

Ashmore SICAV

Société d'Investissement à Capital Variable Luxembourg
R.C.S. Luxembourg B 90279

UNAUDITED SEMI-ANNUAL REPORT

For the period ended 30 June 2024

General Information

The information represented in this report relates to the period from 1 January 2024 to 30 June 2024. It should not be taken as an indication of the future development of Ashmore SICAV (the “Company”).

The Board of Directors may establish different portfolios of assets in one or more Sub-Funds of the Company at any time to meet, in its opinion, the needs of different Shareholders. During the period under review, the Company comprised 28 Sub-Funds, namely:

- Ashmore SICAV Emerging Markets Debt Fund
- Ashmore SICAV Emerging Markets Sovereign Debt Fund
- Ashmore SICAV Emerging Markets Sovereign Investment Grade Debt Fund
- Ashmore SICAV Emerging Markets Local Currency Bond Fund
- Ashmore SICAV Emerging Markets Local Currency Bond Fund 2
- Ashmore SICAV Emerging Markets Investment Grade Local Currency Fund
- Ashmore SICAV Emerging Markets Absolute Return Debt Fund
- Ashmore SICAV Emerging Markets Total Return Fund
- Ashmore SICAV Emerging Markets Total Return Debt Fund 2
- Ashmore SICAV Emerging Markets Investment Grade Total Return Fund
- Ashmore SICAV Emerging Markets Multi-Asset Fund
- Ashmore SICAV Emerging Markets Corporate Debt Fund
- Ashmore SICAV Emerging Markets Corporate Debt ESG Fund
- Ashmore SICAV Emerging Markets Investment Grade Corporate Debt Fund
- Ashmore SICAV Emerging Markets High Yield Corporate Debt Fund (terminated operations on 29 April 2024)
- Ashmore SICAV Emerging Markets Asian High Yield Debt Fund
- Ashmore SICAV Emerging Markets Short Duration Fund
- Ashmore SICAV Emerging Markets Investment Grade Short Duration Fund
- Ashmore SICAV Emerging Markets Global Small-Cap Equity Fund
- Ashmore SICAV Emerging Markets Frontier Equity Fund
- Ashmore SICAV Emerging Markets Active Equity Fund
- Ashmore SICAV Middle East Equity Fund
- Ashmore SICAV Emerging Markets Equity Fund
- Ashmore SICAV Emerging Markets Indonesian Equity Fund
- Ashmore SICAV Emerging Markets Equity ESG Fund
- Ashmore SICAV India Equity Fund
- Ashmore SICAV Global Liquidity US\$ Money Market Fund
- Ashmore SICAV Emerging Markets Shariah Active Equity Fund

This report does not constitute an offer or an invitation to purchase Shares of the Sub-Funds referred to herein. Subscriptions are only valid if made on the basis of the current Prospectus and Key Investor Information Document (KIID) supplemented by the latest audited annual report. Should the reference date of the audited annual report date back more than eight months, the subscriber must also be supplied with a semi-annual report.

The figures stated in this report are historical and not necessarily indicative of future performance.

1: Introduction

Investment Manager's Report

Market Review

Upside surprises to global growth and inflation boosted equity markets returns during Q1, while government bond yields widened significantly and retraced half of the previous quarter's strong rally. The equity markets rally was broad based, taking many market indices to all-time highs as growth concerns alleviated, earnings came in above expectations, and more sectors participated beyond large cap tech stocks. Although year-on-year (yoy) inflation numbers fell at a slower pace than anticipated, the market never seemed to truly question the disinflation narrative and policymakers stuck to their dovish bias, keeping financial conditions relatively easy.

Global bond yields finished the quarter a few basis points (bps) higher during Q2, as a spike in bond yields in April was promptly retraced lower in May and June when inflation numbers finally started coming below expectations. Global equity markets also rebounded from late April onwards to close the quarter at all-time highs, buoyed by stronger earnings expectations. Global core bond yields continued widening during the quarter: the 10-year treasury yields widened by over 50 bps to 4.72% in April, before falling back down to 4.39% by end-June, a 20 bps rise over the quarter. The move was driven by real yields, but interestingly the yield curve steepened slightly as the front-end was pinned down by expectations of policy rate cuts. The S&P Global Manufacturing Purchasing Manager Index (PMI) came in at 50.9 in June, marginally higher than the 50.3 reading as of March, and still indicating expansion. Against this robust backdrop, inflation pressure has been subsiding and G-10 monetary policymakers have turned more dovish: the European Central Bank (ECB), the Bank of Canada (BOC), and the Riksbank (Sweden) all cut rates for the first time in this cycle. The Bank of England (BOE) and the US Federal Reserve remain the main developed markets central banks that have yet to act.

Overview by investment theme

External Debt

The External Debt theme represents US dollar denominated Emerging Market (EM) sovereign and quasi-sovereign bonds. Ashmore SICAV Funds which are managed under this theme are primarily benchmarked against the JP Morgan EMBI Global Diversified Index, which returned +2.34% in the six months to 30 June 2024.

Egypt, Argentina and Ecuador were the top contributors to performance for the JP Morgan EMBI GD Index. Egypt's Planning Minister Hala al-Saeed released an updated economic forecast, indicating that the Egyptian economy would grow by 4.2% in the 2024/2025 fiscal year. International reserves have increased to US\$ 46.125bn as of May 2024, up more than US\$ 5bn from the US\$ 41.057bn level in April 2024. Egypt received US\$ 14bn from the UAE in May, the balance due from the previously announced Ras El Hekma real estate transaction. The sum augments the US\$ 6bn UAE deposit at the Central Bank of Egypt which will be converted into local currency. Egypt's 2024/2025 budget anticipates foreign direct investment to reach US\$ 30bn, following the UAE investment and the potential for a similar investment from Saudi Arabia. The International Monetary Fund (IMF) and the Egyptian government reached a staff-level agreement on the various policies and reforms required for completion of the third review of the EFF which, if approved by the IMF Executive Board, would provide access to US\$ 820m in funding. In Argentina, President Javier Milei is delivering bitter (but in our view, necessary) medicine to rebalance the Argentine economy. A deep fiscal adjustment and planned exchange rate devaluation led to softer economic activity towards the end of 2023 and into 2024. The IMF reached a staff-level agreement on the eighth review of the country's Extended Fund Facility, which will provide access to nearly US\$ 800m in funding. The IMF highlighted the "better-than-expected performance" of the Argentine economy with declining inflation and a significant fiscal adjustment in Q1. Two further disbursements from the IMF are due in 2024, assuming satisfactory adherence to agreed targets.

Colombia, Philippines and Venezuela were among the top detractors from performance for the JP Morgan EMBI GD Index. In the Philippines, Vice President Sara Duterte resigned her posts in President Marcos' Cabinet as their political alliance crumbled over policy disagreements and as the rivalry between two powerful family dynasties boiled over. Duterte will remain as the country's Vice President. Moody's Analytics reported that it expects 5% growth in 2024, which will lag the ASEAN region as an "outperforming but underachieving" country. The central bank lowered its headline inflation forecast to 3.3% from its earlier 3.5% forecast. Bond prices continued to fluctuate in Venezuela on profit-taking after notable price gains over recent months. Uncertainty ahead of presidential elections scheduled for later in July and speculation as to whether President Maduro will remain in power or whether a political transition could potentially occur, will likely drive prices through the July 28th election and until the outcome is decided.

Investment Manager's Report *continued*

Overview by investment theme *continued*

Local Currencies and Local Currency Bonds

Ashmore SICAV Funds which are managed under this theme are primarily benchmarked against the JP Morgan GBI-EM Global Diversified Index, that returned -3.71% in the six months to 30 June 2024.

The EM local currency bond index (JP Morgan GBI-EM Global Diversified Index) fell -2.1% in US dollar terms in Q1. The average index yield rose by 8 bps to 6.3% during the quarter, and contribution from FX was negative (-2.8%). The EM local currency bond index (JP Morgan GBI-EM GD) fell -1.6% in US dollar terms in Q2. The average index yield rose by 33 bps to 6.6% during the quarter, and contribution from FX was negative (-2.5%), driven notably by Latin America.

Over the period, the best performers were South African Rand, Chinese Yuan and Serbian Dinar, Uruguayan Peso. The South African Rand was the best performing currency in the index over the quarter, gaining 4.7%. Price action was driven by the election and the outcome forced the African National Congress party (ANC) into coalition talks and after initial market nervousness a government of national unity (GNU) was formed, announced by President Cyril Ramaphosa announced the National Unity cabinet - a positive catalyst for South African assets after initial delays. Finance Minister Enoch Godongwana was re-appointed, signalling fiscal policy continuity. It is likely that Godongwana will press for an increase in the primary surplus, from 0.5% in FY23/24. The cabinet likely means potential upside reform scenarios could be materialising, in our view.

Top laggards included Brazilian Real, Mexican Peso and Thai Baht. In Mexico, the central bank left policy rates unchanged as inflation stabilised in May at 4.69% versus expectations of 4.82% yoy. The big driver of returns, however, was the elections as Claudia Sheinbaum's landslide victory caused a sharp increase in volatility on the Peso. Outgoing president Andrés Manuel López Obrador (AMLO) had proposed 20 changes to the constitution during this mandate but did not have the political capital to pass them. Constitutional changes require two-thirds of both houses of Congress and a simple majority across all states to be implemented. Most of AMLO's constitutional reforms are seen as weakening the institutions in Mexico, which explains why the MXN sold off sharply after AMLO mentioned his intention to approve changes in the judiciary system last week, which would effectively reduce checks and balances on state power, transferring more authority to the executive branch.

Overall, it is likely Sheinbaum will want to have her own independent pro-growth mandate, significantly mitigating the constitutional reform risks. In Thailand, the central bank left the policy rate unchanged at 2.5% as expected. Consumer Price Index (CPI) yoy inflation trended higher at 1.54% (versus 1.2% expected). Exports yoy jumped to 7.2% versus 2.0% expected, moving the May customs trade balance sharply higher to US\$ 656m versus US\$ -965m expected.

Corporate Debt

Ashmore SICAV Funds which are managed under this theme are primarily benchmarked against the JP Morgan CEMBI Broad Diversified Index. The benchmark returned +3.85% in the six months to 30 June 2024.

Activity in the primary market during June remained at levels similar to May, with US\$ 32bn of new issuance, a decrease of US\$ 1bn compared to previous month. Net supply for the month turned negative again at US\$ -18bn taking year to date (YTD) number down to US\$ -30bn. The negative net supply YTD is driven by Asia with US\$ -52bn, with Latin America and the Middle East both showing small positive net issuance. We still expect net supply for the full year to finish in the negative territory. This assessment is supported by activity levels in Asia remaining muted, given the continued weakness in the bonds from the China property sector, one of the largest sources of new supply historically. The impact of sanctions and the war with Russia and Ukraine, which were frequent issuers in Europe in previous years, will likely further reduce supply. We believe this provides a strong technical backdrop for performance in 2024.

Emerging Markets remain favourably positioned to weather the headwinds of global inflation and interest rate increases given the proactive approach by local Central Banks to hike interest rates early, allowing them to also be ahead of Developed Markets (DM) central banks in the process of lowering rates. Further, a combination of higher average income given higher spreads and lower average duration which EM credit offers when compared to DM is likely to support a return of positive investor flows into this asset class in 2024.

1: Introduction

Investment Manager's Report *continued*

Overview by investment theme *continued*

Corporate Debt *continued*

Among the top contributors over the period were Chile, India and Hong Kong. Credits from Chile outperformed recently owing to spread-duration advantage. Credits from Latin America outperformed all other regions except Africa in Q2. Average credit spreads in Chile tightened by 64 bps during Q2, outperforming the index as well as the rest of Latin American region. Security selection has been the main driver of performance, with exposure to the Metals and Mining and Telecom sectors generating positive alpha. Credits from India performed in line with the index during Q2, with average credit spreads tightening 10 bps. Security selection has been the main driver of performance, with exposure to the Diversified and Infrastructure sectors generating positive alpha. Credits from Hong Kong generally underperformed during Q2 owing to tighter spreads, with average credit spreads tightening only 9 bps during the quarter. Security selection has been the main driver to performance, with exposure to the Financials and Infrastructure sectors generating positive alpha.

There were no detractors over the period.

Equities

The MSCI EM Index returned +7.49% for H1 2024.

Developed Markets (DM) have begun easing monetary policy with the expectation that the Bank of England and the Federal Reserve will start their rate cutting cycle in the coming months. Despite this policy pivot, market optimism for the rapid easing of monetary conditions that was priced in at the beginning of the year has all but dissipated. There remain many near-term headwinds to DM stock market performance including political cycles in France, United Kingdom and the United States.

Against this backdrop, we remain favourable on the outlook for EM. Performance to-date has been driven by earnings growth. This has primarily occurred in technology related industries and has kept valuations at attractive levels. We expect the pace of interest rate cuts in EM will accelerate in the back half of the year and in 2025 which will support this trend. We expect investors will rotate capital towards more attractive earning yields in equity markets compared to cash/debt alternatives.

Adding to our optimism, has been the resilience of EM growth which has been positively revised in the first half of 2024. DM on the other hand has seen decreased growth. The divergent paths have allowed the EM growth premium to expand which has historically been correlated with significant outperformance by the EM Equity asset class.

Taiwan, China and India were the top country contributors over the period and Brazil, Mexico and Thailand were the top country detractors over the period.

Outlook

Year-to-date, investor sentiment towards Emerging Market (EM) external debt has been mixed, with many portfolios underweight in the asset class. Factors contributing to this cautious stance include the historical volatility of EM debt, and more recent challenges include the competition from high interest rates on cash balances, and geopolitical tensions. This has led to ongoing outflows from the asset class in the last few quarters. However, there are grounds for optimism. The trend in EM debt fund flows has now stabilised. According to Morningstar, some funds seeing net inflows and new mandates from institutional investors, indicating a cautiously optimistic recovery in investor sentiment towards the asset class. If global economic conditions continue to recover and EM structural and economic reforms continue, there is a large potential for increased allocations towards the asset class in the second half of 2024.

The credit profile of EM economies has been on an improving trend and is now being recognised by the credit rating agencies: there has been a notable shift in sovereign credit ratings, with upgrades becoming more prevalent across a range of EM countries, indicating a reversal of the decade-long trend of credit deterioration. This positive momentum spans from major economies like Brazil, Nigeria, and Turkey to lower-rated markets such as Egypt and Zambia. In 2024 so far, almost 70% of all sovereign rating actions by major agencies like S&P, Moody's, and Fitch have been positive. This wave of upgrades not only reduces borrowing costs for these countries but also provides a favourable outlook for EM debt going forward.

'Carry' continues to drive the performance of EM local and dollar-denominated debt alike and should continue delivering strong contributions to performance. The higher coupon payments from EM dollar bonds, with an attractive overall yield environment of +8.3% provide a compelling source of income for investors. Notwithstanding the relative tightness in spreads, particularly within Investment Grade (IG), there remains substantial potential for further spread compression in the High Yield (HY) space. Improving economic fundamentals and credit conditions in many EM countries, alongside positive ratings momentum, support the case for spreads narrowing.

Investment Manager's Report *continued*

Overview by investment theme *continued*

Outlook *continued*

Institutional sentiment towards EM local currency debt is cautiously optimistic. EM local currency debt markets saw significant outflows during 2022 and 2023, driven by rising global inflation and geopolitical uncertainties. However, the outlook for 2024 is more optimistic, as we approach from the start of the Fed's rate cutting cycle, which may deprive the US dollar from a key source of support. Ongoing fiscal profligacy and a fractious political climate ahead of the elections also create their own sort of risks in a market that is so widely held. Conversely, lower inflation and lower risk premia have created the conditions for all the largest EM central banks to ease monetary policy. The trend has been stalling while a few policy makers await the Fed to start acting, but we expect financial conditions to ease across all regions, including in Asia once pressure on local currencies start to abate.

Notes to the Combined Financial Statements

1. General

Ashmore SICAV (the “Company”) is incorporated as a société anonyme (public limited company) under the laws of the Grand-Duchy of Luxembourg and qualifies as an open-ended société d’investissement à capital variable (a “SICAV”). It is authorised as an undertaking for collective investment in transferable securities under part I of the law dated 17 December 2010 on undertakings for collective investment (the “Law of 2010”), as amended by the law of 10 May 2016.

The Company was incorporated under the laws of the Grand-Duchy of Luxembourg on 19 December 2002 for an unlimited period of time. It is registered under number B 90279 at the Register of Commerce at the District Court of Luxembourg.

The Memorandum and Articles of Association of the Company were published in the Mémorial, Recueil Spécial des Sociétés et Associations du Grand-Duché de Luxembourg (the “Mémorial”) and filed with the Registry of the Luxembourg District Court where they may be consulted and copies may be obtained upon the payment of Registry fees.

As at 30 June 2024, the Company comprised 27 active Sub-Funds (individually the “Sub-Fund” and collectively the “Sub-Funds”):

- Ashmore SICAV Emerging Markets Debt Fund
- Ashmore SICAV Emerging Markets Sovereign Debt Fund
- Ashmore SICAV Emerging Markets Sovereign Investment Grade Debt Fund
- Ashmore SICAV Emerging Markets Local Currency Bond Fund
- Ashmore SICAV Emerging Markets Local Currency Bond Fund 2
- Ashmore SICAV Emerging Markets Investment Grade Local Currency Fund
- Ashmore SICAV Emerging Markets Absolute Return Debt Fund
- Ashmore SICAV Emerging Markets Total Return Fund
- Ashmore SICAV Emerging Markets Total Return Debt Fund 2
- Ashmore SICAV Emerging Markets Investment Grade Total Return Fund
- Ashmore SICAV Emerging Markets Multi-Asset Fund
- Ashmore SICAV Emerging Markets Corporate Debt Fund
- Ashmore SICAV Emerging Markets Corporate Debt ESG Fund
- Ashmore SICAV Emerging Markets Investment Grade Corporate Debt Fund
- Ashmore SICAV Emerging Markets Asian High Yield Debt Fund
- Ashmore SICAV Emerging Markets Short Duration Fund
- Ashmore SICAV Emerging Markets Investment Grade Short Duration Fund
- Ashmore SICAV Emerging Markets Global Small-Cap Equity Fund
- Ashmore SICAV Emerging Markets Frontier Equity Fund
- Ashmore SICAV Emerging Markets Active Equity Fund
- Ashmore SICAV Middle East Equity Fund
- Ashmore SICAV Emerging Markets Equity Fund
- Ashmore SICAV Emerging Markets Indonesian Equity Fund
- Ashmore SICAV Emerging Markets Equity ESG Fund
- Ashmore SICAV India Equity Fund
- Ashmore SICAV Global Liquidity US\$ Money Market Fund
- Ashmore SICAV Emerging Markets Shariah Active Equity Fund

During the period, 1 Sub-Fund was terminated, the Ashmore SICAV Emerging Markets High Yield Corporate Debt Fund on 29 April 2024.

The Ashmore SICAV Global Liquidity US\$ Money Market Fund qualifies as a short-term Low Volatility NAV Money Market Fund (“LVNAV”) under the Money Market Fund Regulation (the “Regulation”).

** This JPY (unhedged) Class is only available within the Ashmore SICAV Emerging Markets Sovereign Debt Fund, the Ashmore SICAV Emerging Markets Sovereign Investment Grade Debt Fund, the Ashmore SICAV Emerging Markets Investment Grade Local Currency Fund and the Ashmore SICAV Emerging Markets Active Equity Fund.

*** This AUD (unhedged) Class is only available within the Ashmore SICAV Emerging Markets Equity Fund.

****This HKD (unhedged) Class is only available within the Ashmore SICAV Emerging Markets Local Currency Bond Fund and the Ashmore SICAV Emerging Markets Short Duration Fund.

*****This GBP (unhedged) Class is only available within the Ashmore SICAV Emerging Markets Local Currency Bond Fund, the Ashmore SICAV Emerging Markets Frontier Equity Fund, the Ashmore SICAV Emerging Markets Active Equity Fund and the Ashmore SICAV Emerging Markets Equity Fund.

The Company also has the ability to issue Advisory Class Shares. These are only available in US\$ and are restricted to certain distributors used by the Management Company where a fee based advisory and/or discretionary client agreement has been entered into. The distributors then purchase Shares of the Company on behalf of their clients via advisory platforms. Advisory Class Shares are also available to any other investor at the discretion of the Investment Manager, acting as a delegate and under the responsibility of the Management Company. Currently no Advisory Class Shares of the Company are in issue.

As at 30 June 2024, the active Institutional Class Shares of all the Ashmore SICAV Sub-Funds were listed on the Luxembourg Stock Exchange, with the exception of the following Share classes:

- Institutional Class Shares (EUR) Accumulation of the Ashmore SICAV Emerging Markets Debt Fund, the Ashmore SICAV Emerging Markets Sovereign Investment Grade Debt Fund, the Ashmore SICAV Emerging Markets Local Currency Bond Fund and the Ashmore SICAV Emerging Markets Multi-Asset Fund;
- Institutional Class Shares (GBP) Accumulation of the Ashmore SICAV Emerging Markets Sovereign Debt Fund, the Ashmore SICAV Emerging Markets Local Currency Bond Fund, the Ashmore SICAV Emerging Markets Corporate Debt Fund and the Ashmore SICAV Emerging Markets Short Duration Fund;
- Institutional Class Shares (US\$) Accumulation of the Ashmore SICAV Emerging Markets Total Return Debt Fund 2, the Ashmore SICAV Emerging Markets Investment Grade Corporate Debt Fund, the Ashmore SICAV Emerging Markets Asian High Yield Debt Fund, the Ashmore SICAV India Equity Fund and the Ashmore SICAV Emerging Markets Shariah Active Equity Fund;
- Institutional Class Shares (EUR) Income of the Ashmore SICAV Emerging Markets Sovereign Investment Grade Debt Fund;

- Z 3 Class Shares (GBP unhedged) Accumulation of the Ashmore SICAV Emerging Markets Equity Fund.

2. Principal accounting policies

a) Presentation of the combined financial statements

The combined financial statements are prepared in accordance with Luxembourg legal and regulatory requirements relating to undertakings for collective investment.

The combined financial statements of the Fund and each of its Sub-Funds have been prepared on a going concern basis, except for the Sub-Fund Ashmore SICAV Emerging Markets High Yield Corporate Debt Fund which terminated operations during the period.

This report is presented on the basis of the latest NAV calculated during the financial period (i.e. 28 June 2024).

b) Basis of combination

The combined financial statements of the Company and the financial statements of each Sub-Fund are expressed in US\$ (the “reference currency”). The Combined Statement of Net Assets and the Combined Statement of Operations and Changes in Net Assets are the sum of the individual Statements of Net Assets and the sum of the individual Statements of Operations and Changes in Net Assets of each Sub-Fund adjusted to eliminate transactions and balances between Sub-Funds.

The combined financial statements include all the assets, liabilities and operations of the Company. Transactions between Sub-Funds (linked to investments in other Sub-Funds of the Company) are fully eliminated on combination but this has no impact on the results and financial positions of the individual Sub-Funds.

c) NAV adjustment

Swing pricing

The swing pricing mechanism may apply across all Sub-Funds with the exception of the Ashmore SICAV Global Liquidity US\$ Money Market Fund and any Sub-Funds that are fully invested in other Ashmore Funds.

Shares of the Sub-Funds may suffer a reduction in value as a result of subscriptions, redemptions and/or conversions in and out of the Sub-Funds due to the transaction costs incurred in the purchase and sale of the underlying investments and the spread between the buying and selling prices. This is known as “dilution”. In order to counter this and to protect Shareholders’ interests, the Administrator, upon instruction from the Management Company, may apply “swing pricing” as part of its valuation policy. This will mean that in certain circumstances the Administrator, upon instruction from the Management Company, may make adjustments to the calculation of the NAVs per Share, to counter the impact of dealing and other costs on occasions when these are deemed to be significant.

If on any Valuation Day the aggregate transactions in Shares of a Sub-Fund result in a net increase or decrease of Shares which exceeds a threshold of 5% of such Sub-Fund’s NAV (or a threshold as determined by the Board of Directors and as applicable to all transactions) for that Sub-Fund, the Administrator upon instruction from the Management Company, shall apply an alternative NAV calculation method (to include such reasonable factors as they see fit) to the NAV per Share.

The NAV of the Sub-Fund may, therefore, be swung by an amount equal to the actual bid or offer spread. Such adjustments may vary from Sub-Fund to Sub-Fund based on normal dealing and other costs for the particular assets in which a Sub-Fund is invested, and will not normally exceed 2% of the original NAV per Share. However, the Board of Directors may decide to increase this adjustment limit above the 2% in exceptional circumstances to protect Shareholders’ interests.

More information related to the swing pricing policy of the Company is available in the Prospectus.

Notes to the Combined Financial Statements *continued*

2. Principal accounting policies *continued*

c) NAV adjustment *continued*

Swing pricing *continued*

No swing pricing mechanism was applied to the NAVs as at 30 June 2024.

Fair value adjustment

Fair value factors are applied to the valuation of equities in order to offer protection to existing/remaining investors within the Sub-Funds to ensure that the asset pricing within the NAV (price) of the Sub-Fund where a particular market is closed is in line with the expected market valuations of the assets when the NAV is struck.

A quantitative fair valuation model is supplied by Virtu to produce factors. Virtu monitors and back tests the factors for appropriateness. The factors may increase or decrease the valuation of a security and not all securities in the same exchange or market will necessarily be impacted to the same degree or even in the same direction.

Where available, factors are supplied daily by Virtu for equities and are applied by the Administrator to the daily NAV calculations.

As at 30 June 2024, the NAVs of equity securities were adjusted in this manner.

d) Valuation of investments of each Sub-Fund

Where possible, bonds are priced at bid prices, while equities are priced at the official close or last traded prices. If a security is traded on several stock exchanges, the valuation is made on the basis of the price on the main market on which the securities are traded. In the case of securities for which trading on a stock exchange is not significant, but which are bought and sold on a secondary market with regulated trading among security dealers (with the effect that the price is set on a market basis), the valuation may be based on this secondary market. Securities traded on a regulated market are valued in the same way as securities listed on a stock exchange.

Investments in open-ended funds are valued on the basis of the last available NAV of the units or shares of such funds.

Money market instruments held by non-Money Market Funds are valued on an amortised cost basis.

Under the Regulation, the securities of a Money Market Fund shall be valued by using mark-to-market whenever possible.

Where use of mark-to-market is not possible or the market data is not of sufficient quality, securities shall be valued using the amortised cost method provided that the following criteria are met:

- the price of the security calculated in accordance with the mark-to-market method does not deviate from the price of the security calculated in accordance with the amortised cost method by more than 10 basis points;
- the NAV per Share calculated in accordance with the mark-to-market method does not deviate from the NAV per Share calculated in accordance with the amortised cost method by more than 20 basis points; and
- the security has a residual maturity of up to 75 days.

The amortised cost method involves valuing a security at its cost and thereafter assuming a constant amortisation (accretion) to maturity of any discount or premium regardless of the impact of fluctuating interest rates on the market value of the security or other instruments. While this method provides certainty in valuation, it may result in periods during which the value, as determined by the amortised cost method, is higher or lower than the price the Sub-Fund would receive if it sold the securities. For certain short-term transferable debt securities, the yield to a Shareholder may differ from that which could be obtained from a similar Sub-Fund which marks its portfolio of securities to market each day.

As at 30 June 2024, the Ashmore SICAV Global Liquidity US\$ Money Market Fund used the mark-to-market method.

Where investments are neither listed on any stock exchange nor traded on any regulated markets, these investments are valued in good faith based on information provided by any person whom the Board of Directors considers to be suitably qualified (an "Approved Person"). The Approved Persons include the Pricing Methodology & Valuation Committee of the Investment Manager and certain brokers. For more information on the fair value measurement of hard to price assets, see note 19.

5: Notes

Notes to the Combined Financial Statements *continued*

2. Principal accounting policies *continued*

e) Valuation of financial derivative instruments

The value of financial derivative instruments not traded on a stock exchange or other regulated market is consistently determined for each different variety of contracts as follows:

Forward currency contracts are valued at market value based on the forward rate prevailing on the valuation date of the assets. The forward rate applied is based on WM/Reuters (4 p.m. GMT).

Interest rate swaps, currency swaps, swaptions and OTC options are valued based on daily counterparty prices verified against third-party pricing agents.

Futures contracts are valued using the last available price on the exchange where the contracts are traded.

f) Realised gain/loss on sales of investments in securities of each Sub-Fund

Realised gains or losses on the sale of investments in securities are determined on the basis of the weighted average acquisition cost with tax lots. Investments in securities are accounted for on a trade date basis, net of any applicable tax.

g) Foreign currency translation

Assets and liabilities expressed in currencies other than the reference currency of each Sub-Fund have been converted into the reference currency at the foreign exchange rate prevailing as at 30 June 2024.

Income and expenses in currencies other than the reference currency of each Sub-Fund are converted into the reference currency at the foreign exchange rate ruling at the transaction date. Realised and unrealised gains or losses on foreign currency translation are accounted for in the Combined Statement of Operations and Changes in Net Assets.

The acquisition cost of investments expressed in currencies other than the reference currency of each Sub-Fund is converted into the reference currency at the foreign exchange rate prevailing at the date of acquisition.

The principal exchange rates applied as at 30 June 2024 were as follows:

US\$	US dollar	=	3.673000	AED	United Arab Emirates dirham

h) Income and expenses

Allocation of expenses

Expenses can be allocated in one of three ways: (i) they can be allocated to a specific Sub-Fund if they are directly incurred by the Sub-Fund, (ii) they can be split evenly or by NAV when the expenses are shared across all the Sub-Funds in the SICAV or a sub-population thereof, or (iii) they can be split in proportion to the holdings that a certain population of Sub-Funds hold in an underlying investment.

Income

Interest income is accrued on a daily basis net of withholding tax. Dividend income from quoted equity investments and collective investment schemes is shown net of withholding tax deducted at source and is recorded as income on the ex-dividend date.

All Sub-Funds account for bond and bank interest, with the exception of non-performing assets, on an effective interest rate basis.

Interest income on non-performing assets, pay-in-kind instruments ("PIK") and PIK paired with profit participating notes ("PIK/PPN") is recognised on receipt unless the Investment Manager deems it appropriate to recognise income on an accruals basis.

i) Repurchase agreements

Securities sold under agreements to repurchase are treated as collateralised borrowing transactions. The securities continue to be carried on the Combined Statement of Net Assets at market value and the related loans are carried at the amount at which the securities were sold under the agreement. The interest expense and interest income recognised under these agreements and the interest income on underlying securities are included in the Combined Statement of Net Assets and in the Combined Statement of Operations and Changes in Net Assets.

The interest expense or interest income is accrued on a daily basis.

j) Equalisation

Income equalisation arrangements may be applied to some or all the Sub-Funds. These measures are designed to ensure that the income per Share which is distributed or deemed distributed in respect of a distribution period is not impacted by changes in the number of Shares in issue during that period. As a consequence, the first distribution received by a Shareholder in an impacted Sub-Fund following the purchase of Shares in that Sub-Fund will represent partly participation in income received by the Sub-Fund and partly a return of capital.

3. Management fees

The Investment Manager is entitled to receive from each Sub-Fund a management fee at an annual rate expressed as a percentage of the NAV of each Share class of each Sub-Fund and as determined in the Sub-Fund's Appendix of the Prospectus.

The management fees are calculated on the basis of the average NAV of the relevant class payable monthly in arrears. The annual rates applied were as follows:

	Institutional Class Shares %	Institutional II Class Shares %	Retail Class Shares %	Retail II Class Shares %	Z Class Shares %	Z 2 Class Shares %	Z 3 Class Shares %
Ashmore SICAV Emerging Markets Debt Fund	0.95 *	0.40	1.50 *	N/A	0.95 *	0.75 *	N/A

* Active as at 30 June 2024.

The Investment Manager is not entitled to management fees from the Institutional III Share classes.

On 9 November 2021, the Investment Manager agreed to a fee waiver on the Ashmore SICAV 2 Global Liquidity US\$ Money Market Fund (pre-merger), whereby the management fee on the Institutional Class Shares would be reduced to 0.00% (nil) per annum. The fee waiver is valid for a rolling period of three consecutive calendar months from the date of the agreement unless terminated by the Investment Manager (at any time upon seven days notice by the Investment Manager, with the acknowledgement of the Company).

Effective 15 December 2022, the management fee on the Institutional Class Shares of the Ashmore SICAV Global Liquidity US\$ Money Market Fund was amended to 0.2% per annum.

4. Depositary fees

Under the terms of the Depositary Agreement with Northern Trust Global Services SE, the fees due to the Depositary are calculated as 0.01% per annum of the Company's net assets for the execution of its duties as Custodian and Paying Agent, and 0.01% per annum of the Company's net assets for the execution of its duties as Depositary.

Depending on the requirements of the jurisdictions in which the investments of the Sub-Funds are issued, the Depositary may use the services of one or more sub-custodians. The Depositary is entitled to reimbursement by the Company of reasonable out-of-pocket expenses incurred by it in performing its duties and the fees and charges of any correspondents and agents including any sub-custodians.

5. Fund accounting fees

The fund accounting fees due to the Administrator are calculated as 0.02% per annum of each Sub-Fund's net assets.

6. Management Company fees

The Management Company fees are calculated as 0.015% per annum of each Sub-Fund's net assets.

Notes to the Combined Financial Statements *continued*

7. Other operating expenses

Other operating expenses represent amounts paid by the Company relating to the operations of the Sub-Funds. They include legal fees, audit fees, the cost of printing and distributing the prospectuses, Directors' fees, Directors' insurance fees, financial servicing fees, regulatory fees and other professional fees. They also include fees in connection with obtaining or maintaining any registration or authorisation of the Company with any governmental agency or stock exchange as well as the cost of publication of information, bank charges and other miscellaneous expenses.

8. Taxation

Under Luxembourg law, the Company is not subject to any taxes on income or capital gains. However, the Company is subject to the "Taxe d'abonnement" or "Subscription tax" of 0.01% per annum for all net assets attributable to Institutional, Institutional II and Institutional III, as well as any net assets in Sub-Funds whose exclusive object is collective investment in money market instruments and the placing of deposits with credit institutions; and 0.05% per annum for all net assets attributable to Retail, Retail II, Z, Z 2 and Z 3 Class Shares. This tax is payable quarterly and is calculated on the basis of the NAV of each Share class at the end of the relevant calendar quarter.

No subscription tax is paid on the assets held by the Sub-Funds in other undertakings for collective investment already subject to that tax in Luxembourg.

Exemption from subscription tax is available for Share classes which:

- are reserved for one or more Institutional Investors; and
- whose exclusive object is the collective investment in money market instruments and the placing of deposits with credit institutions; and
- where the weighted residual maturity of the portfolio does not exceed 90 days; and
- which have the highest possible rating of a recognised rating agency.

The Sub-Fund Ashmore SICAV Global Liquidity US\$ Money Market Fund is not subject to the UK reporting fund regime.

UK reporting status is granted retrospectively by the UK taxation authorities. The UK taxation authorities approved the reporting status applications for the Share classes where the Company made applications for the year ended 31 December 2023.

The current list of Share classes with UK reporting status and the effective dates when they entered into the UK reporting fund regime can be found on the hmrc.gov.uk website.

The Board of Directors intends to apply to the UK taxation authorities for UK reporting status for the year ended 31 December 2024 and for subsequent years if the Board of Directors deems it appropriate to do so.

9. Transaction costs

Transaction costs represent costs incurred by the Company in relation to the purchase and sale of transferable securities and costs incurred by the Company in relation to trade communication services. For further information on transaction costs, please refer to Supplementary Information – Direct transaction costs.

18. Risk management

In pursuing their investment objectives, the Sub-Funds enter into investment transactions in financial instruments which give exposure to a variety of financial and operational risks, including market risk (comprising price risk, interest rate risk and currency risk), liquidity risk and credit risk. Further information on these risks and how they are mitigated is set out below.

5: Notes

Notes to the Combined Financial Statements *continued*

18. Risk management *continued*

All investment strategies are approved by the Investment Manager's Investment Committee and are minuted. Decisions are restricted by the policies contained in the Investment Committee Terms of Reference, the investment restrictions pertaining to UCITS funds, the investment restrictions pertaining to SICAVs and the investment restrictions specific to each Sub-Fund. The details of these investment restrictions are set out in the Company's Prospectus. With regard to portfolio construction, risk is monitored as an integral part of the investment decision making process. The Investment Committee also reviews risk exposure on a weekly basis and the portfolio of each Sub-Fund is monitored with regards to:

- Interest rate sensitivity, including duration
- Currency sensitivity
- Liquidity
- Volatility
- Credit

Analysis includes:

- Global: Analysis of macro issues including global interest rates, liquidity and major events to determine portfolio duration, interest rate sensitivity and cash levels.
- Fundamental: Analysis of country macro-economic and financial fundamentals.
- Political: Analysis of country and international politics including policy dynamics as large changes result from political events and the understanding of incentive structures.
- Asset/Credit: Identification of fundamental value across countries globally and their respective assets.
- Technical/Market: Analysis of asset and market technicals, timing and dynamics.
- Portfolio Construction: Selection of assets using the Ashmore Portfolio Framework and adjustment of the portfolio to achieve:
 - Diversification and correlation objectives including those in relation to benchmarks;
 - Desired duration, principally through altering relative asset category proportions;
 - Desired interest rate sensitivity (through split between fixed and floating instruments);
 - Desired cash level;
 - Portfolio liquidity;
 - Conformity with the limits agreed for currency risk and portfolio volatility and the pre-specified investment restrictions.

The Sub-Funds are exposed to certain risk factors peculiar to investing in Emerging Markets. These require the consideration of matters not usually associated with investing in the securities of issuers in the developed capital markets of North America, Japan or Western Europe. The economic and political conditions in Emerging Markets differ from those in developed markets, and offer less social, political and economic stability. The value of investments in Emerging Markets may be affected by changes in exchange regulations, tax laws (including withholding taxes) or monetary policies. The absence, in many cases until relatively recently, of any move towards capital markets structures or to a free market economy means investing in Emerging Markets may be considered more risky than investing in developed markets.

Notes to the Combined Financial Statements *continued*

18. Risk management *continued*

Market risk

i) Price risk

The main risk arising from the financial instruments held by each Sub-Fund is price risk. All trading securities, investments and derivatives are recognised at fair value, and all changes in market conditions directly affect the results of operations of the Sub-Funds. Price risk primarily arises from uncertainty about the future prices of financial instruments held. The Investment Manager, acting in accordance with the Terms of Reference and each Sub-Fund's investment restrictions, regularly assesses the appropriate allocation of assets in order to minimise overall risks while continuing to follow the investment objectives. The investment restrictions are intended to ensure that each Sub-Fund's investments are appropriately diversified. Details of the investment portfolios as at the period-end date are disclosed in the Schedules of Investments.

ii) Interest rate risk

For Sub-Funds where a substantial portion of financial assets and liabilities are interest bearing, a key risk is fluctuations in the prevailing levels of market interest rates. This risk is managed through duration management and issue selection (the mix between fixed and floating instruments). Some Sub-Funds may also from time to time enter into transactions in derivative instruments and take short positions with a view to hedging the portfolio's interest rate exposure.

iii) Currency risk

The principal exposures to currency risk for the Sub-Funds arise from investments denominated in currencies other than US\$ and from derivative investments. The value of such investments may be affected favourably or unfavourably by fluctuations in exchange rates, notwithstanding any efforts made to hedge such fluctuations. The Sub-Funds may deal in derivative instruments and other synthetic products where investing in such vehicles would be more efficient, is required for legal, tax or regulatory reasons or would otherwise be to the advantage of the Shareholders. If, in the view of the Investment Manager, it is more efficient or cost effective, the Investment Manager may take exposure to the underlying local currency Emerging Market debt or other investments through synthetic products offered by third parties. The Investment Manager may sell investments or currencies short, including through the use of derivative instruments, in order to manage the Sub-Funds' currency risk through hedging. Details of the forward currency contracts held by the Sub-Funds at the period-end date are disclosed in note 11.

Liquidity risk

Liquidity risk is the risk that a Sub-Fund may not be able to generate sufficient cash resources to settle its obligations in full as they fall due or can only do so on terms that are materially disadvantageous.

The main liquidity risk for the Sub-Funds is the potential redemption of any Shares that Shareholders wish to sell. The Company's Prospectus provides for daily subscriptions and redemptions and it is therefore exposed to the liquidity risk of meeting Shareholder redemptions on a daily basis. The Sub-Funds mitigate this risk by holding a portion of their assets in securities that can be liquidated quickly at an amount close to fair value in order to meet liquidity requirements. The Sub-Funds also operate a Swing Pricing Policy as outlined in note 2c.

Some of the investments which the Sub-Funds may make are traded only on over-the-counter ("OTC") markets and there may not be an organised public market for such securities. The effect of this is to increase the difficulty of valuing the investments and until a market develops, certain investments may generally be illiquid. There may be no established secondary market for certain of the investments made by the Sub-Funds. Reduced secondary market liquidity may adversely affect the market price of the investments and the Sub-Funds' ability to dispose of particular investments to meet liquidity requirements or in response to specific events such as deterioration in the creditworthiness of any particular issuer. Due to the lack of adequate secondary market liquidity for certain securities, the Administrator may find it more difficult to obtain accurate security valuations for the purposes of valuing the Sub-Funds and calculating the NAVs. Valuations may only be available from a limited number of sources and may not represent firm bids for actual sales. In addition, the current or future regulatory regime may adversely affect liquidity.

Credit risk

The Sub-Funds are exposed to credit risk, which is the risk that a counterparty is unable to pay amounts in full when they fall due. The main concentration of credit risk for most Sub-Funds arises from investments in debt securities. The Sub-Funds are also exposed to counterparty credit risk if they invest in derivative products, and on their cash at bank and other debtor balances.

The Sub-Funds' policy to manage credit risk is to invest in debt securities that have been rated by established well-known rating agencies. The Investment Manager monitors the credit ratings of the Sub-Funds' counterparties, maintains an approved counterparty list and periodically reviews all counterparty limits. The breakdown of investments by credit rating for the Sub-Funds is disclosed in Other Information on Investments.

5: Notes

Notes to the Combined Financial Statements *continued*

18. Risk management *continued*

Credit risk continued

The Sub-Funds' financial instruments may include purchases of securities and other obligations of companies that are experiencing significant financial or business distress, including companies involved in bankruptcy or other reorganisation and liquidation proceedings. Although such purchases may result in significant returns, they involve a substantial degree of risk. The level of analytical sophistication, both financial and legal, necessary for successful investment in companies or sovereign issuers experiencing significant business and financial distress is unusually high. There is no assurance that the Investment Manager will correctly evaluate the nature and magnitude of the various factors that could affect the prospects for a successful reorganisation or similar action. The completion of debt and/or equity exchange offers, restructurings, reorganisations, mergers, takeover offers and other transactions can be prevented or delayed, or the terms changed, by a variety of factors. If a proposed transaction appears likely not to be completed or in fact is not completed or is delayed, the market price of the investments purchased by a Sub-Fund may decline sharply and result in losses which could have a material adverse effect on the performance of the Sub-Fund and returns to Shareholders.

The administrative costs in connection with a bankruptcy or restructuring proceeding are frequently high and will be paid out of the debtor's assets prior to any return to creditors (other than out of assets or proceeds thereof, which may be subject to valid and enforceable liens and other security interests) and equity holders. In addition, certain claims that have priority by law over the claims of other creditors (for example, claims for taxes) may reduce any entitlement of the Sub-Funds. In any reorganisation or liquidation proceeding relating to a company or sovereign issuance in which a Sub-Fund invests, the Sub-Fund may lose its entire investment or may be required to accept cash or securities with a value less than its original investment. Under such circumstances, the returns generated from such investments may not compensate investors adequately for the risks assumed, which could have a material adverse effect on the performance of the Sub-Fund and returns to Shareholders.

It is frequently difficult to obtain accurate information as to the condition of distressed entities. Such investments may be adversely affected by laws relating to, among other things, fraudulent transfers and other voidable transfers or payments, lender liability and the bankruptcy court's power to disallow, reduce, subordinate or disenfranchise particular claims. The market prices of such securities are subject to abrupt and erratic market movements and above-average price volatility, and the spread between the bid and offer prices of such securities may be greater than those prevailing in other securities markets.

Substantially all of the assets of the Sub-Funds are held with the Custodian which is an indirect wholly-owned subsidiary of the Northern Trust Corporation. Bankruptcy or insolvency of the Custodian may cause the Sub-Funds' rights with respect to cash and securities held by the Custodian to be delayed or limited. This risk is managed by monitoring the credit quality and financial positions of the Custodian that the Sub-Funds use. The credit rating as at 30 June 2024, of the Northern Trust Corporation was A+. Depending on the requirements of the jurisdictions in which the investments of the Sub-Funds are issued, the Custodian may use the services of one or more sub-custodians.

Global exposure

The Management Company uses a risk management process which enables it to assess the exposure of each of the Sub-Funds to market, liquidity, counterparty and operational risks, which are material for the Sub-Fund. As part of the risk management process, the Management Company calculates the global exposure of each Sub-Fund by using either the commitment approach or the Value-at-Risk (VaR) methodology. The methodology used depends on an assessment of the risk profile of the relevant Sub-Fund resulting from its policy (including but not limited to its potential use of financial derivative instruments and features thereof) in accordance with relevant European and Luxembourg laws and regulations. In the interest of the Shareholders, the Company has determined that the Management Company will, as a default, use the commitment approach to monitor and measure the global exposure of each Sub-Fund unless otherwise specified for a particular Sub-Fund. This approach measures the global exposure related to positions in financial derivative instruments and other efficient portfolio management techniques which, unless otherwise specified for a particular Sub-Fund, may not exceed the total net value of the portfolio of the relevant Sub-Fund. The global risk on derivatives has been determined according to the commitment approach for all Sub-Funds during the reporting period from 1 January 2024 until 30 June 2024.

19. Fair value measurement

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (i.e. the exit price) in an orderly transaction between market participants at the measurement date.

Notes to the Combined Financial Statements *continued*

19. Fair value measurement *continued*

For certain of the Company's financial instruments, including cash at bank, repurchase agreements, amounts payable on the purchase of investments/receivable on the sale of investments, amounts receivable on subscriptions/payable on redemptions, accrued income, prepaid/accrued expenses and other receivables, their carrying amounts approximate fair value due to the immediate or short-term nature of these financial instruments. The Company's investments and financial derivative instruments are carried at market value which approximates fair value.

The Company classifies financial instruments within a fair value hierarchy that prioritises the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurement) and the lowest priority to unobservable inputs (Level 3 measurement). The three levels of the fair value hierarchy are as follows:

Level 1 inputs are unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.

Level 2 inputs are observable inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly, including:

- quoted prices for similar assets or liabilities in active markets;
- quoted prices for identical or similar assets or liabilities in markets that are not active;
- inputs other than quoted prices that are observable for the asset or liability;
- inputs that are derived principally from or corroborated by an observable market.

Level 3 inputs are unobservable inputs for the asset or liability.

Inputs are used in applying the various valuation techniques and broadly refer to the assumptions that market participants use to make valuation decisions, including assumptions about risk. Inputs may include price information, volatility statistics, specific and broad credit data, liquidity statistics, and other factors. A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. However, the determination of what constitutes "observable" requires significant judgement. The Company considers observable data to be that market data which is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

The categorisation of a financial instrument within the hierarchy is based upon the pricing transparency of the instrument and does not necessarily correspond to the Company's perceived risk of that instrument.

Investments: Investments whose values are based on quoted market prices in active markets, and are therefore classified within Level 1, include active listed equities, certain US government and sovereign obligations, and certain money market securities. The Company does not adjust the quoted price for such instruments, even in situations where it holds a large position and a sale could reasonably impact the quoted price.

Investments that trade in markets that are not considered to be active, but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within Level 2. These may include government and sovereign obligations, government agency securities, corporate bonds, and municipal and provincial obligations.

Investments classified within Level 3 have significant unobservable inputs, as they trade infrequently or not at all. Level 3 instruments may include private equity and real estate investments, certain loan participations, less liquid corporate debt securities (including distressed debt instruments), collateralised debt obligations and collective investment schemes. Also included in this category are government and sovereign obligations, government agency securities and corporate bonds for which independent broker prices are used and information relating to the inputs of the price models is not observable.

Fair value factors are applied to the valuation of equities in order to offer protection to existing/remaining investors within the Sub-Funds to ensure that the asset pricing within the NAV (price) of the Sub-Fund where a particular market is closed is in line with the expected market valuations of the assets when the NAV is struck.

5: Notes

Notes to the Combined Financial Statements *continued*

19. Fair value measurement *continued*

A quantitative fair valuation model is supplied by Virtu to produce factors. Virtu monitors and back tests the factors for appropriateness. The factors may increase or decrease the valuation of a security and not all securities in the same exchange or market will necessarily be impacted to the same degree or even in the same direction.

Where available, factors are supplied daily by Virtu for equities and are applied by the Administrator to the daily NAV calculations.

As at 30 June 2024, the NAVs of equity securities were adjusted in this manner.

When observable prices are not available; e.g. if an asset does not trade regularly, the Administrator may rely on information provided by any person, firm or entity including any professional person whom the Directors consider to be suitably qualified to provide information in respect of the valuation of investments and who is approved by the Custodian (an "Approved Person"). Approved Persons may include certain brokers and the Pricing Methodology and Valuation Committee ("PMVC") of the Investment Manager.

The PMVC may, upon request, provide assistance to the Administrator in determining a methodology for valuing assets where the Administrator cannot determine a price or methodology from another source. It is the Administrator's responsibility to determine whether to use any such assistance provided by the PMVC. These assets, which are classified within Level 3, may include all asset types but are frequently 'Special Situations' type investments, typically incorporating distressed, illiquid or private investments.

For these hard-to-value investments, the methodology and models used to determine fair value are created in accordance with the International Private Equity and Venture Capital Valuation ("IPEV") guidelines. Smaller investments may be valued directly by the PMVC but material investments are valued by experienced personnel at an independent third-party valuation specialist. Such valuations are subject to review, amendment if necessary, then approval by the PMVC. The valuations are ultimately approved by the Directors and subsequently reviewed by auditors as they make up part of the NAV in the combined financial statements.

A range of valuation techniques are used with judgement applied as well as quantitative techniques such as the market approach, the income approach or the cost approach depending on the availability of reliable information. The market approach generally consists of using; comparable transactions, earnings before interest, tax, depreciation and amortisation ("EBITDA") multiples; or enterprise value ("EV") multiples (based on comparable public company information). The use of the income approach generally consists of the net present value of estimated future cash flows, adjusted as deemed appropriate for liquidity, credit, market and/or other risk factors.

Inputs used in estimating the value of investments may include the original transaction price, recent transactions in the same or similar instruments, completed or pending third-party transactions in the underlying investment or comparable issuers, subsequent rounds of financing, recapitalisations and other transactions across the capital structure, offerings in the equity or debt capital markets and bids received from potential buyers.

For the determination of the NAV, Level 3 investments may be adjusted to reflect illiquidity and/or non-transferability. However, any such adjustments are typically reversed in the combined financial statements where it is required by the accounting standards.

The Company believes that its estimates of fair value are appropriate, however estimates and assumptions concerning the future, by definition, seldom equal the actual results and the estimated value may not be realised in a current sale or immediate settlement of the asset or liability. The use of different methodologies, assumptions or inputs would lead to different measurements of fair value and given the number of different factors affecting the estimate, specific sensitivity analysis cannot be reliably quantified.

Financial Derivative Instruments: Financial derivative instruments can be exchange-traded or privately negotiated OTC. Exchange-traded derivatives, such as futures contracts and exchange-traded options contracts, are typically classified within Level 1 or Level 2 of the fair value hierarchy depending on whether or not they are deemed to be actively traded.

Notes to the Combined Financial Statements *continued*

19. Fair value measurement *continued*

OTC derivatives, including forwards, credit default swaps, interest rate swaps and currency swaps, are valued using observable inputs, such as quotations received from the counterparty, dealers or brokers, whenever these are available and considered reliable. In instances where models are used, the value of an OTC derivative depends upon the contractual terms of, and specific risks inherent in, the instrument as well as the availability and reliability of observable inputs. Such inputs include market prices for reference securities, yield curves, credit curves, measures of volatility, prepayment rates and correlations of such inputs. Certain OTC derivatives, such as generic forwards, swaps and options contracts, have inputs which can generally be corroborated by market data and are therefore classified within Level 2.

Those OTC derivatives that have less liquidity or for which inputs are unobservable are classified within Level 3. While the valuations of these less liquid OTC derivatives may utilise some Level 1 and/or Level 2 inputs, they also include other unobservable inputs which are considered significant to the fair value determination.

The following tables present the assets and liabilities that are measured at fair value on a recurring basis as at 30 June 2024 in US\$.

Ashmore SICAV Emerging Markets Debt Fund

20. Additional information concerning representation in Germany

Deutsche Bank AG, TSS post-IPO Services, Taunusanlage 12, 60325 Frankfurt am Main, acts as the German representative of the Company and carries out the function of the Company's paying agent in relation to Shares distributed in or from Germany.

21. Additional information concerning representation in Switzerland

The Directors have appointed BNP Paribas Securities Services, Paris, Succursale de Zurich, Selnaustrasse 16, 8002 Zurich, as the Company's representative and paying agent for Switzerland. In accordance with Article 124 CISA, BNP Paribas Securities Services, Paris, Succursale de Zurich, represents the Company vis-à-vis the investors and the Swiss Financial Market Supervisory Authority FINMA.

For Shares distributed in or from Switzerland, the performance place is at the BNP PARIBAS, Paris, Zurich branch address. Investors can obtain the following information free of charge from the representative at the above address: the Prospectus, the Key Information Document ("KIDs") (both of which are also available for potential investors), the most recent audited annual and unaudited semi-annual reports, copies of the Articles of Incorporation and any amendments thereto, in German, and a list of the purchases and sales made on behalf of the Company.

Publications in respect of the foreign collective investment scheme are made in Switzerland on the electronic platform of fundinfo AG (www.fundinfo.com). The issue and the redemption prices or the NAV together with a footnote stating that these figures are "excluding commissions" are published daily on www.fundinfo.com.

22. Commitments

In relation to its investments, the Company may from time to time agree to indemnify and/or pre-fund trustees or other agents, either solely or alongside other creditors on a several basis. Generally, such agreements do not have a termination date. The Directors are not aware of and do not currently expect any claims to be made against the Company under any such indemnity or pre-funding agreements.

23. Sustainable Financial Disclosure Regulation ("SFDR") Disclosure

The information on the environmental and/or social characteristics for the Sub-Funds disclosing under Article 8(1) of SFDR as required by Article 50 (2) of SFDR RTS is disclosed in the Supplementary Information under section Sustainable Finance Disclosure Regulation (SFDR) in the Ashmore SICAV Annual Report for the year ended 31 December 2023.

24. Significant events during the period

Effective 1 January 2024, Ernst & Young S.A. has been appointed as auditor of the Company.

Effective 10 January 2024, Matthew Hill has been appointed as Director of the Company replacing Juraj Pekar.

The Ashmore SICAV Emerging Markets High Yield Corporate Debt Fund terminated operations on 29 April 2024.

On 6 June 2024, the investment objectives and policies of the Ashmore SICAV Emerging Markets Local Currency Bond Fund was amended and classified from Article 6 to Article 8 pursuant to the EU Sustainable Financial Disclosure Regulation (SFDR) effective 8 July 2024.

Notes to the Combined Financial Statements *continued*

24. Significant events during the period *continued*

In relation to both Ashmore SICAV Emerging Markets Volatility-Managed Local Currency Bond Fund and Ashmore SICAV Emerging Markets Local Currency Bonds (Broad) Fund, they are past the 9 month wind-down period as both Sub-Funds have Rubles which cannot be repatriated or distributed until Russian sanctions have been lifted.

There were no other significant events during the period.

25. Subsequent events

Ashmore SICAV Emerging Markets Equity EX China Fund Money Market was launched on 16 July 2024.

Ashmore SICAV Emerging Markets Corporate Debt ESG Fund terminated operations on 16 July 2024.

There were no other significant events subsequent to the period-end date that require adjustments to, or disclosures in the combined financial statements.

Supplementary Information

Reconciliation of differences between US GAAP and Luxembourg GAAP

FASB ASC 946-20-25 Paragraphs 7-8, Recognition - Capital Share Transactions, requires that subscriptions and redemptions received on the last valuation day of the period be included in the period-end NAV of the Sub-Funds, whereas under Luxembourg GAAP they are recorded subsequent to the period end. There are no other reconciling items between the figures in these financial statements published in accordance with Luxembourg GAAP and their equivalent published in accordance with US GAAP. A reconciliation of these differences for US\$ denominated Share classes is provided below:

	Luxembourg GAAP	Subscriptions (including equalisation)	Redemptions (including equalisation)	US GAAP
Ashmore SICAV Emerging Markets Local Currency Bond Fund				
Total number of shares	14,678,120	–	(3,525)	14,674,595
Total net assets (US\$)	1,265,185,380	–	(182,630)	1,265,002,750
Retail Class Shares (US\$) Income				
Number of Shares	226,609	–	(3,525)	223,084
Share class net assets (US\$)	11,740,177	–	(182,630)	11,557,547

Total net assets (US\$)	286,431,719	–	(218,358)	286,213,361
Retail Class Shares (US\$) Accumulation				
Number of Shares	193,361	–	(2,330)	191,031
Share class net assets (US\$)	18,036,623	–	(217,352)	17,819,271
NAV per Share (US\$)*	93.28	–	93.28	93.28
Retail II Class Shares (US\$) Income				
Number of Shares	15,682	–	(27)	15,655
Share class net assets (US\$)	584,258	–	(1,006)	583,252
NAV per Share (US\$)*	37.26	–	37.26	37.26

* As the number of Shares are shown without decimals, a decimal mismatch might occur when recalculating the NAV per Share.

The other US\$ Share classes of the Sub-Funds did not have any reconciling items between US GAAP and Luxembourg GAAP as at 30 June 2024.

Direct transaction costs

In accordance with the Statement of Recommended Practice ("SORP") issued by the UK Pensions Research Accountants Group ("PRAG") in November 2014, as amended, direct transaction costs incurred by UK Pension Schemes must be disclosed in their annual reports. Purchases and sales of investments made by Ashmore SICAV Sub-Funds are recorded net of direct transaction costs, which are included separately in "Transaction costs" in the Combined Statement of Operations and Changes in Net Assets.

Direct transaction costs are costs incurred to acquire financial assets or financial liabilities. These include fees and commissions paid to agents, advisers, brokers and dealers.

Direct transaction costs incurred by the Sub-Funds during the period ended 30 June 2024 have been detailed below:

		Ashmore SICAV Emerging Markets Global Small-Cap Equity Fund		Ashmore SICAV Emerging Markets Frontier Equity Fund

There were no direct transaction costs incurred by the other Sub-Funds during the period ended 30 June 2024.

In most instances there are no direct transaction costs on bonds, but in addition to the direct transaction costs disclosed above, indirect costs are incurred through the bid-offer spread. Investments in pooled vehicles may incur transaction costs on the purchase or sale of investments within those vehicles.

Securities Financing Transaction Regulation

During the period under review, the Company did not have any transactions falling into the scope of the Regulation (EU) 2015/2365 on transparency of securities financing transactions (“SFTs”) and of reuse.
