BNY MELLON GLOBAL FUNDS, PLC

BACKGROUND TO THE COMPANY

The following information is derived from and should be read in conjunction with the full text and definitions section in the prospectus.

STRUCTURE

BNY Mellon Global Funds, plc (the "Company") was incorporated in the Republic of Ireland as a public limited company on 27 November 2000 with registration number 335837 under the Companies Act 2014, as amended. The Company changed its name from Mellon Global Funds, plc to BNY Mellon Global Funds, plc, effective 3 June 2008.

The Company is an open-ended umbrella type investment

company with variable capital organised under the laws of Ireland, with segregated liability between sub-funds, individually referred to as the "Fund" and collectively the "Funds". The Company qualifies and is authorised in Ireland by the Central Bank of Ireland (the "Central Bank") as an undertaking for collective investment in transferable securities pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the "UCITS Regulations"). The Company currently comprises of 48 active Funds as at 31 December 2024 (31 December 2023: 50).

The history of the Funds within the Company as at the date of approval of this report and accounts is as follows:

BNY MELLON GLOBAL FUNDS, PLC

DIRECTORS' REPORT

The Board of Directors of the Company (the "Board" or the "Directors") submit their annual report together with the audited financial statements for the financial year ended 31 December 2024.

PRINCIPAL ACTIVITIES

The investment objective of each of the Funds is outlined in the prospectus and discussed in the Investment Managers' Reports.

DIRECTORS' RESPONSIBILITIES

The Directors are responsible for preparing the Directors' Report and financial statements in accordance with the Companies Act 2014 define as (the "Act"), as amended.

Irish company law requires the Directors to prepare financial statements for each financial year. Under that law, the Directors have elected to prepare the financial statements in accordance with Financial Reporting Standard ("FRS") 102: "The Financial Reporting Standard applicable in the United Kingdom and the Republic of Ireland" ("FRS 102"). Under company law, the Directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the assets, liabilities and financial position of the Company at the financial year end date and of the profit or loss of the Company for the financial year and otherwise comply with the Act, as amended. In preparing these financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and accounting estimates that are reasonable and prudent;
- state whether the financial statements have been prepared in accordance with applicable accounting standards, identify same and note the effect and the reasons for any material departure from same; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in operation.

The Directors confirm that they have complied with the above requirements when preparing the financial statements.

DIRECTORS' COMPLIANCE STATEMENT

The Directors, in accordance with Section 225 (2) of the Act, acknowledge that they are responsible for securing the Company's compliance with its "Relevant Obligations" as defined in that section and which constitute: (i) certain provisions under the Act, a breach of which is a category 1 or 2 offence; (ii) serious market abuse offences as referred to in Section 1368 of the Act; and (iii) the Irish tax laws referred to in Section 225 of the Act.

It is the policy of the Company to secure compliance with its Relevant Obligations and to foster an environment in the Company which raises awareness of, and promotes a culture of compliance with, those obligations (the "Compliance Policy").

In order to give effect to the Compliance Policy, the Board, with the assistance of the relevant advisers, have identified the Relevant Obligations that they consider apply to the Company.

The Directors confirm that:

- appropriate arrangements and structures (the "Compliance Arrangements") that, in their opinion, are designed to secure material compliance with the Company's Relevant Obligations, have been put in place; and
- a review has been conducted, during the financial year, of the Compliance Arrangements that have been put in place to secure the Company's compliance with its Relevant Obligations.

This Compliance Policy Statement will be subject to periodic review and may be supplemented from time to time. The Compliance Arrangements will be subject to annual review with the aim of establishing that they continue to provide a reasonable assurance of compliance, in all material respects, with the Company's Relevant Obligations.

ACCOUNTING RECORDS

The Directors are responsible for keeping adequate accounting records which disclose with reasonable accuracy at any time the financial position of the Company and to enable them to ensure that the financial statements are prepared in accordance with FRS 102 and comply with the Act, as amended, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the "UCITS Regulations") and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations").

The measures taken by the Directors to secure compliance with the Company's obligations to keep adequate accounting records are the use of appropriate systems and procedures and the employment of competent persons. To this end, BNY Mellon Fund Services (Ireland) Designated Activity Company (the "Administrator") has been appointed for the purpose of maintaining adequate accounting records. Accordingly, the accounting records are kept at One Dockland Central, Guild Street, IFSC, Dublin 1, D01 E4XO, Ireland.

The Directors are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Under the Central Bank UCITS Regulations, the Directors are required to entrust the assets of the Company to a depositary for safekeeping. In carrying out this duty, the Company has appointed The Bank of New York Mellon SA/NV, Dublin Branch (the "Depositary"), which provides trustee, depositary and custody services.

The financial statements of the Company are published on the website of BNY Mellon Investment Management EMEA Limited (www.bny.com/investments). The BNY Mellon Fund Management (Luxembourg) S.A. (the "Manager") is responsible for the maintenance and integrity of the corporate and financial information relating to the Company published on this website. Legislation in the Republic of Ireland governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

DISTRIBUTIONS

Distributions to redeemable participating shareholders are recognised in the Statement of Comprehensive Income as finance costs.

Distributions are declared to the extent necessary to enable the Company to pursue a full distribution policy in accordance with the current UK tax legislation.

REVIEW OF BUSINESS AND FUTURE DEVELOPMENT

The Company is an open-ended investment company with variable capital which has been authorised by the Central Bank under the UCITS Regulations. There was no change in the nature of the Company's business during the financial year.

There is a detailed review in the Investment Managers' Reports of factors contributing to the Funds' performance. The Directors do not anticipate any change in the structure or investment objectives of the Company.

RISK MANAGEMENT OBJECTIVES AND POLICIES

The Company's investment activities expose it to the various types of risk, which are associated with the financial instruments and markets in which it invests.

Details of the risks inherent in investing in the Company are disclosed in Note 16 to the financial statements.

RESULTS

The results for the financial year are set out in the Statement of Comprehensive Income.

EVENTS SINCE THE FINANCIAL YEAR END

There have been no significant events affecting the Company since the financial year end other than as disclosed in Note 20 to the financial statements.

RELATED PARTY TRANSACTIONS AND BALANCES

Other than as disclosed in Note 11 to the financial statements, the Directors are not aware of any contracts or arrangements of any significance in relation to the business of the Company in which the Directors had any beneficial interest as defined in the Act, as amended, at any time during the financial years ended 31 December 2024 and 31 December 2023.

CONNECTED PERSON TRANSACTIONS

In accordance with the requirements of Section 43(1) of the Central Bank UCITS Regulations, any transaction carried out with the Company by its management company or depositary, and the delegates or sub-delegates of such a management company or depositary (excluding any non-

group company sub-custodian appointed by a depositary), and any associated or group company of such a management company, depositary, delegate or sub-delegate ("connected persons") must be carried out as if negotiated at arm's length.

Such transactions must be in the best interests of the shareholders. In addition to those transactions, there are also transactions carried out by connected persons on behalf of the Company to which the Directors have no direct access and in respect of which the Directors must rely upon assurances from its delegates that the connected persons carrying out those transactions do carry them out on a similar basis.

Shareholders should have regard to the governance structure of the Company as more particularly described in the Corporate Governance Statement section below and the roles and responsibilities of the Company's respective delegates subject to the overall supervision of the Board. Further, shareholders should refer to the prospectus which identifies many of the connected person transactions and the general nature of the contractual arrangements with the principal connected persons but it is not exhaustive of all connected person transactions. Shareholders should also refer to the provisions of the prospectus dealing with conflicts of interest.

Therefore, having regard to confirmations from the Manager and its relevant delegates, the Board is satisfied that:

- (i) there are arrangements (as evidenced by written procedures documented by the Manager) in place to ensure that the obligations described above are applied to all transactions with connected persons; and
- (ii) transactions with connected persons entered into during the financial year complied with these obligations, as attested by the Manager through regular updates to the Directors.

Note 11 details related party transactions during the financial year as required by Section 33 "Related Party Disclosures" of FRS 102. However, shareholders should understand that not all "connected persons" are related parties as defined by Section 33.

CORPORATE GOVERANCE STATEMENT

The Company is subject to corporate governance practices imposed by:

- (i) The Memorandum and Articles of Association of the Company;
- (ii) The Companies Act 2014, as amended; and
- (iii) The Central Bank UCITS Regulations.

Copies of all of the above documents are available for inspection at the Company's registered office at One Dockland Central, Guild Street, IFSC, Dublin 1, D01 E4XO, Ireland.

On 14 December 2011, the Irish Funds Industry Association ("IF") published a corporate governance code ("IF Code") which may be inspected on/obtained from the IF website (www.irishfunds.ie). It should be noted that the IF Code reflects the existing corporate governance policies imposed on Irish authorised collective investment schemes.

The Directors have reviewed the IF Code and adopted this code on 20 December 2012 following assessment of the measures included in the IF Code as being consistent with its existing corporate governance principles and procedures for the financial year. Consistent with the regulatory framework applicable to investment fund companies such as the Company (and in contrast to normal operating companies with a full time executive management and employees), the Company, consequently, operates under the delegated model whereby it has delegated management (including investment management), administration and distribution functions to third parties without abrogating the Board's overall responsibility. The Board has in place mechanisms for monitoring the exercise of such delegated functions, which are always subject to the supervision and direction of the Board. These delegations of functions and the appointment of regulated third party entities are detailed in the Company's prospectus. In summary, they are:

- (1) The Company has appointed the Manager pursuant to the Management Agreement. Under the terms of the Management Agreement, the Manager has responsibility for the management and administration of the Company's affairs and the distribution of the shares of the Sub-Funds. The Manager is authorised and regulated by the Commission de Surveillance du Secteur Financier ("CSSF").
- (2) The Manager has delegated the performance of the investment management functions in respect of the Company and of its Sub-Funds to the respective Investment Managers as detailed in the prospectus and listed in the directory to these financial statements.

The respective Investment Managers have direct responsibility for the decisions relating to the day-to-day running of the Sub-Funds which they manage and they are accountable to the Board for the investment performance of the Sub-Funds which they manage. The respective Investment Managers have internal controls and risk management processes in place to ensure that all applicable risks pertaining to their management of the Sub-Funds are identified, monitored and managed at all times and appropriate reporting is made to the Board on a regular basis. The Investment Managers are regulated by and under the supervision of the regulator of their operating jurisdiction;

(3) The Manager has delegated its responsibility as Administrator, Registrar and Transfer Agent to the Administrator, which has responsibility for the day-today administration of the Company and the Sub-Funds including the calculation of the net asset values. The Administrator is regulated by and under the supervision of the Central Bank; and (4) BNY Mellon Investment Management EMEA Limited and the Manager act as distributors for the Sub-Funds of the Company.

In accordance with the Central Bank UCITS Regulations, the Board is required to entrust the assets of the Company to the Depositary for safekeeping. In carrying out this duty, the Company has appointed the Depositary, which is authorised by the European Central Bank under the supervision of the Central Bank.

The Board receives reports on a regular (and at least quarterly) basis from each of its delegate service providers and the Depositary which enable it to assess the performance of the delegate service providers and the Depositary (as the case may be).

FINANCIAL REPORTING PROCESS – DESCRIPTION OF MAIN FEATURES

The Board is ultimately responsible for overseeing the establishment and maintenance of adequate internal control and risk management systems of the Company in relation to the financial reporting process. Such systems are designed to manage rather than eliminate the risk of error or fraud in achieving the Company's financial reporting objectives and can only provide reasonable and not absolute assurance against material misstatement or loss. The Board has entrusted the administration of the accounting records to the Administrator.

The Board, through delegation to the Administrator, have procedures in place to ensure all relevant accounting records are properly maintained and are readily available, including production of annual and semi-annual financial statements. The annual and semi-annual financial statements of the Company are required to be approved by the Board and filed with the Central Bank. The annual financial statements are also required to be filed with the Companies Registration Office and be audited by independent auditors who report annually to the Board on their findings.

The Company has not established an audit committee. Given the size, nature and complexity of the Company, and the existing processes and procedures adopted by the Company, the Board does not consider that an audit committee is required.

The Board have hired an independent external audit firm to audit the financial statements in accordance with the Act. The Board evaluate and discuss significant accounting and reporting issues as the need arises.

The Administrator has operating responsibility in respect of its internal controls in relation to the financial reporting process and the Administrator's report to the Board. The Administrator is authorised and regulated by the Central Bank and complies with the rules imposed by the Central Bank.

SHAREHOLDER MEETINGS

The convening and conduct of shareholders' meetings are governed by the Memorandum and Articles of Association

of the Company and the Act, as amended. Although the Board may convene an extraordinary general meeting of the Company at any time, the Board is required to convene an annual general meeting of the Company within eighteen months of incorporation and fifteen months of the date of the previous annual general meeting thereafter provided that an annual general meeting is held within nine months of the end of each accounting period for the Company.

In accordance with the Act, as amended, shareholders representing not less than one-tenth of the paid up share capital of the Company may also request the Board to convene a shareholders' meeting. Not less than twenty one clear days' notice of every annual general meeting and any meeting convened for the passing of a special resolution must be given to shareholders.

Two shareholders present either in person or by proxy constitutes a quorum at a general meeting. Votes may be cast in person or by proxy. On a show of hands, every shareholder who is present in person or by proxy shall have one vote and every management shareholder shall have one vote in respect of all non-participating shares. On a poll, every shareholder is entitled to one vote in respect of each participating share held by him and every management shareholder is entitled to one vote in respect of all non-participating shares held by him. The chairman of a general meeting of the Company or at least five shareholders present or a shareholder or shareholders representing at least one tenth of the shares in issue having the right to vote at such meeting may demand a poll.

Shareholders may resolve to sanction an ordinary resolution or special resolution at a shareholders' meeting. An ordinary resolution of the Company or of the shareholders of a particular fund or class requires an absolute majority of the votes cast by the shareholders voting in person or by proxy at the meeting at which the resolution is proposed. A special resolution of the Company or of the shareholders of a particular fund or share class requires a majority of not less than 75% of the shareholders present in person or by proxy and voting in general meeting in order to pass a special resolution including a resolution to amend the Memorandum and Articles of Association.

COMPOSTION AND OPERATION OF BOARD OF DIRECTORS AND COMMITTEES

The number of directors may not be less than two nor more that twelve, however the Board may seek approval via an ordinary resolution of the Company to operate with one Director or more than twelve Directors. Currently, the Board of Directors of the Company is composed of six Directors, being those listed in the directory in these financial statements.

The business of the Company is managed by the Directors, who exercise all such powers of the Company in accordance with the Companies Act 2014, as amended, or by the Articles of Association of the Company. A Director may, and the company secretary of the Company on the requisition of a Director will, at any time summon a meeting of the Directors. Questions arising at any meeting of the Directors are determined by a majority of votes. In the case of an equality of votes, the chairman has a second or casting vote.

The quorum necessary for the transaction of business at a meeting of the Directors may be fixed by the Directors and unless so fixed is two. The key management functions of the Manager are delegated to the designated Directors in accordance with its business plan.

The Sub-Fund Application Approval Committee (the "Committee) has been established by the Boards of Directors of the Company and the Manager. It exists primarily to assist the respective Boards in fulfilling their oversight responsibilities with regards to the submission of new Sub-Fund applications or where specifically delegated modifications to existing Sub-Funds or fund documentation (e.g., required as a result of regulatory updates or material changes) to the Central Bank.

DIVERSITY STATEMENT

In recognition of the importance and value of diversity, the Board adopted a Diversity Policy in September 2019, which was ratified at the board meeting in January 2020. The Diversity Policy recognises the benefits of having individuals with diverse background, experience and viewpoints including individuals who contribute to the heterogeneity of the Board. The objective of the Diversity Policy is to promote diversity on the Board. The Diversity Policy will be implemented going forward through ensuring that new appointments to the Board should be made on merit, taking account of the specific skills and experience, independence, and knowledge needed to ensure a rounded board and the diversity benefits each candidate would bring to the overall board composition. There has been six appointments and four resignations to the Board since the Diversity Policy was adopted.

DIRECTORS

The names of the persons who were Directors at any time during the financial year ended 31 December 2024 are set out below:

David Dillon (Irish) (Resigned 12 September 2024)**
Greg Brisk (British) (Resigned 26 August 2024)**
Claire Cawley (Irish)<**
Caylie Stallard (New Zealand)
Mark Flaherty (Irish) (Resigned 31 March 2025)**
Sarah Cox (British)
Sandeep Sumal (British)
Deirdre Gormley (Irish) (Appointed 11 September 2024)*

All Directors are non-executive Directors.

- < Chairman of the Board of Directors
- ^ Independent Director
- * Please refer to Note 19 of the financial statements.
- ** Please refer to Note 20 of the financial statements.

DIRECTORS' REPORT cont'd.

DIRECTORS AND SECRETARY'S INTERESTS

The Directors (including their families) and the Secretary, Tudor Trust Limited, had no interests in the shares of the Company at any time during the financial years ended 31 December 2024 and 31 December 2023.

POLITICAL DONATIONS

There were no political donations made by the Company during the financial years ended 31 December 2024 and 31 December 2023.

DISCLOSURE OF INFORMATION TO THE AUDITORS

So far as each person who was a Director at the date of approving this report is aware, there is no relevant audit information, being information needed by the auditors in connection with preparing their report, which they have not disclosed to the auditors. Each Director has taken all the steps that they are obliged to take as a Director in order to make themselves aware of any relevant audit information and to ensure that it is disclosed to the auditors.

INDEPENDENT AUDITORS

The Directors appointed Ernst & Young as auditors for the Company, with effect from 2 September 2014.

Ernst & Young have indicated their willingness to remain in office in accordance with Section 383 (2) of the Act.

On behalf of the Board

Director - Deirdre Gormley

Director - Sarah Cox

Date: 24 April 2025

BNY MELLON GLOBAL FUNDS, PLC

DEPOSITARY'S REPORT

For the period from 1 January 2024 to 31 December 2024 (the "Period")

The Bank of New York Mellon SA/NV, Dublin Branch (the "Depositary", "us" "we", or "our"), has enquired into the conduct of BNY Mellon Global Funds plc (the "Company") for the Period, in its capacity as depositary to the Company.

This report including the opinion has been prepared for and solely for the shareholders in the Company, in accordance with our role as depositary to the Company and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

RESPONSIBILITIES OF THE DEPOSITARY

Our duties and responsibilities are outlined in Regulation 34 of the of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (S.I. No 352 of 2011), as amended (the "Regulations").

Our report shall state whether, in our opinion, the Company has been managed in that period in accordance with the provisions of the Company's constitutional documentation and the Regulations. It is the overall responsibility of the Company to comply with these provisions. If the Company has not been so managed, we as depositary must state in what respects it has not been so managed and the steps which we have taken in respect thereof.

BASIS OF DEPOSITARY OPINION

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties and to ensure that, in all material respects, the Company has been managed (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of its constitutional documentation and the appropriate regulations and (ii) otherwise in accordance with the Company's constitutional documentation and the appropriate regulations.

OPINION

In our opinion, the Company has been managed during the period, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the constitutional documentation and by the Regulations; and
- (ii) otherwise in accordance with the provisions of the constitutional documentation and the Regulations.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF BNY MELLON GLOBAL FUNDS, PLC

OPINION

We have audited the financial statements of BNY Mellon Global Funds, plc ('the Company') for the year ended 31 December 2024, which comprise the Statement of Financial Position, Statement of Comprehensive Income, Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders and notes to the financial statements, including the summary of significant accounting policies set out in note 1. The financial reporting framework that has been applied in their preparation is Irish Law and Accounting Standards including FRS 102, the Financial Reporting Standard applicable in the UK and Republic of Ireland issued in the United Kingdom by the Financial Reporting Council.

In our opinion the financial statements:

- give a true and fair view of the assets, liabilities and financial position of the company as at 31 December 2024 and of its profit for the year then ended;
- have been properly prepared in accordance with FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland; and
- have been properly prepared in accordance with the requirements of the Companies Act 2014, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019.

BASIS FOR OPINION

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report.

We are independent of the Company in accordance with ethical requirements that are relevant to our audit of financial statements in Ireland, including the Ethical Standard as applied to public interest entities issued by the Irish Auditing and Accounting Supervisory Authority (IAASA), and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

CONCLUSIONS RELATING TO GOING CONCERN

In auditing the financial statements, we have concluded that the Directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company's ability to continue as a going concern for a period of at least twelve months from the date when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the Directors with respect to going concern are described in the relevant sections of this report. However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the Company's ability to continue as a going concern.

OTHER INFORMATION

The Directors are responsible for the other information. The other information comprises the information included in the Annual Report other than the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

OPINIONS ON OTHER MATTERS PRESCRIBED BY THE COMPANIES ACT 2014

In our opinion, based solely on the work undertaken in the course of the audit, we report that:

- the information given in the Directors' report for the financial year ended for which the financial statements are prepared is consistent with the financial statements; and
- the Directors' report has been prepared in accordance with the applicable legal requirements.

We have obtained all the information and explanations which we consider necessary for the purposes of our audit.

In our opinion the accounting records of the Company were sufficient to permit the financial statements to be readily and properly audited and the Company statement of financial position is in agreement with the accounting records.

MATTERS ON WHICH WE ARE REQUIRED TO REPORT BY EXCEPTION

Based on the knowledge and understanding of the company and its environment obtained in the course of the audit, we have not identified material misstatements in the Directors' report.

The Companies Act 2014 requires us to report to you if, in our opinion, the disclosures required by sections 305 to 312 of the Act, which relate to disclosures of Directors' remuneration and transactions are not complied with by the Company. We have nothing to report in this regard.

RESPECTIVE RESPONSIBILITIES Responsibilities of directors for the financial statements

As explained more fully in the Directors' responsibilities statement set on page 3, the Directors are responsible for the preparation of the financial statements in accordance with the regulatory framework that give a true and fair view, and for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Directors are responsible for assessing the parent Company's ability to continue as going concerns, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on the IAASA's website at: https://iaasa.ie/wp-content/uploads/docs/media/IAASA/Documents/audit-standards/Description_of_auditors_responsibilities_for_audit.pdf

This description forms part of our auditors' report.

THE PURPOSE OF OUR AUDIT WORK AND TO WHOM WE OWE OUR RESPONSIBILITIES

Our report is made solely to the Company's members, as a body, in accordance with section 391 of the Companies Act 2014. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members, as a body, for our audit work, for this report, or for the opinions we have formed.

INVESTMENT MANAGERS' REPORTS

ECONOMIC & MARKET OVERVIEW

Introduction

Global equities rose strongly in the year under review. Stock markets were bolstered by a series of interest rate cuts from the world's major central banks. This occurred against a backdrop of slowing inflation and relatively weak economic growth outside of the US. Corporate earnings growth was also better than expected, which drove share prices higher. Many stock markets, including those in the US, Europe, the UK, India, Brazil and Japan, hit all-time highs. Fixed interest – bonds issued by governments and companies – did not fare as well. Bond yields generally rose, pushing bond prices lower. However, elevated yields generated positive returns across most of fixed income.

This said, it was not all smooth sailing for company shares. Markets experienced pullbacks on occasion, first in April, when expected interest rate cuts were delayed, and again in August, on worries about a slowdown in the US economy. Geopolitical concerns, notably about the escalation of violence in both Gaza and Ukraine, also dimmed investors' enthusiasm at times.

Inflation continued to slow in most economies. This paved the way for policy interest rate cuts from most major central banks. Having been the last to raise interest rates, in September 2023, the European Central Bank (ECB) was the first to cut them in June 2024. The ECB subsequently lowered rates three more times. The US Federal Reserve (Fed) delayed its first rate reduction until September but then cut by a bigger-than-expected 0.5%. US rates were cut again in November and December. The Bank of England (BoE) also cut its benchmark interest rate twice before pausing in December. The Bank of Japan (BoJ) was a major exception to this trend. Policymakers raised the key rate for the first time in 17 years in March and again in July from a very low base in an effort to normalise policy. The Central Bank of Brazil also increased rates three times as inflation in the country picked up.

The global economy remained sluggish, with GDP growth remaining low in many countries. The US economy was impressively resilient, and India enjoyed slow but steady growth, but economic outlooks elsewhere were somewhat weak. China undershot its target for GDP growth in several quarters. The eurozone and the UK faced tough economic conditions thanks to weak industrial activity and consumer spending. Economic momentum in Japan was also relatively weak.

North America

The US market surged over the year, frequently hitting new highs, and outperformed other global equity markets. Investors were optimistic that the Fed would cut interest rates as inflation eased. Strong company earnings also boosted US equities, with technology companies the clear standouts. Stocks involved in artificial intelligence did particularly well.

Headline inflation fell to a three-year low of 2.4% in September, though had inched up a bit by year's end. Falling gasoline prices were a key factor behind the lower inflation rate

The Fed cut interest rates three times by the end of the year. Chairman Jerome Powell noted inflation pressures had largely abated. However, the central bank warned in December that the pace of interest rate cuts would be slower in 2025.

The US economy grew by 3.0% and 3.1%, respectively, in the second and third quarters of the year. This was a big improvement from early 2024. Unemployment rose, but never enough to threaten economic growth.

Europe (including UK)

European stock markets rose, but underperformed global equities. They were driven by hopes of interest rate cuts as inflation fell and economic growth floundered. The UK did better than Continental European markets. Stock markets in the UK, Germany and France all hit all-time highs during the year.

Inflation fell across the region. Eurozone and UK inflation both hit 1.7% in September, the lowest reading each region had seen early 2021. Falling energy and food prices helped drive inflation lower. However, it began to pick up again as the year came to a close.

These easing price pressures allowed the ECB and BoE to cut interest rates. The ECB was the first to cut rates in June, ultimately reducing its deposit rate from 4.0% to 3.0% by December. The BoE cut rates twice, taking borrowing costs to 4.75%.

The eurozone enjoyed a pick-up in growth in the third quarter, with the economy expanding. Growth was admittedly muted, however. The UK's slowdown was more pronounced. Having achieved quarterly growth of 0.7% in the first three months of 2024, it failed to grow at all in the third quarter.

Asia

Asian markets rose but underperformed developed world markets. Interest rate cuts, falling inflation and strong earnings growth boosted the regional indices. Still, concerns about China's economic outlook and geopolitical tensions limited gains.

Taiwan was the best-performing market in Asia thanks to strong growth in its technology sector. Indian shares did well for much of the year but faded as economic growth slowed. Chinese markets picked up in the second half of the year on hopes that the government would announce an economic stimulus package. Japan's fates were reversed: its local Nikkei 225 Index hitting a 34-year high in February before becoming more subdued later in the year.

Inflation declined across much of Asia. In China, annual inflation fell to a multi-decade low of -0.8% in January. It rose from there, but failed to exceed 0.6%. India was an exception; rising food prices drove inflation higher in the autumn months.

China's central bank lowered key interest rates as economic growth stalled. The Bank of Korea also cut rates as its economy contracted. The BoJ raised rates for the first time in 17 years in March and again in July.

India's economy was stronger than most, but nevertheless slowed. China's economy remained challenged by its real estate sector. It failed to hit the government's 5.0% target in either the second or third quarter.

Fixed Income

Government bond prices fell in sterling terms. Falling interest rates and inflation helped bond prices rise early in the year, but fears about inflation reaccelerating sent bond yields higher into year-end.

Corporate bonds (debt issued by companies) fared better as investors took advantage of the higher yields on offer.

Currency and Commodities

The US dollar strengthened against other currencies despite a dip in early autumn. The strength of the US economy and the Fed's initial caution about cutting rates supported the dollar. Donald Trump's election victory sent it higher in November.

Sterling weakened against the US dollar but rose against the euro as the ECB cut interest rates.

The Japanese yen weakened substantially against the US dollar, and hit a 38-year low in early July.

Commodity prices rose in aggregate, spurred by falling interest rates and a better outlook for economic recovery.

Industrial metals, such as copper, aluminium and zinc, all traded higher on tighter supplies. Gold set a series of all-time highs during the period. The precious metal was supported by falling interest rates and its 'safe-haven' status.

Oil prices ended the year roughly flat. Concerns about lacklustre demand were offset somewhat by OPEC reining in production.

All performance data is from 1 January 2024 to 31 December 2024: Total return, based on net asset value, including charges, but excluding initial charge, income reinvested gross of tax, expressed in local currency terms unless otherwise stated, sourced from Lipper IM.

ALTERNATIVES

BNY MELLON ABSOLUTE RETURN BOND FUND

Over the twelve months under review, the Fund's Euro S share class returned 8.02%, net of fees, compared with 3.63% for the 3 Month EURIBOR benchmark, in euro terms.

The manager helped to produce this positive return by keeping a close eye on the Fund's investments in both government bonds and corporate bonds and adjusting them in response to movements in the markets.

In the first half of the year, a better outlook for global growth boosted corporate bonds. The manager positioned the Fund to benefit from this. European corporate bonds with high investment grade ratings helped returns too.

In government bonds, the manager's country selection worked well. The Fund benefited from favouring Italy over Germany and Australia over Canada.

The manager anticipated a rally in US government bonds. This worked well as inflation fell in the early summer months and central banks then began to cut interest rates.

Holdings in inflation-linked bonds issued by governments added to returns. Here, the manager favoured bonds denominated in US dollars over those denominated in euros.

The manager's choice of corporate bonds also helped the Fund's returns.

Insight Investment Management (Global) Limited January 2025

BNY MELLON ABSOLUTE RETURN CREDIT FUND

In the twelve months under review, the Euro W share class of the Fund returned 6.06%, net of fees, compared with 3.63% for the 3 Month EURIBOR benchmark.

Keeping a close eye on investments in corporate bonds (those issued by a company as opposed to by a government) and adjusting them in response to movements in the markets helped achieve this return.

In the opening quarter of 2024, a better outlook for global GDP growth boosted corporate bonds. The manager positioned the Fund to benefit from these market conditions. Investments in high-quality corporate bonds valued in euros helped returns.

Holdings in corporate bonds did well until June, when bond prices fell after a surprise announcement that elections would be held in France.

In the autumn months, investments in corporate bonds performed well as major central banks cut interest rates.

In the last three months of the year, corporate bonds weakened as the US Federal Reserve warned the pace of interest rate cuts would slow in 2025. The manager's investment in asset-backed securities and loans helped offset the impact of weaker bond markets.

ALTERNATIVES cont'd

BNY MELLON ABSOLUTE RETURN CREDIT FUND cont'd

Currency allocation helped returns. The manager favoured the US dollar, which rose on expectations US interest rates would stay high.

Insight Investment Management (Global) Limited January 2025

BNY MELLON ABSOLUTE RETURN GLOBAL CONVERTIBLE FUND

Over the twelve months under review, the Fund's USD U (Acc.) share class returned 7.67%, net of fees, compared with 5.34% for the SOFR 30-Day Compounded, both in dollar terms.

The manager helped to produce this positive return by keeping a close eye on the Fund's investments in convertible bonds (corporate bonds that can be converted into company shares) and adjusting them in response to market movements.

In the first quarter of 2024, a better outlook for US growth boosted corporate bonds. The manager positioned the Fund's holdings to gain from this.

In the second quarter, corporate bonds were dragged down by weakness in government bonds. Some of the Fund's holdings that had performed well earlier in the year lost ground at this time.

Subsequently, both corporate bonds and share prices were boosted by the first US interest rate cut in four years in September. The Fund's holdings in a French software and automation company and a leading Chinese technology did well

As interest rates in the US and Europe fell further during the last quarter of 2024, holdings in a US construction company, a leading German engine manufacturer and a US multinational entertainment group performed well.

Insight Investment Management (Global) Limited January 2025

BNY MELLON DYNAMIC FACTOR PREMIA V10 FUND

In the twelve months under review, the Fund's USD W (Accumulation) share class rose by 9.33%, net of fees, against 5.45% for the ICE BofA US 3-Month Treasury Bill Index.#

The Fund's strong return came largely from its trend positions. These aim to help the Fund by tracking price movements in the markets. Among the best performers here was a long position in the US dollar.

The US dollar made gains as investors looked to Donald Trump's return to the White House and his America-first policies. This, paired with delayed interest rate cuts, pushed the dollar up to highs not seen since the autumn of 2022. The Fund's short positions in the Swiss franc, the Korean won and the Japanese yen added most to returns. All three currencies lost ground against the dollar.

Among the emerging market currencies that offer high yields, the Mexican peso, the Hungarian forint and the Brazilian real all hurt the Fund's returns.

In government bond markets, a short position in the five-year Euro Area bond worked well for the Fund.

Effective 17 July 2024, the benchmark changed from the FTSE 3 Month US T Bill Index to the ICE BofA US 3-Month Treasury Bill Index. Benchmark past performance prior to this date was for the FTSE 3 Month US T Bill Index.

Newton Investment Management North America LLC January 2025

EQUITY

BNY MELLON ASIAN INCOME FUND

During the twelve months under review, the USD W (Inc.) share class of the Fund rose by 5.77%, net of fees, against a return of 10.18% for the FTSE Asia Pacific ex Japan TR Index.

Compared with those of the benchmark index, the Fund's holdings performed less favourably.

By sector, they were weakest in communication services and financials. The decision to own less stocks from China and more from Indonesia than the benchmark also weighed on returns.

On the positive side, exposure to some technology companies worked well. Among these were Taiwan Semiconductor and MediaTek. Shares in financials stocks DBS Group and Singapore Exchange were strong, too.

The weakest stock position was in Samsung Electronics. This was due to disappointing earnings. Some telecommunication stocks also detracted from returns. Among these shares were Spark New Zealand and PT Telkom Indonesia. Not owning shares in large Chinese internet firm Tencent also hurt returns. The Fund's yield criteria mean it cannot hold Tencent.

The manager added shares in the financials sector, including in Hong Kong Exchanges & Clearing and HSBC, as well as some utility and consumer discretionary stocks. Profits were taken in several technology shares that had performed well, including Taiwan Semiconductor, Infosys and Advantech.

Newton Investment Management Limited January 2025

BNY MELLON ASIAN OPPORTUNITIES FUND

Over the twelve-month period under review, the Fund's USD A share class generated a return of 9.28%, net of fees, against a return of 10.63% for the MSCI AC Asia Pacific ex Japan TR Index.

The manager's sector preferences worked well over the year. The Fund added value by being more invested in information technology and less invested in materials than the benchmark. A low weighting in Korea aided returns too.

The manager's choice of stocks was less successful. The weakest stock performances came from the financials sector. Here, PT Bank Rakyat Indonesia and AIA Group were weak. By region, the Fund's Chinese stocks detracted significantly. Among these were Shenzhen Inovance Technology and Kanzhun.

The Fund's best stock performances came from consumer discretionary companies. India's Zomato and China's Trip. com were the two top performers over the year.

The manager added shares in the technology sector. These included SK Hynix, which makes memory chips, MediaTek, which makes chips for smart phones, and Sinbon Electronics, which makes cables and connectors. Late on in the year, the manager bought a stake in Chinese sportswear firm Anta Sports.

Fast food stock Yum China was sold in light of weaker consumer demand in China, and Prudential was sold after strong performance. Earlier in the year, the manager had reduced exposure to Asian insurers.

Newton Investment Management Limited January 2025

BNY MELLON BLOCKCHAIN INNOVATION FUND

In the twelve months under review, the USD W (Accumulation) share class of the Fund returned 18.84%, net of fees, against 17.49% for the MSCI All Country World Net Return Index.

Stock markets made strong gains in 2024, driven by artificial intelligence and cuts to interest rates.

The Fund's holdings in semiconductors and semiconductor equipment did well, thanks to surging demand for chips. Stock choices in software worked well too.

Stock choices in entertainment detracted from returns. This came as growth in streaming revenue fell. The Fund's choice of stocks in IT services also hurt its performance.

The manager increased the Fund's weightings in semiconductors and semiconductor equipment and interactive media and services. The weightings in health care providers and services and air freight and logistics were reduced.

In 2024, two events had a major impact on the cryptocurrency landscape. The first, in January, was the launch of US spot bitcoin exchange-traded funds. The second was Donald Trump's US election win. The shift to an administration that supports cryptocurrency raised hopes for a more favourable environment for digital assets in the US. The Fund manager believes this could allow greater access to capital, spur innovation and allow firms to interact with blockchain technology on a larger scale.

Newton Investment Management North America LLC January 2025

BNY MELLON BRAZIL EQUITY FUND

In the twelve months under review, the USD A share class of the Fund returned -25.53%, net of fees, compared with a return of -30.71% for the MSCI Brazil 10/40 NR Index.

The manager's choice of company shares in the consumer basic and education sectors led to the negative return.

Being less invested in oil & gas than the benchmark also hurt returns.

More positively, choices about which shares to invest in in the food processors industry helped the Fund do better than the benchmark. Being more invested than the index in this area helped, too. Certain investments in global capital goods, such as shares of Embraer, added to returns. The manager's stock selection in logistics also boosted the Fund's performance when compared with the benchmark.

BNY MELLON BRAZIL EQUITY FUND cont'd

During the year, the manager sold the Fund's shares of certain supermarkets and utilities companies, as well as a healthcare stock. A position in a logistics firm was sold after the company agreed to be taken private.

The manager bought shares in retail and financials firms.

ARX Investimentos Ltda January 2025

BNY MELLON DYNAMIC U.S. EQUITY FUND

During the twelve-month period under review, the Fund's USD A (Inc.) share class produced a return of 21.64%, net of fees, against 24.50% for the S&P 500 NR Index.

Though the Fund made an overall positive return, being underweight in company shares, which did very well in 2024, meant it underperformed the index. As the stock market rallied, the Fund was hurt by both its defensive positioning and its use of options. These options helped the Fund over the year by increasing its participation in the stock-market rally. But as the market did not sell off in 2024, the insurance that options can provide came at a small overall cost.

A long position in US Treasury bonds also detracted from the Fund's returns. The Fund bought more Treasuries in July. But in the last three months of the year, concerns about inflation and the US deficit pushed bond yields higher (and bond prices down), which hurt the Fund's returns.

The Fund still has a defensive position in equities. This stance is paired with options that allow the Fund to move to an underweight position in equities when the stock market sells off. The Fund also has a small part of its assets in long-dated US Treasury bonds, where yields now look more attractive.

Newton Investment Management North America LLC January 2025

BNY MELLON GLOBAL EMERGING MARKETS OPPORTUNITIES FUND*

In the almost twelve months from 1 January 2024 to the Fund's closure on 10 December 2024, the USD A share class of the Fund produced a return of 6.04%, net of fees, against a return of 10.97% for the MSCI Emerging Markets NR Index.

Choices about which sectors to invest in worked well. Being less invested in the materials sector than the benchmark proved positive. Having a larger stake in the information technology (IT) sector also helped returns. Shares of the Fund's Indian stocks surged, including Zomato and Info Edge. Industrials holdings, such as Sungrow Power Supply and CATL, also did well.

The manager's choice of company shares in the financials sector detracted. Within the sector, shares of XP, AIA Group and Banco del Bajio all dented returns. The Fund's consumer staples stocks were also weak. This included Wal-Mart de Mexico and Dino Polska.

The manager bought shares in chipmaker SK Hynix. The firm is a top supplier of memory devices to Nvidia. Within the IT sector, the manager also bought shares of Sinbon, ASE Technology, and MediaTek. Leading Chinese sportswear maker Anta Sports was added, too.

Fast-food firm Yum China was sold due to increasing competition. Shares in Samsung Electronics, B3, XP and Chailease were exited to fund better opportunities elsewhere. Pidilite was sold following strong share-price performance.

Newton Investment Management Limited January 2025

BNY MELLON GLOBAL EQUITY INCOME FUND

During the twelve-month review period, the Fund's USD A share class generated a return of 6.19%, net of fees, against a return of 17.96% for the FTSE World TR Index.

The manager's choice of company shares to invest in weighed on returns. By sector, the Fund's stocks were weakest in consumer discretionary (non-essential items) and financials. By region, they detracted the most in North America. Another negative factor was being less invested in technology than the benchmark.

At the stock level, the Fund was helped by its industrial shares, such as Johnson Controls International. Shares in Chroma ATE and Anglo American also did well.

Not owning shares in Al stocks Nvidia and Broadcom weighed on returns. The Fund's strict yield requirement prevents the manager from buying many technology stocks. Shares in Samsung Electronics were weak on disappointing earnings.

The manager bought shares in car firm Stellantis, which is launching new models in the US. Two new Swedish early-cycle industrial companies, SKF and Sandvik, were added on a good outlook for earnings. The manager chose to sell Nestle given weaker demand and higher costs. Other sales included Tyson Foods, Roche, Zurich Insurance and Unilever.

Newton Investment Management Limited January 2025

BNY MELLON GLOBAL INFRASTRUCTURE INCOME FUND

In the twelve months under review, the USD W (Acc.) share class of the Fund rose by 12.30%, net of fees, versus a return of 14.05% for the S&P Global Infrastructure NR Index.

Being less invested in the industrials sector (namely transportation infrastructure) than the benchmark helped the Fund produce a positive return. A lone holding in the real estate sector, which the benchmark was not invested in, also helped boost returns.

A poor choice of energy shares detracted from the Fund's performance. Certain stocks from the communication services sector weighed on returns too, especially since the index was not invested in this area of the market.

BNY MELLON GLOBAL INFRASTRUCTURE INCOME FUND cont'd

The manager bought more stock in the industrials and real estate sectors during the year. Some shares in the communication services and energy sectors were sold.

Newton Investment Management North America LLC

January 2025

BNY MELLON GLOBAL LEADERS FUND

In the twelve-month period under review, the Fund's USD A (Acc.) share class returned 4.78%, net of fees, versus 18.67% for its benchmark, the MSCI World NR Index.

Company shares from information technology companies detracted. The Fund's holdings in this sector rose by 14% during the year but did not do as well as those held by the sector benchmark. The index was led up by the strength of the 'Magnificent Seven' group of companies. The Fund owns just three of the Magnificent Seven: Alphabet, Amazon and Microsoft.

Holdings based in emerging markets made a positive contribution to the Fund's returns over the year.

The financials sector dented the Fund's returns. The Fund was less invested in the sector than the benchmark, which proved a detriment, as financial firms did very well over the year. By contrast, the Fund's underweight position in the materials sector was helpful.

During the year, the Fund bought shares of Amazon.com, Deere, Ferguson, Mettler Toledo International and O'Reilly Automotive.

Walter Scott & Partners Limited January 2025

BNY MELLON GLOBAL OPPORTUNITIES FUND

Over the twelve-monh review period, the USD A share class of the Fund generated a return of 18.43%, net of fees, against 17.49% for the MSCI AC World NR Index.

The manager's selection of shares added value. By sector, the best returns came in industrials. By region, they came from North America. Shares in GE Vernova, a US provider of energy solutions, were strong on positive earnings momentum. Trane Technologies, another US industrials firm, also did well. The share prices of financials Goldman Sachs and Barclays were strong too.

The manager's sector preferences worked well. The Fund gained from being more invested in information technology (IT), and less invested in materials, than the benchmark.

On the negative side, the IT stocks held in the Fund weighed on returns. While SAP and Taiwan Semiconductor did well, Samsung Electronics was notably weak. Higher weightings in Europe and the UK detracted as well.

The manager bought stakes in financial group London Stock Exchange, animal medicine firm Zoetis, Chinese fast-food chain Yum China and GE Vernova, among others. Earlier in the year, stakes were bought in Siemens and Samsung Electronics.

The holdings in Ecolab, Dassault Systemes, Diageo and Novonesis were sold.

Newton Investment Management Limited January 2025

BNY MELLON JAPAN SMALL CAP EQUITY FOCUS FUND

In the twelve months under review, the Fund's JPY W share class returned 19.05%, net of fees, compared with 16.36% for the Russell/Nomura Small Cap TR Index, in Japanese yen terms.

The manager's choice of company shares to invest in helped the Fund achieve this strong return.

Being more invested in the pharmaceutical and glass & ceramic products industries than the benchmark was helpful. Being less invested in banks also boosted returns.

A lack of investment in nonferrous metals did little to help returns, as did a comparatively smaller stake in other products and chemicals.

As for company shares, the main contributors to performance included Rakuten Bank, PeptiDream, and M-up Holdings. Shares of Enplas, Vector, and Minkabu The Infonoid detracted.

The manager bought shares in Daihen, Aica Kogyo, Kosaido Holdings, PeptiDream, Japan Material, Carlit, And Saizeriya. Shares of Yonex, Enplas, Zenkoku Hosho, Direct Marketing Mix, Minkabu The Infonoid, Kosaido Holdings, and Ulvac were sold.

By the end of the year, the Fund was invested in 30 companies.

Newton Investment Management Japan Ltd January 2025

BNY MELLON LONG-TERM EUROPEAN EQUITY FUND

During the twelve months under review, the Euro W (Acc.) share class of the Fund returned 2.87%, net of fees, versus 8.59% for its benchmark, the MSCI Europe NR Index.

The main positive contribution came from the consumer discretionary sector. Here, the Fund's holdings outperformed their sector benchmark. The Fund's choice of stocks and large position in information technology also worked well.

On the other side, the main negative contribution came from the financials sector. This was largely because the Fund held less than the benchmark here. Weakness in the Fund's industrials and healthcare stocks also hurt its returns for the year.

BNY MELLON LONG-TERM EUROPEAN EQUITY FUND cont'd

By country, the Fund's holdings in the UK, Switzerland, France and Germany were weak over the year. Holdings in the Netherlands and Denmark performed well, though they made fairly small contributions.

During the year, the manager bought two new stocks: Schott Pharma and The Sage Group. There were four complete sales: Carl Zeiss Meditec, Nestle, Prudential and Victrex.

Walter Scott & Partners Limited January 2025

BNY MELLON LONG-TERM GLOBAL EQUITY FUND

Over the twelve months under review, the Euro A share class of the Fund returned 13.29%, net of fees, versus 26.60% for the MSCI World NR Index, both in euro terms.

At the sector level, information technology hurt returns the most. The Fund's holdings in the sector rose strongly but less so than those held by the benchmark, which was led up by the 'Magnificent Seven' group of companies. The Fund held just two of these stocks: Alphabet and Microsoft.

Financials and industrials also acted as a drag on returns. This was because the Fund's holdings in these sectors underperformed the stocks the index held. This was mainly driven by concerns about China and a slowdown in global manufacturing.

The Fund's lack of holdings in the energy, utilities and real estate sectors was positive for returns.

By region, the US was the main negative. The Fund's holdings here did not do as well as those held by the benchmark. On the positive side, the Fund's exposure to emerging market positions the index did not hold made a strong contribution to returns.

During the year, the manager bought shares of Copart, Ferguson, ResMed and Visa. There were five complete sales: the manager sold the Fund's shares in Cognex, Dassault Systemes, Nestle, Prudential and The Walt Disney Company.

Walter Scott & Partners Limited January 2025

BNY MELLON MOBILITY INNOVATION FUND

In the twelve months under review, the USD A (Acc.) share class of the Fund returned 2.43%, net of fees, against 17.49% for the MSCI AC World NR Index.

Unfavorable stock selection and overweight positioning in automobile components detracted from relative performance. Challenging stock selection in software also weighed on relative returns.

The Fund's large position in electrical equipment helped its performance. The manager's choice of stocks in hotels, restaurants and leisure also worked well.

The manager increased the Fund's weightings in electrical equipment and electronic equipment, instruments and components. Investments in software and automobile components were reduced.

Sales of electric vehicles have been weak in Europe and the US, but the manager believes that they could start to grow once cheaper models and lower interest rates are on offer.

Newton Investment Management North America LLC January 2025

BNY MELLON SMALL CAP EUROLAND FUND

In the twelve months under review, the Euro A share class of the Fund returned -2.38%, net of fees, versus a return of 2.49% for the S&P EuroZoneSmallCap TR Index.

Positions in certain company shares from Spain proved unhelpful. This contributed to the disappointing return.

On the other hand, the manager's choice of shares from Italy helped to temper losses. Shares in financial firms did well.

By sector, communications services stocks did well. The manager's choice of stocks from Italy and France added to the Fund's returns. This was offset, however, by the Fund's consumer discretionary shares, namely those from Germany.

The manager bought more shares in the utilities and financials sectors during the twelve months under review. Some industrials and technology stocks were sold.

Newton Investment Management North America LLC January 2025

BNY MELLON SUSTAINABLE GLOBAL EMERGING MARKETS FUND

Over the twleve-month review period, the Fund's USD W (Acc.) share class produced a return of -2.92%, net of fees, against a return of 7.50% for the MSCI Emerging Markets NR Index.

Weak stock selection was the key factor behind the Fund's lower return. Company shares from the financials sector detracted. Shares of Chailease Holding, PT Bank Rakyat Indonesia and HDFC Bank all dented returns. Selected information technology stocks, such as Flat Glass and Samsung SDI, also did poorly. The manager's choice of stocks from China was similarly unhelpful. A lack of investment in internet stock Tencent was a detriment.

On the positive side, shares of industrials firms did well. These included CATL and Sungrow Power Supply. Not owning Samsung Electronics also aided returns, as the firm's earnings growth was not as strong as was expected. Being less invested in materials than the benchmark also helped.

The manager bought shares of MediaTek. The manager also added to the Sub-fund's positions in CATL, NARI Technology and Supreme Industries.

The manager sold shares of Samsung SDI owing to a loss of faith in its prospects. Reductions were made to Bank Rakyat

BNY MELLON SUSTAINABLE GLOBAL EMERGING MARKETS FUND cont'd

Indonesia and Raia Drogasil following strong share-price performance.

Newton Investment Management Limited January 2025

BNY MELLON SUSTAINABLE GLOBAL EQUITY FUND

In the twelve-month period under review, the USD A share class of the Fund produced a return of 18.10%, net of fees, compared with 17.49% for the MSCI AC World NR USD Index.

The Fund's positive return for the year was helped by its stock-picking in the US. This worked particularly well in the information technology and industrials sectors. Stock selection was also strong in emerging markets.

Some of the main detractors came from healthcare and financials. These were both sectors in which the Fund held larger positions than the benchmark.

The best stock contributors were Nvidia, which makes microchips, and GE Vernova, which makes energy equipment. In emerging markets, the standout was Taiwan Semiconductor; like Nvidia, it gained on excitement about artificial intelligence.

Stock detractors included Icon and Edwards Lifesciences in the healthcare sector. In financials, weak performance from Bank Rakyat Indonesia and AIA Group weighed on returns.

During the year, the Fund bought new holdings in eyecare firm Alcon, consulting group Tetra Tech and drug maker UCB. The Fund sold out of healthcare companies Edwards Lifesciences and Novonesis.

Newton Investment Management Limited January 2025

BNY MELLON U.S. EQUITY INCOME FUND

In the twelve months under review, the USD C (Inc.) share class of the Fund returned 13.73%, net of fees, against 24.50% for the S&P 500 NR Index.

The manager's choice of company shares from the utilities sector added the most to its return for the year. The Fund's lack of holdings in the real estate sector also added to returns, as this sector did poorly.

On the other hand, the Fund's returns were hurt by its low weighting and choice of stocks in the information technology (IT) sector. The Fund did not own some of the stocks that did the best over the year. Returns were also hurt by being less invested in the consumer discretionary sector than the benchmark. The manager's choice of stocks within that sector hampered returns, too.

During the year, the manager bought more shares in the IT and industrials sectors. The holdings in the healthcare and energy sectors were decreased.

Newton Investment Management North America LLC January 2025

FIXED INCOME

BNY MELLON EFFICIENT EURO HIGH YIELD BETA FUND*

In the six months from the Fund's launch on 24 June 2024 to 31 December 2024, its EUR W (Acc.) share class returned 4.75%, net of fees, versus 5.12% for the ICE BofA Euro Developed Markets High Yield Constrained Index.

The manager's focus on higher-quality bonds, as well as value bonds, helped the Fund make a good return.

Being exposed to the European iTraxx Index also proved useful. The avoidance of bonds from firms with poor environmental, social and corporate governance scores led to a gain as well.

Bonds from Standard Profil Automotive and Altice France, which are both facing restructuring, hurt returns.

Being less invested in Selecta Group and Intrum AB partially offset some other losses.

Transaction costs, management fees, and Fund expenses also detracted a bit.

Insight North America LLC January 2025

BNY MELLON EFFICIENT GLOBAL HIGH YIELD BETA FUND

Over the twelve months under review, the USD A (Inc.) share class of the Fund returned 8.47% net of fees, compared with 9.03% for the Bloomberg Global High Yield Corporate TR Index USD Hedged.

High yield corporate bonds (bonds issued by companies that are riskier than investment grade bonds) performed well early in the year. They weakened in the spring, however, as government bond yields rose (and bond prices fell).

In the first half of 2024, the Fund's 'model-driven' components helped achieve a positive return, offsetting weaker performance by fallen angel bonds (those that have recently lost their investment grade status).

The manager's choice of bonds detracted from returns, notably in the communications and other financials sectors.

In the autumn, interest rate cuts from the major central banks boosted corporate bond markets. This helped the Fund's return.

The choice of bonds in sectors that are more dependent on discretionary consumer spending was a positive factor, though investments in technology and other financials lost ground.

In the last three months of the year, high yield corporate bonds withstood weakness in government bond markets. In this period, the Fund was helped by its focus on bonds that provide a high level of income.

Insight North America LLC January 2025

BNY MELLON EFFICIENT GLOBAL IG CORPORATE BETA FUND*

In the almost twelve-month period from 1 January 2024 to the Fund's closure on 10 December 2024, the USD W (Acc.) share class of the Fund produced a return of 15.08%, net of fees, versus a return of 14.85% for the Bloomberg Global Aggregate Corporate Bond USD Hedged TR Index.

The manager's focus on value bonds, which cost less to invest in, helped the Fund make this positive return.

The Efficient Allocation factor, in which the Fund invests more heavily in short-dated lower-quality bonds rated BBB, detracted a bit. However, market completion factors helped offset this small loss.

The manager's choice of bonds to invest in also added to returns

Insight North America LLC January 2025

BNY MELLON EFFICIENT U.S. FALLEN ANGELS BETA FUND

Over the twelve months under review, the Fund's USD A (Acc.) share class returned 4.48%, net of fees, compared with 6.79% for the Bloomberg US HY Fallen Angel 3% Cap TR index.

The Fund's investments in corporate bonds (bonds issued by companies as opposed to governments) led to a positive return but lagged the benchmark over the year.

In the first three months of 2024, the weakness of the Fund's holdings in 'fallen angel' bonds (those that have lost their investment grade status) offset rising corporate bond prices as the US economic outlook improved.

In the first half of the year, bonds from the telecommunications sector struggled most.

Meanwhile, some bonds from sectors that tend to perform well when economic conditions are good unexpectedly lost ground. These included bonds issued by a US retailer that reported disappointing earnings results.

In the autumn, corporate bonds were boosted by the first US interest rate cut in four years. While this helped bonds in the telecommunications sector, the Fund did not hold bonds with the lowest credit rating, which did the best.

In the last three months of the year, however, this benefited the Fund, as low-quality bonds were weak.

Insight North America LLC January 2025

BNY MELLON EFFICIENT U.S. HIGH YIELD BETA FUND

In the twelve months under review, the Fund's USD A (Inc.) share class rose by 7.73%, net of fees, versus 8.19% for the Bloomberg US Corporate High Yield TR Index.

BNY MELLON EFFICIENT U.S. HIGH YIELD BETA FUND cont'd

Management of the Fund's investments in high yield corporate bonds (those issued by companies considered riskier than those with investment grade rated bonds) in response to market movements helped to achieve this return.

In the first three months of the year, Fund's investments in some of the highest-quality issuers in the high yield asset class helped returns. Bonds in the telecommunications sector weakened and so hurt returns.

In the second half of 2024, as inflation fell and US interest rates were cut, bonds with lower credit ratings did better than higher-quality bonds. This was unhelpful for the Fund.

Limited exposure to riskier bonds in the telecommunications sector dented returns. These bonds did very well, helped by optimism about the potential for artificial intelligence.

In the final three months of the year, the Fund was helped by a focus on bonds offering higher interest payments.

Insight North America LLC January 2025

BNY MELLON EMERGING MARKETS CORPORATE DEBT

Over the twelve months under review, the USD A share class of the Fund returned 7.20%, net of fees, compared with 7.63% for the JP Morgan Corporate Emerging Market Bond Index Broad Diversified (CEMBI - BD) TR Index.

The Fund's positive return was achieved through close management of its investments in corporate bonds (those issued by companies rather than governments).

In the early months of the year, a better outlook for global growth boosted corporate bonds. The manager positioned the Fund to benefit from this. Bonds from the financial sectors worked well in this period.

In the autumn, emerging market bonds made strong gains, helped by an interest rate cut from the US Federal Reserve (Fed).

Holdings in the financials and telecommunications sectors helped returns in this part of the year.

In the last three months of the year, corporate bonds fell as the US Fed warned that the pace of rate cuts would slow in 2025.

At this time, the manager adopted a more cautious approach, favouring Eastern Europe and Africa over Asia and the Middle East.

Insight Investment Management (Global) Limited January 2025

BNY MELLON EMERGING MARKETS DEBT FUND

In the twelve months under review, the USD A (Acc.) share class of the Fund rose by 7.81%, net of fees, compared with a return of 5.73% for the JP Morgan Emerging Markets (EMBI) Global TR Bond Index benchmark.

The Fund's investments in Argentina added to returns in the year. Policies aiming to tackle inflation, reduce public spending and deregulate the domestic economy boosted the Argentinian bond market.

Bonds from Ecuador also helped returns. Investments in bonds from Ukraine and Ghana were also positive contributors for the Fund as debt restructuring in both countries went on.

Elsewhere, investments in Turkey made a healthy return. The country's central bank reduced interest rates for the first time in almost two years as inflation began to decline.

The Fund was less invested in China than the benchmark was. This helped performance. In December, the Chinese renminbi fell to its lowest level against the US dollar for a year thanks to growing concerns about the impact of potential US trade tariffs.

Bonds from Bahrain and Pakistan and investments in Romania, Sri Lanka and Venezuela were less helpful.

Insight Investment Management (Global) Limited January 2025

BNY MELLON EMERGING MARKETS DEBT LOCAL CURRENCY FUND

Over the twelve months under review, the Fund's USD A (Acc.) share class returned -4.92%, net of fees, compared with a return of -2.38% for the JP Morgan GBI-EM Global Diversified TR Index benchmark.

In the first half of the year, the Fund's investments in Mexico, Brazil and Russia hurt its returns. So did some of the Fund's currency positions, among them the Thai baht and the Korean won.

Later in the year, local currency bonds made gains. These came as encouraging US economic indicators, an interest rate cut from the US Federal Reserve and a package of measures in China meant to support the domestic economy combined to boost emerging markets.

The Fund's investments in Colombia performed well. Holdings in Thailand, South Africa and Turkey helped returns, too.

In the last three months of 2024, emerging market local currency bonds fell back sharply, particularly in Latin America. They were dragged down by weakness in US government bonds and the strength of the US dollar. Investor confidence was hurt further by the prospect of trade tariffs under the Trump administration. Conflict in the Middle East also weighed on bond prices.

BNY MELLON EMERGING MARKETS DEBT LOCAL CURRENCY FUND cont'd

During this period, the Fund's investments in Colombia, Brazil, Peru and Turkey were unhelpful for returns.

Insight Investment Management (Global) Limited January 2025

BNY MELLON EMERGING MARKETS DEBT OPPORTUNISTIC FUND*

In the 10 months from 1 January 2024 to the Fund's closure on 30 October 2024, the USD C (Acc.) share class of the Fund returned 4.09%, net of fees, compared with a return of 3.46% for the for the benchmark, a composite comprising 50% JP Morgan Government Bond Index – Emerging Markets Global Diversified TR Index, 25% JP Morgan Emerging Markets Bond Index Global TR Index, 25% JP Morgan Corporate Emerging Markets Bond Index Diversified TR Index, both in US dollar terms.

In the first six months of the year, the Fund's investments in bonds from China, Singapore, India, Nigeria, Mexico, Brazil and Colombia lagged a bit. Investments in the Korean won and the Chilean peso were unhelpful too.

Things turned around in the second half of the year. The Fund was aided by positions in bonds denominated in developed market currencies. These came from places like Ecuador, Argentina, Brazil, Venezuela, Ghana, Saudi Arabia and Ukraine. At the same time, the Fund's local-currency bonds from Turkey and Indonesia helped.

Later on, bonds from Colombia and Peru did well when interest rates were cut. The manager's choice of Mexican bonds helped, as the energy sector was boosted by government reforms and the potential for regulatory changes.

Israeli and Saudi Arabian bonds were weak thanks to tensions in the Middle East.

Insight Investment Management (Global) Limited January 2025

BNY MELLON EMERGING MARKETS DEBT TOTAL RETURN FUND

In the twelve months under review, the USD W (Acc.) share class of the Fund returned 4.52%, net of fees, compared with a return of 3.86% for the comparative benchmark comprising 1/3 JP Morgan Government Bond Index – Emerging Markets Global Diversified TR Index, 1/3 JP Morgan Emerging Markets Bond Index Global Diversified TR Index, 1/3 JP Morgan Corporate Emerging Markets Bond Index Broad Diversified TR Index.

In the first few months of 2024, a better outlook for global growth pushed emerging market bonds higher. The manager positioned the Fund to benefit from these market conditions.

However, as inflation stayed high in the US, investors became less confident that the Federal Reserve (Fed) would cut rates quickly. As a result, the Fund's investments in Mexico and Colombia lost ground.

In September, emerging market bonds posted gains. This was thanks to positive US economic data and a 0.5% interest rate cut from the Fed.

In the latter half of the year, the Fund's investments in bonds from Argentina and Brazil that were denominated in developed market currencies did well.

The last three months of the year saw emerging market bonds fall back sharply, dragged down by weakness in US government bonds and the strength of the US dollar. Talk of higher trade tariffs from the incoming Trump administration hurt emerging market debt, too.

Insight Investment Management (Global) Limited January 2025

BNY MELLON EUROLAND BOND FUND

In the twelve months under review, the Fund's Euro A share class returned 3.63%, net of fees, versus 2.63% for the Bloomberg Euro Aggregate Bond TR Index.

A better outlook for global GDP growth boosted corporate bonds in the first few months of the year. The manager positioned the Fund's holdings to benefit from this sentiment.

The manager's focus on which countries to invest in also added to returns in the early part of the year. Buying bonds from Slovakia and Sweden instead of Germany proved a good choice.

Inflation in the eurozone fell during the year, and the European Central Bank cut interest rates three times. This boosted bonds whose returns were directly linked to inflation rates, which was additive for the Fund.

Country selection continued to have a positive effect on the Fund's returns. Investing in bonds from Italy and Hungary, as opposed to Germany, helped performance in the third quarter. In the last months of 2024, holding bonds from Spain instead of France helped.

The Fund's holdings in German government bonds fell considerably in October, but recouped their losses in November.

Insight Investment Management (Global) Limited January 2025

BNY MELLON EUROPEAN CREDIT FUND

In the year under review, the Fund's Euro A share class returned 4.91%, net of fees, versus 4.56% for the Markit iBoxx Euro Corporates TR Index.

Keeping a close watch on the Fund's investments in corporate bonds (bonds issued by a company) and adjusting them in response to market moves helped the Fund make a positive return.

In the first six months of the year, the manager chose to invest in bonds likely to benefit from a better outlook for global GDP growth, which helped the Fund do well. The

BNY MELLON EUROPEAN CREDIT FUND cont'd

manager's choice of corporate bonds aided returns. In the utilities sector, owning bonds in a French water and waste management company helped. The Fund's investment in the bonds of a leading global medical technology company added to returns, too.

In the second half of the year, the Fund's holdings in the financial sector performed well as inflation fell and the European Central Bank cut interest rates. Bonds issued by banks were notably strong. A position in a Greek financial services firm was a key contributor.

The Fund's holdings in the autos sector, both in vehicle manufacturers and component suppliers, added to returns. These industries are expected to do well under the Trump administration in the US.

Insight Investment Management (Global) Limited January 2025

BNY MELLON FLOATING RATE CREDIT FUND

Over the twelve-month period, the Fund's Euro W (Acc.) share class returned 7.86%, net of fees, compared with 3.63% for the 3-Month EURIBOR benchmark.

The manager helped to produce this positive return by keeping a close eye on the Fund's investments in floating rate notes (bonds issued by governments and companies that pay a variable interest rate to reflect changes in official interest rates).

Management of the Fund's exposure to movements in bond markets also helped.

In the first quarter of 2024, a better outlook for US GDP growth helped high yield corporate bonds rise. The manager positioned the Fund's holdings to benefit from this.

As inflation eased in the second quarter, investors began to hope for interest rate cuts in the second half of the year. The manager focused on bonds with maturity dates further in the future, which helped returns.

High yield corporate bonds rose after the US Federal Reserve (Fed) cut interest rates in September. The Fund's holdings in telecommunications, utilities and construction companies performed well.

Corporate bonds weakened in the final quarter after the Fed warned that the pace of interest rate cuts was likely to slow in 2025. However, the manager focused on holdings that pay a higher income, helping returns.

Insight Investment Management (Global) Limited January 2025

BNY MELLON GLOBAL AGGREGATE BOND FUND*

Over the period from the Fund's launch on 16 July 2024 to 31 December 2024, the USD W (Acc.) share class of the Fund returned 1.85%, net of fees, compared with 1.99% for the Bloomberg Global Aggregate Index (hedged to U.S.Dollars).

Since launch, the manager has chosen a wide range of investments in both government bonds and corporate bonds (those issued by a company as opposed to a government).

The Fund's investments are diversified across different regions. They also cover a broad range of sectors and industries.

In corporate bond markets, the manager favoured issues from companies with high credit ratings. These are known as investment grade bonds.

Bond markets performed well in the autumn. This came as the US Federal Reserve cut interest rates for the first time in over four years. However, bond markets lost ground over the final quarter.

The selection of bonds the manager chose to invest in helped returns over the period. So did the Fund's country allocation within the eurozone, as well as its investments in bonds that have returns directly linked to inflation indices.

The Fund's exposure to changes in interest rates acted as a drag on returns.

Insight Investment Management (Global) Limited January 2025

BNY MELLON GLOBAL BOND FUND

Over the twelve-month review period, the Fund's USD A share class generated a return of -4.08%, net of fees, compared with a return of -3.65% for the JP Morgan Global GBI Unhedged TR index.

The manager's overall selection of bonds weighed on performance. Long-dated government bonds (debt issued by governments with maturities several decades in the future) did not work well. Those issued by governments in Japan and the US weighed heavily on returns. Derivative instruments (contracts on underlying assets) also had a negative effect.

The best returns came from short-dated government bonds (debt issued by governments with maturity dates in the next few years) in Indonesia and the US. Returns were helped by favourable currency hedging (which aims to reduce risk from currency movements).

Over the period, the manager decreased the Fund's sensitivity to interest rates, although it was increased again at the end of the year. Profits were taken on short-dated US Treasuries. The long position in the yen was reduced after it worked well in the third quarter of the year. The manager gradually increased the Fund's US dollar exposure late in the year. The Fund had a smaller position in the euro.

Newton Investment Management Limited January 2025

BNY MELLON GLOBAL CREDIT FUND

Over the twelve-month period, the USD W (Acc.) share class of the Fund returned 4.51%, net of fees, versus a gain of 3.52% for the Bloomberg Global Aggregate Credit TR Index USD Hedged.

BNY MELLON GLOBAL CREDIT FUND cont'd

The Fund took an overweight position on credit risk in the first half of the year. In the second half of the year, the manager adopted a more tactical, opportunist position as regards risk.

For most of the year, the Fund was more invested in European corporate bonds (bonds issued by companies as opposed to governments) than US corporate bonds. This helped performance.

The manager also favoured bonds issued by banks. At the same time, the manager limited investments in bonds issued by energy companies. Both of these factors helped returns.

In the third quarter of the year, the Fund's holdings in UK water companies rebounded. By contrast, bonds issued by a French luxury goods group hurt returns. This was due to a poor outlook for China, one of the group's biggest markets.

Ahead of the US elections in November, the manager positioned the portfolio for a decisive Republican victory. This helped returns, as the Republican party won the presidency and both chambers of Congress.

The Fund's investment in bonds issued by a European wind turbine operator weakened on fears about its US business. These arose from the Trump administration's opposition to renewable energy.

Insight Investment Management (Global) Limited January 2025

BNY MELLON GLOBAL DYNAMIC BOND FUND

Over the twelve-month period under review, the USD A share class of the Fund produced a return of 4.99%, net of fees, against a return of 5.34% for SOFR (30-Day Compounded) +2%.

The Fund's largest segment, government bonds (debt issued by governments), produced negative returns. The weakest of these were Japanese government bonds set to reach their maturity dates 30 or more years from now. Emerging market sovereign bonds were also weak, especially those from Brazil and Mexico.

On the other hand, the Fund had strong returns from high yield credit (lower-quality bonds issued by companies) and investment grade bonds (high-quality bonds issued by companies). Some holdings in government bonds did well, too, among them those from Spain, the US, South Africa and Peru. Currency hedging back into the Fund's base currency of US dollars also added to returns.

The manager increased the Fund's duration (which measures its sensitivity to interest rates). Over the year, the Fund took part in several new issues of corporate bonds (debt issued by companies). In the final three months of the year, new issues from Prysmian, Verallia and Castello were added. A long US dollar position was established at the end of the year.

Newton Investment Management Limited January 2025

BNY MELLON GLOBAL HIGH YIELD BOND FUND

Over the twelve months under review, the Fund's USD W (Accumulation) share class rose by 8.59%, net of fees, against 8.67% for the ICE BofA Developed Market High Yield Constrained TR Index.

The manager's choice of high yield bonds worked well in the telecommunications, chemicals and packaging sectors. This was partly offset by the poor performance of bonds in the cable and financials sectors. The Fund stayed underweight in sectors exposed to consumers, including consumer products, retail and autos.

The Fund's largest exposure was to bonds with a BB investment grade rating, though the Fund had a lower weighting in those bonds than the benchmark. The Fund was overweight bonds rated B and CCC bonds. As B and CCC bonds outperformed, this worked well. Late in the year, the Fund reduced its CCC holdings a little and added to its holdings of bonds rated BB and B.

The Fund was overweight in US and UK high yield bonds and a little underweight in European high yield. This had mixed results; UK high yield bonds outperformed, while US high yield bonds lagged behind.

The cash position proved a modest drag on the Fund's returns. The Fund was helped by its exposure to floating-rate bank loans, however.

Alcentra NY, LLC January 2025

BNY MELLON GLOBAL SHORT-DATED HIGH YIELD BOND FUND

Over the twelve-month period under review, the Fund's USD A (Acc.) share class returned 8.30%, compared with a return of 5.42% for the SOFR (90-Day Compounded).

This return was achieved by careful management of the Fund's investments in high yield corporate bonds.

Throughout the year, the manager favoured bonds from companies with free cash flows. To reduce the risk of defaults, the Fund avoided unprofitable companies.

The manager kept a clear focus on bonds that pay a higher income. This helped returns over the year.

Healthy demand for high yield bonds helped the Fund's returns too, particularly as central banks began cutting interest rates with the first US rate cut for well over four years in September.

With continuing inflows from investors supporting new issuance of corporate bonds, the manager focused on adding bonds from high-quality companies with sound business models.

Despite weakness in government bonds, high yield corporate bonds made further gains in the last three months of the year. This was driven by strong demand from investors, who were expecting pro-business policies from the incoming

BNY MELLON GLOBAL SHORT-DATED HIGH YIELD BOND FUND cont'd

Trump administration in the US.

Insight Investment Management (Global) Limited January 2025

BNY MELLON SUSTAINABLE GLOBAL DYNAMIC BOND FUND

Over the twelve-month period under review, the Euro W (Acc.) share class of the Fund generated a return of 3.89%, net of fees, against a return of 5.62% for the 1 Month EURIBOR + 2% benchmark.

Each segment of the bond market in which the manager chose to invest produced positive returns. Investment grade credit (high-quality bonds issued by companies) contributed the most to returns. High yield bonds, which are often thought to be riskier, also delivered positive returns. Here, bonds issued by communications firm Windstream did well.

Short-dated government bonds (debt issued by governments with maturity dates in the next few years) issued by Mexico and South Africa were the top-performing positions in the Fund over the year. The Fund also got positive returns through its use of derivatives (instruments used to protect returns from moves in underlying assets).

Currency hedging (which is used to protect the Fund from sharp currency moves) detracted from returns. Long-dated Japanese bonds (with maturities a long way in the future) were especially weak. Certain US Treasury and UK Gilt issues also detracted.

The manager bought more investment grade and high yield bonds in the first half of the year. Emerging market government bonds from Poland, Indonesia and Brazil were bought later in the year. Several attractive new issues were added as well. Late in the year, the manager moved to a long position in the US dollar.

Newton Investment Management Limited January 2025

BNY MELLON TARGETED RETURN BOND FUND

Over the twelve months under review, the USD A (Acc.) share class of the Fund returned 7.88%, net of fees, compared with 2.02% for the Lipper Bond Global USD average.

In the first half of the year, the manager positioned the Fund to benefit from movements in bond markets. Corporate bonds performed well during the first three months, which helped returns, as the manager had anticipated this.

Corporate bonds did less well as the spring went on. Yields on government bonds rose, which meant that their prices fell. This had a knock-on effect on corporate bonds. At this time, the Fund was helped by instruments that protected against weakness in the bond markets.

In the third quarter of 2024, bond markets performed well as central banks cut interest rates. The US Federal Reserve (Fed) cut rates for the first time in more than four years.

The manager positioned the Fund to benefit from lower interest rates, keeping a close eye on the differences in yield among bonds with different maturity dates. This helped the Fund's returns.

Bond markets lost ground in the last three months of the year. This came as the Fed warned that the pace of interest rate cuts would slow in 2025. The Fund's investments in corporate bonds performed well at this time.

Insight North America LLC January 2025

BNY MELLON U.S. MUNICIPAL INFRASTRUCTURE DEBT

Over the twelve-month period under review, the Fund's USD C (Acc.) share class returned 2.15%, compared with a return of 1.34% for its custom benchmark comprising 50% Bloomberg U.S. Municipal Bond TR Index, 50% Bloomberg Taxable U.S. Municipal Bond TR Index.

The Fund's positive return was helped by the careful management of its holdings in US municipal bonds. These are bonds that are issued by local county and state governments to fund infrastructure projects.

Municipal bonds had a tough start to the year as investors feared that US interest rates would stay high. But these bonds rallied in the early summer as inflation fell back. The manager focused on sectors that benefit from the strength of the US economy, such as airports and transport. This worked well.

In the autumn, municipal bonds made strong gains as the Federal Reserve (Fed) cut US interest rates for the first time in over four years. Later in the year, the Fed warned that the pace of interest rate cuts was likely to slow in 2025. Municipal bonds weakened as a result.

The manager favoured municipal bonds within the most economically important and populous states, such as California, New York and Texas.

Insight North America LLC January 2025

RESPONSIBLE HORIZONS EM DEBT IMPACT FUND

In the twelve months under review, the Fund's USD W (Accumulation) share class rose by 5.86%, net of fees, versus 5.41% for the JP Morgan EM Credit Green, Social and Sustainability Bond Diversified Index (USD Hedged).

The Fund's investments in emerging market government bonds contributed to this positive result. Corporate bonds (those issued by a company) helped boost returns, too. Bonds issued by banks were especially helpful.

In the first six months of the year, the manager's choices about which sectors and countries to invest in helped the Fund do well. Both investment grade and lower-quality high yield emerging market corporate bonds did better than their developed market counterparts. Emerging markets were boosted by GDP growth that was stronger than that of

RESPONSIBLE HORIZONS EM DEBT IMPACT FUND cont'd

developed markets. Interest rate cuts and good performance from emerging market corporate bonds helped too.

During the autumn months, the Fund's investments in Central and Eastern European markets lost ground. Holding fewer Middle Eastern bonds than the index was unhelpful, too. In the last three months of the year, the Fund's holdings in Romania weakened. Bonds from Cote D'Ivoire and Poland were also a drag on performance.

The Fund's holdings are aligned with all 17 UN Sustainable Development Goals. Taking a long-term view, the manager will keep a clear focus on investments in renewable energy and telecommunications infrastructure. The manager believes both these sectors could offer attractive investment opportunities in the next three to five years.

Insight Investment Management (Global) Limited January 2025

RESPONSIBLE HORIZONS EURO CORPORATE BOND FUND

In the twelve months under review, the Fund's Euro W (Acc.) share class returned 5.32%, net of fees, versus 4.73% for the Bloomberg Euro Aggregate Corporate TR Index.

The Fund benefited from the close eye the manager kept on investments in corporate bonds (bonds issued by companies as opposed to governments). These holdings were adjusted as the market moved, and this helped the Fund to make a positive return.

The outlook for economic growth improved in the first few months of the year, which boosted corporate bond markets. The manager positioned the Fund's holdings to benefit from these conditions, and this worked well.

Corporate bond markets made further gains as inflation fell and the European Central Bank cut interest rates in the second half of the year.

The manager's choice of individual bonds to invest in worked less well during the third quarter. In the fourth quarter, a preference for bonds issued by banks, instead of energy companies, boosted returns. The manager increased the Fund's holdings in certain banks.

Insight Investment Management (Global) Limited January 2025

RESPONSIBLE HORIZONS EURO IMPACT BOND FUND

Over the twelve months under review, the Fund's Euro W (Acc.) share class returned 4.91%, net of fees, compared with 5.00% for the Bloomberg MSCI Euro Corporate Green Bond Index.

The Fund's returns were helped by the manager's choice of green corporate bonds. These are bonds that are issued to provide a key source of funding for projects related to the climate and other aspects of the environment.

Throughout the year, the manager identified opportunities in new bond issues, adding holdings in utilities, construction firms and banks that lend to green projects.

The Fund's investments in other sectors and industries were less helpful over the year.

Close management of the Fund's investments proved helpful. The manager adjusted the Fund's positions as the outlook changed for both interest rates and inflation.

After inflation fell back in the spring, the manager positioned the Fund to benefit from lower interest rates. This came to pass as the European Central Bank cut its key deposit rate four times.

The manager kept up the Fund's commitment to making a positive impact on the environment. This meant that the Fund stayed focused on green bonds issued by providers of renewable energy, less carbon-intensive transport firms and businesses providing products and services that save energy.

Insight Investment Management (Global) Limited January 2025

MULTI ASSET

BNY MELLON GLOBAL REAL RETURN FUND (EUR)

In the twelve-month period under review, the Fund's Euro A share class returned 6.55%, net of fees, compared with a return of 3.63% for the 1 Month EURIBOR + 4% benchmark, both in euro terms.

The Fund's positive return for the year was driven by its return-seeking core. This consists of shares, bonds issued by companies and alternative investments. Of these, shares did the best, with good performance from holdings in companies that were benefiting from optimism about artificial intelligence. Among these were Nvidia and TSMC. Detractors included Nestlé, on disappointing results, and Samsung Electronics, on sluggishness in its core market and competition from China.

Alternatives detracted from the Fund's returns. Although some of the Fund's alternative assets worked well, renewable energy and commodities were weak over the year.

The Fund's stabilising layer, which aims to reduce volatility, detracted from returns. The Fund had derivatives in place to protect against falls in share prices, but these instruments hurt performance as stocks did well in 2024. On the other hand, cash and gold helped the Fund's returns. As central banks cut interest rates and geopolitical concerns persisted, gold had its best year since 2010.

Over the year, the manager reduced the size of the Fund's return-seeking core. In government bonds, the manager increased the Fund's sensitivity to interest rates slightly. This came as the US Federal Reserve indicated that US interest rates would stay higher for longer.

Newton Investment Management Limited January 2025

BNY MELLON GLOBAL REAL RETURN FUND (GBP)

Over the twelve-month period under review, the Fund's Sterling C (Inc.) share class returned 6.35%, compared with a return of 4.36% for SONIA (30-day compounded) + 4% benchmark, both in sterling terms.

The Fund's positive return for the year was driven by its return-seeking core. This consists of shares, bonds issued by companies and alternative investments. Of these, shares did the best, with good performance from holdings in companies that were benefiting from optimism about artificial intelligence. Among these were Nvidia and TSMC. Detractors included Nestlé, on disappointing results, and Samsung Electronics, on sluggishness in its core market and competition from China.

Alternatives detracted from the Fund's returns. Although some of the Fund's alternative assets worked well, renewable energy and commodities were weak over the year.

The Fund's stabilising layer, which aims to reduce volatility, had a positive effect on returns, though less so than the core. Here, the holdings in cash and gold helped the Fund's returns. As central banks cut interest rates and geopolitical concerns persisted, gold had its best year since 2010. On the other side, the Fund had derivatives in place to protect

against falls in share prices. These instruments hurt performance as stocks did well in 2024.

Over the year, the manager reduced the size of the Fund's return-seeking core. In government bonds, the manager increased the Fund's sensitivity to interest rates slightly. This came as the US Federal Reserve indicated that US interest rates would stay higher for longer.

Newton Investment Management Limited January 2025

BNY MELLON GLOBAL REAL RETURN FUND (USD)

In the twelve-month period under review, the Fund's USD A share class returned 6.02%, compared with a return of 5.34% for SOFR (30-day compounded) + 4% benchmark, both in US dollar terms.

The Fund's positive return for the year was driven by its return-seeking core. This consists of shares, bonds issued by companies and alternative investments. Of these, shares did the best, with good performance from holdings in companies that were benefiting from optimism about artificial intelligence. Among these were Nvidia and TSMC. Detractors included Nestlé, on disappointing results, and Samsung Electronics, on sluggishness in its core market and competition from China.

Alternatives detracted from the Fund's returns. Although some of the Fund's alternative assets worked well, renewable energy and commodities were weak over the year.

The Fund's stabilising layer, which aims to reduce volatility, had a positive effect on returns, though less so than the core. Here, the holdings in cash and gold helped the Fund's returns. As central banks cut interest rates and geopolitical concerns persisted, gold had its best year since 2010. On the other side, the Fund had derivatives in place to protect against falls in share prices. These instruments hurt performance as stocks did well in 2024.

Over the year, the manager reduced the size of the Fund's return-seeking core. In government bonds, the manager increased the Fund's sensitivity to interest rates slightly. This came as the US Federal Reserve indicated that US interest rates would stay higher for longer.

Newton Investment Management Limited January 2025

BNY MELLON SUSTAINABLE GLOBAL MULTI-ASSET FUND*

In the twelve months under review, the Fund's USD W (Acc.) share class returned 8.72%, net of fees, versus 8.74% for the benchmark a composite comprising 60% MSCI AC World NR Index and 40% JP Morgan Global Government Bond Index TR Index

The manager's decision to invest more in shares than in bonds (debt issued by governments and companies) had a positive effect on returns. This is because stocks did better than bonds over the year. The small holding in commodities was also helpful.

MULTI ASSET cont'd

BNY MELLON SUSTAINABLE GLOBAL MULTI-ASSET FUND* cont'd

Although the manager's choice of stocks detracted from returns, this was offset by good positioning by sector. Being more invested than the benchmark in information technology, financials and consumer services helped the Fund's performance. The Fund also benefited from being less invested in consumer staples than the benchmark, and from avoiding energy stocks.

The Fund's best-performing shares were from SAP, a German software company. Its results were consistently strong. Hipgnosis Song Fund and Trane Technologies also did well.

Among the main detractors were technology stocks Nvidia and Broadcom, which performed well but were not held by the Fund. Battery maker Samsung SDI was the main negative among the Fund's stocks.

The Fund's overseas bonds made a strong contribution to returns. The manager's choice of UK bonds hurt returns slightly.

Newton Investment Management Limited January 2025

BNY MELLON SUSTAINABLE GLOBAL REAL RETURN FUND (EUR)*

Over the period from 1 January 2024 until the Fund's closure on 10 December 2024, the Fund's Euro W (Acc.) share class produced a return of 7.19%, net of fees, versus a return of 7.04% for the EURIBOR 1 Month + 4% benchmark.

The Fund's positive return was driven by its 'return-seeking' core. This consists of shares, bonds issued by companies, and alternative investments. Of these, shares did the best, with good performance from holdings in companies that were benefiting from optimism about artificial intelligence. Among these were Nvidia and Taiwan Semiconductor. Detractors included Neste Corporation, on disappointing results, and Samsung Electronics, on sluggishness in its core market and competition from China.

Alternatives detracted from the Fund's returns. Although some of the Fund's alternative assets worked well, renewable energy, energy storage and commodities were weak over the period.

The Fund's stabilising layer, which aims to reduce volatility, detracted from returns. The Fund had derivatives in place to protect against falls in share prices, but these instruments hurt performance as stocks did well in 2024. On the other hand, cash and gold helped the Fund's returns. As central banks cut interest rates and geopolitical concerns persisted, gold had its best year since 2010.
