BNY MELLON GLOBAL FUNDS, PLC

NOTES TO THE FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies and estimation techniques applied in the preparation of these financial statements are set out below:

STATEMENT OF COMPLIANCE

The financial statements for the financial year ended 31 December 2024 have been prepared in accordance with Financial Reporting Standard ("FRS") 102: "The Financial Reporting Standard applicable in the United Kingdom and the Republic of Ireland" ("FRS 102") and Irish statute comprising the Act, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the "UCITS Regulations") and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations").

BASIS OF PREPARATION

The financial statements have been prepared on a going concern basis for the Company under the historical cost convention as modified by the revaluation of financial assets and liabilities held at fair value through the profit or loss.

The format and certain wordings of the financial statements has been adapted from those contained in the Act, as amended, so that, in the opinion of the Directors, they more appropriately reflect the nature of the Company's business as an investment fund.

The Company has availed of the exemption available to open-ended investment funds under Section 7 "Statement of Cash Flows" of FRS 102 not to prepare a cash flow statement on the basis that substantially all of the Company's investments are highly liquid and carried at fair value, and the Company provides a statement of changes in net assets attributable to redeemable participating shareholders.

CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

The preparation of financial statements requires the use of certain critical accounting estimates. It also requires the Directors to exercise its judgement in the process of applying the Company's accounting policies. Management makes estimates and assumptions concerning the future. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities are discussed below within "Financial assets and liabilities at fair value through profit or loss – Fair value estimation". The Company based its assumptions and estimates on parameters available when the financial statements were prepared. However, existing circumstances and assumptions about future developments may change due to market changes or circumstances arising beyond the control of the Funds. Such changes are reflected in the assumptions when they occur and are recognised prospectively.

FOREIGN CURRENCY TRANSLATION - FUNCTIONAL AND PRESENTATION CURRENCY

Items included in the Company's financial statements are measured using the currency of the primary economic environment in which each Fund operates (the "functional currency"). The functional currency of each Fund has been evaluated by the Board of Directors based on the currency that most faithfully represents the economic effects of the underlying transactions, events, investors' base and conditions. The financial statements of the Company are presented in US dollar, which is the Company's presentational currency.

The functional and presentation currency of the Funds are US dollar, Euro, Sterling or Japanese yen as noted in the Statement of Financial Position.

Foreign currency assets and liabilities, including net assets attributable to redeemable participating shareholders are translated into the functional currency using the closing rate applicable at the financial year end date. Foreign currency income and expenses in the Statement of Comprehensive Income are translated into the functional currency at the exchange rates prevailing at the dates of the transactions. Proceeds from redeemable participating shares issued and the cost of redeemable participating shares redeemed are also translated into the functional currency at the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses arising from transactions and translations are presented in the Statement of Comprehensive Income within "net gains/losses on financial assets/ liabilities at fair value through profit or loss".

For Company aggregation purposes, all assets and liabilities together with income and expenses for all classes of shares are translated into US dollar using the closing rate for assets and liabilities and the average rate for income and expenses including subscriptions and redemptions, as this is the currency of the primary economic environment in which the Company operates. A currency adjustment arises from the re-translation of the opening net assets at the financial year end exchange rates, as disclosed in the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders. This method of allocation has no effect on the value of net assets allocated to the individual Funds.

FINANCIAL ASSETS AND LIABILITIES AT FAIR VALUE THROUGH PROFIT OR LOSS - CLASSIFICATION

This category has two sub-categories: financial assets and liabilities held for trading, and those designated at fair value through profit or loss at inception.

A financial asset or liability is classified as held for trading if it is acquired or incurred principally for the purpose of selling or repurchasing in the near term or if on initial recognition is part of a portfolio of identifiable financial investments that are managed together and for which there is evidence of a recent actual pattern of short-term profit taking. Derivatives are also categorised as held for trading.

Financial assets and liabilities designated at fair value through profit or loss at inception are financial instruments that are not classified as held for trading but are managed, and their performance is evaluated on a fair value basis in accordance with the investment strategy of the Funds as documented in the prospectus.

FINANCIAL ASSETS AND LIABILITIES AT FAIR VALUE THROUGH PROFIT OR LOSS – RECOGNITION, DERECOGNITION AND MEASUREMENT

Regular purchases and sales of investments are recognised on the trade date – the date on which the Company commits to purchase or sell the investment. Financial assets and liabilities at fair value through profit or loss are initially recognised at fair value. Transaction costs are expensed as incurred in the Statement of Comprehensive Income.

Financial assets and liabilities are derecognised when the rights to receive cash flows from or pay cash flows for the investments have expired or the Company has transferred substantially all risks and rewards of ownership.

Subsequent to initial recognition, all financial assets and liabilities at fair value through profit or loss are measured at fair value. Gains and losses arising from changes in the fair value of the "financial assets or financial liabilities at fair value through profit or loss" category are presented in the Statement of Comprehensive Income within "net gains/ (losses) on financial assets/liabilities at fair value through profit or loss" in the financial year in which they arise using the average cost method.

For hedge share class level forward foreign currency contracts, the realised and unrealised gains or losses are allocated solely to the relevant share classes. The unrealised gains or losses on hedging activities are reflected in the "financial assets or financial liabilities at fair value through profit or loss" category in the Statement of Financial Position.

FINANCIAL ASSETS AND LIABILITIES AT FAIR VALUE THROUGH PROFIT OR LOSS - FAIR VALUE ESTIMATION

The fair value of financial assets and liabilities traded in active markets (such as publicly traded derivatives and trading securities) are based on quoted market prices at the financial year end date. In accordance with FRS 102, the Company has applied the recognition and measurement provisions of International Accounting Standards No. 39 "Financial Instruments: Recognition and Measurement" as adopted for use in the European Union. Accordingly, the quoted market price used for financial assets held is the mid-market price. When the Company holds derivatives with offsetting market risks, it uses mid-market prices as a basis for establishing fair values for the offsetting risk positions and applies this mid-market price to the net open position, as appropriate.

If a significant movement in fair value occurs subsequent to the valuation point of the Funds on the financial year end date, valuation techniques will be applied to determine the fair value. A significant event is any event that occurs after the last market price for a security, close of market or close of the foreign exchange, but before the Funds' valuation time that materially affects the integrity of the closing prices for any security, instrument, currency or securities affected by that event so that they cannot be considered readily available market quotations.

The fair value of financial assets and liabilities that are not traded in an active market (for example over-the-counter derivatives) is determined by using valuation techniques. The Company uses a variety of methods and makes assumptions that are based on market conditions existing at each reporting date. Valuation techniques used include the use of comparable recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis, option pricing models and other valuation techniques commonly used by market participants making the maximum use of market inputs and relying as little as possible on entity-specific inputs.

The carrying value less impairment provision of other receivables and payables are assumed to approximate their fair values.

FINANCIAL ASSETS AND LIABILITIES AT FAIR VALUE THROUGH PROFIT OR LOSS - FAIR VALUE ESTIMATION cont'd

The main valuation techniques of the Company are as follows:

- (a) Financial assets and liabilities listed and regularly traded on a recognised exchange and for which market quotations are readily available or traded on over-the-counter markets shall be valued at the mid-market price accordingly on the principal exchange in the market for such investment.
- (b) If the financial assets and liabilities are listed on several recognised exchanges, the mid-market price on the recognised exchange, which, in the opinion of the Directors in consultation with the relevant Investment Manager, constitutes the principal market for such assets, will be used.
- (c) If for specific financial assets or liabilities the mid-market price referred to in (a) or (b) above is not available or does not, in the opinion of the Directors in consultation with the relevant Investment Manager, reflect a fair or appropriate value, the value shall be calculated by alternative methods with care and in good faith by the Directors, as appropriate, approved for such purpose by the Bank of New York Mellon SA/NV, Dublin Branch (the "Depositor"), in sonsultation with the relevant Investment Manager, with a view to establishing the probable realisation value for such assets.
- (d) In the event that any financial assets or liabilities are not listed or dealt on any recognised exchange, such assets shall be valued by the Directors with care and in good faith and in consultation with the relevant Investment Manager at the probable realisation value. Such probable realisation value may be determined by using a quotation from a broker.
- (e) Cash and other liquid assets are valued at their face value with interest accrued, where applicable.
- (f) Units or shares in collective investment schemes (other than those valued pursuant to (a) or (b) above), are valued at the latest available net asset value, as a best estimate of fair value, of the relevant collective investment scheme.
- (g) Derivative instruments dealt on a market are fair valued at the settlement price for such instruments on such market. Where such derivative instruments are not dealt on a market, their value shall be the daily quotation from independent pricing service or market makers.
- (h) Forward foreign currency contracts are fair valued by an independent price source by reference to the price at which a new forward contract of the same size and maturity could be undertaken.
- (i) Initial margin deposits are made upon entering into futures contracts and are generally made in cash or cash equivalents. Futures contracts are fair valued based upon their quoted daily settlement prices. Changes in the value of open futures contracts are recognised as unrealised gains or losses on futures contracts until the contracts are terminated, at which time the realised gains and losses are recognised. Unrealised gains or losses on futures contracts are shown in the Schedule of Investments. The variation margin receivable or payable at the reporting date is reported as an asset or liability, as applicable, in the Statement of Financial Position.
- (j) The premium on purchased put options exercised is subtracted from the proceeds of the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on purchased call options exercised is added to the cost of the securities or foreign currencies purchased. Premiums paid from the purchase of options, which expire unexercised are treated as realised losses. The premium on written call options exercised is added to the proceeds from the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on written put options exercised is subtracted from the cost of the securities or foreign currencies purchased. Premiums received from written options, which expire unexercised are treated as realised gains.
- (k) Interest rate, credit default and total return swap contracts are fair valued daily based upon quotations from independent pricing service or market makers and the change in the value if any is recorded as unrealised gains or losses. Payments received or made as a result of the contract termination are recognised net of any upfront payment as realised gains or losses. Income on over-the-counter derivatives accrues to the Funds and is not subject to any returns sharing arrangements with BNY Mellon Fund Management (Luxembourg) S.A (the "Manager") or any other parties.
- (l) Commercial paper and time deposits are valued at amortised cost, as a best estimate of fair value. The Company may invest in financial instruments that are not traded in an active market, whereby fair value may be determined by applying valuation techniques, such as discounted cash flow analysis and other valuation techniques used by market participants.
- (m) Exchange traded funds are fair valued based upon quotations of the net asset value per share, as a best estimate of fair value, from independent pricing sources.

FINANCIAL ASSETS AND LIABILITIES AT FAIR VALUE THROUGH PROFIT OR LOSS - FAIR VALUE ESTIMATION contid

- (n) Certain Funds may enter into "TBA" (To Be Announced) purchase commitments to purchase securities for a fixed unit price at a future date beyond customary settlement time. Although the unit price has been established, the principal value has not been finalised. The Funds hold and maintain until settlement date, cash or high grade debt obligations in an amount sufficient to meet the purchase price, or the Funds may enter into offsetting contracts for the forward sale of other securities they own. Income on the securities will not be earned until settlement date. TBA purchase commitments may be considered securities in themselves and involve a risk of loss if the value of the security to be purchased declines prior to settlement date, which is in addition to the risk of decline in the value of the Funds' other assets. Unsettled TBA purchase commitments are valued at the current market value of the underlying securities. Although the Funds may enter into TBA purchase commitments with the intention of acquiring securities for their portfolios or for delivery pursuant to option contracts that they have entered into, the Funds may dispose of a commitment prior to settlement if the Investment Manager deems it the appropriate action.
- (o) Equity swaps are priced in accordance with the pricing basis for the underlying equity positions. Finance charges on equity swaps are accrued daily, reset on a monthly basis and subject to settlement on disposal of equity swaps. Income on equity swaps accrues to the Funds and is not subject to any returns sharing arrangements with the Manager or any other parties.
- (p) Loans are fair valued based on valuations provided by the pricing vendor Markit. Fees earned or paid and the receipt of payments of principal are recorded as a component of "net gains/(losses) on financial assets/liabilities at fair value through profit or loss" in the Statement of Comprehensive Income. Where Markit is unable to provide a value for a loan, the loan is fair valued based on a quotation obtained from a loan house. Unsettled loans are fair valued based on the agreed purchase price until a valuation from pricing vendor becomes available.
- (q) Certain Funds may use Participatory Notes ("P-Notes") that are either listed or traded on eligible markets. P-Notes provide the Funds with the opportunity for economic exposure to specific equities in restricted or emerging markets, i.e. India, Sri Lanka, Vietnam, Bangladesh, China and Brazil, where owning local equity or equity related securities might be less efficient that the use of P-Notes, leading to a reduction in costs. P-Notes are valued by reference to the mid-market price of the underlying security.

LOANS

Certain Funds of the Company may invest in direct debt instruments which are interests in amounts owed to lenders or lending syndicates by corporate, governmental, or other borrowers. A Fund's investments in loans may be in the form of participations in loans or assignments of all or a portion of loans from third parties. A loan is often administered by a bank or other financial institution (the "lender") that acts as agent for all holders. The agent administers the terms of the loan, as specified in the loan agreement. A Fund may invest in multiple series or tranches of a loan, which may have varying terms and carry different associated risks. A Fund generally has no right to enforce compliance with the terms of the loan agreement with the borrower. As a result, a Fund may be subject to the credit risk of both the borrower and the lender that is selling the loan agreement.

When a Fund purchases assignments from lenders, it acquires direct rights against the borrower of the loan. When investing in a loan, a Fund has the right to receive payments of principal, interest and any fees to which it is entitled only from the lender selling the loan agreement and only upon receipt of payments by the lender from the borrower.

RECEIVABLES

Receivables include cash and cash equivalents, income receivable, receivable for investments sold, expense cap receivable from the manager, margins on derivatives contracts, subscriptions receivable and other receivables. These amounts are recognised initially at fair value and subsequently measured at amortised cost.

FINANCIAL LIABILITIES AT AMORTISED COST

Financial liabilities at amortised cost include bank overdraft, payable for investments purchased, redemptions payable, expenses payable, performance fees payable, margins on derivatives contracts, cash collateral payable to broker, income payable on swaps, finance charges payable on swaps, tax payable and other payables. These amounts are recognised initially at fair value and subsequently measured at amortised cost.

OFFSETTING FINANCIAL INSTRUMENTS

Financial assets and liabilities are offset and the net amount reported in the Statement of Financial Position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

CROSS INVESTMENT

As at 31 December 2024, BNY Mellon Absolute Return Bond Fund, BNY Mellon Absolute Return Credit Fund, BNY Mellon Emerging Markets Corporate Debt Fund, BNY Mellon Euroland Bond Fund, BNY Mellon European Credit Fund and Responsible Horizons Euro Corporate Bond Fund invest in other Funds of the Company (31 December 2023: BNY Mellon Absolute Return Bond Fund, BNY Mellon Absolute Return Credit Fund, BNY Mellon Euroland Bond Fund and BNY Mellon European Credit Fund). These cross investments have been eliminated in the financial statements of the Company. Where a Fund invests in another Fund or Funds of the Company, these cross investments have been deducted from the total net asset value when calculating the management fees payable. The realised gains and losses, including movements in unrealised gains and losses, on the cross investments have been eliminated in the Total Company amounts disclosed in the Statement of Comprehensive Income.

CASH AND CASH EQUIVALENTS AND BANK OVERDRAFTS

Cash and cash equivalents are valued at face value, with interest accrued where applicable at relevant valuation point on the relevant business day. Cash equivalents include deposits held at call with banks and other short-term investments in an active market with original maturities of three months or less. Bank overdrafts are shown separately in the Statement of Financial Position. Unrealised gains and losses on spot currency contracts are incorporated within the balances for cash and cash equivalents and bank overdraft, respectively.

COLLATERAL

Cash collateral provided by the Funds is identified in the Statement of Financial Position as "margins on derivatives contracts" and is not included as a component of cash and cash equivalents. Cash collateral received by the Funds is identified in the Statement of Financial Position as "cash collateral received from broker". The obligation to return the cash collateral is identified in the Statement of Financial Position as "cash collateral payable to broker". Cash collateral received is restricted and does not form part of the Funds' cash and cash equivalents. For collateral other than cash, if the party to whom the collateral is provided has the right by contract or custom to sell or re-pledge the collateral, the Funds classify that asset in its Statement of Financial Position separately from other assets and identify the asset as pledged collateral. Where the party to whom the collateral is provided does not have the right to sell or re-pledge, a disclosure of the collateral provided is made in the Schedule of Investments, as indicated by a "*" tick mark.

TRANSACTION COSTS

Transaction costs are costs incurred to acquire financial assets or liabilities at fair value through profit or loss. They include fees and commissions paid to agents, advisers, brokers and dealers. In respect of equities and financial derivative instruments, the transaction costs, when incurred, are immediately recognised in the Statement of Comprehensive Income as an expense and are included in the "net gains/(losses) on financial assets/liabilities at fair value through profit or loss". In respect of all other securities, the bid ask spread is embedded in the purchase and sale price of the securities and cannot be separately verified or disclosed.

DIVIDEND INCOME

Dividend income from financial assets at fair value through profit or loss is recognised in the Statement of Comprehensive Income within "dividend income" when the right of the Funds to receive payments is established. Dividend income is shown gross of any non-recoverable withholding taxes.

DIVIDEND EXPENSE

Interest on short equity swaps is recognised in the Statement of Comprehensive Income as "Dividend expense", which may be subject to change, dependant on periodic resetting and/or final disposal of underlying swap instruments.

INTEREST INCOME

Interest income on interest bearing financial instruments is shown as a component of "net gains/(losses) on financial assets/liabilities at fair value through profit or loss". Bank interest income is accounted for on a cash receipts basis.

TAXATION

Under current law and practice, there is no income, gains or other taxes payable by the Funds. The Funds currently incur withholding taxes imposed by certain countries on investment income and capital gains. Withholding taxes are disclosed separately in the Statement of Comprehensive Income and net of any tax credits.

Certain Funds accrue for capital gains tax on net realised and unrealised gains on investments. The capital gains tax is recorded in accordance with the tax regulation of each relevant country and rates on Irish investors. The capital gains tax expense and the amounts payable at the financial year end are reflected in the "withholding taxes on dividends and other investment income" and "tax payable" figures in the Statement of Comprehensive Income and the Statement of Financial Position, respectively.

EXPENSES

Expenses are accounted for on an accruals basis. Any costs associated with the termination of a Fund are paid for by the Manager.

SECURITIES LENDING

The Company has entered into a securities lending agreement (as amended, assigned, novated and assumed) with The Bank of New York Mellon SA/NV and the Depositary. The Company can lend securities with a value of up to 100% of any one line of stock, to borrowers approved by The Bank of New York Mellon. The Company receives securities, financial instruments or other assets as collateral against the loaned securities. The Company does accept cash as collateral but does not engage in cash collateral reinvestment. Collateral held (and pending) will not be less than 102% of the value of the securities on loan. Securities lending income is accounted for on a cash receipts basis. Details of the securities lending position at the financial year end are contained in Note 14 to the financial statements.

DISTRIBUTIONS TO REDEEMABLE PARTICIPATING SHAREHOLDERS

Distributions to redeemable participating shareholders are recognised as "finance costs" in the Statement of Comprehensive Income.

REDEEMABLE PARTICIPATING SHARES

The Company issues multiple classes of redeemable participating shares within each Fund which are redeemable at the holder's option and do not have identical rights. Such shares are classified as financial liabilities.

Redeemable participating shares can be put back to the Fund at any time for cash equal to a proportionate share of the Fund's net asset value attributable to the share class. The redeemable participating shares are carried at the redemption amount that is payable at the financial year end date if the holder exercises the right to put the share back to the Fund.

Redeemable participating shares are issued and redeemed at the holder's option at prices based on the Fund's net asset value per share at the time of issue or redemption. The Fund's net asset value per share is calculated by dividing the net assets attributable to the holders of each class of redeemable participating shares with the total number of outstanding redeemable participating shares for each respective class in accordance with the provisions of the prospectus in determining the net asset value per share for subscriptions and redemptions.

DILUTION ADJUSTMENT

To mitigate the effects of dilution, the Directors may, at their discretion, make a dilution adjustment to the net asset value per share. The Directors will retain the discretion in relation to the circumstances in which to make such a dilution adjustment.

The decision to make a dilution adjustment will depend on the volume of subscriptions or redemptions of shares in the Fund. The Directors may in their discretion make a dilution adjustment if, in their opinion, the existing shareholders, in the case of subscriptions, or remaining shareholders, in the case of redemptions, might otherwise be adversely affected. In particular, the dilution adjustment may be made in the following circumstances:

- where a Fund is in continual decline (i.e. is experiencing a net outflow of redemptions);
- if the Fund is experiencing large levels of net subscriptions or net redemptions relevant to its size; and
- in any other circumstances where the Directors believe it will be in the interests of shareholders to make a dilution adjustment.

The dilution adjustment will involve adding to the net asset value per share when the Fund is in a net subscription position, and deducting from the net asset value per share when the Fund is in a net redemption position, such figure as the Directors consider represents an appropriate figure to meet transaction costs, including but not restricted to market spreads, brokerage fees and taxes, to preserve the value of the underlying assets of the relevant Fund and in any other circumstances where the Directors believe it will be in the interests of the shareholders. The resultant amount will be the price rounded to such number of decimal places, as the Directors deem appropriate.

DILUTION ADJUSTMENT cont'd.

Where a dilution adjustment is made, it will increase the price at which shares shall be issued when there are net subscriptions and decrease the price at which shares shall be redeemed when there are net redemptions. The price at which each class of share shall be issued or redeemed (as appropriate) will be calculated separately but any dilution adjustment will in percentage terms affect the price of each class in an identical manner. Such dilution adjustment will not exceed 2% of the Fund's net asset value under normal market conditions; however, the Directors may temporarily increase the above mentioned maximum dilution adjustment if this is deemed necessary under exceptional market conditions and in the best interests of investors. As dilution is directly related to the inflows and outflows from a Fund, it is not possible to accurately predict whether dilution will occur at any future point in time. Consequently, it is also not possible to accurately predict how frequently the dilution adjustment will be applied.

2. SHARE CAPITAL

AUTHORISED SHARES

The initial authorised share capital of the Company is EUR 38,092 divided into 38,092 subscriber shares of EUR 1.00 each and 25,000,000,000 at no par value initially designated as unclassified shares. The unclassified shares are available for issue as participating shares.

SUBSCRIBER SHARES

The 38,092 subscriber shares at EUR 1.00 each were all issued as fully paid and are held by the Manager. The subscriber shares do not entitle the holders to any dividend and on a winding up, entitle the holders to receive the amount paid up thereon but not otherwise to participate in the assets of the Company. The subscriber shares do not form part of the net asset value of the Company and are thus disclosed in the financial statements by way of this note only. In the opinion of the Directors, this disclosure reflects the nature of the Company's investment business.

REDEEMABLE PARTICIPATING SHARES

Redeemable participating shares carry the right to a proportionate share in the assets of the Funds and the holder of the share is entitled to one vote each on a poll. Shares are redeemed by shareholders at prices based on the value of net assets of the relevant class.

The activity on redeemable participating shares for the financial year ended 31 December 2024 is as follows:

| | | | Shares in issue at beginning of financial | Shares issued during the financial | Shares redeemed during the financial | Shares in issue at end of financial |

3. MANAGEMENT AND PERFORMANCE FEES

MANAGEMENT FEES

The Manager is entitled to receive out of the assets of a Fund an annual management fee in respect of each class, accruing daily and payable monthly in arrears at an agreed annual rate as set out in the relevant supplement of the prospectus. The table below outlines the range of annual management fee rates for each share class:

| Share Class | Rate | Share Class | Rate |
|-------------|---------------|-------------|---------------|
| Class A | 0.40% - 2.00% | Class N | 0.90% |
| Class B | 0.75% - 1.50% | Class R | 1.00% |
| Class C | 0.30% - 1.00% | Class S | 0.50% |
| Class E | 0.08% - 0.85% | Class SY | 0.90% - 1.00% |
| Class F | 0.35% | ClassT | 0.50% |
| Class G | 0.30% - 1.00% | Class U | 0.75% |
| Class H | 0.40% - 2.00% | Class W | 0.20% - 0.75% |
| Class I | 0.45% - 1.00% | Class X | None |
| Class J | 1.40% - 1.50% | ClassY | None |
| Class K | 0.30% - 1.40% | Class Z | 0.22% - 0.65% |
| Class L | 0.14% - 0.30% | | |

[^] This share class was launched or closed during the financial year.

3. MANAGEMENT AND PERFORMANCE FEES cont'd.

MANAGEMENT FEES (continued)

Management fees accrued to the Manager and the amounts due at the financial year end are included in the "Management Fee" and "Expenses Payable" figures in the Statement of Comprehensive Income and the Statement of Financial Position, respectively.

PERFORMANCE FEES

In addition to the annual management fee, the Manager is entitled to an annual performance fee (the "Performance Fee") in respect of certain classes of the following Funds, as detailed in the relevant supplement of the prospectus. The table below outlines the performance fee rates and benchmarks of the respective share class:

| Fund | Benchmark | Rate |
|---|--|------------------------------------|
| BNY Mellon Absolute Return Bond Fund | 3 month EURIBOR / SOFR (90-day compounded) / SONIA (90-day compounded) / SARON (90-day compounded) / TONAR (90-day compounded) | Class D, R, S and T - 10.00% |
| BNY Mellon Absolute Return Equity Fund* | 1 month EURIBOR / SOFR (30-day compounded) / SONIA (30-day compounded) / SARON (30-day compounded) | Class D, R, S, T and U - 15.00% |
| BNY Mellon Absolute Return Global Convertible Fund | 1 month EURIBOR / SOFR (30-day compounded) / SONIA (30-day compounded) / SARON (30-day compounded) / TONAR (30-day compounded) | Class D, F, R, S, T and U - 15.00% |
| BNY Mellon Dynamic U.S. Equity Fund [^] | S&P 500 Net Total Return Index in USD terms | Class D, F, S, T and U - 10.00% |
| BNY Mellon Global Leaders Fund [^] | MSCI World Index (with net dividends reinvested) in Euro/USD terms | Class U - 20.00% |
| BNY Mellon Long-Term Global Equity Fund | MSCI World Daily (with net dividends reinvested) in Euro/USD terms | Class S - 15.00% |

^{*} This Fund closed in financial reporting year 2023.

Performance fees accrued to the Manager and the amounts due at the financial year end are included in the "Performance Fee" and "Performance Fees Payable" figures in the Statement of Comprehensive Income and the Statement of Financial Position, respectively.

[^] This Fund did not have issued share classes entitled to a performance fee, in the current or prior financial years.

3. MANAGEMENT AND PERFORMANCE FEES cont'd.

PERFORMANCE FEES (continued)

4. ADMINISTRATION FEES

The Manager pays to BNY Mellon Fund Services (Ireland) Designated Activity Company (the "Administrator") out of the assets of each Fund an annual fee which shall accrue daily and be payable monthly in arrears as detailed in the prospectus. The annual fee accrued to the Administrator is attributable to all share classes and represents a deduction from the net asset value of the Fund and, accordingly, each class. Fees accrued to the Administrator and the amounts due at the financial year end are included in the "Operating Expenses" and "Expenses Payable" figures in the Statement of Comprehensive Income and the Statement of Financial Position, respectively.

5. DEPOSITARY FEES

The Company pays to the Depositary out of the assets of each Fund an annual fee which shall accrue daily and be payable monthly in arrears as detailed in the prospectus. The annual fee accrued to the Depositary is attributable to all share classes and represents a deduction from the net asset value of the Fund and, accordingly, each class. Fees accrued to the Depositary and the amounts due at the financial year end are included in the "Depositary Fee" and "Expenses Payable" figures in the Statement of Comprehensive Income and the Statement of Financial Position, respectively.

6. EXPENSE CAP

From time to time, for certain Funds, an expense cap is introduced, whereby expenses exceeding an agreed level of a relevant Fund's net asset value are borne by BNY Mellon Fund Management (Luxembourg) S.A. (the "Manager") or its affiliate. The expense cap is then applied to the relevant Fund until such time as the Board agrees to amend the relevant expense cap. At the date of these financial statements, the following expenses caps are in place:

| Fund | Agreed Total Expense Ratio ("TER") Limit |
|--|--|
| BNY Mellon Absolute Return Credit Fund | TER limit of Annual Management Charge ("AMC") plus 15 basis points; increased to plus 18 basis points, effective 1 October 2024. |
| BNY Mellon Absolute Return Global Convertible Fund | TER limit of AMC plus 15 basis points |

The total expenses borne by the Manager, for Sub-Funds subject to an expense cap arrangement, during the financial year ended 31 December 2024 was USD 3,157,168 (31 December 2023: USD 2,827,631).

^{*} Please refer to Note 19 of the financial statements.

7. OPERATING EXPENSES

The operating expenses in the Statement of Comprehensive Income comprise of the following:

| | 31 December 2024 | 31 December 2023 |
|-----------------------------|------------------|------------------|
| Expense | USD | USD |
| Administration fee | 10,421,966 | 10,829,456 |
| Audit and taxation services | 850,674 | 858,291 |
| Directors' fee | 133,663 | 119,770 |
| Other expenses | 5,411,294 | 3,745,329 |
| Total operating expenses | 16,817,597 | 15,552,846 |

Fees and expenses charged for the services of the statutory auditors, Ernst & Young, in respect of the financial year are as follows:

| | 31 December 2024 | 31 December 2023 |
|--|------------------|------------------|
| | USD | USD |
| Statutory audit of financial statements (Ireland) | 572,079 | 605,835 |
| Other non-audit services - Investor Tax Reporting (United Kingdom) | 122,684 | 151,722 |
| Other non-audit services - Investor Tax Reporting (Austria) | 155,911 | 100,734 |
| Total | 850,674 | 858,291 |

8. TRANSACTION COSTS

Transaction costs are costs incurred to acquire financial assets or liabilities at fair value through profit or loss and include the bid ask spread, fees and commissions paid to agents, advisers, brokers and dealers.

Transaction costs incurred for the purchases and sales of equities and financial derivative instruments are included in the "net gains/(losses) on financial assets/liabilities at fair value through profit or loss" in the Statement of Comprehensive Income and are detailed in the table below. In respect of all other securities, the bid ask spread is embedded in the purchase and sale price of the securities and cannot be separately verified or disclosed.

9. CASH AND CASH EQUIVALENTS

Cash held by the Company is deposited with The Bank of New York Mellon SA/NV, Dublin Branch and held by counterparties (Barclays Bank Plc, BNP Paribas, Canadian Imperial Bank of Commerce, Citigroup Global Markets Limited, Goldman Sachs & Co. LLC, Goldman Sachs International, HSBC Bank Plc, J.P. Morgan Securities Plc, J.P. Morgan Securities LLC, Lloyds Bank Plc, Morgan Stanley & Co International Plc, Natixis CIB, NatWest Markets Plc, State Street Bank and UBS AG) in respect of collateral and margin requirements. Cash balances include cash invested into short-term investment vehicles daily.

Cash account arrangements have been put in place in respect of the Funds as a consequence of the requirements relating to the subscription and redemption collection accounts pursuant to the Central Bank of Ireland (Supervision and Enforcement) Act 2013 (Section 48(i)) Investor Money Regulations 2015 for Fund Service Providers ("Investor Money Regulations").

^{**} This Fund launched or closed in financial reporting year 2023.

> Transaction costs on purchase and sale of bonds are included in the purchase and sale price of the investment, which cannot be practically or reliably gathered and cannot be separately verified or disclosed.

9. CASH AND CASH EQUIVALENTS cont'd.

These cash accounts, held with the Global Sub-Custodian for collection of subscriptions and payment of redemptions and distributions for the Funds, are deemed assets of the Funds. The balances on these cash accounts as at 31 December 2024 and 31 December 2023 are deemed immaterial in respect of the relevant Fund to which they are due, with exception for GBP 267,577 as at 31 December 2023 on BNY Mellon Absolute Return Equity Fund (closed 9 October 2023), USD 122,470 as at 31 December 2024 (31 December 2023: USD 122,352) on BNY Mellon Asian Opportunities Fund, USD 4,812,410 as at 31 December 2024 on BNY Mellon Global Emerging Markets Opportunities Fund (closed 10 December 2024) and EUR 24,053 as at 31 December 2024 (31 December 2023: EUR 23,285) on BNY Mellon Pan European Fund (closed 9 March 2017).

10. TAXATION

Under current law and practice, the Company qualifies as an investment undertaking as defined in Section 739B of the Tax Consolidation Acts, 1997, as amended. On that basis, it is not chargeable to Irish tax on its income and gains.

However, Irish tax may arise on the happening of a "chargeable event". A chargeable event includes any distribution payments to shareholders or any encashment, redemption, cancellation or transfer of shares and the holding of shares at the end of each eight year period beginning with the acquisition of the shares.

No Irish tax will arise on the Company in respect of chargeable events in respect of:

- (a) a shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Company; or the Company has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations; and
- (b) certain exempted Irish resident investors who have provided the Company with the necessary signed statutory declarations.

Distributions, interest and capital gains (if any) received on investments made by the Company may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Company or its shareholders.

The Manager assessed the implications of the OECD's Pillar Two framework which aims to ensure multi-national enterprises ("MNEs") with global revenues above €750 million (or local currency equivalent) pay a minimum tax rate on income within each jurisdiction in which they operate. The framework imposes a Top-Up Tax on profits arising in jurisdictions where the effective tax rate is below 15%. The Manager determined that given the structure of the Company, it is not in scope for Pillar Two.

Certain Funds accrue for Brazilian and Indian capital gains tax on net realised and unrealised gains on investments. As at, 31 December 2024 a capital gains tax payable of USD 29,279 for BNY Mellon Asian Income Fund (31 December 2023: USD 34,405), a capital gains tax payable of USD 307,897 for BNY Mellon Asian Opportunities Fund (31 December 2023: USD 293,332), capital gains tax payable of USD 277,648 for BNY Mellon Brazil Equity Fund (31 December 2023: USD 861,322), a capital gains tax payable of USD Nil for BNY Mellon Global Emerging Markets Opportunities Fund (31 December 2023: USD 113,062), a capital gains tax payable of USD 5,046 for BNY Mellon Global Opportunities Fund (31 December 2023: USD Nil), a capital gains tax payable of USD 48,358 for BNY Mellon Sustainable Global Emerging Markets Fund (31 December 2023: USD 61,718), capital gains tax payable of USD 153,838 for BNY Mellon Sustainable Global Equity Fund (31 December 2023: USD Nil) and a capital gains tax payable of EUR Nil for BNY Mellon Sustainable Global Real Return Fund (EUR) Fund (31 December 2023: EUR 3,865) have been recorded in the Statement of Financial Position.

10. TAXATION cont'd.

For the financial year ended 31 December 2024, a capital gains tax provision credit release of USD 5,125 and capital gains tax expense of USD 13,554 for BNY Mellon Asian Income Fund (31 December 2023: USD 34,405), a capital gains tax expense of USD 283,202 for BNY Mellon Asian Opportunities Fund (31 December 2023: USD 301,433), capital gains tax provision credit release of USD 583,674 and capital gains tax expense of USD 97,703 for BNY Mellon Brazil Equity Fund (31 December 2023: USD 147,383), capital gains tax provision credit release of USD 113,062 and capital gains tax expense of USD 224,973 for BNY Mellon Global Emerging Markets Opportunities Fund (31 December 2023: USD 113,062), capital gains tax expense of USD 5,046 for BNY Mellon Global Opportunities Fund (31 December 2023: USD Nil), capital gains tax payments of USD 215,715 for BNY Mellon Mobility Innovation Fund (31 December 2023: USD Nil), capital gains tax provision credit release of USD 13,361 and capital gains tax expense of USD 69,770 for for BNY Mellon Sustainable Global Emerging Markets Fund (31 December 2023: USD 61,715), capital gains tax expense of USD 153,838 for for BNY Mellon Sustainable Global Equity Fund (31 December 2023: USD Nil) and capital gains tax provision credit release of USD 3,865 and capital gains tax expense of USD 4,315 for BNY Mellon Sustainable Global Real Return Fund (EUR) Fund (31 December 2023: USD 3,865), have been recorded in the Statement of Comprehensive Income under "Withholding taxes on dividends and other investment income".

^{*} Please refer to Note 19 of the financial statements.

During the financial year, companies related to the Depositary and the Investment Managers were selected by the Investment Managers to execute investment transactions and foreign exchange transactions and to accept deposits on behalf of the Investment Managers. The Bank of New York Mellon, New York and The Bank of New York Mellon, London were counterparties to forward foreign currency contracts open at the financial year end as disclosed in appendices to the Schedule of Investments. The counterparties were selected by the Investment Managers and the terms of such transactions were negotiated by the Investment Managers with such companies.

The Manager owns 38,092 (31 December 2023: 38,092) of the Company's subscriber shares as disclosed in Note 2 of the financial statements. There was no ultimate controlling party of the Company during the financial years ended 31 December 2024 and 31 December 2023.

12. SOFT COMMISSION AND DIRECTED BROKERAGE ARRANGEMENTS

During the financial year, ARX Investimentos Ltda (the "Investment Manager") have entered into soft commission arrangements (also referred to as soft dollar arrangements) with brokers in respect of which certain goods and services used to support the investment process were received. The Investment Manager do not make direct payment for these services but either remunerate brokers through commissions paid on transactions or arrange for executing counterparties to pay some or all of their allocated research commission away to other brokers or non-brokering research providers. The goods and services utilised for the Company include economic and political analysis, industry, sector or company specific, investment related research and broker provide active order management. The Investment Manager consider these arrangements to be of benefit to its clients and the brokerage rates are not in excess of customary institutional full service brokerage rates.

13. EXCHANGE RATES

The financial statements are prepared in US dollar. The following exchange rates have been used to translate assets and liabilities in other currencies to US dollar:

| Currency | 31 December 2024 | 31 December 2023 |

14. EFFICIENT PORTFOLIO MANAGEMENT

The Company and each Fund may invest in Financial Derivative Instruments ("FDIs") for investment purposes where specified in the relevant supplement to the prospectus. In addition, each Fund may utilise techniques and instruments for efficient portfolio management purposes or to protect against foreign exchange rate risks, subject to the conditions and within the limits laid down by the Central Bank.

Such techniques and instruments include, but are not limited to, futures, options, swaps, warrants, P-Notes, stock lending arrangements, repurchase/reverse repurchase agreements, forward foreign currency contracts and when issued and/or delayed delivery securities.

Efficient portfolio management transactions relating to the assets of a Fund may be entered into with one of the following aims: a reduction of risk, a reduction of cost with no increase or a minimal increase in risk or generation of additional capital or income with no, or an acceptably low level of risk (relative to the expected return). The Company currently invests in futures, options, swaps, forward foreign currency contracts and P-Notes, as evidenced in the relevant Schedule of Investments. Details of all open transactions at the financial year end are disclosed in the Schedule of Investments.

The Company has entered into a securities lending agreement (as amended, assigned, novated and assumed) with The Bank of New York Mellon SA/NV and the Depositary. The securities lending income is currently split between the Company and The Bank of New York Mellon SA/NV in the proportion 81%:19%.

Securities lending transactions and the related collateral are settled and cleared in accordance with the tri-party and bilateral agreements.

The Company earned revenue from securities lending during the financial year ended 31 December 2024, as detailed in the table below:

| Fund | Base Currency | Gross Earnings | Direct Costs (Paid to The Bank of New York Mellon SA/NV) (19%) | Net Earnings to Company (81%)^ |

15. NET ASSET VALUE

The net asset value of each class of redeemable participating share is determined by dividing the value of the net assets of the share class by the total number of redeemable participating shares in issue at the financial year end.

The published net asset value of each class of redeemable participating share is as follows:

| Fund | Share Class | Currency | 31 December 2024 | 31 December 2023 | 31 December 2022 |
|-----------------------|-----------------------|----------|------------------|------------------|------------------|

^^ This share class was reissued during the financial year.

STRATEGY IN USING FINANCIAL INSTRUMENTS

The Company's investment activities expose it to the various types of risk, which are associated with the financial instruments and markets in which it invests: market risk (including market price risk, interest rate risk and currency risk), credit risk and liquidity risk. The Company has in place risk management programmes that seek to limit the potential adverse effects of these risks on the Funds' financial performances.

The assets of each Fund will be invested separately in accordance with the investment objectives and policies of the relevant Fund, which are set out in the relevant supplements to the prospectus. Where a Fund maintains in its name reference to a particular currency, country, region, economic sector or type of security, at least three quarters of the assets of that Fund will comprise investments corresponding to the relevant currency, country, region, economic sector or type of security (as appropriate).

The Funds may use FDI for efficient portfolio management purposes or to protect against foreign exchange risks. Some Funds have the facility to use FDI for investment purposes according to the Central Bank UCITS Regulations. In their Risk Management Process ("RMP") it explains whether each Fund uses the commitment approach or Value at Risk ("VaR") to calculate its global exposure. The commitment approach measures the leverage effect produced by the use of derivatives and is calculated by converting all derivative positions, whether used as part of the Fund's general investment policy, for purposes of risk reduction or for the purpose of efficient portfolio management, based on the market values of the underlying assets or contracts. VaR for a pre-defined time horizon measures the threshold loss in value of a portfolio of financial instruments that may be exceeded for a given probability (either Absolute^[1] or Relative^[2]). The quality of the VaR model forecasts is demonstrated by back-testing. As a complement to VaR, stress testing is used to evaluate the potential impact on portfolio values of extreme, although plausible, events or movements in a set of financial variables.

For a more detailed discussion, the RMP for each of the Funds is available on request.

[1] This is defined as the VaR of the Fund capped as a percentage of NAV.

^[2] This is defined as the VaR of the Fund divided by the VaR of a benchmark or reference portfolio.

FINANCIAL RISK MANAGEMENT PROCESS

In order to achieve its investment objectives, the Company buys, sells and holds financial assets and liabilities. As a consequence, the Company is exposed to market price risk, interest rate risk, currency risk, credit risk and liquidity risk arising from the financial instruments it holds. The Company's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Company's financial performance. The Company uses FDI to moderate certain risk exposures.

The risk management policies employed by the Company to manage these risks are discussed below.

INVESTMENT RISK

Activities of each Fund expose it to a variety of financial risks: market risk (including market price risk, interest rate risk and currency risk), credit risk and liquidity risk.

MARKET RISK

Market risk is the risk that the fair value of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: market price risk, interest rate risk and currency risk.

MARKET PRICE RISK

Market price risk is the risk that the fair value of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk and currency risk), whether those changes are caused by factors specific to individual financial instruments or its issuer, or other factors affecting similar financial instruments traded in the market.

Many of the Funds trade in financial instruments, taking positions in traded securities in the equity and equity derivative markets. The investments of the Funds are subject to market fluctuations and there can be no assurances that investments will appreciate in value, therefore presenting a risk of loss of capital.

MARKET PRICE RISK cont'd.

The Investment Managers manage market price risk through building diversified investment portfolios across a range of industry and/or geographic sectors as is appropriate for the Funds and in accordance with the Central Bank UCITS Regulations and the investment objectives of the Funds. An analysis of exposures to market price risk is provided in the Schedule of Investments for each Fund. The market positions of the Funds are monitored on a daily basis by the Investment Managers, reviewed on a monthly basis by the Investment Management Oversight Committee and on a quarterly basis by the Board of Directors.

The Company's market risk strategy is driven by the Company's investment risk and return objectives. The Board of Directors has instructed the Investment Managers to manage each of the risks in accordance with an established risk management system.

The following table demonstrates by way of example the likely increase in net asset value as a result of a 5% upwards movement in the Funds' related market index (a 5% decrease would have similar negative results). Please note the table does not include the bond Funds as their main exposure is to interest rate risk, as detailed below. Detail of market sensitivity for these Funds is provided in the subsequent commentary. In the interests of providing consistent comparisons across the Funds, the table assumes a movement of 5%. It should be noted future market conditions could vary significantly and the table is meant for illustrative purposes only.

As at 31 December 2024 and 31 December 2023, for the Funds listed in the table below, should market value have increased or decreased by 5% with all other variables remaining constant, the increase or decrease in net assets attributable to redeemable participating shareholders for the financial year is shown.

[^] As the Fund is in existence for less than three years, a statistically significant beta is not available. Hence, for market price risk sensitivity disclosure, a notional beta of 1 is applied in the effective calculation for these Funds.

For the bond Funds, the likelihood of a decrease in net asset value as a consequence of a downward movement in market prices is defined as overleaf.

^{*} Please refer to Note 19 of the financial statements. ** This Fund launched in financial reporting year 2023.

MARKET PRICE RISK cont'd.

As at 31 December 2024 and 31 December 2023, for bond Funds utilising the Investment Managers' VaR risk model (VaR is based on probability), one would not expect the Fund to lose more than the following percentage as listed in the table below (Regulatory limit) in any one week or day, i.e. 1 week in a hundred weeks or 1 day in a hundred days. The table below also shows the VaR of each Fund as at 31 December 2024 and 31 December 2023 calculated at the 99th percentile confidence level over the holding period listed below.

| Fund | Confidence Level | VaR Type | Holding Period 2024 | Holding Period 2023 | Regulatory Limit 2024 | Regulatory Limit 2023 | VaR 2024 | VaR 2023 |

 $[\]mbox{\scriptsize *}$ Please refer to Note 19 of the financial statements.

VaR is the risk measurement methodology used to assess the Funds' leverage and market risk volatility. When the VaR is calculated as a percentage of the net asset value of the Funds (absolute or relative VaR), it may not be greater than the Regulatory limits, as detailed in the prospectus. VaR is calculated on a daily basis using a one-tailed 99% confidence level and pre-determined holding period on either an absolute (where the figure is compared to the net asset value of the Fund) or relative basis (where VaR is compared to the benchmark or reference portfolio). The historical observation period will not be less than one year unless a shorter period is justified.

Some limitations of VaR analysis are:

- the models' methodologies are based on historical data and cannot take account of the fact that future market price movements, correlations between markets and levels of market liquidity in conditions of market stress may bear no relation to historical patterns;
- the market price risk information is a relative estimate of risk rather than a precise and accurate number; and

^{**} This Fund launched in financial reporting year 2023.

MARKET PRICE RISK cont'd.

- the market price information represents a hypothetical outcome and is not intended to be predictive.

The minimum, average and maximum utilisation of the Regulatory limits calculated during the financial year ended 31 December 2024 are as follows:

| Fund | Minimum utilisation | Average utilisation | Maximum utilisation |
|--|---------------------|---------------------|---------------------|

MARKET PRICE RISK cont'd.

Leverage is calculated as the sum of the notionals of the derivatives used. (This may be supplemented with leverage calculated on the basis of a commitment approach. The creation of leveraged exposure to an index via FDI, or the inclusion of a leverage feature in an index, must also be taken into account in meeting the prospectus disclosure requirements).

The average level of leverage employed during the financial year ended 31 December 2024 and 31 December 2023 is as follows:

| | Average Level of Leverage | Average Level of Leverage |
|---|---------------------------|---------------------------|
| Fund | 2024 | 2023 |

^{*} Please refer to Note 19 of the financial statements.

INTEREST RATE RISK

Interest rate risk is defined as the risk that the fair value of a financial instrument will fluctuate because of changes in market interest rates. This risk arises on financial instruments whose fair value is affected by changes in interest rates.

The majority of the Company's financial assets and liabilities i.e. those Funds holding substantially equity or equity derivative instruments are non-interest bearing, as a result, these assets are not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates. Any excess cash and cash equivalents are invested at short-term market interest rates.

^{**} This Fund launched or closed in financial reporting year 2023.

INTEREST RATE RISK cont'd.

The table below summarises the Company's exposure to interest rate risk as at 31 December 2024. It includes the Company's assets and liabilities at fair value, categorised by the earlier of contractual repricing or maturity dates:

| BNY Mellon Absolute Return Bond Fund | Less than 1 year EUR | 1-6 years EUR | Over 6 years EUR | Non interest bearing EUR | Total 2024 EUR |

 $^{^{**}}$ This Fund launched in financial reporting year 2023.

For those Funds holding primarily interest bearing securities and as such exposed to the risk of fluctuations in the prevailing levels of market interest rates, the Investment Managers monitor the Funds' exposure to interest fluctuations on a daily basis. Whilst primarily an investment decision, the Investment Managers employ proprietary systems and processes to best position the Funds to benefit from or limit the risk of any fluctuations in the prevailing market levels of market interest rates.

The Investment Managers will endeavour to acquire interest bearing securities in liquid markets. However, not all securities invested by the Funds will be listed or rated and consequently liquidity may be low. Moreover the accumulation and disposal of holdings in some securities may be time consuming and need to be conducted at unfavourable prices. The Funds may also encounter difficulties in disposing of assets at their fair price due to adverse market conditions leading to limited liquidity. The financial markets of emerging market countries in general, are less liquid than those of the more developed nations. Purchases and sales of investments may take longer than would otherwise be expected on developed stock markets and transactions may need to be conducted at unfavourable prices.

The table below demonstrates the impacts of 25 basis points ("bps") (31 December 2023: 75bps) increase in the market interest rates in the key markets the listed Funds were invested.

As at 31 December 2024, should interest rates have increased by 25 bps (31 December 2023: 75 bps) with all other variables remaining constant, the instantaneous shift in the Funds' total return is listed below; a 25 bps decrease (31 December 2023: 75bps) decrease would have similar but opposite results in the Funds' total return).

| Fund | Functional Currency | Funds Total Return (%) – Instantaneous Shift 2024 | Funds Total Return (%) – Instantaneous Shift 2023 |

^{*} Please refer to Note 19 of the financial statements.

It should be noted that the future market conditions could vary significantly and the table is meant for illustrative purposes only.

For those Funds which use VaR, the interest rate risk sensitivity analysis has been incorporated into the calculation of market price risk.

CURRENCY RISK

Currency risk is the risk that a fair value of a financial instrument will fluctuate because of changes in foreign exchange rates. The risk arises on financial instruments that are denominated in a currency other than the functional currency in which they are measured.

The Investment Managers monitor the Company's currency position on a daily basis and may act to manage the Company's currency exposure through the use of FDI such as forward foreign currency contracts or options. The Investment Managers of hedged non-base share classes may also use derivative instruments such as forward foreign currency contracts or options as a key component of their operating strategy. Currency risk does not arise from financial instruments denominated in the functional currency.

^{**} This Fund launched in financial reporting year 2023.

CURRENCY RISK cont'd.

The following tables set out the Company's material exposures to foreign currency risk as at 31 December 2024:

 $[\]ensuremath{^{**}}$ This Fund launched in financial reporting year 2023.

CURRENCY RISK cont'd.

The following table demonstrates the impact on net assets attributable to redeemable participating shareholders of a movement in local currencies against the Funds' functional currency by way of illustration. In the interests of providing consistent comparisons across the Funds, the table assumes a 5% upward movement in the value of the local currencies (a negative 5% would have similar negative results).

As at 31 December 2024 and 31 December 2023, had the exchange rate between the local currencies held by the Fund and its functional currency increased or decreased by 5% with all other variables held constant, the increase or decrease, respectively, in net assets attributable to redeemable participating shareholders is listed in the table below.

| Fund | Functional currency | Increase/(decrease) in net asset value 2024 | Increase/(decrease) in net asset value 2023 |

 $[\]star$ Please refer to Note 19 of the financial statements.

BNY Mellon Efficient U.S. Fallen Angels Beta Fund had no foreign currency risk exposure as at 31 December 2024 and as at 31 December 2023.

For those Funds which use VaR, the currency risk sensitivity analysis has been incorporated into the calculation of market price risk.

CREDIT RISK

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. This includes counterparty risk and issuer risk. Financial assets, which potentially expose the Company to credit risk, consist principally of interest bearing securities such as bonds, financial derivative instruments and investments in cash balances and deposits with and receivable from brokers.

^{**} This Fund launched or closed in financial reporting year 2023.

CREDIT RISK cont'd.

The extent of the Company's exposure to credit risk in respect of these financial assets approximates their carrying values as recorded in the Statement of Financial Position.

The Investment Managers manage issuer risk through building diversified portfolios with a limited concentration of exposure (10%) to any one issuer in accordance with the Central Bank UCITS Regulations and the investment objectives of the Funds. Additionally, if required the Investment Managers will limit ownership of debt instruments to those instruments carrying a credit rating equal to or in excess of that provided for in the individual investment objectives of the Funds.

Substantially all of the assets of the Company are held by the Depositary. Bankruptcy or insolvency of the Depositary may cause the Company's rights with respect to securities and other positions held by the Depositary to be delayed or limited.

The Company only transacts with depositaries that are regulated entities subject to prudential supervision, or with high credit ratings assigned by international credit-rating agencies. The Directors monitor the credit quality of the Depositary, The Bank of New York Mellon SA/NV, Dublin Branch, on a quarterly basis in order to mitigate risk. Its long-term senior debt and long-term deposit rating by Standard & Poor's is AA- (31 December 2023: AA-) as at the end of the financial year.

The Company's securities and other positions are segregated from the assets of either the Depositary or its agents. Thus in the event of insolvency or bankruptcy of the Depositary, the Company's securities and other positions are segregated from those of the Depositary or its agents. The Company will, however, be exposed to the credit risk of the Depositary, or any custodian used by the Depositary, in relation to the Company's cash held by the Depositary and the subscription and redemption cash collection accounts held by the Global Sub-Custodian. In the event of insolvency or bankruptcy of the Depositary, the Company will be treated as a general creditor of the Depositary in relation to cash holdings of the Company.

Counterparty/issuer risk is monitored in the following manner:

- Each Investment Manager maintains an Approved Broker list which is subject to ongoing monitoring. The trading system only permits trading with approved brokers. New brokers are added, subject to a formal review process that includes a review of the broker's creditworthiness and financial strength.
- Measurement and monitoring of counterparty or issuer trade exposure is conducted daily and consists of reviewing all outstanding positions held.

The permanent risk function of the Company oversees this process as well as performing independent checks.

The long-term senior debt and long-term deposit rating by Standard & Poor's of the counterparties whom the Funds transacted with as at 31 December 2024 are listed in the table below (rating for 31 December 2023 is the same except where stated):

[^] Credit Suisse AG merged with and into UBS AG in 2024, with UBS AG succeeding by operation of Swiss law to all assets and all liabilities of Credit Suisse AG.

For Funds using the cash sweep management, cash balances are automatically swept into the short-term investment vehicle daily. The cash investment auto-sweep is part of the daily cash management procedure. All money market funds available through the cash sweep management are triple-A rated by Standard & Poor's and Moody's and maintain a stable net asset value. US dollar, Euro and Sterling prime and treasury funds are available for investments, in addition to a number of funds in additional currencies, depending on the domicile of the investor and the tax implications.

The table below details the cash sweep balances as at 31 December 2024 and 31 December 2023:

| Fund | Base Currency | 31 December 2024 | 31 December 2023 |

^{*} Please refer to Note 19 of the financial statements.

All transactions in listed securities are settled or paid upon delivery using approved brokers. The risk of broker default is considered minimal as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker.

Credit default swaps provide a measure of protection against defaults of debt issuers. The use of credit default swaps does not assure their use will be effective or will have the desired result. The credit events are specified in the contract and are intended to identify the occurrence of a significant deterioration in the creditworthiness of the reference asset. As a seller of protection on credit default swaps, the Funds will generally receive from the buyer of protection a fixed rate of income throughout the term of the swap provided that there is no credit event. As the seller, the Funds would effectively add leverage to their portfolios because, in addition to their total net assets, the Funds would be subject to investment exposure on the notional amounts of the swaps.

The maximum potential amount of future payments (undiscounted) that a Fund as a seller of protection could be required to make under a credit default swap equals the notional amount of the agreement. These potential amounts would be partially offset by any recovery values of the respective referenced obligations, upfront payments received upon entering into the agreement, or net amounts received from the settlement of buy protection credit default swap entered into by the Funds for the same referenced entity or entities.

^{**} This Fund launched in financial reporting year 2023.

CREDIT RISK cont'd.

The maximum exposure for the Funds as a seller of protection is detailed below:

^{*} Please refer to Note 19 of the financial statements.

Where possible the Company restricts its exposure to credit losses on the trading derivative instruments it holds by entering into master netting arrangements which is a bilateral agreement between the Funds and the counterparties (approved brokers) with whom the Funds undertake a significant volume of over-the-counter derivative transactions (including total return swaps). Derivatives are held with counterparties on an unsegregated basis. Master netting arrangements do not result in an offset of balance sheet assets and liabilities, as transactions are usually settled on a gross basis. However, the credit risk associated with favourable contracts is reduced by a master netting arrangement to the extent that if an event of default occurs, all amounts with the counterparty are terminated and settled on a net basis. The Company's overall exposure to credit risk on derivative instruments subject to a master netting arrangement can change substantially within a short period, as it is affected by each transaction subject to the arrangement.

Certain over-the-counter derivatives are cleared through central clearing houses. Under this arrangement, over-the-counter trades entered with counterparties are given up to clearing houses, which after acceptance effectively replace the counterparty for the risk aspects of the trade.

The Company employs a risk management process which will enable it to measure, monitor and manage the risks attached to financial derivative positions and details of this process have been provided to the Central Bank.

For the purpose of providing margin or collateral in respect of transactions in financial derivative instruments, the Funds of the Company may transfer, mortgage, charge or encumber any assets or cash forming part of the Funds. The Funds may also be exposed to a credit risk in relation to the counterparties with whom they transact or place margin or collateral in respect of transactions in financial derivative instruments and may bear the risk of counterparty default.

The Funds may receive cash and eligible non-cash collateral in relation to derivative trading to reduce counterparty exposure. Cash collateral received by each Fund is shown as an asset in the Statement of Financial Position, which is offset by a corresponding liability.

As at 31 December 2024 and 31 December 2023, no counterparty pledged non-cash collateral in respect of financial derivative transactions held on the Sub-Funds.

Those Funds entering into securities lending arrangements are also exposed to counterparty risk. To minimise such risk, collateral is held, exceeding in value the amount of securities on loan. Details of these are provided in Note 14 of the financial statements.

A number of Funds have investments in leveraged loans which are held on an unsegregated basis with the agent banks. These loans are not held with the Depositary and accordingly the Funds are subject to the credit risk of the borrower. The Funds are also subject to the credit risk of the agent banks.

^{**} This Fund launched in financial reporting year 2023.

LIQUIDITY RISK

Liquidity risk is the risk that the Company may not be able to generate sufficient cash resources to settle its obligations in full as they fall due or can only do so on terms that are materially disadvantageous.

The Company is exposed to the daily settlement of margin calls on derivatives and to daily cash redemptions of redeemable participating shares. Each Fund therefore invests the majority of its assets in investments that are traded in an active market and can be readily disposed of; it invests only a limited proportion of its assets in investments not actively traded on a listed exchange. Listed securities of each Fund are considered readily realisable, as they are listed on a regulated stock exchange.

The Investment Managers utilise derivative instruments and debt securities, if appropriate, such as exchange traded index future contracts to allow exposure to markets whilst maintaining sufficient liquidity.

Where any Fund acquires securities on the over-the-counter markets, there is no guarantee that the Fund will be able to realise the fair value of such securities due to their tendency to have limited liquidity and comparatively high price volatility.

The Company has the ability to borrow in the short term to ensure settlement. An overdraft facility is in place and has been utilised for settlement liquidity purposes. The Depositary shall be entitled to use available cash in the Fund's account and to liquidate securities in the account as is necessary to meet the Fund's obligations in connection with the provision of an overdraft facility to the Fund and/or unpaid amounts.

The Company's financial assets and liabilities are held for trading and are acquired principally for the purpose of selling in the short term. As these securities are not expected to be held to maturity or termination, the current market value represents the estimated cash flow that may be required to dispose of the securities. Future cash flows of the Funds and realised liabilities may differ from current liabilities based on changes in market conditions.

All financial liabilities are realisable within three months except those noted in the tables within this note.

Swaps and other derivative instruments shall be subject to disclosure in the below tables based on their contractual maturity settlements dates, which may be "Greater than 1 year", however given swaps and other derivative instruments are held for trading purposes, the respective Investment Managers may elect on an earlier settlement, dependent on market conditions.

LIQUIDITY RISK cont'd.

The table below summarises the financial liabilities for the Funds with derivative exposures and other liabilities, into relevant maturity groupings based on the remaining period as at 31 December 2024 to the contractual maturity date. The tables have been prepared based on the undiscounted gross cash outflows relating to its financial liabilities:

^{*} Please refer to Note 19 of the financial statements.

Redeemable shares are redeemed on demand at the holders' option. However, the Directors do not envisage that the contractual maturity will be representative of the actual cash outflows, as holders of these instruments typically retain them for the medium to long term.

In order to manage the Company's overall liquidity and to facilitate an orderly disposition of securities, the Directors are able to refuse to repurchase any shares in excess of one tenth of the shares in issue in a Fund on any one valuation day by way of the provisions in the prospectus.

The number of investors that held more than 10% of the net assets at trading valuation of the Fund at the end of the financial year are as follows:

NUMBER OF SHAREHOLDERS

The Company did not have less than 10 redeemable participating shareholders at the end of the current financial year and prior financial year.

^{*} Please refer to Note 19 of the financial statements.
** This Fund launched in financial reporting year 2023.

CAPITAL RISK MANAGEMENT

The capital of the Funds is represented by the net assets at the end of the financial year. The amount of net assets can change significantly on a daily basis as the Funds are subject to daily subscriptions and redemptions at the discretion of shareholders. The Funds' objective when managing capital is to safeguard the Funds' ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain a strong capital base to support the development of the investment activities of the Funds.

In order to maintain or adjust the capital structure, it is part of the Company's policy to perform the following:

- The level of daily subscriptions and redemptions relative to the assets it expects to be able to liquidate is monitored and the amount of distributions payable to redeemable participating shareholders is adjusted accordingly.
- Redeemable participating shares are issued and redeemed in accordance with the prospectus and supplements of the Funds, which include the ability to restrict redemptions and requirement for certain minimum holdings and subscriptions.

FAIR VALUE ESTIMATION

The Company has classified fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).

Level 3: Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs).

Instruments whose values are based on quoted market prices in active markets, and therefore classified within level 1, include active listed equities, exchange traded funds and derivatives, highly liquid government bonds (G7 countries), certificate of deposit and other quoted securities. The Company does not adjust the quoted price for these instruments.

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within level 2. These include investment-grade government (non-G7 countries) and corporate bonds, over-the-counter derivatives, collective investment schemes, money market instruments, P-Notes and certain listed equities. As level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information.

Investments classified within level 3 have significant unobservable inputs, as they trade infrequently. Level 3 instruments include leveraged loans and corporate debt securities which are priced at costs or fair valued using single broken quote. Unobservable inputs shall be used to measure fair value to the extent that relevant observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability at the measurement date. However, the fair value measurement objective remains the same, i.e. an exit price from the perspective of a market participant that holds the asset or owes the liability. Therefore, unobservable inputs shall reflect the assumptions that market participants would use when pricing the asset or liability, including assumptions about risk. The sensitivity of unobservable inputs used in the fair valuation of these level 3 securities is not readily determinable.

FAIR VALUE ESTIMATION cont'd.

The following table provides an analysis of financial instruments that are measured at fair value as at 31 December 2024:

| Fund | Classification | Level 1 | Level 2 | Level 3 | Total 31 December 2024 |

^{**} This Fund launched or closed in financial reporting year 2023.

Transfers are deemed to occur at the beginning of the financial year.

The transfer from Level 2 to Level 3 relates to bond positions whose issuers experienced reductions in trading activity and was inactive (i.e. stale) as at the financial year end. These securities are priced at cost or fair valued using single broker quote and resulted in the reclassification to Level 3.

The transfers out of Level 3 are related to securities that were priced at cost and subsequently were subject to active trading and normal vendor pricing.

17. COMMITMENTS AND CONTINGENCIES

There are no commitments or contingencies as at 31 December 2023 or 31 December 2024.

18. SEGREGATED LIABILITY

The Company avails of the segregated liability provisions of Section 1405 (1) of the Act. As such, under Irish Law the Company generally will not be liable as a whole to third parties and there generally will not be the potential for cross liability between the Funds.

19. SIGNIFICANT EVENTS DURING THE FINANCIAL YEAR

Claire Cawley was appointed as Chair of the Board of Directors, replacing David Dillon, effective 1 January 2024.

On 2 April 2024, the Supplement of BNY Mellon Absolute Return Bond was modified for some clarification updates.

On 2 April 2024, BNY Mellon Efficient Global High Yield Beta Fund and BNY Mellon Efficient IG Corporate Beta Fund were modified to allow for SFDR registration from Article 6 to Article 8.

On 2 April 2024, the fees were increased on non-Founders share classes in the Responsible Horizons Euro Impact Bond Fund.

On 2 May 2024, BNY Mellon Global Leaders Fund was modified to allow SFDR reclassification from Article 6 to Article 8.

On 22 May 2024, BNY Mellon Dynamic U.S. Equity Fund, BNY Mellon Efficient U.S. Fallen Angels Beta Fund, BNY Mellon Efficient U.S. High Yield Beta Fund, BNY Mellon Long-Term Global Equity Fund, BNY Mellon Mobility Innovation Fund BNY Mellon U.S. Equity Income Fund and BNY Mellon U.S. Municipal Infrastructure Debt Fund were registered in Korea.

BNY Mellon Efficient Euro High Yield Beta Fund was launched on 24 June 2024, following a modification to allow SFDR reclassification from Article 6 to Article 8.

BNY Mellon Global Aggregate Bond Fund was launched on 16 July 2024.

On 17 July 2024, the benchmark for BNY Mellon Dynamic Factor Premia V10 Fund changed from the FTSE 3 Month US T-Bill Index to the ICE BofA U.S. 3-Month Treasury Bill Index.

On 19 July 2024, the supplement of BNY Mellon Global Credit Fund was modified to allow for registration in Hong Kong.

Effective 26 August 2024, Greg Brisk resigned as Director of the Company.

On 3 September 2024, BNY Mellon Global Unconstrained Fund was renamed BNY Mellon Sustainable Global Multi-Asset Fund; and was modified to allow for SFDR registration from Article 6 to Article 8.

Effective 11 September 2024, Deirdre Gormley was appointed as Director of the Company.

Effective 12 September 2024, David Dillon resigned as Director of the Company.

The Company's Annual Prospectus Update occurred on 25 October 2025, incorporating the below changes:

- Updates to the supplements of BNY Mellon Euroland Bond Fund and BNY Mellon European Credit Fund, to reflect that these Sub-Funds can invest in callable and puttable bonds.
- The following supplements for these SFDR Article 8 or SFDR Article 9 Sub-Funds were updated to reflect these Sub-Funds may now utilise securities lending arrangements where these arrangements are compatible with the relevant Sub-Fund's categorisation and investment approach: BNY Mellon Absolute Return Bond Fund, BNY Mellon Efficient U.S. Fallen Angels Beta Fund, BNY Mellon Emerging Markets Corporate Debt Fund, BNY Mellon Floating Rate Credit Fund, BNY Mellon Global Short-Dated High Yield Bond Fund, BNY Mellon Long-Term European Equity Fund, BNY Mellon Long-Term Global Equity Fund, BNY Mellon U.S. Municipal Infrastructure Debt Fund, Responsible Horizons Euro Corporate Bond Fund, Responsible Horizons Euro Impact Bond Fund and Responsible Horizons EM Debt Impact Fund.

19. SIGNIFICANT EVENTS DURING THE FINANCIAL YEAR cont'd.

- The supplements for the following SFDR Article 8 or SFDR Article 9 Sub-Funds were updated to reflect clarifications and amendments to issuers and/or companies in which the Sub-Funds may not invest. The exclusion updates include clarifying that these Sub-Funds have existing exclusions related to adult entertainment, alcohol, gambling and thermal coal and introducing new exclusions related to oil and gas and fracking: BNY Mellon Blockchain Innovation Fund, BNY Mellon Mobility Innovation Fund, BNY Mellon Sustainable Global Dynamic Bond Fund, BNY Mellon Sustainable Global Emerging Markets Fund, BNY Mellon Sustainable Global Equity Fund and BNY Mellon Sustainable Global Real Return Fund (EUR).
- The supplement of BNY Mellon Global Equity Income Fund was updated to reflect amendments to the companies in which the Sub-Fund may not invest. The exclusion update introduced new exclusions related to oil and gas and removed the prohibition on the Sub-Fund investing in companies that have a material involvement in the production of alcoholic beverages.
- The following supplements were updated to reflect that certain adverse impacts of investment decisions on specific sustainability factors will be considered for these Sub-Funds from the perspective of the harm the investments positions might do externally to those sustainability factors, and what steps are taken to mitigate that harm: BNY Mellon Efficient U.S. Fallen Angels Beta Fund, BNY Mellon Emerging Markets Corporate Debt Fund, BNY Mellon Global Credit Fund and BNY Mellon U.S. Municipal Infrastructure Debt Fund.
- The supplement of Responsible Horizons EM Debt Impact Fund was updated to reflect that in the case of a split rating of debt and debt-related securities (i.e. different ratings given by two or more rating agencies), the lower of the two highest ratings, instead of the highest rating, will be considered.
- The supplement of BNY Mellon Absolute Return Global Convertible Fund was updated to clarify that the maximum exposure of the Sub-Fund to total return swaps ("TRS") shall be 75% rather than 500% of the Sub-Fund's Net Asset Value and the anticipated exposure to TRS is not expected to exceed 40% rather than 400% of the Sub-Fund's Net Asset Value.
- The supplements of BNY Mellon Long-Term European Equity Fund and BNY Mellon U.S. Equity Income Fund we updated to remove the Sub-Funds' ability to invest in master limited partnerships ("MLPs"). As part of their primary investment strategy, the Sub-Funds' invest in a range of equity and equity-related securities, examples of which currently include MLPs.

BNY Mellon Emerging Markets Debt Opportunistic Fund was closed on 30 October 2024.

On 10 December 2024, BNY Mellon Absolute Return Bond Fund was modified to allow registration from Article 6 to Article 8.

BNY Mellon Efficient Global IG Corporate Beta Fund, BNY Mellon Global Emerging Markets Opportunities Fund and BNY Mellon Sustainable Global Real Return Fund (EUR) were closed on 10 December 2024.

BNY Mellon Global Multi-Asset Income Fund, BNY Mellon S&P 500® Index Tracker and BNY Mellon U.S. Dynamic Value Fund were revoked by the Central Bank on 23 December 2024.

Other than as disclosed above, there were no other significant events affecting the Company during the financial year.

BNY MELLON S&P 500® INDEX TRACKER

S&P 500° is a trademark of The McGraw-Hill Companies, Inc. and has been licensed for use by BNY Mellon Global Funds, plc. The BNY Mellon S&P 500° Index Tracker is not sponsored, endorsed, sold or promoted by Standard & Poor's and Standard & Poor's makes no representation regarding the advisability of investing in the BNY Mellon S&P 500° Index Tracker.

Please note: When a Fund of the Company invests in the shares of other collective investment schemes that are managed, directly or by delegation, by the Company's management company, BNY Mellon Fund Management (Luxembourg) S.A. ("BNY MFM Lux"), or by any other company with which BNY MFM Lux is linked by common management or control, or by a direct or indirect holding of more than 10% of the share capital or of the votes, BNY MFM Lux or that other company shall not charge management, subscription, conversion or redemption fees on account of the Fund's investment in the shares of such other collective investment

APPENDIX 1

UCITS V REMUNERATION POLICY (UNAUDITED)

In accordance with the UCITS V Directive, the Irish implementing Regulations and the ESMA UCITS Remuneration Guidelines (the "UCITS Remuneration Code"), the Company is required to disclose details of the remuneration paid by the Manager to its staff for the financial year.

In line with the requirements of Directive 2009/65/EC, as amended by Directive 2014/91/EU (the "UCITS Directive"), the Manager is subject to the rules on remuneration set out in Article 14(b) of the UCITS Directive. These rules require managers of UCITS to have remuneration policies, procedures and practices that:

- · are consistent with and promote sound and effective risk management;
- · do not encourage excessive risk-taking inconsistent with the risk profiles or governing documentation of the UCITS; and
- · do not impair compliance with the Manager's duty to act in the best interests of the UCITS.

The Manager applies its remuneration policy and practices in a manner that is proportionate to its size and that of the UCITS it manages, its internal organisation and the nature, scope and complexity of its activities. The Manager also applies this principle of proportionality to the appointment of any third-party that makes investment decisions on behalf of the UCITS under a formal delegation arrangement and which may affect the risk profile of the relevant sub-funds.

In broad terms, the Manager's business model is designed such that it does not promote excessive risk-taking. In accordance with the requirements under the UCITS Directive, the Manager takes appropriate steps to identify individuals providing services to the Manager whose professional activities may have a material impact on the risk profile of the Manager and the UCITS that it manages, known as "Identified Staff", including:

- statutory directors;
- senior management and others within the same remuneration bracket of senior management;
- the heads of the control functions; and
- other risk takers including all staff members whose professional activities either individually or collectively, as members of a group can have a material influence on the risk profiles of the Manager or of a UCITS it manages.

The executive directors do not receive any compensation directly from the Manager. The independent non-executive directors receive remuneration for their services from the Manager which comprises a fixed fee and no variable compensation component.

The operations and activities of the Manager and the UCITS for which it acts as manager are largely performed by employees of other companies within the BNY Mellon Group and the compensation of these individuals is determined by senior management of the relevant business line in accordance with the BNY Mellon policies, principles and practices at global and regional level. In such cases where services arrangements or formal delegation of portfolio management are in place, the Manager seeks to ensure that remuneration arrangements in respect of Identified Staff are considered to be equally effective as those to which the Manager is directly subject, including the principles of proportionality. Furthermore, the risk framework operated by the Manager in respect of delegated portfolio management arrangements is designed to ensure that individuals performing activities within such third-parties do not have capacity to have a material impact on the risk profile of the UCITS.

The BNY Mellon compensation philosophy and principles are based on offering an overall remuneration that supports its core values of: Client Focus, Integrity, Teamwork and Excellence. Performance is rewarded both at the individual and corporate level and determined on the basis of financial and non-financial factors. This is intended to align the interests of employees and shareholders and/or clients by incentivising actions that contribute to superior financial performance and long-term value and by ensuring that incentive compensation arrangements do not encourage employees to take unnecessary and excessive risks. BNY Mellon's overall compensation structure is balanced between short-term and long-term incentives and a combination of cash and equity compensation. This is intended to discourage employees from taking excessive risks that may adversely affect the long-term performance of companies within the BNY Mellon Group and impact a substantial proportion of their own compensation.

BNY Mellon operates remuneration committees at a global, regional and enterprise level with responsibilities relating to the oversight of employee compensation and benefit policies and programmes. The Manager does not operate an individual remuneration committee.

Remuneration for identified staff in respect of the year ended 31 December 2024:

| | USD |
|--|-----------|
| Total remuneration for the financial year (excludes VAT) | 3,771,750 |
| Of which fixed remuneration | 2,066,725 |
| Of which variable remuneration | 1,705,025 |

APPENDIX 1

SECURITIES FINANCING TRANSACTIONS REGULATION DISCLOSURES ("SFTR") (UNAUDITED)

SECURITIES LENDING TRANSACTIONS

The Company has entered into a securities lending agreement (as amended, assigned, novated and assumed) with The Bank of New York Mellon SA/NV (the "Agent Lender") effective 27 November 2015.

The following table details the aggregate value of securities on loan by Fund as a proportion of total lendable assets and each Fund's net asset value as at 31 December 2024:

| | Aggregate value | % of | 0/ - £ |
|----------|---|--|--|

The collaterals are held in the name of the Agent Lender to the order of its clients; the actual segregation to underlying client level is done with the Agent Lender's books and records. The collaterals are held on account at the tri-party agent, who acts as a settlement and collection service for securities and collateral between the lender and the borrower. The tri-party agents used are Euroclear, Global Collateral Management – The Bank of New York Mellon Institutional Bank and JPMorgan Chase Bank, N.A. (where JPMorgan are the borrower). For bilateral transactions, the collaterals are held on account at the Agent Lender.

The following tables provide an analysis of the amounts held at each collateral agent as non-cash collateral received in respect of securities lending transactions as at 31 December 2024:

| Fund | Collateral agent | Aggregate value of collateral held | Fund | Collateral agent | Aggregate value of collateral held |

APPENDIX 3

SUSTAINABLE FINANCE DISCLOSURE REGULATION AND TAXONOMY REGULATION (unaudited)

As at 31 December 2024, BNY Mellon Absolute Return Global Fund, BNY Mellon Asian Income Fund, BNY Mellon Dynamic Opportunities Fund, BNY Mellon Brazil Equity Fund, BNY Mellon Dynamic Factor Premium V10 Fund, BNY Mellon Dynamic U.S. Equity Fund, BNY Mellon Efficient U.S. High Yield Beta Fund, BNY Mellon Emerging Markets Debt Fund, BNY Mellon Emerging Markets Debt Total Return Fund, BNY Mellon Euroland Bond Fund#, BNY Mellon European Credit Fund, BNY Mellon Global Aggregate Bond Fund, BNY Mellon Global Bond Fund, BNY Mellon Global Dynamic Bond Fund, BNY Mellon Global High Yield Bond Fund, BNY Mellon Global Infrastructure Income Fund, BNY Mellon Global Opportunities Fund, BNY Mellon Global Real Return Fund (EUR)#, BNY Mellon Global Real Return Fund (GBP), BNY Mellon Global Real Return Fund (USD), BNY Mellon Japan Small Cap Equity Focus Fund, BNY Mellon Small Cap Euroland Fund, BNY Mellon Targeted Return Bond Fund and BNY Mellon U.S. Equity Income Fund are classified as Article 6 Sub Funds. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

BNY Mellon Emerging Markets Debt Opportunistic Fund and BNY Mellon Global Emerging Markets Opportunities Fund, Article 6 Sub Funds; and BNY Mellon Efficient Global IG Corporate Beta Fund and BNY Mellon Sustainable Global Real Return Fund (EUR), Article 8 Sub-Funds, closed in the financial year.

Please refer to Note 20 of the financial statements.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: BNY Mellon Absolute Return Bond Fund Legal entity identifier: 213800MXNNFT8C38II36

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Sub-Fund were met to the following extent during the reference period 10th December 2024 to 31st December 2024 (the "Reference Period").

The Sub-Fund promoted a minimum environmental and/or social standard that sought to mitigate or avoid practices that the Investment Manager deemed environmentally and/or socially detrimental.

Exclusion criteria - as set out in the Sub-Fund's then applicable supplement - were used to achieve this minimum standard. For example, as referenced in the pre-contractual disclosure, corporate issuers that derived a certain percentage of revenue as determined by the Investment Manager from tobacco production, unconventional oil and gas extraction, controversial weapons production and thermal coal mining and/or thermal coal power generation, gambling, adult entertainment, cannabis production and fail a carbon intensity assessment are excluded. Corporate issuers will also be excluded where, in the opinion of the Investment Manager, the issuers are deemed to have violated the minimum standards of business practices represented in widely accepted global conventions. The Sub-Fund also excluded corporate issuers which, in the opinion of the Investment Manager, were highly carbon intensive. Sovereign issuers, such as Debt and Debt-Related Securities issued by governments, supranationals and/or public international bodies that in the opinion of the Investment Manager had committed social violations including but not limited to human rights issues and sanctioned regimes were excluded. Investments in asset-backed and mortgage-backed securities were excluded issuers if in the opinion of the Investment Manager did not enable the Sub-Fund to attain the environmental or social characteristics it promoted.

Additionally, the Sub-Fund made investments in Use of Proceeds Impact Bonds and Impact Issuers, which were considered by the Investment Manager to qualify as SFDR Sustainable Investments (as determined by the Investment Manager) ("SFDR Sustainable Investments"*) and which in the opinion of the Investment Manager, contributed positively to the attainment of the UN Sustainable Development Goals ("UN SDGs"). The Sub-Fund had 10% of its Net Asset Value in aggregate as at 31st December 2024 invested in Use of Proceeds Impact Bonds and Impact Issuers, each of which are considered to qualify as SFDR Sustainable Investments.

The Investment Manager considers that the Sub-Fund's SFDR Sustainable Investments contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to environmental objectives):

- Affordable and clean energy,
- Industry innovation and infrastructure,
- Sustainable cities and communities,
- Responsible consumption and production,
- Climate action,
- Life below water.
- Life on land.

The SFDR Sustainable Investments may, in some cases have contributed to some of the environmental objectives as set out in Article 9 of the Taxonomy Regulation. However, this was not explicitly considered by the Investment Manager in their assessment of the investment.

Please note that the Sub-Fund promotes environmental and/or social characteristics and does not have sustainable investment as its investment objective. There is no commitment or minimum allocation to sustainable investments with environmental objectives aligned with the EU Taxonomy Regulation, however this Annex contains certain information in relation to EU Taxonomy alignment of relevant sustainable investments with environmental objectives held by the Sub-Fund as at 31st December 2024.

As such, information in relation to EU Taxonomy alignment is provided as at the above date and does not reflect the position as at other points during the Reference Period (which may be materially different).

The Investment Manager considers that the Sub-Fund's SFDR Sustainable Investments contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to social objectives):

- Zero hunger,
- Good health & wellbeing,
- Quality education- clean water and sanitation,
- Decent work and economic growth,
- Reduced inequalities.

A reference benchmark was not designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The following sustainability indicators were used to measure how the environmental or social characteristics promoted by the Sub-Fund were attained:

- 1) The Sub-Fund successfully and consistently invested a minimum of 5% of its Net Asset Value during the Reference Period in Use of Proceeds Impact Bonds and Impact Issuers, each of which were considered to be "SFDR Sustainable Investments" (as determined by the Investment Manager). By way of illustration, as at the Sub-Fund's year end of 31st December 2024, 10% of the Sub-Fund's Net Asset Value in aggregate was invested in such Use of Proceeds Impact Bonds and Impact Issuers. This percentage figure is provided as at 31st December 2024 only and the percentage so invested has varied during the Reference Period (while remaining above the minimum at all times during the Reference Period).
- 2) The Impact Issuers and Use of Proceeds Impact Bonds invested in by the Sub-Fund successfully and consistently met the following thresholds as assessed by the Investment Manager:
- (a) each such Impact Issuer in which the Sub-Fund was invested demonstrated that at least 20% of their revenue streams were aligned to help realise one or more of the 17 UN Sustainable Development Goals ("UN SDGs").
- (b) in the case of each such Use of Proceeds Impact Bonds in which the Sub-Fund was invested, the proceeds raised were aimed to be exclusively applied to finance or re-finance in part or in full projects that demonstrated a clear alignment to helping realise one or more of the 17 UN SDGs.
- Exclusion policy: The Sub-Fund has successfully and consistently met its exclusion policy as outlined in the Sub-Fund's supplement and the annex to the Sub-Fund's supplement.

No derivatives (FDI) were used during the Reference Period to meet the environmental or social characteristics of the Sub-Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

...AND COMPARED TO PREVIOUS PERIODS?

No comparison for previous periods is available at the date of this periodic report.

WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

The objective of the SFDR Sustainable Investments the Sub-Fund partially made was to achieve positive environmental and/or social impacts.

The Sub-Fund's SFDR Sustainable Investments contributed to environmental or social objectives by investing in:

Use of Proceeds Impact Bonds: The proceeds were applied to finance or re-finance in part or in full projects with positive environmental and/or social impacts using the UN SDGs as a guide to environmental targets These SFDR Sustainable Investments contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to environmental objectives):

- Affordable and clean energy
- Industry innovation and infrastructure
- Sustainable cities and communities
- Responsible consumption and production
- Climate action
- Life below water
- Life on land

These SFDR Sustainable Investments also contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to social objectives):

- Zero hunger
- Good health & wellbeing
- Quality education
- Clean water and sanitation
- Decent work and economic growth
- Reduced inequalities

Debt securities issued by Impact Issuers: At least 20% of these investments revenue streams were linked to positive environmental and/or social impacts using the UN SDGs as a guide to environmental targets. These SFDR Sustainable Investments contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to environmental objectives):

- Affordable and clean energy
- Industry innovation and infrastructure
- Sustainable cities and communities
- Responsible consumption and production
- Climate action
- Life below water
- Life on land

These SFDR Sustainable Investments also contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to social objectives):

- No poverty
- Reduced inequalities
- Good health & wellbeing
- Quality Education
- Clean water and sanitation

HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

During the Reference Period, the Sub-Fund's investments determined by the Investment Manager to be SFDR Sustainable Investments did not cause significant harm to any environmental or social sustainable investments objective as they were not in breach of the PAIs thresholds set by the Investment Manager.

HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS **TAKEN INTO ACCOUNT?**

During the Reference Period, the indicators for adverse impacts in Table 1 of Annex 1 and any relevant indicators in Tables 2 and 3 of that Annex were taken into account as follows in respect of the Sub-Funds SFDR Sustainable Investments:

The Sub-Fund took into account the following PAIs from:

- Table 1 of Annex I of the Commission Delegated Regulation:
- 1. GHG Emissions: Scope 1, 2 and 3
- 2. Carbon Footprint: Scope 1, 2 and 3
- 3. GHG Intensity of Investee Companies: Scope 1, 2 and 3
- 4. Exposure to companies active in the fossil fuel sector
- 5. Share of non-renewable energy consumption and production
- 6. Energy consumption intensity per high impact climate sector: NACE A, B, C, D, E, F, G, H and L
- Activities negatively affecting biodiversity-sensitive areas
- 8. Emissions to water
- 9. Hazardous waste and radioactive waste ratio
- 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 12. Unadjusted gender pay gap
- 13. Board gender diversity
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons)
- 16. Countries subject to social violations

During the Reference Period, the Sub-Fund took into account the above PAIs, in the following manner and solely in respect of its SFDR Sustainable Investments:

- PAI thresholds were set by the Investment Manager at an issuer and/or Sub-Fund level where applicable in relation to the instrument held by the Sub-Fund. The PAI thresholds were only applied to the Sub-Fund's corporate and sovereign holdings
- The Investment Manager measured the performance of the issuer and/or the Sub-Fund, as applicable, against the PAI which may then have triggered an additional qualitative review where appropriate to determine crossing of PAI thresholds at the time of investment and on an ongoing basis during the above period using data obtained from the Investment Manager's designated third-part data provider.

There were no breaches of such PAI thresholds set by the Investment Manager.

The Investment Manager was dependent upon information and data from third party data providers to be able to consider principal adverse impacts on sustainability factors. Data coverage was previously low and incomplete for some of the mandatory PAIs which impacted the Investment Manager's analysis of adverse indicators. Data quality and completeness has improved over time with the Investment Manager utilising a data provider which has greater coverage. It's expected that PAIs can be applied to a greater portion of the Investment Manager's investable universe, allowing enhanced insight into the adverse impacts caused by issuers.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND **HUMAN RIGHTS?**

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights (the "Responsible Business Practices") collectively cover a broad range of areas of responsible business, including labour rights, consumer protection and support for internationally recognised human rights within a company's or issuer's sphere of influence.

The Sub-Fund's investments determined by the Investment Manager to be SFDR Sustainable Investments were considered aligned with the Responsible Business Practices as each issuer passed a broad controversy screen provided by a third party which either directly covered one or more of the Responsible Business Practices or was considered an appropriate proxy for one or more of the Responsible Business Practices. The Investment Manager was dependant on the information and data available to such third party in order to complete the broad controversy screen. It should be noted, that the availability and quality of data may have impacted the screening process.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following mentioned PAIs to the extent practicable from Table 1 of Annex 1 of the Commission Delegated Regulation:

- 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons)
- 16. Countries subject to social violations

PAI thresholds were set by the Investment Manager at an issuer and/or Sub-Fund level where applicable to the instrument held. The PAI thresholds were only applied to the Sub-Fund's corporate and sovereign holdings which were considered by the Investment Manager to be SFDR Sustainable Investments.

The Investment Manager measured the performance of the issuer and/or the Sub-Fund, as applicable, against these thresholds which may then have triggered an additional qualitative review where appropriate to determine crossing of PAI thresholds at the time of investment and on an ongoing basis during the above period using data obtained from the Investment Manager's designated thirdpart data provider.

There were no breaches of such PAI thresholds set by the Investment Manager.

The Investment Manager was dependent upon information and data from third party data providers to be able to consider principal adverse impacts on sustainability factors. Data coverage was previously low and incomplete for some of the mandatory PAIs which impacted the Investment Manager's analysis of adverse indicators. Data quality and completeness has improved over time with the Investment Manager utilising a data provider which has greater coverage. It's expected that PAIs can be applied to a greater portion of the Investment Manager's investable universe, allowing enhanced insight into the adverse impacts caused by issuers.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 10th December 2024 to 31st December 2024

| Largest investments | Sector | % of assets | Country |
|--------------------------|------------|-------------|---------|
| GERMAN 0% 09/18/24 | GOVERNMENT | 8.57% | GER |

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

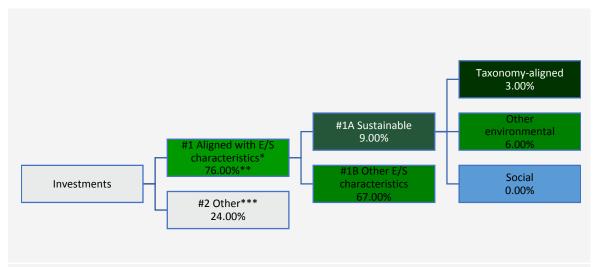

WHAT WAS THE ASSET ALLOCATION?

The Sub-Fund promoted environmental or social characteristics during the Reference Period using an exclusionary approach and allocations to certain SFDR Sustainable Investments, and an investment in a CIS.

Please note that the percentage figures provided in the diagram below reflect percentages out of the Net Asset Value of the Fund as at the end of Reference Period.

The figure in #1 represents a combination of both approaches. The allocation to SFDR Sustainable Investments is referenced in #1A. The figure in #1B below represents the proportion of the portfolio that is not considered by the Investment Manager to be SFDR Sustainable Investments but has excluded certain types of investments as detailed in the binding elements of the investment strategy outlined in the supplement and therefore such proportion of the portfolio was aligned with the environmental or social characteristics promoted by the Sub-Fund through the absence of those investments. The figure in #1B below also represents a proportion of the portfolio held in an investment in a CIS that is considered by the Investment Manager to align with the environmental and/or social characteristics promoted by the Sub-Fund.

It should be noted that the percentages in this section as outlined in the diagram below are provided as at ("End of Reference Period") and do not necessarily reflect the position as at other points during the Reference Period (which may be materially higher or lower).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

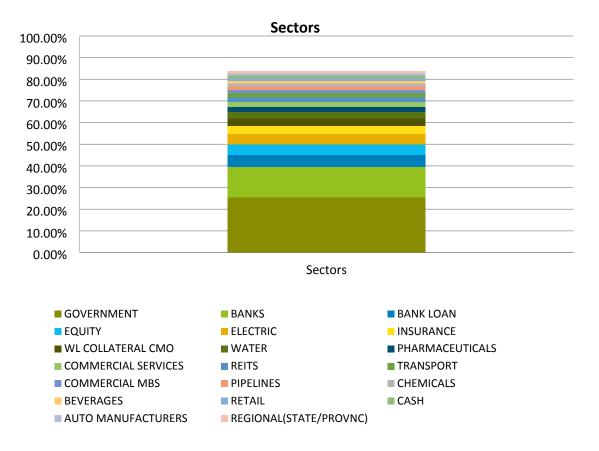

** #1 Aligned with E/S characteristics percentage figure includes investments that are 76% of the NAV in direct holdings and 0% of the NAV in an indirect holding, the indirect holding refers to the Sub-Fund's investment in a CIS. Although in the opinion of the Investment Manager this CIS holding aligned with the Environmental and Social characteristics promoted by the Sub-Fund, this CIS holding did not fully (i) apply the exclusion criteria applied by the Sub-Fund (as detailed in the binding elements of the Sub-Fund's investment strategy outlined in the supplement) and (ii) align with the full set of PAIs taken into account by the Sub Fund.

*** #2 Other contains investments that do not align with E/S characteristics promoted by the fund i.e., cash, derivatives (FDI) for hedging and collective investment schemes (CIS) for liquidity purposes. For further detail please see the question below "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?".

IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?

As at 31st December 2024 the Sub-Fund had mostly been exposed to Government, Banks, as illustrated below.

^{*} The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider alignment with some of the E/S characteristics. In particular, the lack or incomplete reporting of metrics by some investments meant that there was only limited data on such investments. As such, for some of the Sub-Fund's investments, data coverage (such as for carbon footprint) was very low and in the absence of relevant data, such investments were assumed by the Investment Manager to be aligned with E/S characteristics.

The above figures are provided as at 31st December 2024only and do not necessarily reflect the position as at other points during the Reference Period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-fund did not commit to making investments aligned with the EU Taxonomy. However, out of the Sub-Funds allocation to SFDR Sustainable Investments, 33% of the Sustainable Investments with an environmental objective aligned with the EU Taxonomy as of 31st December 2024

The taxonomy aligned investments contributed to the at least one of the following objectives as set out in Article 9 of Regulation (Eu) 2020/852:

- 1. Climate change mitigation.
- 2. Climate change adaptation.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

All figures and disclosures in relation to EU Taxonomy alignment in this Annex reflect the Sub-Fund's positions as at the end of the Reference Period using the most recent data available from relevant third party data providers as at 2nd January 2025.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

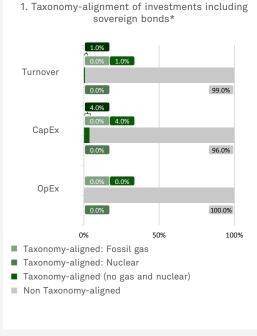

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

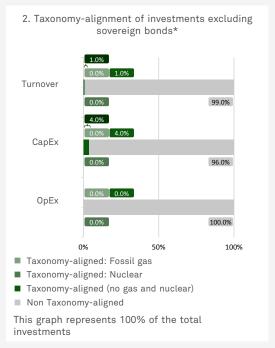

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY 1?

| ☐ Yes: | |
|-----------------|---------------------|
| ☐ In fossil gas | ☐ In nuclear energy |
| ✓ No | |

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND ENABLING ACTIVITIES?

Transitional activities: 0.00% Enabling activities: 0.00%

HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?

No comparison for previous periods is available at the date of this periodic report.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

investments with an environmental objective

that do not take into

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

67% of the of Sustainable Investments with an environmental objective were not aligned with the EU Taxonomy as at 31st December 2024.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

All figures and disclosures in relation to EU Taxonomy alignment in this Annex reflect the Sub-Fund's positions as at the end of the Reference Period using the most recent data available from relevant third party data providers as at 2nd January 2025.

What was the share of socially sustainable investments?

While the Sub-Fund does not commit to investing a minimum percentage of its Net Asset Value in socially sustainable investments, the Sub-Fund invested 0%* of its Net Asset Value in SFDR Sustainable Investments with a social objective, as at 31st December 2024.

*This percentage figure is provided as at 31st December 2024 only and does not necessarily reflect the position as at other points during the Reference Period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Other" were:

- Liquid and near-cash assets including cash held or used for ancillary liquidity purposes.
- Collective Investment Schemes (CIS) that were specifically used for liquidity purposes.
- Derivatives (FDI) that were specifically used for hedging purposes.

No minimum environment or social safeguards were considered for these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken to meet the environmental and/or social characteristics during the Reference Period are:

- The Investment Manager:
- a) Invested in Use of Proceeds Impact Bonds and Impact Issuers, each of which were considered to be "SFDR Sustainable Investments" (as determined by the Investment Manager).
- b) Employed an exclusion policy as outlined in the Sub-Fund's supplement and the annex to the Sub-Fund's supplement.

These binding elements of the Sub-Fund were coded into the trading systems and used to monitor the environmental and social characteristics promoted during the reference period.

The following internal control mechanisms were used by the Investment Manager for such monitoring during the Reference Period:

Pre-trade warnings appeared in the trade system prior to trading to inform portfolio managers of a prohibition or limit.

Post-trade warnings were also reviewed by the monitoring team and escalated as appropriate.

Oversight of the relevance of criteria used to meet characteristics promoted was provided by the Responsible Investment Group, a governance group within the Investment Manager which has overall oversight of ensuring effective implementation of ESG due diligence at asset class level and for defining adherence criteria for the Investment Managers 'Responsible Horizons' strategies. Oversight of internal exclusions lists used to ensure certain binding criteria were met, was provided by the Ratings and Exclusions Group ("REG"), a governance group within the Investment Manager.

During the Reference Period, no engagement with the issuers in which the Sub-Fund has invested was required or undertaken as a consequence of there being no breaches of any of the binding elements outlined in Sub-Fund's supplement.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

- HOW DOES THE REFERENCE BENCHMARK DIFFER FROM A BROAD MARKET INDEX? Not applicable.
- HOW DID THIS FINANCIAL PRODUCT PERFORM WITH REGARD TO THE SUSTAINABILITY INDICATORS TO DETERMINE THE ALIGNMENT OF THE REFERENCE BENCHMARK WITH THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED?

Not applicable.

HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE REFERENCE **BENCHMARK?**

Not applicable.

HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE BROAD MARKET INDEX?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: BNY Mellon Absolute Return Credit Fund Legal entity identifier: 213800PDI80GLAK3FZ66

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Sub-Fund were met to the following extent during the reference period 1 January 2024 to 31 December 2024 (the "Reference Period"):

The Sub-Fund promoted a minimum environmental and/or social standard that sought to mitigate or avoid practices that the Investment Manager deemed environmentally and/or socially detrimental. Exclusion criteria - as set out in the Sub-Fund's then applicable supplement - were used to achieve this minimum standard. For example, as referenced in the pre-contractual disclosure, issuers that derived a certain percentage of revenue as (determined by the Investment Manager) from tobacco, defence, gambling, coal extraction and controversial weapons production were excluded. Issuers were also excluded where, in the opinion of the Investment Manager, such issuers were deemed to have violated the minimum standards of business practices represented in widely accepted global conventions;

Additionally, the Sub-Fund made investments in Use of Proceeds Impact Bonds and Impact Issuers, which were considered by the Investment Manager to qualify as SFDR Sustainable Investments (as determined by the Investment Manager) ("SFDR Sustainable Investments"*) and which in the opinion of the Investment Manager, contributed positively to the attainment of the UN Sustainable Development Goals ("UN SDGs"). The Sub-Fund had 15% of its Net Asset Value in aggregate as at 31 December 2024 invested in Use of Proceeds Impact Bonds and Impact Issuers, each of which are considered to qualify as SFDR Sustainable

The Investment Manager considers that the Sub-Fund's SFDR Sustainable Investments contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to environmental objectives):

- Affordable and clean energy,
- Industry innovation and infrastructure,
- Sustainable cities and communities,

- Responsible consumption and production,
- Climate action,
- Life below water,
- Life on land.

The SFDR Sustainable Investments may, in some cases have contributed to some of the environmental objectives as set out in Article 9 of the Taxonomy Regulation. However, this was not explicitly considered by the Investment Manager in their assessment of the investment.

Please note that the Sub-Fund promotes environmental and/or social characteristics and does not have sustainable investment as its investment objective. There is no commitment or minimum allocation to sustainable investments with environmental objectives aligned with the EU Taxonomy Regulation, however this Annex contains certain information in relation to EU Taxonomy alignment of relevant sustainable investments with environmental objectives held by the Sub-Fund as at 31 December 2024.

As such, information in relation to EU Taxonomy alignment is provided as at the above date and does not reflect the position as at other points during the Reference Period (which may be materially different).

The Investment Manager considers that the Sub-Fund's SFDR Sustainable Investments contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to social objectives):

- No Poverty,
- Zero hunger,
- Good health & wellbeing,
- Quality education
- Clean water and sanitation,
- Decent work and economic growth,
- Reduced inequalities.

A reference benchmark was not designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The Investment Manager was dependent upon information and data from third party data providers to be able to consider principal adverse impacts on sustainability factors. Data coverage was previously low and incomplete for some of the mandatory PAIs which impacted the Investment Manager's analysis of adverse indicators. Data quality and completeness has improved over time with the Investment Manager utilising a data provider which has greater coverage. It's expected that PAIs can be applied to a greater portion of the Investment Manager's investable universe, allowing enhanced insight into the adverse impacts caused by issuers.

HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The following sustainability indicators were used to measure how the environmental or social characteristics promoted by the Sub-Fund were attained:

- The Sub-Fund successfully and consistently invested a minimum of 10% of its Net Asset Value during the Reference Period in Use of Proceeds Impact Bonds and Impact Issuers, each of which were considered to be "SFDR Sustainable Investments" (as determined by the Investment Manager). By way of illustration, as at the Sub-Fund's year end of December 2024 15% of the Sub-Fund's Net Asset Value in aggregate was invested in such Use of Proceeds Impact Bonds and Impact Issuers. This percentage figure is provided as at 31 December 2024 only and the percentage so invested has varied during the Reference Period (while remaining above the minimum at all times during the Reference Period).
- 2) The Impact Issuers and Use of Proceeds Impact Bonds invested in by the Sub-Fund successfully and consistently met the following thresholds as assessed by the Investment Manager:

(a) each such Impact Issuer in which the Sub-Fund was invested demonstrated that at least 20% of their revenue streams were aligned to help realise one or more of the 17 UN Sustainable Development Goals ("UN SDGs"),

(b) in the case of each such Use of Proceeds Impact Bonds in which the Sub-Fund was invested, the proceeds raised were aimed to be exclusively applied to finance or re-finance in part or in full projects that demonstrated a clear alignment to helping realise one or more of the 17 UN SDGs.

Exclusion policy: The Sub-Fund has successfully and consistently met its exclusion policy as outlined in the Sub-Fund's supplement and the annex to the Sub-Fund's supplement.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

No derivatives (FDI) were used during the Reference Period to meet the environmental or social characteristics of the Sub-Fund.

...AND COMPARED TO PREVIOUS PERIODS?

| Period | UN SDGs | Exclusion policy |
|--|--|---|
| Period 1 January 2023 to 31 December 2023 | UN SDGs The following sustainability indicators were used to measure how the environmental or social characteristics promoted by the Sub-Fund were attained: 1) The Sub-Fund successfully and consistently invested a minimum of 10% of its Net Asset Value during the Reference Period in Use of Proceeds Impact Bonds and Impact Issuers, each of which were considered to be "SFDR Sustainable Investments" (as determined by the Investment Manager). By way of illustration, as at the Sub-Fund's year end of 31 December 2023, 12% of the Sub-Fund's | Exclusion policy The Fund successfully and consistently met its exclusion policy as outlined in the then applicable supplement and the annex to the Fund's supplement. |
| | Net Asset Value in aggregate was invested in such Use of Proceeds Impact Bonds and Impact Issuers. | | (b) in the case of each such Use of Proceeds Impact Bonds in which the Sub-Fund was invested, the proceeds raised were aimed to be exclusively applied to finance or re-finance in part or in full projects that demonstrated a clear alignment to helping realise one or more of the 17 UN SDGs. | |

WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

The objective of the SFDR Sustainable Investments the Sub-Fund partially made was to achieve positive environmental and/or social impacts.

The Sub-Fund's SFDR Sustainable Investments contributed to environmental or social objectives by investing in:

Use of Proceeds Impact Bonds: The proceeds were applied to finance or re-finance in part or in full projects with positive environmental and/or social impacts using the UN SDGs as a guide to environmental targets These SFDR Sustainable Investments contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to environmental objectives):

- Affordable and clean energy
- Industry innovation and infrastructure
- Sustainable cities and communities
- Responsible consumption and production
- Climate action
- Life below water
- Life on land

These SFDR Sustainable Investments also contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to social objectives):

- No Poverty
- Zero hunger
- Good health & wellbeing
- Quality education
- Clean water and sanitation
- Decent work and economic growth
- Reduced inequalities

Debt securities issued by Impact Issuers: At least 20% of these investments revenue streams were linked to positive environmental and/or social impacts using the UN SDGs as a guide to environmental targets. These SFDR Sustainable Investments contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to environmental objectives):

- Affordable and clean energy
- Industry innovation and infrastructure
- Sustainable cities and communities
- Responsible consumption and production
- Climate action

These SFDR Sustainable Investments also contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to social objectives):

- Good health & wellbeing
- Clean water and sanitation
- Decent work and economic growth
- Reduced inequalities
- Peace and justice strong institutions

The SFDR Sustainable Investments may, in some cases have contributed to the environmental objectives as set out in Article 9 of the EU Taxonomy Regulation. However, this was not explicitly considered by the Investment Manager in their assessment of the investments.

HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

During the Reference Period, the Sub-Fund's investments determined by the Investment Manager to be SFDR Sustainable Investments did not cause significant harm to any environmental or social sustainable investments objective as they were not in breach of the PAIs thresholds set by the Investment Manager.

HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS TAKEN INTO ACCOUNT?

During the Reference Period, the indicators for adverse impacts in Table 1 of Annex 1 and any relevant indicators in Tables 2 and 3 of that Annex were taken into account as follows in respect of the Sub-Funds SFDR Sustainable Investments:

The Sub-Fund took into account the following PAIs from:

- Table 1 of Annex I of the Commission Delegated Regulation:
- 1. GHG Emissions: Scope 1, 2 and 3
- 2. Carbon Footprint: Scope 1, 2 and 3
- GHG Intensity of Investee Companies: Scope 1, 2 and 3
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

- 6. Energy consumption intensity per high impact climate sector: NACE A, B, C, D, E, F, G, H and L
- 7. Activities negatively affecting biodiversity-sensitive areas
- 8. Emissions to water
- 9. Hazardous waste and radioactive waste ratio
- 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 12. Unadjusted gender pay gap
- 13. Board gender diversity
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).

During the Reference Period, the Sub-Fund took into account the above PAIs, in the following manner and solely in respect of its SFDR Sustainable Investments:

- PAI thresholds were set by the Investment Manager at an issuer and/or Sub-Fund level where applicable in relation to the instrument held by the Sub-Fund. The PAI thresholds were only applied to the Sub-Fund's corporate and sovereign holdings
- The Investment Manager measured the performance of the issuer and/or the Sub-Fund, as applicable, against the PAI which may then have triggered an additional qualitative review where appropriate to determine crossing of PAI thresholds at the time of investment and on an ongoing basis during the above period using data obtained from the Investment Manager's designated third-part data provider.

There were no breaches of such PAI thresholds set by the Investment Manager.

WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND **HUMAN RIGHTS?**

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights (the "Responsible Business Practices") collectively cover a broad range of areas of responsible business, including labour rights, consumer protection and support for internationally recognised human rights within a company's or issuer's sphere of influence.

The Sub-Fund's investments determined by the Investment Manager to be SFDR Sustainable Investments were considered aligned with the Responsible Business Practices as each issuer passed a broad controversy screen provided by a third party which either directly covered one or more of the Responsible Business Practices or was considered an appropriate proxy for one or more of the Responsible Business Practices. The Investment Manager was dependant on the information and data available to such third party in order to complete the broad controversy screen. It should be noted, that the availability and quality of data may have impacted the screening process.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following mentioned PAIs to the extent practicable from Table 1 of Annex 1 of the Commission Delegated Regulation:

Green House Gas ("GHG") Emissions: Scope 1, 2 and 3

- 2. Carbon Footprint: Scope 1, 2 and 3
- GHG Intensity of Investee Companies: Scope 1, 2 and 3
- 6. Energy consumption intensity per high impact climate sector: NACE A, B, C, D, E, F, G, H and L
- Activities negatively affecting biodiversity-sensitive areas 7.
- Emissions to water
- Hazardous waste and radioactive waste ratio
- 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons)

PAI thresholds were set by the Investment Manager at an issuer and/or Sub-Fund level where applicable to the instrument held. The PAI thresholds were only applied to the Sub-Fund's corporate and sovereign holdings which were considered by the Investment Manager to be SFDR Sustainable Investments.

The Investment Manager measured the performance of the issuer and/or the Sub-Fund, as applicable, against these thresholds which may then have triggered an additional qualitative review where appropriate to determine crossing of PAI thresholds at the time of investment and on an ongoing basis during the above period using data obtained from the Investment Manager's designated thirdpart data provider.

There were no breaches of such PAI thresholds set by the Investment Manager.

The Investment Manager was dependent upon information and data from third party data providers to be able to consider principal adverse impacts on sustainability factors. Data coverage was previously low and incomplete for some of the mandatory PAIs which impacted the Investment Manager's analysis of adverse indicators. Data quality and completeness has improved over time with the Investment Manager utilising a data provider which has greater coverage. It's expected that PAIs can be applied to a greater portion of the Investment Manager's investable universe, allowing enhanced insight into the adverse impacts caused by issuers.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2024 to 31 December 2024

| Largest investments | Sector | % of assets | Country |

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

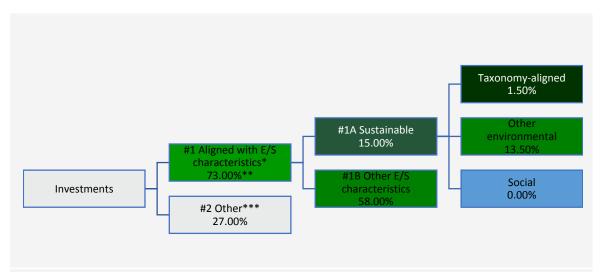

WHAT WAS THE ASSET ALLOCATION?

The Sub-Fund promoted environmental or social characteristics during the Reference Period using an exclusionary approach and allocations to certain SFDR Sustainable Investments, and an investment in a CIS.

Please note that the percentage figures provided in the diagram below reflect percentages out of the Net Asset Value of the Fund as at the end of Reference Period.

The figure in #1 represents a combination of both approaches. The allocation to SFDR Sustainable Investments is referenced in #1A. The figure in #1B below represents the proportion of the portfolio that is not considered by the Investment Manager to be SFDR Sustainable Investments but has excluded certain types of investments as detailed in the binding elements of the investment strategy outlined in the supplement and therefore such proportion of the portfolio was aligned with the environmental or social characteristics promoted by the Sub-Fund through the absence of those investments. The figure in #1B below also represents a proportion of the portfolio held in an investment in a CIS that is considered by the Investment Manager to align with the environmental and/or social characteristics promoted by the Sub-Fund.

It should be noted that the percentages in this section as outlined in the diagram below are provided as at 31st December 2024 and do not necessarily reflect the position as at other points during the Reference Period (which may be materially higher or lower).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

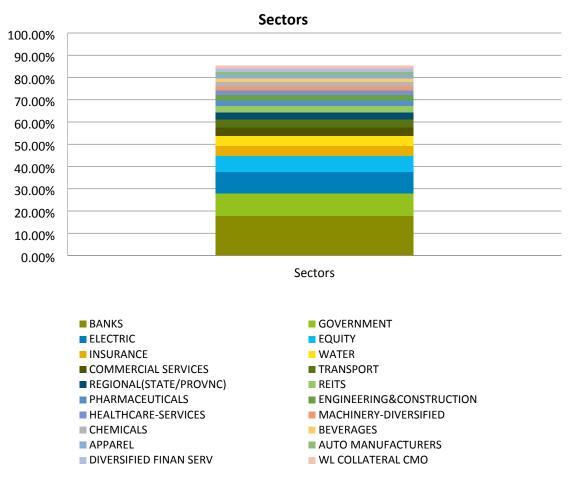

IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?

As at 31st December 2024, the Sub-Fund had mostly been exposed to Government, Banks, as illustrated below.

^{*} The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider alignment with some of the E/S characteristics. In particular, the lack or incomplete reporting of metrics by some investments meant that there was only limited data on such investments. As such, for some of the Sub-Fund's investments, data coverage (such as for carbon footprint) was very low and in the absence of relevant data, such investments were assumed by the Investment Manager to be aligned with E/S characteristics

^{** #1} Aligned with E/S characteristics percentage figure includes investments that are 73% of the NAV in direct holdings and 7.5% of the NAV in an indirect holding, the indirect holding refers to the Sub-Fund's investment in a CIS. Although in the opinion of the Investment Manager this CIS holding aligned with the Environmental and Social characteristics promoted by the Sub-Fund, this CIS holding did not fully (i) apply the exclusion criteria applied by the Sub-Fund (as detailed in the binding elements of the Sub-Fund's investment strategy outlined in the supplement) and (ii) align with the full set of PAIs taken into account by the Sub Fund.

^{*** #2} Other contains investments that do not align with E/S characteristics promoted by the fund i.e., cash, derivatives (FDI) for hedging and collective investment schemes (CIS) for liquidity purposes. For further detail please see the question below "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?".

The above figures are provided as at 31 December 2024 only and do not necessarily reflect the position as at other points during the Reference Period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-fund did not commit to making investments aligned with the EU Taxonomy. However, out of the Sub-Funds allocation to SFDR Sustainable Investments, 46% of the Sustainable Investments with an environmental objective aligned with the EU Taxonomy as of 31st December 2024.

The taxonomy aligned investments contributed to the at least one of the following objectives as set out in Article 9 of Regulation (Eu) 2020/852:

- 1. Climate change mitigation.
- 2. Climate change adaptation.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

All figures and disclosures in relation to EU Taxonomy alignment in this Annex reflect the Sub-Fund's positions as at the end of the Reference Period using the most recent data available from relevant third party data providers as at 2nd January 2025.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

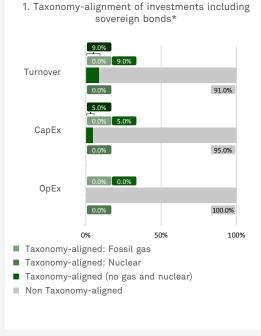

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

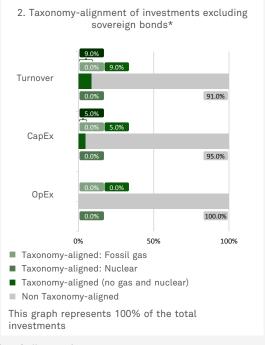

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY 1?

| ☐ Yes: | |
|-----------------|---------------------|
| ☐ In fossil gas | ☐ In nuclear energy |
| ☑ No | |

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND **ENABLING ACTIVITIES?**

0.00%

HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period. This was due to improvements in the availability of data that was reported by companies as opposed to estimated by thirdparty data providers.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

investments with an environmental objective

that do not take into

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

54% of the of Sustainable Investments with an environmental objective were not aligned with the EU Taxonomy as at 31 December 2024.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

All figures and disclosures in relation to EU Taxonomy alignment in this Annex reflect the Sub-Fund's positions as at the end of the Reference Period using the most recent data available from relevant third party data providers as at 2nd January 2025.

What was the share of socially sustainable investments?

While the Sub-Fund does not commit to investing a minimum percentage of its Net Asset Value in socially sustainable investments, the Sub-Fund invested 0%* of its Net Asset Value in SFDR Sustainable Investments with a social objective, as at 31 December 2024.

*This percentage figure is provided as at 31 December 2024 only and does not necessarily reflect the position as at other points during the Reference Period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Other" were:

- Liquid and near-cash assets including cash held or used for ancillary liquidity purposes.
- Collective Investment Schemes (CIS) that were specifically used for liquidity purposes.
- Derivatives (FDI) that were specifically used for hedging purposes.

No minimum environment or social safeguards were considered for these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken to meet the environmental and/or social characteristics during the Reference Period are:

- The Investment Manager:
- a) Invested in Use of Proceeds Impact Bonds and Impact Issuers, each of which were considered to be "SFDR Sustainable Investments" (as determined by the Investment Manager).
- b) Employed an exclusion policy as outlined in the Sub-Fund's supplement and the annex to the Sub-Fund's supplement.

These binding elements of the Sub-Fund were coded into the trading systems and used to monitor the environmental and social characteristics promoted during the reference period.

The following internal control mechanisms were used by the Investment Manager for such monitoring during the Reference Period:

Pre-trade warnings appeared in the trade system prior to trading to inform portfolio managers of a prohibition or limit.

Post-trade warnings were also reviewed by the monitoring team and escalated as appropriate.

Oversight of the relevance of criteria used to meet characteristics promoted was provided by the Responsible Investment Group, a governance group within the Investment Manager which has overall oversight of ensuring effective implementation of ESG due diligence at asset class level and for defining adherence criteria for the Investment Managers 'Responsible Horizons' strategies. Oversight of internal exclusions lists used to ensure certain binding criteria were met, was provided by the Ratings and Exclusions Group ("REG"), a governance group within the Investment Manager.

During the Reference Period, no engagement with the issuers in which the Sub-Fund has invested was required or undertaken as a consequence of there being no breaches of any of the binding elements outlined in Sub-Fund's supplement.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

- HOW DOES THE REFERENCE BENCHMARK DIFFER FROM A BROAD MARKET INDEX? Not applicable.
- HOW DID THIS FINANCIAL PRODUCT PERFORM WITH REGARD TO THE SUSTAINABILITY INDICATORS TO DETERMINE THE ALIGNMENT OF THE REFERENCE BENCHMARK WITH THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED?

Not applicable.

HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE REFERENCE **BENCHMARK?**

Not applicable.

HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE BROAD MARKET INDEX?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: BNY Mellon Blockchain Innovation Fund Legal entity identifier: 213800550EJYI8WPBT81

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Sub-Fund were met to the following extent during the reference period 1 January 2024 to 31 December 2024 (the "Reference Period").

The environmental and/or social characteristics promoted were:

- Investment in companies that align with the Investment Manager's proprietary carbon red line
- Avoid investment in companies that have material unresolvable issues relating to human rights, labour, the environment, and corruption
- Investment in companies proactively seeking to manage social and environmental factors well
- Investment in companies that benefit from increased efficiency and transparency of business operations, with implications for resource use and environmental footprints of companies e.g., companies that provide, financial services to the underbanked, improved personal property and digital security, and increased access to and efficiency of digital services worldwide, among others.

All of the above characteristics were met by the Sub-Fund during the reference period.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The SFDR Sustainable Investments underlying this Sub-Fund did not contribute to the environmental objectives set out in Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments underlying this Sub-Fund contributed to the following environmental objectives not aligned with the EU Taxonomy:

- Sustainable trade
- Reducing carbon emissions
- Reducing waste

- Supporting the production and consumption of renewable energies through providing traceability
- Sustainable sourcing

The SFDR Sustainable Investments underlying this Sub-Fund contributed to the following social objectives:

- Access to improved digital security, and increased access to and efficiency of digital services
- Access to finance
- Cybersecurity
- Data privacy

HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The following sustainability indicators are used to measure how the environmental or social characteristics promoted by the Sub-Fund are attained:

- 1) No more than 5% of Net Asset Value in companies that:
- Are in the following sectors as defined by the Global Industry Classification Standard (GICS): materials, industrials, utilities, and energy; and
- Have a business incompatible with a scenario in which global temperatures rise more than 2 degrees Celsius above pre-industrial levels, as determined by the Investment Manager's proprietary framework; and
- Do not have an adequate strategy to address emissions / climate change, or a credible transition plan, as determined by the Investment Manager's proprietary framework.

In addition, where third party data is not available to assess these criteria or indicates that specific companies meet these criteria, the Investment Manager retains discretion to determine alignment with this sustainability indicator solely on the basis of its qualitative review process.

- 0% of Net Asset Value in investee companies that have been involved in violations of the UNGC principles.
- 3) A weighted average ESG risk rating of 'medium' or better at the portfolio level. Such rating to be determined using third party data.
- 4) Innovation in supply chain as indicated through qualitative case studies.
- 5) Access to improved digital security, and increased access to and efficiency of digital services worldwide as indicated through qualitative case studies.
- 1. WisdomTree, Inc: 7.23% of the sub-fund as of 31 December 2024

Sustainability indicator: Access to improved digital security, and increased access to and efficiency of digital services worldwide as indicated through qualitative case studies.

Sustainable Thematic Justification: Wisdomtree, a leading ETF manager, is tokenizing assets in digital vehicles with the intent to provide greater liquidity and lower costs for investors. The company recently launched Wisdomtree Prime, a consumer digital wallet to facilitate real time trading, liquidity, and management of their tokenized fund offerings. Wisdomtree has worked with Securrency to build technology to ensure digital transactions on public blockchains comply with anti-money laundering (AML) and know-your-customer (KYC) regulation for market participants.

NVIDIA Corp: 7.23% of the sub-fund as of 31 December 2024

Sustainability indicator: Innovation in supply chain as indicated through qualitative case studies.

Sustainable Thematic Justification: NVDA is a hardware enabler of blockchain technology which requires processing power for current applications as well as future blockchain applications for Web 3.0 and the metaverse. From an environmental and social perspective, NVDA's demonstrated improvements in GPU power efficiency for datacentres and gaming/omniverse end markets reduces electricity cost, improves chip speeds and saves space.

3. Block, Inc. Class A: 6.17% of the sub-fund as of 31 December 2024

Sustainability indicator: Access to improved digital security, and increased access to and efficiency of digital services worldwide as indicated through qualitative case studies.

Sustainable Thematic Justification: Block is seeking to broaden access and lower the cost of financial service using blockchain technology. It has a dedicated business segment working on decentralizing finance, starting with creating a secure digital wallet and increasing the speed, functionality, and availability of payments for free using the Bitcoin Lightning network. The Lightning Network is an energy efficient layer-2 scaling solution that enables instant and cost-effective transactions for BTC.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. Microsoft Corp.: 5.73% of the sub-fund as of 31 December 2024

Sustainability indicator: Access to improved digital security, and increased access to and efficiency of digital services worldwide as indicated through qualitative case studies.

Sustainable Thematic Justification: Microsoft offers a range of blockchain architectures focused on financial services and supply chain verticals. Microsoft recently announced their participation in the Canton Network, which is a privacy first blockchain network that addresses the need for strict security, legal and regulatory controls required for tokenizing, trading and settling assets in financial markets. In supply chain, the company provides digitization, traceability, visibility, auditability and a verifiable record of transfer of products and services for enterprises to reduce waste and increase operational efficiency.

Taiwan Semiconductor Manufacturing Company Ltd: 5.16% of the sub-fund as of 31 December 2024

Sustainability indicator: Access to improved digital security, and increased access to and efficiency of digital services worldwide as indicated through qualitative case studies.

Sustainable Thematic Justification: The largest semiconductor manufacturer, TSMC is a vital player in the development of technology demands that support a more advanced and interconnected and resource efficient digital world. Its manufacturing capacity is assisting the emergence of numerous technologies such as AI, 5G, IoT, cloud computing, and many others. With its most cutting-edge and extensive portfolio of specialized foundry process, TSMC is fostering transformation across practically all sectors, examples of which include healthcare, banking, sustainable energy, manufacturing, and cloud computing.

The data coverage for sustainability indicators #1 and #2 was 100% of the Sub-Fund. The data coverage for sustainability indicator #3 was 100% of the Sub-Fund.

No derivatives (FDI) were used to meet the environmental or social characteristics.

The sustainability indicators performed as follows:

| Indicator # | How did the indicator perform in the reference period? | |
|-----------------------------|---|--|
| Sustainability Indicator #1 | 0% | |
| Sustainability Indicator #2 | 0% | |
| Sustainability Indicator #3 | Low – on a weighted average basis, the Sub-Fund was deemed by a third-party data provider to have a low level of unmanaged ESG risks. | |
| Sustainability Indicator #4 | Qualitative case studies for the top 5 holdings in the fund (by weight) included above | |
| Sustainability Indicator #5 | Qualitative case studies for the top 5 holdings in the fund (by weight) included above | |

...AND COMPARED TO PREVIOUS PERIODS?

| Reference period | Sustainability Indicator #1 | Sustainability Indicator #2 | Sustainability Indicator #3 | Sustainability Indicator #4 | Sustainability Indicator #5 |
|--|--------------------------------|--------------------------------|--------------------------------|---|---|
| 31 December 2023 - 31 December 2024 | 0% | 0% | Low | Qualitative case studies for the 5 top holdings | Qualitative case studies for the 5 top holdings |
| 31 December 2022 - 31 December 2023 | 0% | 0% | Low | Qualitative case studies for the 5 top holdings | Qualitative case studies for the 5 top holdings |

WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

The social objectives of the SFDR Sustainable Investments the Sub-Fund partially made are included above.

The SFDR Sustainable Investments contributed to the above social objectives in the following ways:

- Broadening access and lowering the cost of financial services using blockchain technology
- Increasing the speed and security of payments at a lower cost
- Using blockchain to improve the speed and security of insurance underwriting
- Addressing key risks in digital asset markets regulatory compliance and security. Securely managing private keys for digital asset platforms in a scalable manner thus contributing to data privacy.

The SFDR Sustainable Investments underlying this Sub-Fund contributed to environmental objectives not aligned with Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments contributed to environmental objectives not aligned with the EU Taxonomy in the following ways:

- Implementing blockchain solutions that improve supply chain efficiency, traceability, and sustainability
- Provision of traceability for renewable power production & consumption
- Provision of distributed solar power systems utilizing blockchain technology, with solutions contributing to smarter, more efficient, more secure, and reliable energy production, usage and storage
- Developing enterprise blockchain based solutions to promote supply chains efficiency/ sustainability and provide tracking, measurement and reduction of carbon footprint/emissions

HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

The Investment Manager determined that SFDR Sustainable Investments in the Sub-Fund did no significant harm to any environmental or social objectives by assessing each SFDR Sustainable Investment's involvement in areas deemed to be harmful from an environmental or social perspective. Issuers that had involvement in activities deemed to be harmful from an environmental or social perspective were excluded from investment. Involvement in such activities was monitored on an ongoing basis.

HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS **TAKEN INTO ACCOUNT?**

The Investment Manager reviewed the indicators for adverse impacts on sustainability factors for all SFDR Sustainable Investments where data was available. The Investment Manager reviewed PAIs for investee issuers using data from a designated third party data provider. If a given PAI or PAIs for an issuer appeared to exceed expectations based on the data obtained from the designated third-party data provider, further qualitative review was undertaken with respect to those issuer(s) and that product in order to determine whether such data indicated the evidence of significant harm. Where there were data gaps and the PAI was considered material for a company's sector, the Investment Manager's internal qualitative assessment was used to assess the PAIs.

The Sub-Fund took into account the following PAIs from:

- Table 1 of Annex I of the Commission Delegated Regulation:
- GHG emissions: Scope 1, 2 and 3
- 2. Carbon footprint: Scope 1, 2 and 3
- 3. GHG intensity of investee companies: Scope 1, 2 and 3
- 4. Exposure to companies active in the fossil fuel sector
- 5. Share of non-renewable energy consumption and production
- 6. Energy consumption intensity per high impact climate sector: NACE A, B, C, D, E, F, G, H and L
- Activities negatively affecting biodiversity-sensitive areas
- 8. Emissions to water
- 9. Hazardous waste and radioactive waste ratio
- 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 12. Unadjusted gender pay gap
- 13. Board gender diversity
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons)
- Table 2 of Annex I of the Commission Delegated Regulation: 4. Investments in companies without carbon emission reduction initiatives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Table 3 of Annex I of the Commission Delegated Regulation: 9. Lack of a human rights policy. 17. Number of convictions and amount of fines for violation of anti-corruption and anti-bribery

WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND **HUMAN RIGHTS?**

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights (the "Responsible Business Practices") collectively cover a very broad range of areas of responsible business, encompassing everything from labour rights to consumer protection to support for internationally recognised human rights within a company's or issuer's sphere of influence.

SFDR Sustainable Investments were considered aligned with the Responsible Business Practices as each company invested in passed screens provided by third parties which either directly cover one or more of the Responsible Business Practices or are considered appropriate proxies for one or more of the Responsible Business Practices. Each company invested in also passed the Investment Manager's own qualitative review process which takes into account the Responsible Business Practices. In addition, where the companies invested in do not pass the relevant screens provided by third parties, the Investment Manager retains discretion to establish alignment with the Responsible Business Practices solely on the basis of its qualitative review process.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager reviewed principal adverse impacts at the product level on a frequent basis during the reference period, notwithstanding certain data coverage and data quality issues as further described below. The Investment Manager reviewed PAIs for investee issuers using data from a designated third party data provider. If a given PAI or PAIs for an issuer or product appeared to exceed expectations based on the data obtained from the designated third-party data provider, further qualitative review was undertaken with respect to those issuer(s) and that product in order to determine whether such data indicated the evidence of significant harm. In cases where, in the view of the Investment Manager, unresolvable significant harm was identified following further qualitative review, further action would be taken up to and including divestment. Over the course of the reference period no unresolvable significant harm was identified for investments in the Sub-Fund. Where there were data gaps and the PAI was considered material for a company's sector, the Investment Manager's internal qualitative assessment was used to assess the PAIs.

PAIs were categorised based on their characteristics (including their materiality and the Investment Manager's ability to estimate them), and such categories were used for the purpose of determining the actions and outcome when assessing the PAIs.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider principal adverse impacts on sustainability factors. The availability and quality of such data impacted the extent to which each such PAI could be considered. In particular, the lack or incomplete reporting of metrics by some issuers meant that there was limited data on some adverse indicators. As such for some of the mandatory PAIs, data coverage was low. The Investment Manager's analysis of adverse indicators relied on this third-party information and data, and where such information was not available or was incomplete, the Investment Manager's analysis of adverse indicators was necessarily limited. As the data availability improves over time, it is expected that PAIs can be applied to a greater portion of the Investment Manager's investable universe. This will allow for enhanced insight into the adverse impacts caused by issuers.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2024 to 31 December 2024

| Largest investments | Sector | % of assets | Country |
|---------------------------|--------------------------|-------------|---------|
| WisdomTree Inc USD 0.01 | DIVERSIFIED FINAN SERV | 7.47% | USA |

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

WHAT WAS THE ASSET ALLOCATION?

The asset allocation diagram illustrates the asset allocation of this Sub-Fund. 99.28% of Net Asset Value was used to meet the environmental or social characteristics promoted by the Sub-Fund in accordance with the binding elements of the investment strategy. The Sub-Fund invested 70.69% of Net Asset Value in SFDR Sustainable Investments of which 33.71% had an environmental objective not aligned with the EU Taxonomy and 36.70% had a social objective. 0.28% of the Net Asset Value of the Sub-Fund was invested in sustainable investments with an environmental objective aligned with the EU Taxonomy.

#1 Aligned with E/S characteristics: 99.28% of Net Asset Value

#1A Sustainable: 70.69% of Net Asset Value

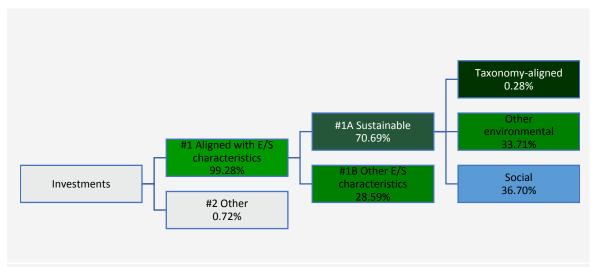

Taxonomy-aligned: 0.28% of Net Asset Value

Environmental: 33.71% of Net Asset Value

Social: 36.70% of Net Asset Value

#1B Other E/S characteristics: 28.59% of Net Asset Value

#2 Other: 0.72% of Net Asset Value

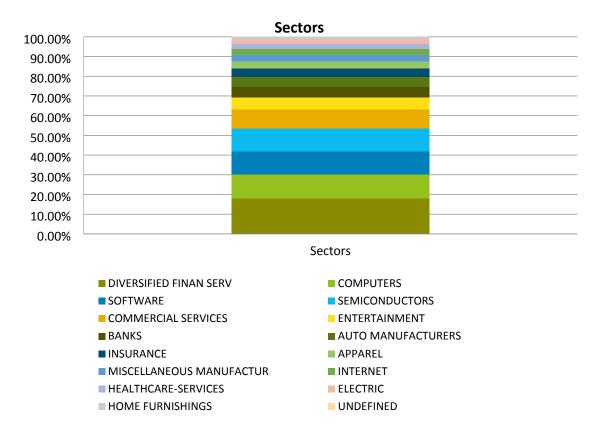

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?

The above figures are provided as at 31 December 2024 only and do not necessarily reflect the position as at other points during the Reference Period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0.28% of the Net Asset Value of the Sub-Fund was invested in SFDR Sustainable Investments with environmental objectives aligned with the EU Taxonomy.

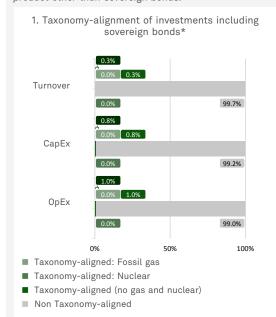

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

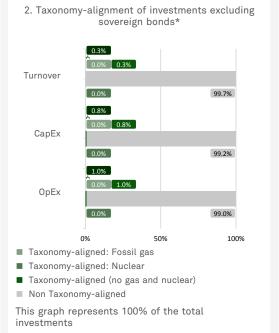

The assessment of whether these investments complied with the EU Criteria for Environmentally Sustainable Economic Activities was not subject to an assurance provided by one or more auditors or a review by one or more third parties.

DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY 1?

| ☐ Yes: | |
|-----------------|--------------------|
| ☐ In fossil gas | ☐ In nuclear energ |
| ☑ No | |

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities: 0.27% (turnover)

Transitional activities: 0.00%

HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period. This was due to improvements in the availability of data that was reported by companies as opposed to estimated by thirdparty data providers.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund invested 33.71% of NAV in SFDR Sustainable Investments with an environmental objective not aligned with the EU Taxonomy.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

What was the share of socially sustainable investments?

While the Sub-Fund does not commit to investing a minimum percentage of its Net Asset Value in socially sustainable investments, the Sub-Fund invested 36.70% of its Net Asset Value in SFDR Sustainable Investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Sub-Fund invested 0.72% of Net Asset Value in category #2 (other) which comprised of:

0.72% in cash held for liquidity purposes only. These instruments were not subject to environmental or social safeguards as the Investment Manager does not view environmental or social considerations as relevant for these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In order to meet environmental and social characteristics promoted by the Sub-Fund, the Investment Manager took the following actions:

- Invested at least 10% in SFDR Sustainable Investments
- Excluded issuers that produce tobacco products
- Excluded issuers that derive more than 10% of turnover from the sale of tobacco
- Excluded issuers that generate revenues from the production of controversial weapons
- Excluded issuers in breach of the Principles of the UN Global Compact (which includes principles relating to human rights, labour, environment and anti-corruption)

- Invested at least 90% of the Net Asset Value of the Sub-Fund net of the Sub-Fund's exposure to cash and liquid near cash assets, money market funds, and currency related FDI and FDI used for hedging purposes (the "Non-ESG Assets") in companies that meet the Investment Manager's ESG and sustainability criteria at time of purchase and on an ongoing basis. As further detailed above, the Investment Manager divested from a position in one company as the Investment Manager determined that the company no longer met the Investment Manager's ESG and sustainability criteria.
- Invested at least 80% of the Net Asset Value of the Sub-Fund in digital assets companies. Digital asset companies are companies likely to benefit from the emerging or ongoing revenue and/or cost savings opportunities offered by blockchain technology (synonymously known as distributed ledger technology) or companies which enable blockchain technology. Blockchain technology, can be most simply defined as an integrated software and hardware that enables companies to independently maintain and exchange digitalised transactional data in a standardised format.

Engagement is not a part of the environmental or social investment strategy of the Sub-Fund. However, engagement is an integral part of the Investment Manager's approach to investing as they believe that constructive dialogue with management teams not only affords real insight into how a company operates, it is an opportunity to advocate for positive change.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund

HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE BROAD MARKET INDEX?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: BNY Mellon Efficient Euro High Yield Beta Fund Legal entity identifier: 213800Z1NSCPJYMEDP21

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Sub-Fund were met to the following extent during the reference period 24th June 2024 to 31st December 2024 (the "Reference Period").

The Sub-Fund promoted a minimum environmental and/or social standard that sought to mitigate or avoid practices that the Investment Manager deemed environmentally and/or socially detrimental.

Exclusion criteria - as set out in the Sub-Fund's supplement - were used to achieve this minimum standard. For example, as referenced in the pre-contractual disclosure, issuers that derive a certain percentage of revenue, as determined by JP Morgan (JPM), from tobacco production, thermal coal mining, thermal coal power generation and oil sands extraction, controversial weapons production and civilian and non-civilian weapons manufacturing and distribution were excluded. Issuers were also excluded where, in the opinion of JPM, the issuers were deemed to have violated the minimum standards of business practices as defined by the principles of the UN Global Compact.

The Sub-Fund did not invest in SFDR Sustainable Investments.

A reference benchmark was not designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The following sustainability indicator will be used to measure whether the Sub-Fund is attaining the environmental and/or social characteristics it promotes:

Exclusion Policy: An assessment of whether the Sub-Fund had successfully and consistently executed its exclusion policy, to not invest in securities issued by corporate entities that met any of the below:

- Derived any revenues
 - the production of tobacco

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- the production of controversial weapons
- the extraction of thermal coal/generates electricity from thermal coal unless:
 - the issue purchased is a green bond as labelled by the Climate Bonds Initiative
- derived any revenue from the extraction of oil sands
- derived more than 10% of revenues from the manufacture and/or sale of non-civilian weapons
- derived any revenue from the manufacture and/or sale of civilian weapons.
- Were deemed by the Investment Manager to be involved in severe environmental, social or governance controversies including significant violations of UN Global Compact Principles,
- have the lowest ESG score as determined by JPM, except if the bond is a green bond as labelled by the Climate Bonds Initiative.

As at the 31st December 2024 the Sub-Fund's investments were 90%* aligned with the environmental and social criteria promoted. The remaining 10% was held in cash and derivatives for hedging purposes and therefore not aligned with environmental and social criteria promoted.

*This percentage figure is provided as at 31st December 2024 only and does not necessarily reflect the position as at other points during the Reference Period.

...AND COMPARED TO PREVIOUS PERIODS?

No comparison for previous periods is available at the date of this periodic report.

 WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

Not applicable. The Sub-Fund did not make - in accordance with the SFDR pre-contractual disclosure - any investments during the Reference Period which were considered by the Investment Manager to qualify as sustainable investments pursuant to SFDR.

HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

Not applicable.

HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS **TAKEN INTO ACCOUNT?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

> WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND **HUMAN RIGHTS?**

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following PAIs from Table 1 of Annex I of the Commission Delegated Regulation:

- 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).
- 16. Investee countries subject to social violations

The PAIs were measured against certain defined thresholds which then may have triggered an additional qualitative review by the Investment Manager to determine if they have been breached. Following this process, if a PAI is considered to have been breached the Investment Manager excluded the relevant issuer from the Sub-Fund or took a synthetic short exposure to the issuer. Reporting on consideration of PAIs are available in an annex to the annual report of the Sub-Fund. Where the Sub-Fund invested in a broad market index, PAIs were not considered as the Investment Manager did not look-through to the underlying constituents of these indices.

Please see 'PAI Data Availability' for further information on the PAI data sources and limitations.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 24th June 2024 to 31st December 2024

| Largest investments | Sector | % of assets | Country |

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

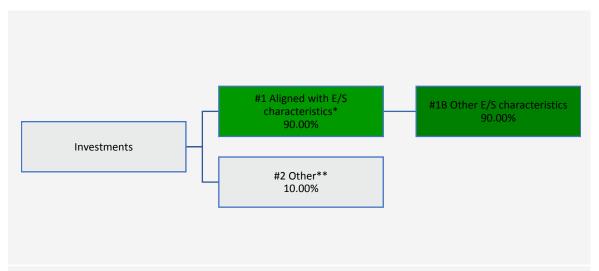

WHAT WAS THE ASSET ALLOCATION?

The Sub-Fund promoted environmental or social characteristics during the Reference Period using an exclusionary approach.

Please note that the percentage figures provided in the diagram below reflect percentages out of the Net Asset Value of the Fund as at the end of Reference Period.

The figure in #1 and in #1B below represents the proportion of the portfolio that has excluded certain types of investments as detailed in the binding elements of the investment strategy outlined in the supplement and therefore such proportion of the portfolio was aligned with the environmental or social characteristics promoted by the Sub-Fund through the absence of those investments.

The percentages in this section as outlined in the diagram below are provided as at 31st December 2024 and do not necessarily reflect the position as at other points during the Reference Period (which may be materially higher or lower).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

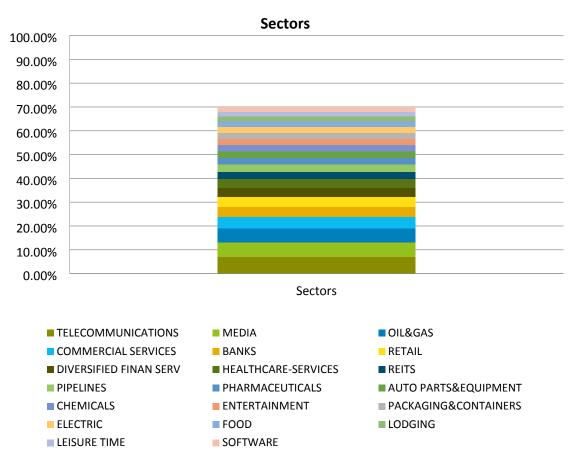

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?

As at 31st December 2024 the Sub-Fund had mostly been exposed to the Telecommunications, Retail sectors, as well as Pipelines and REITS sectors, as illustrated below.

^{*} The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider alignment with some of the E/S characteristics.

^{** #2} Other contains investments that do not align with E/S characteristics promoted by the fund i.e., cash and derivatives (FDI) for hedging. For further detail please see the question below "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?".

The above figures are provided as at 31st December 2024 only and do not necessarily reflect the position as at other points during the Reference Period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

| DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY '? | | | | |
|---|--|--|--|--|
| ☐ Yes: | | | | |
| ☐ In fossil gas ☐ In nuclear energy | | | | |
| ☑ No | | | | |

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds. 1. WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND **ENABLING ACTIVITIES?**

Transitional activities: 0.00% Enabling activities: 0.00%

HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?

No comparison for previous periods is available at the date of this periodic report.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Other" were:

- Liquid and near-cash assets including cash held or used for ancillary liquidity purposes.
- Collective Investment Schemes (CIS) that are used for liquidity purposes
- ETFs used for investment purposes that may be held on a temporary basis to manage subscriptions and redemptions
- Derivatives (FDI) that were used for investment purposes and hedging purposes.

No minimum environment or social safeguards were considered for these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken to meet the environmental and/or social characteristics during the reference period are:

- The Investment Manager employed exclusion criteria as outlined in the Sub-Fund's supplement.
- The Investment Manager ensured the exclusion criteria was met by excluding certain issuers as outlined in the supplement (and above). This was monitored by coding the binding elements (exclusions) into trading systems.
- The Investment Manager also employed the following internal control mechanisms to monitor adherence to the coded binding elements of the Sub-Fund during the Reference Period:
- Pre-trade warnings appeared in the trade system prior to trading to inform portfolio managers of a prohibition or limit.
- 2. Post-trade warnings were also reviewed by the monitoring team and escalated as appropriate.
- Oversight of internal exclusions lists used to ensure certain binding elements were met, was provided by the Ratings and Exclusions Group ("REG"), a governance group within the Investment Manager.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

- HOW DOES THE REFERENCE BENCHMARK DIFFER FROM A BROAD MARKET INDEX? Not applicable.
- HOW DID THIS FINANCIAL PRODUCT PERFORM WITH REGARD TO THE SUSTAINABILITY INDICATORS TO DETERMINE THE ALIGNMENT OF THE REFERENCE BENCHMARK WITH THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED?

Not applicable.

HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE REFERENCE **BENCHMARK?**

Not applicable.

HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE BROAD MARKET INDEX?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: BNY Mellon Efficient Global High Yield Beta Fund Legal entity identifier: 213800JEYSFINLEABK58

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Sub-Fund were met to the following extent during the reference period 25th October 2024 to 31st December 2024 (the "Reference Period").

The Sub-Fund promoted a minimum environmental and/or social standard that sought to mitigate or avoid practices that the Investment Manager deemed environmentally and/or socially detrimental.

The environmental and/or social best practices the Sub-Fund promoted included the reduction of exploitation of tar sands and thermal coal, reduction of production of controversial weapons and reduction of carbon emissions.

Exclusion criteria - as set out in the Sub-Fund's supplement - were used to achieve this minimum standard. For example, as referenced in the pre-contractual disclosure, Issuers derived a certain percentage of revenue as determined by the Investment Manager from tobacco production, thermal coal extraction, thermal coal power generation, oil sands extraction, controversial weapons production and civilian and non-civilian weapons manufacturing and distribution were excluded. Issuers were also excluded where, in the opinion of the Investment Manager, the issuers were deemed to have violated the minimum standards of business practices represented in widely accepted global conventions.

The Sub-Fund did not invest in SFDR Sustainable Investments.

A reference benchmark was not designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The following sustainability indicator will be used to measure whether the Sub-Fund is attaining the environmental and/or social characteristics it promotes:

Exclusion Policy: An assessment of whether the Sub-Fund had successfully and consistently executed its exclusion policy, to not invest in securities issued by corporate entities that met any of the below:

The sustainability indicator performed as follows:

The Exclusion policy was met because the Sub-Fund did not invest in securities issued by corporate entities that:

- Derived any revenues from:
 - the production of tobacco
 - the production of controversial weapons
 - the extraction of thermal coal/generates electricity from thermal coal unless:
 - the issue purchased is a green bond as labelled by the Climate Bonds Initiative
 - extraction of oil sands
 - derived any revenue from the manufacture and/or sale of civilian weapons, or
 - derived more than 10% of revenues from the manufacture and/or sale of non-civilian
 - Were deemed by the Investment Manager to be involved in severe environmental, social or governance controversies including significant violations of UN Global Compact Principles
 - have the lowest ESG score as determined by JPM, except if the bond is a green bond as labelled by the Climate Bonds Initiative.

As at the 31st December 2024 the Sub-Fund's investments were 98%* aligned with the environmental and social criteria promoted. The remaining 2% was held in cash and derivatives for hedging purposes and therefore not aligned with environmental and social criteria promoted.

*This percentage figure is provided as at 31st December 2024 only and does not necessarily reflect the position as at other points during the Reference Period.

...AND COMPARED TO PREVIOUS PERIODS?

No comparison for previous periods is available at the date of this periodic report.

 WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

Not applicable. The Sub-Fund did not make - in accordance with the SFDR pre-contractual disclosure - any investments during the Reference Period which were considered by the Investment Manager to qualify as sustainable investments pursuant to SFDR.

HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

Not applicable.

HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS **TAKEN INTO ACCOUNT?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND **HUMAN RIGHTS?**

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following PAIs from Table 1 of Annex I of the Commission Delegated Regulation:

- 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).
- 16. Investee countries subject to social violations

The PAIs were measured against certain defined thresholds which then may have triggered an additional qualitative review by the Investment Manager to determine if they have been breached. Following this process, if a PAI is considered to have been breached the Investment Manager excluded the relevant issuer from the Sub-Fund or took a synthetic short exposure to the issuer. Reporting on consideration of PAIs are available in an annex to the annual report of the Sub-Fund. Where the Sub-Fund invested in a broad market index, PAIs were not considered as the Investment Manager did not look-through to the underlying constituents of these indices.

Please see 'PAI Data Availability' for further information on the PAI data sources and limitations.

What were the top investments of this financial product?

Product name: BNY Mellon Efficient US Fallen Angels Beta Fund Legal entity identifier: 213800YL6BXGT6FIQ433

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Sub-Fund were met to the following extent during the reference period 1 January 2024 to 31 December 2024 (the "Reference Period")...

The Sub-Fund promoted a minimum environmental and/or social standard that sought to mitigate or avoid practices that the Investment Manager deemed environmentally and/or socially detrimental.

The environmental and/or social best practices the Sub-Fund promoted included the reduction of exploitation of tar sands and thermal coal, reduction of production of controversial weapons and reduction of carbon emissions.

Exclusion criteria - as set out in the Sub-Fund's supplement - were used to achieve this minimum standard. For example, as referenced in the pre-contractual disclosure, Issuers derived a certain percentage of revenue as determined by the Investment Manager from tar sands or thermal coal extraction, and controversial weapons production were excluded. Issuers were also excluded where, in the opinion of the Investment Manager, the issuers were deemed to have violated the minimum standards of business practices represented in widely accepted global conventions.

The Sub-Fund did not invest in SFDR Sustainable Investments.

A reference benchmark was not designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The following sustainability indicator will be used to measure whether the Sub-Fund is attaining the environmental and/or social characteristics it promotes:

Exclusion Policy: An assessment of whether the Sub-Fund had successfully and consistently executed its exclusion policy, to not invest in securities issued by corporate entities that met any of the below:

The sustainability indicator performed as follows:

The Exclusion policy was met because the Sub-Fund did not invest in securities issued by corporate entities that:

- Derived more than 30% of their revenues from tar sands or thermal coal,
- Produced controversial weapons,
- Fell below a pre-set environmental score, as per third party data, where that environmental score was deemed relevant by the Investment Manager, or fell below a pre-set score, as per third party data, on key issues relating to climate change themes,
- Have been allocated a red flag (or equivalent) in relation to key environmental criterion by third party data providers.
- Were deemed by third party, data providers to be involved in severe environmental, social or governance controversies including significant violations of UN Global Compact Principles,

As at the 31 December 2024 the Sub-Fund's investments were 98%* aligned with the environmental and social criteria promoted. The remaining 2% was held in cash and derivatives for hedging purposes and therefore not aligned with environmental and social criteria promoted.

*This percentage figure is provided as at 31 December 2024 only and does not necessarily reflect the position as at other points during the Reference Period.

...AND COMPARED TO PREVIOUS PERIODS?

| Period | riod UN SDGs | |
|---------------------------------------|---|---|
| 1 January 2022 to 31 December 2022 | the Sub-Fund's investments were 99%* aligned with the environmental and social criteria promoted. The remaining 1% was held in cash and derivatives for hedging purposes and therefore not aligned with environmental and social criteria promoted. | The Fund successfully and consistently met its exclusion policy as outlined in the then applicable supplement and the annex to the Fund's supplement. |
| 1 January 2023 to 31 December 2023 | the Sub-Fund's investments were 99.9%* aligned with the environmental and social criteria promoted. The remaining 0.1% was held in cash and derivatives for hedging purposes and therefore not aligned with environmental and social criteria promoted. | The Fund successfully and consistently met its exclusion policy as outlined in the then applicable supplement and the annex to the Fund's supplement. |
| 1 January 2024 to 31 December 2024 | the Sub-Fund's investments were 98%* aligned with the environmental and social criteria promoted. The remaining 2% was held in cash and derivatives for hedging purposes and therefore not aligned with environmental and social criteria promoted. | The Fund successfully and consistently met its exclusion policy as outlined in the then applicable supplement and the annex to the Fund's supplement. |

WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

Not applicable. The Sub-Fund did not make - in accordance with the SFDR pre-contractual disclosure - any investments during the Reference Period which were considered by the Investment Manager to qualify as sustainable investments pursuant to SFDR.

HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS **TAKEN INTO ACCOUNT?**

The Sub-Fund considered the following PAIs from Table 1 of Annex I of the Commission Delegated Regulation:

10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and

Development (OECD) Guidelines for Multinational Enterprises

11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact

principles and OECD Guidelines for Multinational Enterprises

- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).
- 16. Investee countries subject to social violations

The PAIs were measured against certain defined thresholds which then may have triggered an additional qualitative review by the Investment Manager to determine if they have been breached. Following this process, if a PAI was considered to have been breached the Investment Manager excluded the relevant issuer from the Sub-Fund or tool a synthetic short exposure to the issuer.

Reporting on consideration of PAIs is available in an annex to the annual report of the Sub-Fund.

Where the Sub-Fund invested in a broad market index, PAIs were not considered as the Investment Manager did not look-through to the underlying constituents of these indices.

Please see 'PAI Data Availability' for further information on the PAI data sources and limitations.

WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND **HUMAN RIGHTS?**

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund did not consider principal adverse impacts on sustainability factors during the Reference Period.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2024 to 31 December 2024

| Largest investments | Sector | % of assets | Country |
|---------------------------|--------------------|-------------|---------|
| WESTERN D 4.75% 02/15/26 | COMPUTERS | 3.99% | USA |

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

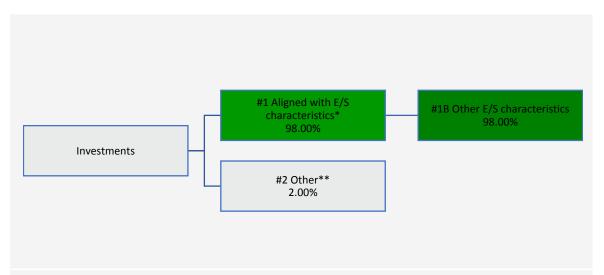

WHAT WAS THE ASSET ALLOCATION?

The Sub-Fund promoted environmental or social characteristics during the Reference Period using an exclusionary approach.

Please note that the percentage figures provided in the diagram below reflect percentages out of the Net Asset Value of the Fund as at the end of Reference Period.

The figure in #1 and in #1B below represents the proportion of the portfolio that has excluded certain types of investments as detailed in the binding elements of the investment strategy outlined in the supplement and therefore such proportion of the portfolio was aligned with the environmental or social characteristics promoted by the Sub-Fund through the absence of those investments.

The percentages in this section as outlined in the diagram below are provided as at 31 December 2024 and do not necessarily reflect the position as at other points during the Reference Period (which may be materially higher or lower).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

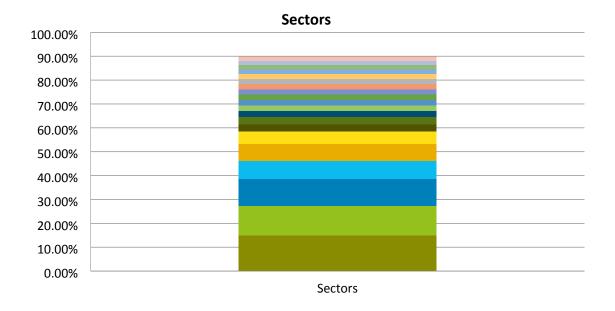

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?

As at 31 December 2024, the Sub-Fund had mostly been exposed to the Telecommunications, Retail sectors, as well as Pipelines and REITS sectors, as illustrated below.

^{*} The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider alignment with some of the E/S characteristics.

^{** #2} Other contains investments that do not align with E/S characteristics promoted by the fund i.e., cash and derivatives (FDI) for hedging. For further detail please see the question below "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?"

The above figures are provided as at 31 December 2024 only and do not necessarily reflect the position as at other points during the Reference Period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

 DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY 1?

| ☐ Yes: | |
|-----------------|---------------------|
| ☐ In fossil gas | ☐ In nuclear energy |
| ✓ No | |

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

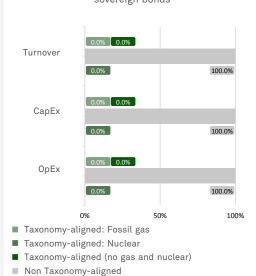

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

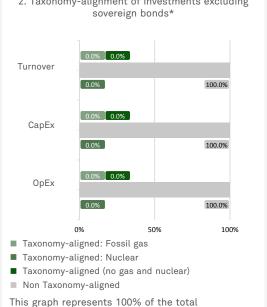

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds. 1. Taxonomy-alignment of investments including 2. Taxonomy-alignment of investments excluding sovereign bonds* sovereign bonds*

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Transitional activities: 0.00% Enabling activities: 0.00%

HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?

investments

No comparison for previous periods is available at the date of this periodic report.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Other" were:

- Liquid and near-cash assets including cash held or used for ancillary liquidity purposes.
- Collective Investment Schemes (CIS) that were used for liquidity purposes
- Derivatives (FDI) that were specifically used for hedging purposes.

No minimum environment or social safeguards were considered for these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken to meet the environmental and/or social characteristics during the reference period are:

- The Investment Manager employed exclusion criteria as outlined in the Sub-Fund's supplement.
- The Investment Manager ensured the exclusion criteria was met by excluding certain issuers as outlined in the supplement (and above). This was monitored by coding the binding elements (exclusions) into trading systems.
- The Investment Manager also employed the following internal control mechanisms to monitor adherence to the coded binding elements of the Sub-Fund during the Reference Period:
- 1. Pre-trade warnings appeared in the trade system prior to trading to inform portfolio managers of a prohibition or limit.
- 2. Post-trade warnings were also reviewed by the monitoring team and escalated as appropriate.
- Oversight of internal exclusions lists used to ensure certain binding elements were met, was provided by the Ratings and Exclusions Group ("REG"), a governance group within the Investment Manager.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

- HOW DOES THE REFERENCE BENCHMARK DIFFER FROM A BROAD MARKET INDEX? Not applicable.
- HOW DID THIS FINANCIAL PRODUCT PERFORM WITH REGARD TO THE SUSTAINABILITY INDICATORS TO DETERMINE THE ALIGNMENT OF THE REFERENCE BENCHMARK WITH THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED?

Not applicable.

HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE REFERENCE **BENCHMARK?**

Not applicable.

HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE BROAD MARKET INDEX?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: BNY Mellon Emerging Markets Corporate Debt Fund

Legal entity identifier: 213800UJQ2JMWP13VU32

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852. establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

| | Did th | is fir | nancial product have a sustainable i | nvestment objective? | | |

| | | | | | | with a social objective |
| | | | ade sustainable investments with a social ective:% | V | | omoted E/S characteristics, but did not e any sustainable investments |
| | | | | | | |

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Sub-Fund were met to the following extent during the reference period 1 January 2024 to 31 December 2024 (the "Reference Period"):

The Sub-Fund promoted a minimum environmental and/or social standard that sought to mitigate or avoid practices that the Investment Manager deemed environmentally and/or socially detrimental.

Exclusion criteria - as set out in the Sub-Fund's supplement - were used to achieve this minimum standard. For example, as referenced in the pre-contractual disclosure, issuers that derived a certain percentage of revenue as (determined by the Investment Manager) from thermal coal extraction, tar sands, controversial weapons production were excluded and reduction of carbon emissions.

Issuers were also excluded where, in the opinion of the Investment Manager, such issuers were deemed to have violated the minimum standards of business practices represented in widely accepted global conventions.

The Sub-Fund did not invest in SFDR Sustainable Investments.

Sustainability indicators measure environmental or social characteristics promoted by the financial product are attained.

HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The following sustainability indicator will be used to measure whether the Sub-Fund is attaining the environmental and/or social characteristics it promotes:

Exclusion Policy: An assessment of whether the Sub-Fund had successfully and consistently executed its exclusion policy, to not invest in securities issued by corporate entities that met any of the below:

The sustainability indicator performed as follows:

The Exclusion policy was met because the Sub-Fund did not invest in securities issued by corporate entities that:

- Derived more than 5% of their revenue from the production of tobacco,
- Were involved in the production of controversial weapons,
- Derived more than 5% of their revenue from thermal coal mining and/or more than 10% of revenue from thermal coal power generation, unless: a) The issue purchased was a use-of proceeds impact bond which passed the Investment Manager's own assessment framework and/ or b) The issuer had a robust and clearly defined plan to reduce emissions in line with the Paris agreement goals, within the assessment of the Investment Manager and/or c) The issuer had a clearly defined plan to exit coal mining and/or generation before (i) 2030 in the case of developed market domiciled issuers or (ii) 2040 in the case of emerging market domiciled issuers;
- Fell below a pre-set environmental score, as per third party data, where that environmental score was deemed relevant by the Investment Manager, or fell below a pre-set score, as per third party data, on key issues relating to climate change themes,
- had allocated a red flag (or equivalent) in relation to key environmental criterion by third party Data Providers- Were deemed, by third party, Data Providers, to be in violation of the UN Global Compact principles (including environmental and governance principles, which include those relating to labour, human rights, bribery and corruption).

As at the 31 December 2024 the Sub-Fund's investments were 90%* aligned with the environmental and social criteria promoted. The remaining 10% was held in cash and derivatives for hedging purposes and therefore not aligned with environmental and social criteria promoted.

*This percentage figure is provided as at 31 December 2024 only and does not necessarily reflect the position as at other points during the Reference Period.

...AND COMPARED TO PREVIOUS PERIODS?

| Period | Sustainable Investments | Exclusion policy |
|---------------------------------------|--|---|
| 1 January 2023 to 31 December 2023 | the Sub-Fund's investments were 96%* aligned with the environmental and social criteria promoted. The remaining 4% was held in cash and derivatives for hedging purposes and therefore not aligned with environmental and social criteria promoted. | The Fund successfully and consistently met its exclusion policy as outlined in the then applicable supplement and the annex to the Fund's supplement. |
| 1 January 2024 to 31 December 2024 | the Sub-Fund's investments were 90%* aligned with the environmental and social criteria promoted. The remaining 10% was held in cash and derivatives for hedging purposes and therefore not aligned with environmental and social criteria promoted. | The Fund successfully and consistently met its exclusion policy as outlined in the then applicable supplement and the annex to the Fund's supplement. |

WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

Not applicable. The Sub-Fund did not make - in accordance with the SFDR pre-contractual disclosure - any investments during the Reference Period which were considered by the Investment Manager to qualify as sustainable investments pursuant to SFDR.

HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS **TAKEN INTO ACCOUNT?**

Not applicable.

WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND **HUMAN RIGHTS?**

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following PAIs from Table 1 of Annex I of the Commission Delegated Regulation:

- 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).
- 16. Investee countries subject to social violations

The PAIs are measured against certain defined thresholds which will trigger an additional qualitative review by the Investment Manager to determine if they have been breached. Following this process, if a PAI is considered to have been breached the Investment Manager excluded the relevant issuer from the Sub-Fund or took synthetic short exposure to the issuer. Reporting on consideration of PAIs is available in an annex to the annual report of the Sub-Fund. Where the Sub-Fund invested in a broad market index, PAIs are not considered as the Investment Manager does not look-through to the underlying constituents of these indices.

Please see 'PAI Data Availability' for further information on the PAI data sources and limitations.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: BNY Mellon Floating Rate Credit Fund Legal entity identifier: 213800XU3DU834Z4IR30

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Sub-Fund were met to the following extent during the reference period 1 January 2024 to 31 December 2024 (the "Reference Period"):

- The Sub-Fund promoted a minimum environmental and/or social standard that sought to mitigate or avoid practices that the Investment Manager deemed environmentally and/or socially detrimental. Exclusion criteria - as set out in the Sub-Fund's then applicable supplement - were used to achieve this minimum standard. For example, as referenced in the pre-contractual disclosure, issuers that derived a certain percentage of revenue as (determined by the Investment Manager) from tobacco, defence, gambling, coal extraction and controversial weapons production were excluded. Issuers were also excluded where, in the opinion of the Investment Manager, such issuers were deemed to have violated the minimum standards of business practices represented in widely accepted global conventions:
- The Sub-Fund focused on higher scoring issuers in terms of their ESG profile by not investing in any securities with the lowest ESG rating (being a score of 5), as determined by the Investment Manager. By way of illustration, as at the Sub-Fund's year-end date of 31 December 2024, 33% of the portfolio's Net Asset Value in aggregate was invested in issuers with a rating of 1 and 2. The remainder was invested in issuers with an ESG rating of 3 or 4, or in assets which did not have an ESG rating (being any liquid and near-cash assets, including cash, and derivatives (FDI) that were specifically used for hedging purposes). Please see the next question for information on the Sub-Fund's asset-weighted overall ESG rating measured as against the Bloomberg Barclays Euro Aggregate Corporate Total Return Index;
- The Sub-Fund focused on issuers that the Investment Manager considered in its sole discretion to have lower carbon intensity. Please see the next question for details on the Sub-Fund's asset weighted average carbon intensity measured as against the Bloomberg Barclays Euro Aggregate Corporate Total Return Index.

Additionally, the Sub-Fund made investments in Use of Proceeds Impact Bonds and Impact Issuers, which were considered by the Investment Manager to qualify as SFDR Sustainable Investments (as determined by the Investment Manager) ("SFDR Sustainable Investments"*) and which in the opinion of the Investment Manager, contributed positively to the attainment of the UN Sustainable Development Goals ("UN SDGs"). The Sub-Fund had 12% of its Net Asset Value in aggregate as at 31 December 2024 invested in Use of Proceeds Impact Bonds and Impact Issuers, each of which are considered to qualify as SFDR Sustainable Investments.

The Investment Manager considers that the Sub-Fund's SFDR Sustainable Investments contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to environmental objectives):

- Affordable and clean energy,
- Industry innovation and infrastructure,
- Sustainable cities and communities,
- Responsible consumption and production,
- Climate action,
- Life on land.

The SFDR Sustainable Investments may, in some cases have contributed to some of the environmental objectives as set out in Article 9 of the Taxonomy Regulation. However, this was not explicitly considered by the Investment Manager in their assessment of the investment.

Please note that the Sub-Fund promotes environmental and/or social characteristics and does not have sustainable investment as its investment objective. There is no commitment or minimum allocation to sustainable investments with environmental objectives aligned with the EU Taxonomy Regulation, however this Annex contains certain information in relation to EU Taxonomy alignment of relevant sustainable investments with environmental objectives held by the Sub-Fund as at 31 December 2024.

As such, information in relation to EU Taxonomy alignment is provided as at the above date and does not reflect the position as at other points during the Reference Period (which may be materially different).

The Investment Manager considers that the Sub-Fund's SFDR Sustainable Investments contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to social objectives):

- Good health & wellbeing,
- Quality education,
- Clean water and sanitation,
- Decent work and economic growth,
- Reduced inequalities,
- Partnerships to achieve the goal.

A reference benchmark was not designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The following sustainability indicators were used to measure how the environmental or social characteristics promoted by the Sub-Fund were attained:

- The Sub-Fund successfully and consistently invested a minimum of 10% of its Net Asset Value during the Reference Period in Use of Proceeds Impact Bonds and Impact Issuers, each of which were considered to be "SFDR Sustainable Investments" (as determined by the Investment Manager). By way of illustration, as at the Sub-Fund's year end of 31 December 2024, 12% of the Sub-Fund's Net Asset Value in aggregate was invested in such Use of Proceeds Impact Bonds and Impact Issuers. This percentage figure is provided as at 31 December 2024 only and the percentage so invested has varied during the Reference Period (while remaining above the minimum at all times during the Reference Period).
- 2) The Impact Issuers and Use of Proceeds Impact Bonds invested in by the Sub-Fund successfully and consistently met the following thresholds as assessed by the Investment Manager:
- (a) each such Impact Issuer in which the Sub-Fund was invested demonstrated that at least 20% of their revenue streams were aligned to help realise one or more of the 17 UN Sustainable Development Goals ("UN SDGs"),

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

(b) in the case of each such Use of Proceeds Impact Bonds in which the Sub-Fund was invested, the proceeds raised were aimed to be exclusively applied to finance or re-finance in part or in full projects that demonstrated a clear alignment to helping realise one or more of the 17 UN SDGs.

Exclusion policy: The Sub-Fund has successfully and consistently met its exclusion policy as outlined in the Sub-Fund's supplement and the annex to the Sub-Fund's supplement.

No derivatives (FDI) were used during the Reference Period to meet the environmental or social characteristics of the Sub-Fund.

AND COMPARED TO PREVIOUS PERIODS?

| Period | UN SDGs | Exclusion policy |
|------------------------------------|---|---|
| 1 January 2023 to 31 December 2023 | The Sub-Fund had 13% of its Net Asset Value in aggregate as at 31 December 2023 invested in Use of Proceeds Impact Bonds and Impact Issuers, each of which are considered to qualify as SFDR Sustainable Investments. | The Fund successfully and consistently met its exclusion policy as outlined in the then applicable supplement and the annex to the Fund's supplement. |
| 1 January 2024 to 31 December 2024 | The Sub-Fund had 12% of its Net Asset Value in aggregate as at 31 December 2024 invested in Use of Proceeds Impact Bonds and Impact Issuers, each of which are considered to qualify as SFDR Sustainable Investments. | The Fund successfully and consistently met its exclusion policy as outlined in the then applicable supplement and the annex to the Fund's supplement. |

WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

The objective of the SFDR Sustainable Investments the Sub-Fund partially made was to achieve positive environmental and/or social impacts.

The Sub-Fund's SFDR Sustainable Investments contributed to environmental or social objectives by investing in:

Use of Proceeds Impact Bonds: The proceeds were applied to finance or re-finance in part or in full projects with positive environmental and/or social impacts using the UN SDGs as a guide to environmental targets These SFDR Sustainable Investments contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to environmental objectives):

- Affordable and clean energy
- Industry innovation and infrastructure
- Sustainable cities and communities
- Responsible consumption and production
- Climate action
- Life below water
- Life on land

These SFDR Sustainable Investments also contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to social objectives):

- No poverty
- Zero hunger
- Good health & wellbeing
- Quality education
- Gender equality
- Clean water and sanitation
- Decent work and economic growth
- Reduced inequalities
- Partnerships to achieve the goal

Debt securities issued by Impact Issuers: At least 20% of these investments revenue streams were linked to positive environmental and/or social impacts using the UN SDGs as a guide to environmental targets. These SFDR Sustainable Investments contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to environmental objectives):

- Affordable and clean energy
- Industry innovation and infrastructure
- Sustainable cities and communities
- Responsible consumption and production
- Climate action
- Life on land
- Life below water

These SFDR Sustainable Investments also contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to social objectives):

- Good health & wellbeing
- Quality education
- Clean water and sanitation
- Decent work and economic growth
- Reduced inequalities
- Partnerships to achieve the goal

The SFDR Sustainable Investments may, in some cases have contributed to the environmental objectives as set out in Article 9 of the EU Taxonomy Regulation. However, this was not explicitly considered by the Investment Manager in their assessment of the investments.

HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

During the Reference Period, the Sub-Fund's investments determined by the Investment Manager to be SFDR Sustainable Investments did not cause significant harm to any environmental or social sustainable investments objective as they were not in breach of the PAIs thresholds set by the Investment Manager.

HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS **TAKEN INTO ACCOUNT?**

During the Reference Period, the indicators for adverse impacts in Table 1 of Annex 1 and any relevant indicators in Tables 2 and 3 of that Annex were taken into account as follows in respect of the Sub-Funds SFDR Sustainable Investments:

The Sub-Fund took into account the following PAIs from:

- Table 1 of Annex I of the Commission Delegated Regulation:
- 1. GHG Emissions: Scope 1, 2 and 3
- 2. Carbon Footprint: Scope 1, 2 and 3
- GHG Intensity of Investee Companies: Scope 1, 2 and 3
- 4. Exposure to companies active in the fossil fuel sector
- 5. Share of non-renewable energy consumption and production
- 6. Energy consumption intensity per high impact climate sector: NACE A, B, C, D, E, F, G, H and L
- 7. Activities negatively affecting biodiversity-sensitive areas
- 8. Emissions to water
- 9. Hazardous waste and radioactive waste ratio
- 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 12. Unadjusted gender pay gap
- 13. Board gender diversity
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).

During the Reference Period, the Sub-Fund took into account the above PAIs, in the following manner and solely in respect of its SFDR Sustainable Investments:

- PAI thresholds were set by the Investment Manager at an issuer and/or Sub-Fund level where applicable in relation to the instrument held by the Sub-Fund. The PAI thresholds were only applied to the Sub-Fund's corporate and sovereign holdings.
- The Investment Manager measured the performance of the issuer and/or the Sub-Fund, as applicable, against the PAI thresholds which may then have triggered an additional qualitative review where appropriate to determine crossing of PAI thresholds at the time of investment and on an ongoing basis during the above period using data obtained from the Investment Manager's designated third-part data provider.

There were no breaches of such PAI thresholds set by the Investment Manager.

The Investment Manager was dependent upon information and data from third party data providers to be able to consider principal adverse impacts on sustainability factors. Data coverage was previously low and incomplete for some of the mandatory PAIs which impacted the Investment Manager's analysis of adverse indicators. Data quality and completeness has improved over time with the Investment Manager utilising a data provider which has greater coverage. It's expected that PAIs can be applied to a greater portion of the Investment Manager's investable universe, allowing enhanced insight into the adverse impacts caused by issuers.

WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND **HUMAN RIGHTS?**

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights (the "Responsible Business Practices") collectively cover a broad range of areas of responsible business, including labour rights, consumer protection and support for internationally recognised human rights within a company's or issuer's sphere of influence.

The Sub-Fund's investments determined by the Investment Manager to be SFDR Sustainable Investments were considered aligned with the Responsible Business Practices as each issuer passed a broad controversy screen provided by a third party which either directly covered one or more of the Responsible Business Practices or was considered an appropriate proxy for one or more of the Responsible Business Practices. The Investment Manager was dependant on the information and data available to such third party in order to complete the broad controversy screen. It should be noted, that the availability and quality of data may have impacted the screening process.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following mentioned PAIs to the extent practicable from Table 1 of Annex 1 of the Commission Delegated Regulation:

10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises

- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).
- Table 2 of Annex I of the Commission Delegated Regulation:
- Investments in companies without carbon emission reduction initiatives

Table 3 of Annex I of the Commission Delegated Regulation:

- 16. Lack of anti-corruption and anti-bribery policies.
- PAI thresholds were set by the Investment Manager at an issuer and/or Sub-Fund level where applicable to the instrument held. The PAI thresholds were only applied to the Sub-Fund's corporate and sovereign holdings which were considered by the Investment Manager to be SFDR Sustainable Investments.
- The Investment Manager measured the performance of the issuer and/or the Sub-Fund, as applicable, against these thresholds which may then have triggered an additional qualitative review where appropriate to determine crossing of PAI thresholds at the time of investment and on an ongoing basis during the above period using data obtained from the Investment Manager's designated thirdpart data provider.

There were no breaches of such PAI thresholds set by the Investment Manager.

The Investment Manager was dependent upon information and data from third party data providers to be able to consider principal adverse impacts on sustainability factors. Data coverage was previously low and incomplete for some of the mandatory PAIs which impacted the Investment Manager's analysis of adverse indicators. Data quality and completeness has improved over time with the Investment Manager utilising a data provider which has greater coverage. It's expected that PAIs can be applied to a greater portion of the Investment Manager's investable universe, allowing enhanced insight into the adverse impacts caused by issuers.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2024 to 31 December 2024

| Largest investments | Sector | % of assets | Country |
|---------------------------|--------------------------|-------------|---------|
| ILF-EUR LIQUIDITY-2 | EQUITY | 5.91% | IRE |

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

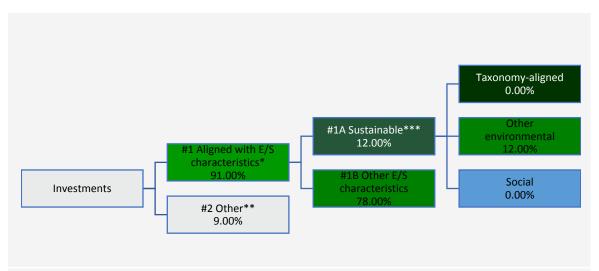

WHAT WAS THE ASSET ALLOCATION?

The Sub-Fund promoted environmental or social characteristics during the Reference Period using an exclusionary approach and allocations to certain SFDR Sustainable Investments, higher scoring issuers and lower carbon intensity issuers.

Please note that the percentage figures provided in the diagram below reflect percentages out of the Net Asset Value of the Fund as at the end of Reference Period.

The figure in #1 represents a combination of both approaches. The allocation to SFDR Sustainable Investments is referenced in #1A. The figure in #1B below represents the proportion of the portfolio that is not considered by the Investment Manager to be SFDR Sustainable Investments but has excluded certain types of investments as detailed in the binding elements of the investment strategy outlined in the supplement and therefore such proportion of the portfolio was aligned with the environmental or social characteristics promoted by the Sub-Fund through the absence of those investments.

It should be noted that the percentages in this section as outlined in the diagram below are provided as at 31 December 2024 and do not necessarily reflect the position as at other points during the Reference Period (which may be materially higher or lower).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

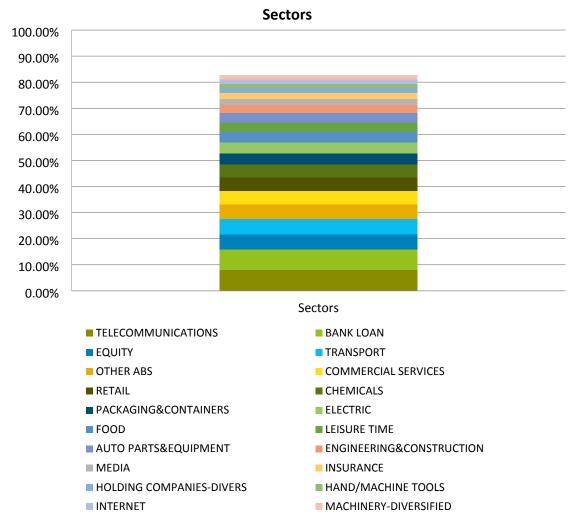

IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?

As at 31 December 2024, the Sub-Fund had mostly been exposed to the Commercial Services, Banks and Packaging & Containers, as illustrated below.

^{*} The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider alignment with some of the E/S characteristics. In particular, the lack or incomplete reporting of metrics by some investments meant that there was only limited data on such investments. As such, for some of the Sub-Fund's investments, data coverage (such as for carbon footprint) was very low and in the absence of relevant data, such investments were assumed by the Investment Manager to be aligned

^{** #2} Other contains investments that do not align with E/S characteristics promoted by the fund i.e., cash, derivatives (FDI) for hedging and collective investment schemes (CIS) for liquidity purposes. For further detail please see the question below "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?".

^{***} As at 31 December 2024, 4% of the NAV made by the Sub-Fund contributed to both an environmental and social objective. However, it is the Investment Manager's understanding that for each SFDR Sustainable Investment, SFDR requires consideration of one single environmental or social objective. Therefore, where any SFDR Sustainable Investment held by the Sub-Fund contributed to both an environmental and social objective, such SFDR Sustainable Investment has been included under "Environmental" in the diagram above.

The above figures are provided as at 31 December 2024 only and do not necessarily reflect the position as at other points during the Reference Period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not commit to making investments aligned with the EU Taxonomy Regulation. However, out of the Sub-Fund's allocation to SFDR Sustainable Investments, 0% of the Sustainable Investments with an environmental objective were aligned with the EU Taxonomy as at 31 December 2024.

The taxonomy aligned investments contributed to the at least one of the following objectives as set out in Article 9 of Regulation (EU) 2020/852:

- 1. Climate change mitigation.
- 2. Climate change adaptation.

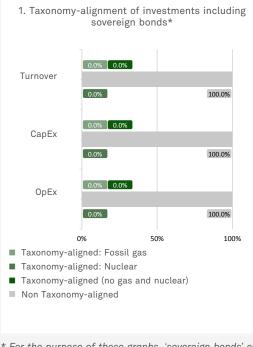

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

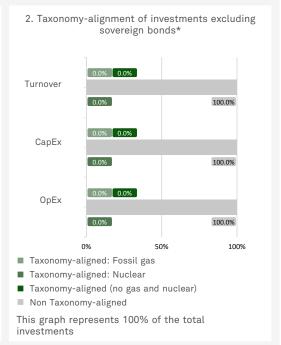

All figures and disclosures in relation to EU Taxonomy alignment in this Annex reflect the Sub-Fund's positions as at the end of the Reference Period using the most recent data available from relevant third party data providers as at 31 December 2024.

DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY 1?

| ☐ Yes: | |
|-----------------|--------------------|
| ☐ In fossil gas | ☐ In nuclear energ |
| √ No | |

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND ENABLING ACTIVITIES?

Transitional activities: 0.00% Enabling activities: 0.00%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

To comply with the EU Taxonomy, the

criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety

and waste management rules.

Taxonomy-aligned

expressed as a share

- turnover reflecting

the share of revenue

from green activities

- capital expenditure (CapEx) showing the

green investments

transition to a green

expenditure (OpEx) reflecting green

operational activities of investee

made by investee companies, e.g. for a

activities are

of investee companies.

economy.

- operational

companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?

| Reporting period | EU Taxonomy percentage alignment |
|---------------------------------------|---|
| 1 January 2023 to 31 December 2023 | The Sub-Fund did not commit to making investments aligned with the EU Taxonomy Regulation. However, out of the Sub-Fund's allocation to SFDR Sustainable Investments, 9% of the Sustainable Investments with an environmental objective were aligned with the EU Taxonomy as at 31st December 2023. |
| 1 January 2024 to 31 December 2024 | The Sub-Fund did not commit to making investments aligned with the EU Taxonomy Regulation. However, out of the Sub-Fund's allocation to SFDR Sustainable Investments, 0% of the Sustainable Investments with an environmental objective were aligned with the EU Taxonomy as at 31 December 2024. |

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

100% of the Sustainable investments with an environmental objective were not aligned with the EU Taxonomy as at 31 December 2024.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

All figures and disclosures in relation to EU Taxonomy alignment in this Annex reflect the Sub-Fund's positions as at the end of the Reference Period using the most recent data available from relevant third party data providers as at 31 December 2024.

What was the share of socially sustainable investments?

Whilst the Sub-Fund does not commit to investing a minimum percentage of its Net Asset Value in socially sustainable investments, the Sub-Fund invested 0%* of its Net Asset Value in SFDR Sustainable Investments with a social objective, as at 31 December 2024.

* This percentage figure is provided as at 31 December 2024 only and does not necessarily reflect the position as at other points during the Reference Period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Other" were:

- Liquid and near-cash assets including cash held or used for ancillary liquidity purposes.
- Collective Investment Schemes (CIS) that were specifically used for liquidity purposes.
- Derivatives (FDI) that were specifically used for hedging purposes.

No minimum environment or social safeguards were considered for these investments.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken to meet the environmental and/or social characteristics during the Reference Period are:

- The Investment Manager:
- a) Invested in Use of Proceeds Impact Bonds and Impact Issuers, each of which were considered to be "SFDR Sustainable Investments" (as determined by the Investment Manager).
- b) Ensured the Sub-Fund's asset-weighted overall ESG rating, as determined by the Investment Manager, was not weaker than the asset-weighted overall ESG rating of the Bloomberg Barclays Euro Aggregate Corporate Total Return Index (the "Benchmark") at any point during the Reference Period.
- c) Ensured the Sub-Fund's asset weighted average carbon intensity was at least 25% lower than the asset weighted average carbon intensity of the Benchmark during the Reference Period.
- d) Employed an exclusion policy as outlined in the Sub-Fund's supplement and the annex to the Sub-Fund's supplement.

These binding elements of the Sub-Fund were coded into the trading systems and used to monitor the environmental and social characteristics promoted during the reference period.

The following internal control mechanisms were used by the Investment Manager for such monitoring during the Reference Period:

Pre-trade warnings appeared in the trade system prior to trading to inform portfolio managers of a prohibition or limit.

Post-trade warnings were also reviewed by the monitoring team and escalated as appropriate.

Oversight of the relevance of criteria used to meet characteristics promoted was provided by the Responsible Investment Group, a governance group within the Investment Manager which has overall oversight of ensuring effective implementation of ESG due diligence at asset class level and for defining adherence criteria for the Investment Managers 'Responsible Horizons' strategies. Oversight of internal exclusions lists used to ensure certain binding criteria were met, was provided by the Ratings and Exclusions Group ("REG"), a governance group within the Investment Manager.

During the Reference Period, no engagement with the issuers in which the Sub-Fund has invested was required or undertaken as a consequence of there being no breaches of any of the binding elements outlined in Sub-Fund's supplement.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics

that they promote.

- HOW DOES THE REFERENCE BENCHMARK DIFFER FROM A BROAD MARKET INDEX? Not applicable.
- HOW DID THIS FINANCIAL PRODUCT PERFORM WITH REGARD TO THE SUSTAINABILITY INDICATORS TO DETERMINE THE ALIGNMENT OF THE REFERENCE BENCHMARK WITH THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED?

Not applicable.

HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE REFERENCE **BENCHMARK?**

Not applicable.

HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE BROAD MARKET INDEX?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: BNY Mellon Global Credit Fund Legal entity identifier: 213800FUW383MBX2J760

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Sub-Fund were met to the following extent during the reference period 1 January 2024 to 31 December 2024 (the "Reference Period").

The environmental and/or social best practices the Sub-Fund promoted included the reduction of exploitation of tar sands and thermal coal, reduction of production of controversial weapons and reduction of carbon emissions.

Exclusion criteria - as set out in the Sub-Fund's supplement - were used to achieve this minimum standard. For example, as referenced in the pre-contractual disclosure, issuers that derived a certain percentage of revenue as (determined by the Investment Manager) from tobacco, controversial weapons production, thermal coal extraction were excluded.

Issuers were also excluded where, in the opinion of the Investment Manager, such issuers were Are deemed to be involved in severe environmental, social or governance controversies (including significant violations of UN Global Compact Principles)

The Sub-Fund did not invest in SFDR Sustainable Investments.

A reference benchmark was not designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The following sustainability indicator was used to measure how the environmental and/or social characteristics promoted by the Sub-Fund were attained:

The following sustainability indicator will be used to measure whether the Sub-Fund is attaining the environmental and/or social characteristics it promotes:

Exclusion Policy: An assessment of whether the Sub-Fund had successfully and consistently executed its exclusion policy, to not invest in securities issued by corporate entities that met any of the below:

The sustainability indicator performed as follows:

The Exclusion policy was met because the Sub-Fund did not invest in securities issued by corporate entities that:

- Derive more than 5% of their revenue from the production of tobacco,
- Are involved in the production of controversial weapons,
- Derive more than 5% of their revenue from thermal coal mining and/or more than 10% of revenue from thermal coal power generation, unless: a) The issue purchased is a use-of proceeds impact bond as described in the Supplement and/or b) The issuer has a clearly defined plan to exit coal mining and/or generation before (i) 2030 in the case of developed market domiciled issuers or (ii) 2040 in the case of emerging market domiciled issuers,
- Are deemed to be involved in severe environmental, social or governance controversies (including significant violations of UN Global Compact Principles) party data, on key issues relating to climate change themes.

As at the 31 December 2024 the Sub-Fund's investments were 97%* aligned with the environmental and social criteria promoted. The remaining 3% was held in cash and derivatives for hedging purposes and therefore not aligned with environmental and social criteria promoted.

*This percentage figure is provided as at 31 December 2024 only and does not necessarily reflect the position as at other points during the Reference Period.

...AND COMPARED TO PREVIOUS PERIODS?

| Period | UN SDGs | Exclusion policy |
|---|--|---|
| 24 November 2023 to 31 December 2023 | the Sub-Fund's investments were 89%* aligned with the environmental and social criteria promoted. The remaining 11% was held in cash and derivatives for hedging purposes and therefore not aligned with environmental and social criteria promoted. | The Fund successfully and consistently met its exclusion policy as outlined in the then applicable supplement and the annex to the Fund's supplement. |
| 1 January 2024 to 31 December 2024 | the Sub-Fund's investments were 97%* aligned with the environmental and social criteria promoted. The remaining 3% was held in cash and derivatives for hedging purposes and therefore not aligned with environmental and social criteria promoted. | The Fund successfully and consistently met its exclusion policy as outlined in the then applicable supplement and the annex to the Fund's supplement. |

WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

Not applicable. The Sub-Fund did not make - in accordance with the SFDR pre-contractual disclosure - any investments during the Reference Period which were considered by the Investment Manager to qualify as sustainable investments pursuant to SFDR.

HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

Not applicable.

HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS **TAKEN INTO ACCOUNT?**

Not applicable.

decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

> WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND **HUMAN RIGHTS?**

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund did not consider principal adverse impacts on sustainability factors during the Reference Period.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2024 to 31 December 2024

| Largest investments | Sector | % of assets | Country |
|---------------------------|----------------|-------------|---------|

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

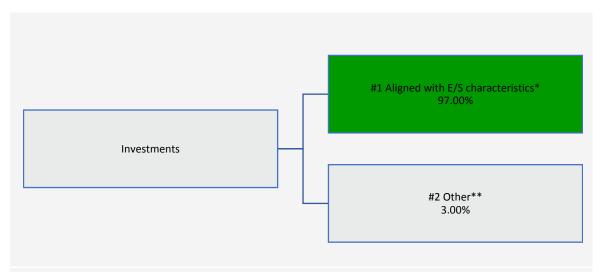

WHAT WAS THE ASSET ALLOCATION?

The Sub-Fund promoted environmental or social characteristics during the Reference Period using an exclusionary approach.

Please note that the percentage figures provided in the diagram below reflect percentages out of the Net Asset Value of the Fund as at the end of Reference Period.

The figure in #1 and in #1B below represents the proportion of the portfolio that has excluded certain types of investments as detailed in the binding elements of the investment strategy outlined in the supplement and therefore such proportion of the portfolio was aligned with the environmental or social characteristics promoted by the Sub-Fund through the absence of those investments.

The percentages in this section as outlined in the diagram below are provided as at 31 December 2024 and do not necessarily reflect the position as at other points during the Reference Period (which may be materially higher or lower).

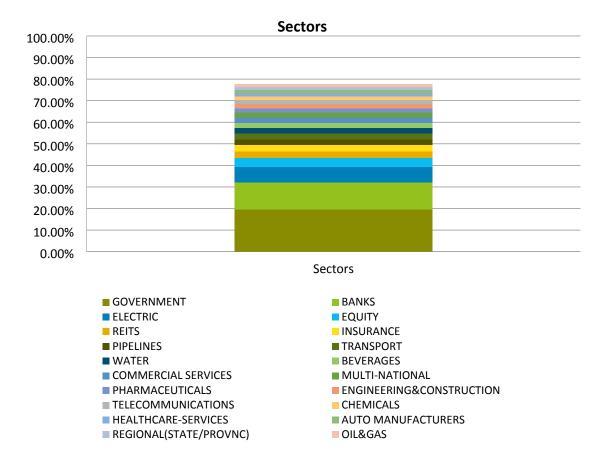

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

^{*} The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider alignment with some of the E/S characteristics.

^{** #2} Other contains investments that do not align with E/S characteristics promoted by the fund i.e., cash and derivatives (FDI) for hedging. For further detail please see the question below "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?".

IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?

The above figures are provided as at 31 December 2024 only and do not necessarily reflect the position as at other points during the Reference Period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY 1?

| ☐ Yes: | |
|-------------------------|--------------------|
| \square In fossil gas | ☐ In nuclear energ |
| ☑ No | |

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

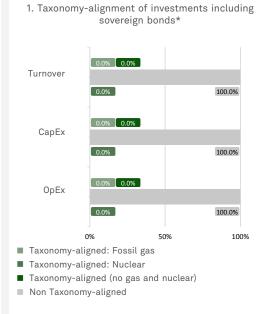

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

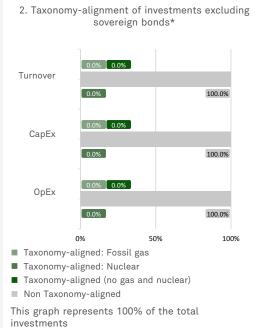

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures
- WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND **ENABLING ACTIVITIES?**

Transitional activities: 0.00% Enabling activities: 0.00%

HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?

| Period | Taxonomy |
|----------------------|---------------------|
| 24 November 2023 to | Turnover 0% aligned |
| 31 December 2023 | CapEx 1% aligned |
| | OpEx 0% aligned |
| 1 January 2024 to 31 | Turnover 0% aligned |
| December 2024 | CapEx 0% aligned |
| | OpEx 0% aligned |

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Other" were:

- Liquid and near-cash assets including cash held or used for ancillary liquidity purposes.
- Collective Investment Schemes (CIS) that are used for liquidity purposes
- Derivatives (FDI) that were specifically used for hedging purposes.
- Debt and debt related securities issued by governments, supranationals and public international bodies that are used to achieve the Sub-Fund's investment objective
- Asset backed and mortgage-backed securities that are used to achieve the Sub-Fund's investment objective

No minimum environment or social safeguards were considered for these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken to meet the environmental and/or social characteristics during the reference period are:

- The Investment Manager employed exclusion criteria as outlined in the Sub-Fund's supplement.
- The Investment Manager ensured the exclusion criteria was met by excluding certain issuers as outlined in the supplement (and above). This was monitored by coding the binding elements (exclusions) into trading systems.
- The Investment Manager also employed the following internal control mechanisms to monitor adherence to the coded binding elements of the Sub-Fund during the Reference Period:
- 1. Pre-trade warnings appeared in the trade system prior to trading to inform portfolio managers of a prohibition or limit.
- 2. Post-trade warnings were also reviewed by the monitoring team and escalated as appropriate.
- 3. Oversight of internal exclusions lists used to ensure certain binding elements were met, was provided by the Ratings and Exclusions Group ("REG"), a governance group within the Investment Manager.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

- HOW DOES THE REFERENCE BENCHMARK DIFFER FROM A BROAD MARKET INDEX? Not applicable.
- HOW DID THIS FINANCIAL PRODUCT PERFORM WITH REGARD TO THE SUSTAINABILITY INDICATORS TO DETERMINE THE ALIGNMENT OF THE REFERENCE BENCHMARK WITH THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED?

Not applicable.

HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE REFERENCE **BENCHMARK?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE BROAD MARKET **INDEX?**

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: BNY Mellon Global Equity Income Fund Legal entity identifier: 213800SLXMIXN6BQFB77

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Sub-Fund were met to the following extent during the reference period 1 January 2024 to 31 December 2024 (the "Reference Period").

The environmental and/or social characteristics promoted were:

Avoid investment in companies that:

- generate any revenues from the production of tobacco;
- generate 10% or more of revenue from products that support the tobacco industry and/or tobacco;
- generate any revenue from the production of controversial weapons;
- generate 10% or more of revenues from the production of alcoholic beverages;
- generate 10% or more of revenues from the owning and/or operation of a gambling venue;
- generate 10% or more of revenues from the production of adult entertainment or the owning and/or operation of adult entertainment venues;
- generate 10% or more of revenues from the extraction of thermal coal;
- generate 10% or more of revenues from the extraction and/or production of oil and gas in offshore Arctic regions;
- generate 10% or more of revenues from the extraction of oil sands

All of the above characteristics were met by the Sub-Fund during the reference period. No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The following sustainability indicators were used to measure how the environmental and social characteristics promoted by the Sub-Fund were attained:

Exclusion Policy: An assessment of whether the Sub-Fund has successfully and consistently executed its exclusion policy

The Sub-Fund successfully and consistently met its exclusion policy as outlined in the Sub-Fund's supplement and annex to the Sub-Funds' supplement during the Reference Period.

...AND COMPARED TO PREVIOUS PERIODS?

| Reference Period | Performance of sustainability indicators |
|--|---|
| 01 January 2024 – 31 December 2024 | The Sub-Fund successfully and consistently met its exclusion policy as outlined in the Sub-Fund's supplement and annex to the Sub-Funds' supplement during the Reference Period |
| 24 November 2023 – 31 December 2023 | The Sub-Fund successfully and consistently met its exclusion policy as outlined in the Sub-Fund's supplement and annex to the Sub-Funds' supplement during the Reference Period |

WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

The SFDR Sustainable Investments underlying this Sub-Fund contributed to the following environmental objectives not aligned with the EU Taxonomy:

- Contribution to the transition to a net zero world
- Circular economy and recycling
- Reduction in natural resource usage
- Electrification

The SFDR Sustainable Investments underlying this Sub-Fund contributed to the following social objectives:

- Access to financial products and services
- Health & wellbeing
- Drug development
- Infrastructure
- Contribution to social objectives as a result of investee companies' internal business practices and successful management of competing interests of key stakeholder groups.

HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

The Investment Manager determined that SFDR Sustainable Investments in the Sub-Fund did no significant harm to any environmental or social objectives by assessing each SFDR Sustainable Investment's involvement in areas deemed to be harmful from an environmental or social perspective. Issuers that had involvement in activities deemed to be harmful from an environmental or social perspective were excluded from investment. Involvement in such activities was monitored on an ongoing basis.

HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS **TAKEN INTO ACCOUNT?**

The Investment Manager reviewed the indicators for adverse impacts on sustainability factors for all SFDR Sustainable Investments where data was available. The Investment Manager reviewed PAIs for investee issuers using data from a designated third party data provider. If a given PAI or PAIs for an issuer appeared to exceed expectations based on the data obtained from the designated third-party data provider, further qualitative review was undertaken with respect to those issuer(s) and that product in order to determine whether such data indicated the evidence of significant harm. Where there were data gaps and the PAI was considered material for a company's sector, the Investment Manager's internal qualitative assessment was used to assess the PAIs.

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Principal adverse

The Sub-Fund took into account the following PAIs from:

- Table 1 of Annex I of the Commission Delegated Regulation:
- GHG emissions: Scope 1, 2 and 3 1.
- 2. Carbon footprint: Scope 1, 2 and 3
- GHG intensity of investee companies: Scope 1, 2 and 3 3.
- 4. Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- 6. Energy consumption intensity per high impact climate sector: NACE A, B, C, D, E, F, G, H and L
- 7. Activities negatively affecting biodiversity-sensitive areas
- 8. Emissions to water
- 9. Hazardous waste and radioactive waste ratio
- 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 12. Unadjusted gender pay gap
- 13. Board gender diversity
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons)
- Table 2 of Annex I of the Commission Delegated Regulation: 4. Investments in companies without carbon emission reduction initiatives.
- Table 3 of Annex I of the Commission Delegated Regulation: 9. Lack of a human rights policy. 17. Number of convictions and amount of fines for violation of anti-corruption and anti-bribery

WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND **HUMAN RIGHTS?**

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights (the "Responsible Business Practices") collectively cover a very broad range of areas of responsible business, encompassing everything from labour rights to consumer protection to support for internationally recognised human rights within a company's or issuer's sphere of influence.

SFDR Sustainable Investments were considered aligned with the Responsible Business Practices as each company invested in passed screens provided by third parties which either directly cover one or more of the Responsible Business Practices or are considered appropriate proxies for one or more of the Responsible Business Practices. Each company invested in also passed the Investment Manager's own qualitative review process which takes into account the Responsible Business Practices. In addition, where the companies invested in do not pass the relevant screens provided by third parties, the Investment Manager retains discretion to establish alignment with the Responsible Business Practices solely on the basis of its qualitative review process.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered certain principal adverse impact indicators at the product level. The Investment Manager used a combination of externally and internally sourced data and research to identify companies that are involved in areas of material harm from an environmental or social perspective. The Investment Manager considered the following PAIs:

- Share of investments in investee companies involved in the manufacture or selling of controversial weapons;
- Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2024 to 31 December 2024

| Largest investments | Sector | % of assets | Country |
|---------------------------|-------------------------|-------------|---------|
| SANOFI EUR 2 | PHARMACEUTICALS | 3.22% | FRC |

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

WHAT WAS THE ASSET ALLOCATION?

The asset allocation diagram illustrates the asset allocation of this Sub-Fund. 97.06% of Net Asset Value was used to meet the environmental or social characteristics promoted by the Sub-Fund in accordance with the binding elements of the investment strategy. The Sub-Fund did not make any commitments to invest in SFDR Sustainable Investments. 1.12% of the Net Asset Value of the Sub-Fund was invested in SFDR Sustainable Investments with an environmental objective aligned with the EU Taxonomy.

#1 Aligned with E/S characteristics: 97.06% of Net Asset Value

#1A Sustainable: 79.95% of Net Asset Value

Taxonomy-aligned: 1.12% of Net Asset Value Environmental: 27.20% of Net Asset Value

Social: 51.62% of Net Asset Value

#1B Other E/S characteristics: 17.11% of Net Asset Value

#2 Other: 2.94% of Net Asset Value

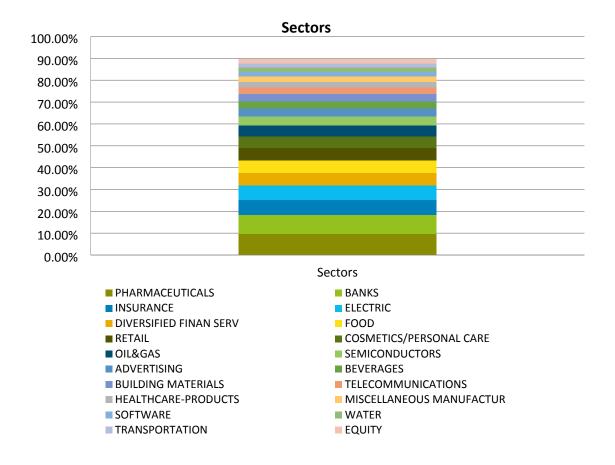

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

1.12% of the Net Asset Value of the fund was invested in SFDR Sustainable Investments with an environmental objective aligned with the EU Taxonomy.

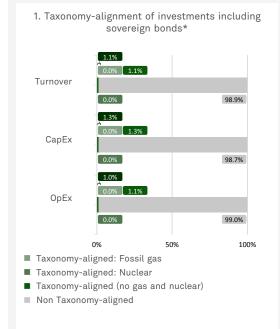

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited.

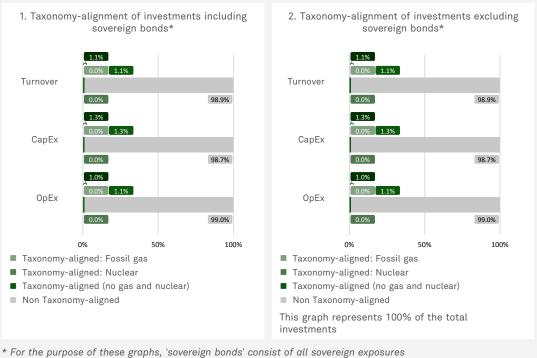

The assessment of whether these investments complied with the EU Criteria for Environmentally Sustainable Economic Activities was not subject to an assurance provided by one or more auditors or a review by one or more third parties.

DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY 1?

| ☐ Yes: | |
|-----------------|--------------------|
| ☐ In fossil gas | ☐ In nuclear energ |
| ✓ No | |

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

To comply with the EU Taxonomy, the

criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety

and waste management rules.

companies.

WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND **ENABLING ACTIVITIES?**

Enabling activities: 0.62% (turnover)

Transitional activities: 0.00%

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Transitional activities are activities for which low-carbon alternatives are not vet available and among others have greenhouse gas emission levels corresponding to the best performance.

HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?

The percentage of investments that were aligned with the EU Taxonomy marginally increased compared to the previous reference period. This was due to improvements in the availability of data that was reported by companies as opposed to estimated by thirdparty data providers.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/

What was the share of socially sustainable investments?

51.62%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Sub-Fund invested 2.94% of Net Asset Value in category #2 (other) which comprised of cash held for liquidity purposes only. These instruments were not subject to environmental or social safeguards as the Investment Manager does not view environmental or social considerations as relevant for these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In order to meet the environmental and social characteristics, the Investment Manager took the following actions:

- Excluded issuers that produce tobacco products
- Excluded issuers that derive more than 10% of turnover from the sale of tobacco
- Excluded issuers that produce controversial weapons
- Excluded issuers that derive more than 10% of turnover from the production of alcohol
- Excluded issuers that derive more than 10% of turnover from gambling
- Excluded issuers that derive more than 10% of turnover from the extraction of thermal coal
- Excluded issuers that derive more than 10% of turnover from the extraction and/or production of oil and gas in offshore Arctic regions
- Excluded issuers that derive more than 10% of turnover from the extraction of oil sands
- Excluded issuers in breach of the principles of the UN Global Compact (which includes principles relating to human rights, labour, environment and anti-corruption)

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: BNY Mellon Global Leaders Fund Legal entity identifier: 213800T8WBQXO7WXYO38

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The 'reference period' for this periodic report is from 02 May 2024 to 31 December 2024 (the "Reference Period").

During the Reference Period, this Sub-Fund promoted the environmental characteristic of responsible use of natural resources and the social characteristic of responsible business conduct through investing in companies which embrace high standards of environmental, social and governance (ESG) practice, or that were attractive due to their progression in environmental and social practice and exhibit good governance, and by deliberately avoiding investment in companies with below threshold ESG credentials as defined by the Investment Manager.

The environmental and social sustainability indicators considered by the Investment Manager are detailed below (the "Sustainability Indicators"):

Environmental Sustainability Indicators

- Greenhouse gas emissions
- Biodiversity and natural resources
- Climate and transition risks
- Pollution and waste management

Social Sustainability Indicators

- Business ethics, bribery and corruption
- Data privacy and security
- Labour practices and human rights safeguards
- Diversity, equality and inclusion

A reference benchmark was not designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

There was no intention for the SFDR Sustainable Investments underlying this Sub-Fund to contribute to the environmental objectives set out in Article 9 of the EU Taxonomy Regulation.

The Sub-Fund's SFDR Sustainable Investments with a social objective were aligned with the UN Sustainable Development Goal 1 - 'No Poverty' and the UN Sustainable Development Goal 3 - 'Good Health and Well-Being'. The Sub-Fund's SFDR Sustainable Investment with an environmental objective was aligned with the UN Sustainable Development Goal 12 - 'Responsible Consumption and Production'.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The Sub-Fund used eight Sustainability Indicators to measure how the environmental or social characteristics promoted by the Sub-Fund were attained which are supported by 14 data points.

ENVIRONMENTAL SUSTAINABILITY INDICATORS

| Indicator # | Description | Supporting Data Points |
|-----------------------------|------------------------------------|--|
| Sustainability Indicator #1 | Greenhouse Gas Emissions | 1. Carbon intensity scope 1 and 2 |
| Sustainability Indicator #2 | Biodiversity and natural resources | 2. Company has operations located in biodiversity-sensitive areas and is involved in controversies with severe impact on the environment |
| | | 3. Operational sites owned, leased, managed in, or adjacent to, protected areas and areas of high biodiversity value outside protected areas |
| Sustainability Indicator #3 | Climate and transition risks | 4. Active fossil fuel sector exposure |
| Sustainability Indicator #4 | Pollution and waste management: | 5. Environment controversy score |

SOCIAL SUSTAINABILITY INDICATORS

| Indicator # | Description | Supporting Data Points | |
|----------------------------------|--|--|--|
| Sustainability In- dicator #5 | Business ethics, bribery and corruption | 6. Controversial weapons – any tie | |
| aroacor no | | 7. Total number of convictions for violations of anti-corruption and anti-bribery laws | |
| Sustainability Indicator #6 | Data privacy and security | 8. Customers - Privacy and data security score | |
| | | 9. Data security breaches controversies | |
| Sustainability In- | Labour practices and human rights safeguards | 10. Labour compliance – Broad | |
| dicator #7 | | 11. Human rights compliance | |
| | | 12. Human rights - Impact on local communities score | |
| Sustainability Indicator #8 | Diversity, equality and inclusion | 14. Discrimination and diversity controversies | |

Each of the Sub-Fund's equity investments was measured against the Sustainability Indicators listed above prior to the Sub-Fund converting to SFDR Article 8. In addition, they are also measured on a quarterly basis and at the end of the Reference Period, as well as upon each purchase of a new company. The supporting data points were compared to internally set thresholds and, if a threshold was met, a flag was generated which required analysis. This would prompt comment and conclusion from the 'Stock Champion' (a member of the Investment Manager's Research team responsible for the research in the equity company) and further review from the Additional Objectives Portfolios Group, an internal governance forum.

No holdings were sold during the Reference Period as a result of analysis against the Sustainability Indicators detailed above.

No derivatives (FDI) were used to meet the environmental or social characteristics.

There were no new flags deemed to be potentially material changes in data during the Reference Period.

The following table indicates the percentage weight of the Sub-Fund invested in companies which had a flag relating to each Sustainability Indicator as at the end of the Reference Period.

| Indicator # | Description | % Weight of Flagged Com- panies |
|-----------------------------|--|---------------------------------------|
| Sustainability Indicator #1 | Greenhouse Gas Emissions | 4.0 |
| Sustainability Indicator #2 | Biodiversity and natural resources | 2.0 |
| Sustainability Indicator #3 | Climate and transition risks | 0.0 |
| Sustainability Indicator #4 | Pollution and waste management: | 2.0 |
| Sustainability Indicator #5 | Business ethics, bribery and corruption | 6.4 |
| Sustainability Indicator #6 | Data privacy and security | 0.0 |
| Sustainability Indicator #7 | Labour practices and human rights safeguards | 17.0 |
| Sustainability Indicator #8 | Diversity, equality and inclusion | 11.1 |

...AND COMPARED TO PREVIOUS PERIODS?

No comparison for previous periods is available at the date of this periodic report.

WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

The social objectives to which the SFDR Sustainable Investments contributed were UN Sustainable Development Goal 1 - 'No Poverty' and UN Sustainable Development Goal 3 - 'Good Health and Well-Being'.

A SFDR Sustainable Investment contributed to this objective by having a minimum of 30% revenue aligned with UN Sustainable Development Goals. The Sub-Fund's five SFDR Sustainable Investments contributed to the objectives as follows:

SFDR Sustainable Investments with a social objective:

- Novo Nordisk: global pharmaceuticals company largely focused on diabetes and obesity. 86% of revenue aligned with UN Sustainable Development Goal 1 - 'No Poverty' and UN Sustainable Development Goal 3 'Good Health and Well-Being'.
- Edwards Lifesciences: market leader in the treatment of aortic stenosis, a serious heart condition that affects millions of people worldwide. 84% of revenues aligned with UN Sustainable Development Goal 1 - 'No Poverty' and UN Sustainable Development Goal 3 'Good Health and Well-Being'.
- Roche: global pharmaceuticals and diagnostics business with a world leading oncology franchise. 45% of revenue aligned with UN Sustainable Development Goal 1 - 'No Poverty' and UN Sustainable Development Goal 3 'Good Health and Well-Being'.

There were no SFDR Sustainable Investments with an environmental objective.

There was no intention for the SFDR Sustainable Investments underlying this Sub-Fund to contribute to the environmental objectives set out in Article 9 of the EU Taxonomy Regulation.

HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

The Sub-Fund's SFDR Sustainable Investments that met the minimum revenue threshold, as previously described, were then screened against a number of principal adverse impacts (PAIs) indicators for 'do no significant harm' (DNSH).

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS **TAKEN INTO ACCOUNT?**

The following mandatory indicators in Table 1 of Annex I of the SFDR regulatory technical standards (RTS) and any relevant indicators (on a sector-by-sector basis) from Tables 2 and 3 of Annex I of the RTS were taken into account as follows during the Reference Period:

- Relevant indicators in Table 1 of Annex I of the RTS:
- Greenhouse gas emissions: Scope 1, 2 and 3
- Greenhouse gas intensity of investee companies: Scope 1, 2 and 3 3.
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Energy consumption intensity per high impact climate sector
- Activities negatively affecting biodiversity-sensitive areas 7.
- 8. Emissions to water
- 9. Hazardous waste and radioactive waste ratio
- 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 12. Unadjusted gender pay gap
- 13. Board gender diversity
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons)

The Sub-Fund considered all mandatory indicators included in Table 1 of Annex I of the RTS with the exception of PAI 2, carbon footprint. For the DNSH assessment, the PAIs are required to be considered at company level. PAI 1 was converted to an intensity measure rather than an absolute number for this analysis. This was because the original PAI was designed for portfolio level consideration, rather than use at the company level, but the analysis for DNSH must be at the company level. PAI 2 is not considered separately as, having converted PAI 1 to an intensity measure, it would simply repeat the same information covered in PAIs 1 and 3.

- Relevant indicators in Table 2 of Annex I of the RTS:
- Investments in companies without carbon emission reduction initiatives
- 8. Exposure to areas of high water stress
- Indicators in Table 3 of Annex I of the RTS:
- 4. Lack of a supplier code of conduct
- 6. Insufficient whistle-blower protection
- Incidents of discrimination
- 9. Lack of a human rights policy
- 14. Number of identified cases of severe human rights issues and incidents
- 15. Lack of anti-corruption and anti-bribery policies

Each indicator was either considered versus a sector median or absolute threshold for all companies that met the percentage revenue threshold to qualify as a sustainable investment.

For quantitative indicators, a flag was raised if the designated threshold for sector median was surpassed. In such instances, further analysis was undertaken to determine whether the investment did no significant harm and therefore was in fact a SFDR Sustainable Investment. Across the three securities which qualified as SFDR Sustainable Investments, there were seven flags as at the end of the Reference Period, five of which related to data gaps, while the remaining two flags related to surpassing the sector median. Specifically, these flags were for: PAI 1: Greenhouse gas emissions: Scope 1, 2 and 3; and PAI 3: Greenhouse gas intensity of investee companies: Scope 1, 2 and 3.

For other indicators, a flag was raised for a below threshold response. In such instances, further analysis was undertaken to determine whether the investment did no significant harm and therefore was in fact a SFDR Sustainable Investment. Across the three securities which qualified as SFDR Sustainable Investments, there were three flags as at the end of the Reference Period. Specifically, these flags were for: PAI 10: Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises; PAI 8: Emissions to water; Additional Social; and PAI 4: Lack of a supplier code of conduct.

For all indicators (qualitative and otherwise), if the data was not available from the Investment Manager's third-party data provider, steps were taken by the Investment Manager to either source the required information or contact the investee company. If the company did not report that data point, then proxy or alternative contextual information was used.

In all cases where flags were raised, following further analysis it was concluded that there was no significant harm to any environmental or social sustainable investment objective and therefore the companies qualified as SFDR Sustainable Investments.

WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND **HUMAN RIGHTS?**

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights (the "Responsible Business Practices") collectively cover a very broad range of areas of responsible business, encompassing everything from labour rights to consumer protection to support for internationally recognised human rights within a company's or issuer's sphere of influence.

The Sub-Fund's SFDR Sustainable Investments were considered aligned with the Responsible Business Practices as no flags were raised in relation to the specific human rights, labour, controversy, and tax compliance screens which either (i) directly cover one or more of the Responsible Business Practices; or (ii) are considered an appropriate proxy for one or more of the Responsible Business Practices.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

In accordance with Article 7 of SFDR, the adverse impacts of investment decisions on sustainability factors were considered in line with the PAI regime for this Sub-Fund from the perspective of the harm that investment positions might do externally to sustainability factors. The Sub-Fund considered seven of the mandatory indicators included in Table 1 of Annex I of the RTS at a portfolio level. Those were:

- PAI 2: Carbon footprint
- PAI 3: Greenhouse gas intensity of investee companies
- PAI 4: Exposure to companies active in the fossil fuel sector
- PAI 7: Activities negatively affecting biodiversity-sensitive areas
- PAI 10: Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 13: Board gender diversity
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons)

Thresholds were set against each indicator at an aggregate portfolio level. The approach to 'consider the PAIs' has been for the Investment Manager to apply the reasonable thresholds, above which it could be considered that the Sub-Fund has a 'material adverse impact' against any of the criteria listed above. The Sub-Fund was reviewed against these thresholds internally on a quarterly basis, as well as upon each purchase of a new company. When compared, none of these thresholds were exceeded.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 02 May 2024 to 31 December 2024

| More important investments | Sector | % of assets | Country |
|------------------------------|--|-------------|---------------|
| Microsoft Corporation | Information technology - Software & Services | 6.21% | United States |
| Alphabet | Communication services - Media & Entertainment | 4.65% | United States |
| TAIWAN SEMICONDUCTOR MFG | Information technology - Semiconductors & Semiconductor Equipment | 4.45% | Taiwan |
| Amazon.com | Consumer discretionary - Consumer Discretionary Distribution & Retail | 4.4% | United States |
| Edwards Lifesciences | Health care - Health Care Equipment & Services | 4.32% | United States |
| ASML | Information technology - Semiconductors & Semiconductor Equipment | 4.29% | Netherlands |
| West Pharmaceutical Services | Health care - Pharmaceuticals Biotechnology & Life Sciences | 4.18% | United States |
| Mastercard | Financials - Financial Services | 4.1% | United States |
| Mettler Toledo International | Health care - Pharmaceuticals Biotechnology & Life Sciences | 4.06% | United States |
| AIA Group | Financials - Insurance | 4.06% | Hong Kong |
| Intuitive Surgical | Health care - Health Care Equipment & Services | 4% | United States |
| Nike | Health care - Pharmaceuticals Biotechnology & Life Sciences | 3.99% | United States |
| Automatic Data Processing | Industrials - Commercial & Professional Services | 3.98% | United States |
| O'Reilly Automotive | Consumer discretionary - Consumer Discretionary Distribution & Retail | 3.97% | United States |
| Keyence | Information technology - Technology Hardware & Equipment | 3.95% | Japan |

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

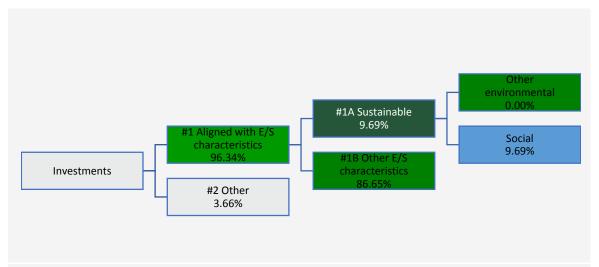

WHAT WAS THE ASSET ALLOCATION?

As at 31 December 2024, the asset allocation of the Sub-Fund was as shown in the diagram. This differs from the asset allocation diagram in the pre-contractual disclosure (Annex II) as this was intended to illustrate the planned asset allocation of the Sub-Fund and reflected the minimum investments referred to in that Annex.

As at 31 December 2024, 96.34% of the Net Asset Value of this Sub-Fund was invested in Equity and Equity-Related Securities that met the Investment Manager's "ESG Criteria" at the time of purchase and on an ongoing basis. The remainder of the Sub-Fund was invested in cash which, for the avoidance of doubt, is not required to meet the ESG Criteria.

The Sub-Fund met its commitment to investing a minimum of 5% of Net Asset Value in SFDR Sustainable Investments which contribute to an environmental or social objective. As at 31 December 2024, 9.69% of the Sub-Fund's Net Asset Value was invested in SFDR Sustainable Investments.

The asset allocation between environmental and social objectives is not fixed and as such, the Sub-Fund does not commit to invest a minimum percentage of Net Asset Value in SFDR Sustainable Investments which have specifically contributed to either an environmental objective or social objective. As at 31 December 2024, 0.00% of the Sub-Fund's Net Asset Value was in SFDR Sustainable Investments with an environmental objective (without the intention to be aligned with the EU Taxonomy) and 9.69% of the Sub-Fund's Net Asset Value was in SFDR Sustainable Investments with a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

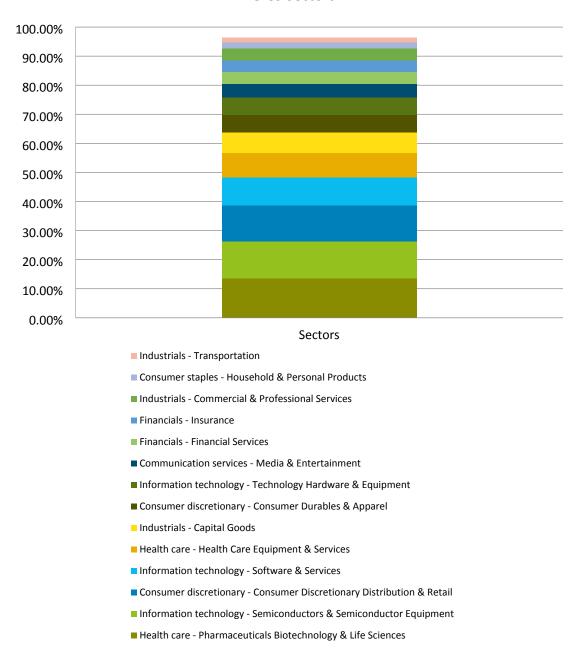

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
 The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?

As at 31 December 2024, the Sub-Fund's investments were in the following economic sectors:

GICS Sectors

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There were no SFDR Sustainable Investments with an environmental objective, and therefore no SFDR Sustainable Investments aligned with the EU Taxonomy.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

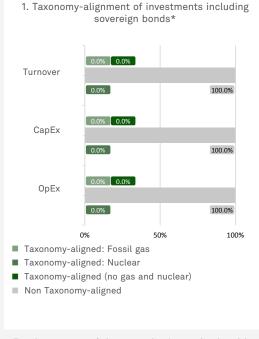

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

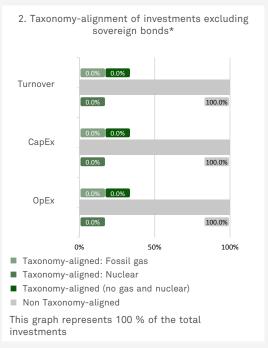

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY 1?

| ☐ Yes: | |
|-----------------|---------------------|
| ☐ In fossil gas | ☐ In nuclear energy |
| ✓ No | |

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND ENABLING ACTIVITIES?

0%

HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?

No comparison for previous periods is available at the date of this periodic report.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

There were no SFDR Sustainable Investments with an environmental objective, and therefore no SFDR Sustainable Investments aligned with the EU Taxonomy.

investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/ 852.

What was the share of socially sustainable investments?

While the Sub-Fund does not have a commitment to investing a minimum percentage of Net Asset Value in socially sustainable investments, as at 31 December 2024 the Sub-Fund invested 9.69% of Net Asset Value in SFDR Sustainable Investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

As at 31 December 2024, the Sub-Fund held 3.66% of Net Asset Value in cash held as ancillary liquidity. There are no minimum environmental or social safeguards associated with these investments

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In summary, the actions taken to meet the environmental and/or social characteristics during the Reference Period were:

- Adherence to the Investment Manager's investment process in terms of stock selection and portfolio construction.
- Each potential investment idea was subject to a broad assessment incorporating relevant and material issues using a consistent framework - a materiality-based assessment of ESG factors.
- ESG data points and controversies screening were sourced from the Investment Manager's third-party data provider.
- Review of sustainable investment assessment, performance of Sustainability Indicators and portfolio level assessment against relevant PAIs by an internal governance forum, the Additional Objectives Portfolios Group.
- The environmental and social characteristics promoted by the Sub-Fund were monitored daily via the exclusions list detailed in the binding elements of the Sub-Fund's investment strategy.
- Due diligence carried out on the underlying assets of the Sub-Fund spanned the processes from generation of a potential investment idea to portfolio construction. The Additional Objectives Portfolios Group assessed potential investment ideas for suitability for inclusion in the Sub-Fund and provides a recommendation to the Investment Executive. The Investment Executive has overall responsibility for the composition of the Sub-Fund.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

Reference benchmarks are indexes to measure HOW DOES THE REFERENCE BENCHMARK DIFFER FROM A BROAD MARKET INDEX? Not applicable.

whether the financial product attains the environmental or social characteristics that they promote.

HOW DID THIS FINANCIAL PRODUCT PERFORM WITH REGARD TO THE SUSTAINABILITY INDICATORS TO DETERMINE THE ALIGNMENT OF THE REFERENCE BENCHMARK WITH THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED?

Not applicable.

HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE REFERENCE **BENCHMARK?**

A reference benchmark has not been designated for the purpose of attaining the environmental and/ or social characteristics promoted by the Sub-Fund.

HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE BROAD MARKET **INDEX?**

Not applicable.

SUSTAINABLE FINANCE DISCLOSURE REGULATION (UNAUDITED)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: BNY Mellon Global Short-Dated High Yield Bond Fund

Legal entity identifier: 213800B8FEADSCHQLG79

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (FU) 2020/852. establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

| | Did this financial product have a sustainable inves | | | | vestment objective: | | |

| | | | | | | | |

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Sub-Fund were met to the following extent during the reference period 1st January 2024 to 31st December 2024 (the "Reference Period").

- The Sub-Fund promoted a minimum environmental and/or social standard that sought to mitigate or avoid practices that the Investment Manager deemed environmentally and/or socially detrimental. Exclusion criteria, as set out in the Sub-Fund's then applicable supplement, were used to achieve this minimum standard. For example, as referenced in the pre-contractual disclosure, issuers that derived a certain percentage of revenue as (determined by the Investment Manager) from tobacco, defence, gambling, coal extraction and controversial weapons production were excluded. Issuers were also excluded where, in the opinion of the Investment Manager, such issuers were deemed to have violated the minimum standards of business practices represented in widely accepted global conventions;
- The Sub-Fund focused on higher scoring issuers in terms of their ESG profile by not investing in any securities with the lowest ESG rating (being a score of 5), as determined by the Investment Manager. By way of illustration, as at the Sub-Fund's year-end date of 31st December 2024, 41% of the portfolio's Net Asset Value in aggregate was invested in issuers with a rating of 1 and 2. The remainder was invested in issuers with an ESG rating of 3 or 4, or in assets which did not have an ESG rating (being any liquid and near-cash assets, including cash, and derivatives (FDI) that were specifically used for hedging purposes). Please see the next question for information on the Sub-Fund's asset-weighted overall ESG rating measured as against the Bloomberg Barclays Euro Aggregate Corporate Total Return Index;

The Sub-Fund focused on issuers that the Investment Manager considered in its sole discretion to have lower carbon intensity. Please see the next question for details on the Sub-Fund's asset weighted average carbon intensity measured as against the Bloomberg Barclays Euro Aggregate Corporate Total Return Index.

Additionally, the Sub-Fund made investments in Use of Proceeds Impact Bonds and Impact Issuers, which were considered by the Investment Manager to qualify as SFDR Sustainable Investments (as determined by the Investment Manager) ("SFDR Sustainable Investments"*) and which in the opinion of the Investment Manager, contributed positively to the attainment of the UN Sustainable Development Goals ("UN SDGs"). The Sub-Fund had 9% of its Net Asset Value in aggregate as at 31st December 2024 invested in Use of Proceeds Impact Bonds and Impact Issuers, each of which are considered to qualify as SFDR Sustainable Investments.

The Investment Manager considers that the Sub-Fund's SFDR Sustainable Investments contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to environmental objectives):

- Affordable and clean energy,
- Industry innovation and infrastructure,
- Sustainable cities and communities,
- Climate action,
- Responsible consumption and production.

The Sustainable Investments may, in some cases have contributed to some of the environmental objectives as set out in Article 9 of the EU Taxonomy Regulation. However, this was not explicitly considered by the Investment Manager in their assessment of the investment.

Please note that the Sub-Fund promotes environmental and/or social characteristics and does not have sustainable investment as its investment objective. There is no commitment or minimum allocation to sustainable investments with environmental objectives aligned with the EU Taxonomy Regulation, however this Annex contains certain information in relation to EU Taxonomy alignment of relevant sustainable investments with environmental objectives held by the Sub-Fund as at 31st December 2024.

As such, information in relation to EU Taxonomy alignment is provided as at the above date and does not reflect the position as at other points during the Reference Period (which may be materially different).

The Investment Manager considers that the Sub-Fund's SFDR Sustainable Investments contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to social objectives):

Clean water and sanitation.

A reference benchmark was not designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The following sustainability indicators were used to measure how the environmental or social characteristics promoted by the Sub-Fund were attained:

- 1) The Sub-Fund successfully and consistently invested a minimum of 5% of its Net Asset Value during the Reference Period in Use of Proceeds Impact Bonds and Impact Issuers, each of which were considered to be "SFDR Sustainable Investments" (as determined by the Investment Manager). By way of illustration, as at the Sub-Fund's year end of 31st December 2024, 9% of the Sub-Fund's Net Asset Value in aggregate was invested in such Use of Proceeds Impact Bonds and Impact Issuers. This percentage figure is provided as at 31st December 2024 only and the percentage so invested has varied during the Reference Period (while remaining above the minimum at all times during the Reference Period).
- 2) The Impact Issuers and Use of Proceeds Impact Bonds invested in by the Sub-Fund successfully and consistently met the following thresholds as assessed by the Investment Manager:
- (a) each such Impact Issuer in which the Sub-Fund was invested demonstrated that at least 20% of their revenue streams were aligned to help realise one or more of the 17 UN Sustainable Development Goals ("UN SDGs"),
- (b) in the case of each such Use of Proceeds Impact Bonds in which the Sub-Fund was invested, the proceeds raised were aimed to be exclusively applied to finance or re-finance in part or in full projects that demonstrated a clear alignment to helping realise one or more of the 17 UN SDGs.
- Exclusion policy: The Sub-Fund has successfully and consistently met its exclusion policy as outlined in the Sub-Fund's supplement and the annex to the Sub-Fund's supplement.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

No derivatives (FDI) were used during the Reference Period to meet the environmental or social characteristics of the Sub-Fund.

AND COMPARED TO PREVIOUS PERIODS?

| Period | Sustainable Indicators | Exclusion policy |
|---------------------------------------|---|---|
| 1 January 2023 to 31 December 2023 | The Sub-Fund had 11% of its Net Asset Value in aggregate as at 31st December 2023 invested in Use of Proceeds Impact Bonds and Impact Issuers, each of which are considered to qualify as SFDR Sustainable Investments. | The Fund successfully and consistently met its exclusion policy as outlined in the then applicable supplement and the annex to the Fund's supplement. |
| 1 January 2024 to 31 December 2024 | The Sub-Fund had 9% of its Net Asset Value in aggregate as at 31st December 2024 invested in Use of Proceeds Impact Bonds and Impact Issuers, each of which are considered to qualify as SFDR Sustainable Investments. | The Fund successfully and consistently met its exclusion policy as outlined in the then applicable supplement and the annex to the Fund's supplement. |

WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

The objective of the SFDR Sustainable Investments the Sub-Fund partially made was to achieve positive environmental and/or social impacts.

The Sub-Fund's SFDR Sustainable Investments contributed to environmental or social objectives by investing in:

Use of Proceeds Impact Bonds: The proceeds were applied to finance or re-finance in part or in full projects with positive environmental and/or social impacts using the UN SDGs as a guide to environmental targets These SFDR Sustainable Investments contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to environmental objectives):

- Affordable and clean energy
- Industry innovation and infrastructure
- Sustainable cities and communities
- Responsible consumption and production
- Climate action
- Life below water
- Life on land

These SFDR Sustainable Investments also contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to social objectives):

- No poverty
- Zero hunger
- Good health & wellbeing
- Quality education
- Gender equality
- Clean water and sanitation
- Decent work and economic growth
- Reduced inequalities

Debt securities issued by Impact Issuers: At least 20% of these investments revenue streams were linked to positive environmental and/or social impacts using the UN SDGs as a guide to environmental targets. These SFDR Sustainable Investments contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to environmental objectives):

Affordable and clean energy

- Industry innovation and infrastructure
- Sustainable cities and communities
- Responsible consumption and production
- Climate action

These SFDR Sustainable Investments also contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to social objectives):

- No poverty
- Good health & wellbeing
- Gender equality
- Clean water and sanitation
- Decent work and economic growth
- Reduced inequalities
- Peace and justice strong institutions

The SFDR Sustainable Investments may, in some cases have contributed to the environmental objectives as set out in Article 9 of the EU Taxonomy Regulation. However, this was not explicitly considered by the Investment Manager in their assessment of the investments.

HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

During the Reference Period the Sub-Fund's investments determined by the Investment Manager to be SFDR Sustainable Investments did not cause significant harm to any environmental or social sustainable investments objective as they were not in breach of the PAIs thresholds set by the Investment Manager.

HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS **TAKEN INTO ACCOUNT?**

During the Reference Period, the indicators for adverse impacts in Table 1 of Annex 1 and any relevant indicators in Tables 2 and 3 of that Annex were taken into account as follows in respect of the Sub-Funds SFDR Sustainable Investments:

The Sub-Fund took into account the following PAIs from:

- Table 1 of Annex I of the Commission Delegated Regulation:
- 1. GHG Emissions: Scope 1, 2 and 3
- 2. Carbon Footprint: Scope 1, 2 and 3
- 3. GHG Intensity of Investee Companies: Scope 1, 2 and 3
- 4. Exposure to companies active in the fossil fuel sector
- 5. Share of non-renewable energy consumption and production
- 6. Energy consumption intensity per high impact climate sector: NACE A, B, C, D, E, F, G, H and L
- 7. Activities negatively affecting biodiversity-sensitive areas
- 8 Emissions to water
- 9. Hazardous waste and radioactive waste ratio
- 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 12. Unadjusted gender pay gap
- 13. Board gender diversity
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

During the Reference Period the Sub-Fund took into account the above PAIs, in the following manner and solely in respect of its SFDR Sustainable Investments:

- PAI thresholds were set by the Investment Manager at an issuer and/or Sub-Fund level where applicable in relation to the instrument held by the Sub-Fund. The PAI thresholds were only applied to the Sub-Fund's corporate and sovereign holdings.
- The Investment Manager measured the performance of the issuer and/or the Sub-Fund, as applicable, against the PAI thresholds which may then have triggered an additional qualitative review where appropriate to determine crossing of PAI thresholds at the time of investment and on an ongoing basis during the above period using data obtained from the Investment Manager's designated third-part data provider.

There were no breaches of such PAI thresholds set by the Investment Manager.

The Investment Manager was dependent upon information and data from third party data providers to be able to consider principal adverse impacts on sustainability factors. Data coverage was previously low and incomplete for some of the mandatory PAIs which impacted the Investment Manager's analysis of adverse indicators. Data quality and completeness has improved over time with the Investment Manager utilising a data provider which has greater coverage. It's expected that PAIs can be applied to a greater portion of the Investment Manager's investable universe, allowing enhanced insight into the adverse impacts caused by issuers.

WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND **HUMAN RIGHTS?**

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights (the "Responsible Business Practices") collectively cover a broad range of areas of responsible business, including labour rights, consumer protection and support for internationally recognised human rights within a company's or issuer's sphere of influence.

The Sub-Fund's investments determined by the Investment Manager to be SFDR Sustainable Investments were considered aligned with the Responsible Business Practices as each issuer passed a broad controversy screen provided by a third party which either directly covered one or more of the Responsible Business Practices or was considered an appropriate proxy for one or more of the Responsible Business Practices. The Investment Manager was dependant on the information and data available to such third party in order to complete the broad controversy screen. It should be noted, that the availability and quality of data may have impacted the screening process.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following mentioned PAIs to the extent practicable as described from Table 1 of Annex 1 of the Commission Delegated Regulation:

- 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).

- PAI thresholds were set by the Investment Manager at an issuer and/or Sub-Fund level where applicable to the instrument held. The PAI thresholds were only applied to the Sub-Fund's corporate and sovereign holdings which were considered by the Investment Manager to be SFDR Sustainable Investments.
- The Investment Manager measured the performance of the issuer and/or the Sub-Fund, as applicable, against these thresholds which may then have triggered an additional qualitative review where appropriate to determine crossing of PAI thresholds at the time of investment and on an ongoing basis during the above period using data obtained from the Investment Manager's designated thirdpart data provider.

There were no breaches of such PAI thresholds set by the Investment Manager.

The Investment Manager was dependent upon information and data from third party data providers to be able to consider principal adverse impacts on sustainability factors. Data coverage was previously low and incomplete for some of the mandatory PAIs which impacted the Investment Manager's analysis of adverse indicators. Data quality and completeness has improved over time with the Investment Manager utilising a data provider which has greater coverage. It's expected that PAIs can be applied to a greater portion of the Investment Manager's investable universe, allowing enhanced insight into the adverse impacts caused by issuers.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1st January 2024 to 31st December 2024

| Largest investments | Sector | % of assets | Country |
|---------------------------|--------------------------|-------------|---------|
| INSIGHT-USD LIQUIDITY FD- | EQUITY | 4.48% | IRE |
| OI Europe 6.25% 05/15/28 | PACKAGING&CONTAINERS | 1.84% | USA |
| Ithaca En 8.125% 10/15/29 | OIL&GAS | 1.81% | UKK |
| Assemblin 6.25% 07/01/30 | ENGINEERING&CONSTRUCTION | 1.77% | SWE |
| Ithaca En 9% 07/15/26 | OIL&GAS | 1.61% | UKK |

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

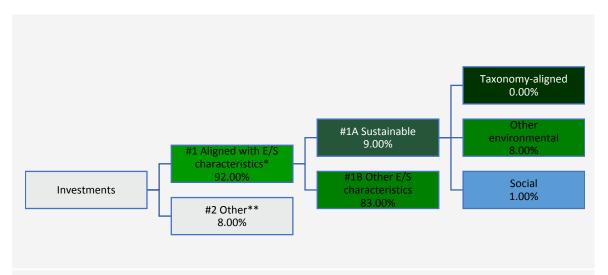

WHAT WAS THE ASSET ALLOCATION?

The Sub-Fund promoted environmental or social characteristics during the Reference Period using an exclusionary approach and allocations to certain SFDR Sustainable Investments, higher scoring issuers and lower carbon intensity issuers.

Please note that the percentage figures provided in the diagram below reflect percentages out of the Net Asset Value of the Fund as at the end of Reference Period.

The figure in #1 represents a combination of both approaches. The allocation to SFDR Sustainable Investments is referenced in #1A. The figure in #1B below represents the proportion of the portfolio that is not considered by the Investment Manager to be SFDR Sustainable Investments but has excluded certain types of investments as detailed in the binding elements of the investment strategy outlined in the supplement and therefore such proportion of the portfolio was aligned with the environmental or social characteristics promoted by the Sub-Fund through the absence of those investments.

It should be noted that the percentages in this section as outlined in the diagram below are provided as at 31st December 2024 and do not necessarily reflect the position as at other points during the Reference Period (which may be materially higher or lower).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

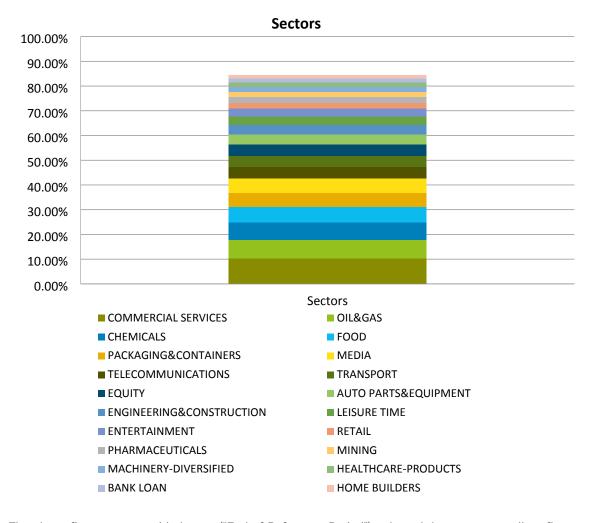

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?

As at 31st December 2024, the Sub-Fund had mostly been exposed to the Packaging & Containers, Commercial Services and Chemicals, as illustrated below.

^{*} The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider alignment with some of the E/S characteristics. In particular, the lack or incomplete reporting of metrics by some investments meant that there was only limited data on such investments. As such, for some of the Sub-Fund's investments, data coverage (such as for carbon footprint) was very low and in the absence of relevant data, such investments were assumed by the Investment Manager to be aligned with E/S characteristics.

^{** #2} Other contains investments that do not align with E/S characteristics promoted by the fund i.e., cash, derivatives (FDI) for hedging and collective investment schemes (CIS) for liquidity purposes. For further detail please see the question below "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?".

The above figures are provided as at ("End of Reference Period") only and do not necessarily reflect the position as at other points during the Reference Period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not commit to making investments aligned with the EU Taxonomy, however, out of the Sub-Fund's allocation to SFDR Sustainable Investments, 0% of the Sustainable Investments with an environmental objective were aligned with the EU Taxonomy as at the 31st December 2024

The taxonomy aligned investments contributed to the at least one of the following objectives as set out in Article 9 of Regulation (EU) 2020/852:

- Climate change mitigation.
- 2. Climate change adaptation.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

All figures and disclosures in relation to EU Taxonomy alignment in this Annex reflect the Sub-Fund's positions as at the end of the Reference Period using the most recent data available from relevant third party data providers as at 2nd January 2025

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

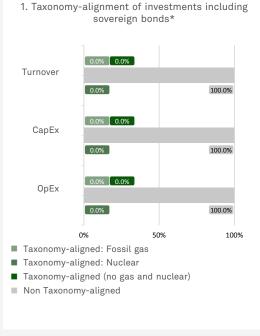

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

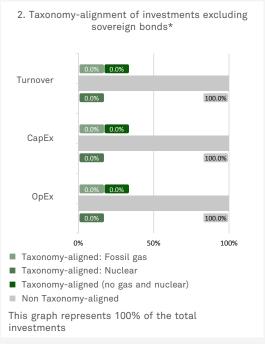

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY 1?

| ☐ Yes: | |
|-----------------|---------------------|
| ☐ In fossil gas | ☐ In nuclear energy |
| ✓ No | |

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND **ENABLING ACTIVITIES?**

Transitional activities: 0.00% Enabling activities: 0.00%

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?

| Date | Comment |
|----------------------|-----------------------|
| 3 April 2023 to 31 | Turnover/Revenue – 0% |
| December 2023 | CapEx - 0% |
| | OpEx - 0% |
| 1 January 2024 to 31 | Turnover/Revenue – 0% |
| December 2024 | CapEx - 0% |
| | OpEx - 0% |

re sustainable

environmentally

investments with an

that do not take into account the criteria for

sustainable economic activities under

Regulation (EU) 2020/

environmental objective

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

100% of the of sustainable Investments with an environmental objective were not aligned with the EU Taxonomy as at 31st December 2024.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

All figures and disclosures in relation to EU Taxonomy alignment in this Annex reflect the Sub-Fund's positions as at the end of the Reference Period using the most recent data available from relevant third party data providers as at 2nd January 2025.

What was the share of socially sustainable investments?

While the Sub-Fund does not commit to investing a minimum percentage of its Net Asset Value in socially sustainable investments, the Sub-Fund invested 1%* of its Net Asset Value in SFDR Sustainable Investments with a social objective, as at 31st December 2024.

*This percentage figure is provided as at 31st December 2024 only and does not necessarily reflect the position as at other points during the Reference Period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Other" were:

- Liquid and near-cash assets including cash held or used for ancillary liquidity purposes.
- Collective Investment Schemes (CIS) that were specifically used for liquidity purposes.
- Derivatives (FDI) that were specifically used for hedging purposes.

No minimum environment or social safeguards were considered for these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken to meet the environmental and/or social characteristics during the Reference Period are:

- The Investment Manager:
- a) Invested in Use of Proceeds Impact Bonds and Impact Issuers, each of which were considered to be "SFDR Sustainable Investments" (as determined by the Investment Manager).

- b) Ensured the Sub-Fund's asset-weighted overall ESG rating, as determined by the Investment Manager, was not weaker than the asset-weighted overall ESG rating of the Bloomberg Barclays Euro Aggregate Corporate Total Return Index (the "Benchmark") at any point during the Reference Period.
- c) Ensured the Sub-Fund's asset weighted average carbon intensity was at least 25% lower than the asset weighted average carbon intensity of the Benchmark during the Reference Period
- d) Employed an exclusion policy as outlined in the Sub-Fund's supplement and the annex to the Sub-Fund's supplement.

These binding elements of the Sub-Fund were coded into the trading systems and used to monitor the environmental and social characteristics promoted during the reference period.

The following internal control mechanisms were used by the Investment Manager for such monitoring during the Reference Period:

Pre-trade warnings appeared in the trade system prior to trading to inform portfolio managers of a prohibition or limit.

Post-trade warnings were also reviewed by the monitoring team and escalated as appropriate.

Oversight of the relevance of criteria used to meet characteristics promoted was provided by the Responsible Investment Group, a governance group within the Investment Manager which has overall oversight of ensuring effective implementation of ESG due diligence at asset class level and for defining adherence criteria for the Investment Managers 'Responsible Horizons' strategies. Oversight of internal exclusions lists used to ensure certain binding criteria were met, was provided by the Ratings and Exclusions Group ("REG"), a governance group within the Investment Manager.

During the Reference Period, no engagement with the issuers in which the Sub-Fund has invested. was required or undertaken as a consequence of there being no breaches of any of the binding elements outlined in Sub-Fund's supplement. However, there was a breach on 18th January 2024 where the fund incorrectly invested in an asset with a ESG rating of 5. This was identified on the 19th January 2024 via the post trade compliance process and action was taken to immediately sell the same asset.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

- HOW DOES THE REFERENCE BENCHMARK DIFFER FROM A BROAD MARKET INDEX? Not applicable.
- HOW DID THIS FINANCIAL PRODUCT PERFORM WITH REGARD TO THE SUSTAINABILITY INDICATORS TO DETERMINE THE ALIGNMENT OF THE REFERENCE BENCHMARK WITH THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED?

Not applicable.

HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE REFERENCE **BENCHMARK?**

Not applicable.

HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE BROAD MARKET INDEX?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: BNY Mellon Long-Term European Equity Fund Legal entity identifier: 2138004XGCRR77P7N117

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The "reference period" for this periodic report is from 1 January 2024 to 31 December 2024 (the "Reference Period").

During the Reference Period, this Sub-Fund promoted the environmental characteristic of responsible use of natural resources and the social characteristic of responsible business conduct through investing in companies which embrace high standards of environmental, social and governance (ESG) practice, or that were attractive due to their progression in environmental and social practice and exhibit good governance, and by deliberately avoiding investment in companies with below threshold ESG credentials as defined by the Investment Manager.

The environmental and social sustainability indicators considered by the Investment Manager are detailed below (the "Sustainability Indicators"):

Environmental Sustainability Indicators

- Greenhouse gas emissions
- Biodiversity and natural resources
- Climate and transition risks
- Pollution and waste management

Social Sustainability Indicators

- Business ethics, bribery and corruption
- Data privacy and security
- Labour practices and human rights safeguards
- Diversity, equality and inclusion

A reference benchmark was not designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

There was no intention for the SFDR Sustainable Investments underlying this Sub-Fund to contribute to the environmental objectives set out in Article 9 of the EU Taxonomy Regulation.

The Sub-Fund's SFDR Sustainable Investments with a social objective were aligned with the UN Sustainable Development Goal 1 - 'No Poverty' and with the UN Sustainable Development Goal 3 - 'Good Health and Well-Being'. The Sub-Fund's SFDR Sustainable Investment with an environmental objective was aligned with the UN Sustainable Development Goal 12 - 'Responsible Consumption and Production.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The Sub-Fund used eight Sustainability Indicators to measure how the environmental or social characteristics promoted by the Sub-Fund were attained which are supported by 14 data points. This is a change from prior reporting periods where the underlying data points were used by the Sub-Fund as the sustainability indicators and reflects a change made to the Sub-Fund's precontractual disclosure during the Reference Period.

ENVIRONMENTAL SUSTAINABILITY INDICATORS

| Indicator # | Description | Supporting Data Points |
|-----------------------------|------------------------------------|---|
| Sustainability Indicator #1 | Greenhouse Gas Emissions | 1. Carbon intensity scope 1 and 2 |
| Sustainability Indicator #2 | Biodiversity and natural resources | 2. Company has operations located in biodiversity- sensitive areas and is involved in controversies with severe impact on the environment |
| | | 3. Operational sites owned, leased, managed in, or adjacent to, protected areas and areas of high biodiversity value outside protected areas |
| Sustainability Indicator #3 | Climate and transition risks | 4. Active fossil fuel sector exposure |
| Sustainability Indicator #4 | Pollution and waste management: | 5. Environment controversy score |

SOCIAL SUSTAINABILITY INDICATORS

| Indicator # | Description | Supporting Data Points |
|-----------------------------|--|--|
| Sustainability In- | Business ethics, bribery and | 6. Controversial weapons – any tie |
| dicator #5 | corruption | 7. Total number of convictions for violations of anti- corruption and anti-bribery laws |
| Sustainability In- | Data privacy and security | 8. Customers - Privacy and data security score |
| dicator #6 | | 9. Data security breaches controversies |
| Sustainability In- | Labour practices and human rights safeguards | 10. Labour compliance – Broad |
| dicator #7 | | 11. Human rights compliance |
| | | 12. Human rights - Impact on local communities score |
| Sustainability Indicator #8 | Diversity, equality and inclusion | 14. Discrimination and diversity controversies |

Each of the Sub-Fund's equity investments was measured against the Sustainability Indicators listed above on a quarterly basis and at the end of the Reference Period, as well as upon each purchase of a new company. The supporting data points were compared to internally set thresholds and, if a threshold was met, a flag was generated which required analysis. This would prompt comment and conclusion from the 'Stock Champion' (a member of the Investment Manager's Research team responsible for the research in the equity company) and further review from the Additional Objectives Portfolios Group, an internal governance forum.

No holdings were sold during the Reference Period as a result of analysis against the Sustainability Indicators detailed above.

No derivatives (FDI) were used to meet the environmental or social characteristics.

There were no new flags deemed to be potentially material changes in data during the Reference

The following table indicates the percentage weight of the Sub-Fund invested in companies which had a flag relating to each Sustainability Indicator as at the end of the Reference Period.

| Indicator # | Description | % Weight of Flagged Com- panies |
|-----------------------------|--|---------------------------------------|
| Sustainability Indicator #1 | Greenhouse Gas Emissions | 3.8 |
| Sustainability Indicator #2 | Biodiversity and natural resources | 10.2 |
| Sustainability Indicator #3 | Climate and transition risks | 1.9 |
| Sustainability Indicator #4 | Pollution and waste management: | 2.6 |
| Sustainability Indicator #5 | Business ethics, bribery and corruption | 4.2 |
| Sustainability Indicator #6 | Data privacy and security | 2.2 |
| Sustainability Indicator #7 | Labour practices and human rights safeguards | 9.8 |
| Sustainability Indicator #8 | Diversity, equality and inclusion | 0.0 |

AND COMPARED TO PREVIOUS PERIODS?

In prior reporting periods, the 14 supporting data points set out above were used by the Sub-Fund as the sustainability indicators used to measure how the environmental or social characteristics promoted by the Sub-Fund were attained. However, following an amendment to the Sub-Fund's precontractual disclosure during the Reference Period, the Sub-Fund now uses the eight overarching environmental and social themes, which are supported by the same 14 data points, as the sustainability indicators. Please see the section above titled "How did the sustainability indicators perform?" for further detail. The following table compares the performance of the eight Sustainability Indicators during the Reference Period against their performance in the prior reference period.

| Indicator # | Description | 2023 | 2024 |
|-----------------------------|--|------|------|
| Sustainability Indicator #1 | Greenhouse Gas Emissions | 3.5 | 3.8 |
| Sustainability Indicator #2 | Biodiversity and natural resources | 3.5 | 10.2 |
| Sustainability Indicator #3 | Climate and transition risks | 2.3 | 1.9 |
| Sustainability Indicator #4 | Pollution and waste management: | 1.9 | 2.6 |
| Sustainability Indicator #5 | Business ethics, bribery and corruption | 4.1 | 4.2 |
| Sustainability Indicator #6 | Data privacy and security | 2.0 | 2.2 |
| Sustainability Indicator #7 | Labour practices and human rights safeguards | 10.1 | 9.8 |
| Sustainability Indicator #8 | Diversity, equality and inclusion | 0.0 | 0.0 |

Sustainability Indicator #2 (Biodiversity and natural resources): The increase in weight in companies with one or more flags relating to this sustainability indicator was due our third-party data provider changing the underlying methodology behind the data points informing this sustainability indicator.

WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

The social objectives to which the SFDR Sustainable Investments contributed were UN Sustainable Development Goal 1 - 'No Poverty' and UN Sustainable Development Goal 3 - 'Good Health and Well-Being'. The environmental objective to which the SFDR Sustainable Investments contributed was UN Sustainable Development Goal 12 - 'Responsible Consumption and Production'.

A SFDR Sustainable Investment contributed to this objective by having a minimum of 30% revenue aligned with UN Sustainable Development Goals. The Sub-Fund's five SFDR Sustainable Investments contributed to the objectives as follows:

SFDR Sustainable Investments with a social objective

- Novo Nordisk: global pharmaceuticals company largely focused on diabetes and obesity. 86% of revenue aligned with UN Sustainable Development Goal 1 - 'No Poverty' and UN Sustainable Development Goal 3 'Good Health and Well-Being'.
- Novartis: global diversified pharmaceutical company which engages in innovative medicines. 52% of revenues aligned with UN Sustainable Development Goal 1 - 'No Poverty' and UN Sustainable Development Goal 3 'Good Health and Well-Being'.
- Recordati: global diversified biopharmaceuticals company which operates through the Specialty and Primary Care, and Rare Diseases segments. 50% of revenues aligned with UN Sustainable Development Goal 1 - 'No Poverty' and UN Sustainable Development Goal 3 'Good Health and Well-Being'.
- Roche: global pharmaceuticals and diagnostics business with a world leading oncology franchise. 45% of revenue aligned with UN Sustainable Development Goal 1 - 'No Poverty' and UN Sustainable Development Goal 3 'Good Health and Well-Being'.

SFDR Sustainable Investment with an environmental objective

Dassault Systemes: the world's leading producer of 3D Product Lifecycle Management software. 36% of revenue aligned with UN Sustainable Development Goal 12 - 'Responsible Consumption and Production'.

There was no intention for the SFDR Sustainable Investments underlying this Sub-Fund to contribute to the environmental objectives set out in Article 9 of the EU Taxonomy Regulation.

HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

The Sub-Fund's SFDR Sustainable Investments that met the minimum revenue threshold, as previously described, were then screened against a number of principal adverse impacts (PAIs) indicators for 'do no significant harm' (DNSH).

HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS **TAKEN INTO ACCOUNT?**

The following mandatory indicators in Table 1 of Annex I of the SFDR regulatory technical standards (RTS) and any relevant indicators (on a sector-by-sector basis) from Tables 2 and 3 of Annex I of the RTS were taken into account as follows during the Reference Period:

- Relevant indicators in Table 1 of Annex I of the RTS:
- 1. Greenhouse gas emissions: Scope 1, 2 and 3
- 3. Greenhouse gas intensity of investee companies: Scope 1, 2 and 3
- 4. Exposure to companies active in the fossil fuel sector
- 5. Share of non-renewable energy consumption and production
- 6. Energy consumption intensity per high impact climate sector
- Activities negatively affecting biodiversity-sensitive areas
- 8. Emissions to water
- 9. Hazardous waste and radioactive waste ratio
- 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 12. Unadjusted gender pay gap
- 13. Board gender diversity
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons)

The Sub-Fund considered all mandatory indicators included in Table 1 of Annex I of the RTS with the exception of PAI 2, carbon footprint. For the DNSH assessment, the PAIs are required to be considered at company level. PAI 1 was converted to an intensity measure rather than an absolute number for this analysis. This was because the original PAI was designed for portfolio level

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

consideration rather than use at the company level but the analysis for DNSH must be at the company level. PAI 2 is not considered separately as, having converted PAI 1 to an intensity measure, it would simply repeat the information covered in PAIs 1 and 3.

- Indicators in Table 2 of Annex I of the RTS:
- Investments in companies without carbon emission reduction initiatives 4.
- 8. Exposure to areas of high water stress
- Indicators in Table 3 of Annex I of the RTS:
- 4. Lack of a supplier code of conduct
- 6. Insufficient whistle-blower protection
- 7. Incidents of discrimination
- 9. Lack of a human rights policy
- 14. Number of identified cases of severe human rights issues and incidents
- 15. Lack of anti-corruption and anti-bribery policies

Each indicator was either considered versus a sector median or absolute threshold for all companies that met the percentage revenue threshold to qualify as an SFDR Sustainable Investment.

For quantitative indicators, a flag was raised if the designated threshold for sector median was surpassed. In such instances, further analysis was undertaken to determine whether the investment did no significant harm and therefore was in fact a SFDR Sustainable Investment. Across the five securities which qualified as SFDR Sustainable Investments, there were eight flags as at the end of the reference period, with seven of those related to data gaps, while the remaining flag was related to surpassing the sector median. Specifically, PAI 1: Greenhouse gas emissions: Scope 1, 2 and 3.

For other indicators, a flag was raised for a below threshold response. In such instances, further analysis was undertaken to determine whether the investment did no significant harm and therefore was in fact a SFDR Sustainable Investment. Across the five securities which qualified as SFDR Sustainable Investments, there were six flags as at the end of the reference period. Specifically, these flags were for: PAI 10: Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises; PAI 8: Emissions to water; Additional Social; and PAI 4: Lack of a supplier code of conduct.

For all indicators (qualitative and otherwise), if the data was not available from the Investment Manager's third-party data provider, steps were taken by the Investment Manager to either source the required information or contact the investee company. If the company did not report that data point, then proxy or alternative contextual information was used.

In all cases where flags were raised, following further analysis it was concluded that there was no significant harm to any environmental or social sustainable investment objective and therefore the companies qualified as SFDR Sustainable Investments.

WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND **HUMAN RIGHTS?**

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights (the "Responsible Business Practices") collectively cover a very broad range of areas of responsible business, encompassing everything from labour rights to consumer protection to support for internationally recognised human rights within a company's or issuer's sphere of influence.

The Sub-Fund's SFDR Sustainable Investments were considered aligned with the Responsible Business Practices as no flags were raised in relation to the specific human rights, labour, controversy, and tax compliance screens which either (i) directly cover one or more of the Responsible Business Practices; or (ii) are considered an appropriate proxy for one or more of the Responsible Business Practices.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

In accordance with Article 7 of SFDR, the adverse impacts of investment decisions on sustainability factors were considered in line with the PAI regime for this Sub-Fund from the perspective of the harm that investment positions might do externally to sustainability factors. The Sub-Fund considered seven of the indicators included in Table 1 of Annex I of the RTS at a portfolio level. Those were:

- PAI 2: Carbon footprint
- PAI 3: Greenhouse gas intensity of investee companies
- PAI 4: Exposure to companies active in the fossil fuel sector
- PAI 7: Activities negatively affecting biodiversity-sensitive areas
- PAI 10: Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 13: Board gender diversity
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons)

Thresholds were set against each indicator at an aggregate portfolio level. The approach to 'consider the PAIs' has been for the Investment Manager to apply the reasonable thresholds, above which it could be considered that the Sub-Fund has a 'material adverse impact' against any of the criteria listed above. The Sub-Fund was reviewed against these thresholds internally on a quarterly basis, as well as upon each purchase of a new company. When compared, none of these thresholds were exceeded.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2024 to 31 December 2024

| More important investments | Sector | % of assets | Country |
|----------------------------|--|-------------|----------------|
| ASML | Information technology - Semiconductors & Semiconductor Equipment | 3.27% | Netherlands |
| SAP | Information technology - Software & Services | 3.01% | Germany |
| Diploma | Industrials - Capital Goods | 2.69% | United Kingdom |
| Novo Nordisk | Health care - Pharmaceuticals Biotechnology & Life Sciences | 2.67% | Denmark |
| The Sage Group | Information technology - Software & Services | 2.64% | United Kingdom |
| Inditex | Consumer discretionary - Consumer Discretionary Distribution & Retail | 2.64% | Spain |
| Halma | Information technology - Technology Hardware & Equipment | 2.63% | United Kingdom |
| Wolters Kluwer | Industrials - Commercial & Professional Services | 2.61% | Netherlands |
| ASM International | Information technology - Semiconductors & Semiconductor Equipment | 2.51% | Netherlands |
| Compass Group | Consumer discretionary - Consumer Services | 2.45% | United Kingdom |
| Rational | Industrials - Capital Goods | 2.38% | Germany |
| Reply | Health care - Pharmaceuticals Biotechnology & Life Sciences | 2.38% | Italy |
| Roche | Health care - Pharmaceuticals Biotechnology & Life Sciences | 2.31% | Switzerland |
| Hermès International | Consumer discretionary - Consumer Durables & Apparel | 2.26% | France |

| More important investments | Sector | % of assets | Country |
|----------------------------|---|-------------|---------|
| Ferrari | Consumer discretionary - Automobiles & Components | 2.23% | Italy |

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

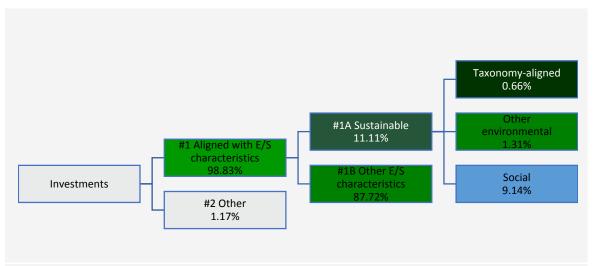

WHAT WAS THE ASSET ALLOCATION?

As at 31 December 2024, the asset allocation of the Sub-Fund was as shown in the diagram. This differs from the asset allocation diagram in the pre-contractual disclosure (Annex II) as this was intended to illustrate the planned asset allocation of the Sub-Fund and reflected the minimum investments referred to in that Annex.

As at 31 December 2024, 98.83% of the Net Asset Value of this Sub-Fund was invested in Equity and Equity-Related Securities that met the Investment Manager's "ESG Criteria" at the time of purchase and on an ongoing basis. The remainder of the Sub-Fund was invested in cash which, for the avoidance of doubt, is not required to meet the ESG Criteria.

The Sub-Fund met its commitment to investing a minimum of 5% of Net Asset Value in SFDR Sustainable Investments which contribute to an environmental or social objective. As at 31 December 2024, 11.11% of the Sub-Fund's Net Asset Value was invested in SFDR Sustainable

The asset allocation between environmental and social objectives is not fixed and as such, the Sub-Fund does not commit to invest a minimum percentage of Net Asset Value in SFDR Sustainable Investments which have specifically contributed to either an environmental objective or social objective. As at 31 December 2024, 1.97% of the Sub-Fund's Net Asset Value was in SFDR Sustainable Investments with an environmental objective (without the intention to be aligned with the EU Taxonomy) and 9.14% of the Sub-Fund's Net Asset Value was in SFDR Sustainable Investments with a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

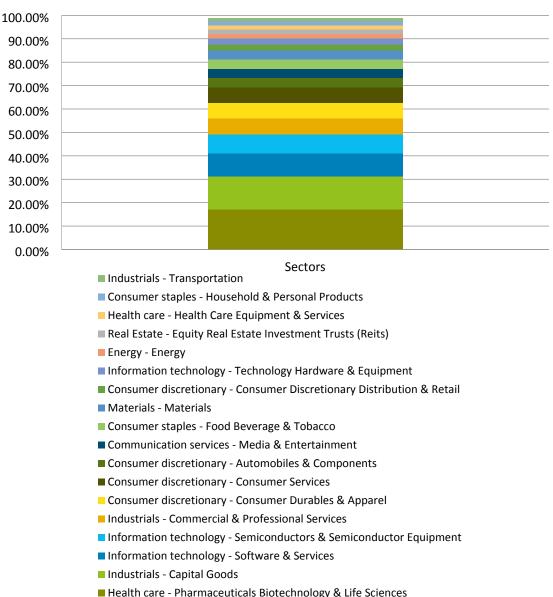

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?

As at 31 December 2024, the Sub-Fund's investments were in the following economic sectors:

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While it is not the Investment Manager's intention to invest in holdings with EU Taxonomy alignment, the SFDR Sustainable Investment with an environmental objective were aligned to a degree with the EU Taxonomy. 0.66% of the Net Asset Value of the Sub-Fund invested in SFDR Sustainable Investment with an environmental objective aligned with EU Taxonomy. For reporting purposes, please see the table below for the breakdown of the company's revenue, operating expenditure and capital expenditure considered to be aligned with the EU Taxonomy. The assessment of whether these investments complied with the EU Criteria for Environmentally Sustainable Economic Activities was not subject to an assurance provided by one or more auditors or a review by one or more third parties.

Companies qualifying as Sustainable Investments must pass a DNSH process determined by the Investment Manager (using the mandatory and additional PAIs), as well as the additional minimum social safeguards requirements relating to OECD/UNGP alignment. One company qualified as contributing to an environmental objective (Dassault Systemes). Within the company's annual reports, the EU Taxonomy eligible and aligned figures were used and,

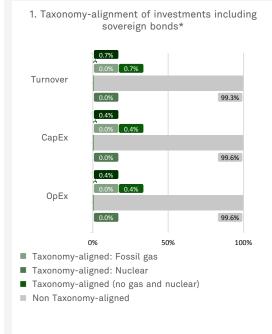

combining the figures of eligible revenue/OpEx/CapEx with the fact that Dassault has passed the Investment Manager's DNSH process, these figures were multiplied by the weight of the holding within the Sub-Fund to arrive at total Sub-Fund EU Taxonomy aligned values.

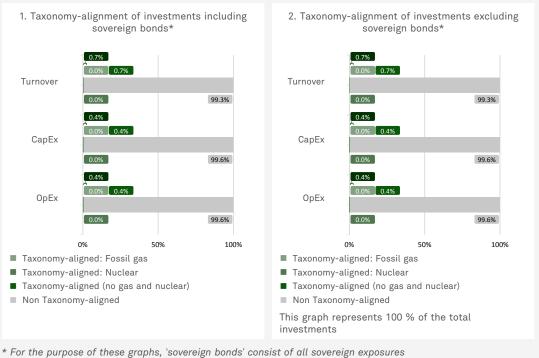

The Investment Manager was partly dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Specifically, the DNSH and minimum social safeguard assessment used third-party data as an input to the process, and thus this assessment was subject to the potential data limitations detailed in the adverse impact section above. However, where data was limited, the Investment Manager undertook further analysis (as described in the Sustainable Investment section above) to assess potential significant harm and minimum social safeguards.

DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY 1?

| ☐ Yes: | |
|-----------------|--------------------|
| ☐ In fossil gas | ☐ In nuclear energ |
| ✓ No | |

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

To comply with the EU Taxonomy, the

criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety

and waste management rules.

companies.

economy.

- operational

of investee

companies.

WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND **ENABLING ACTIVITIES?**

0%

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Transitional activities are activities for which low-carbon alternatives are not vet available and among others have greenhouse gas emission levels corresponding to the best performance.

HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?

In the prior reference period, one investee company was identified as having EU Taxonomy eligible and aligned revenue, OpEx and CapEx. Previously, the company reported an 'eligible' revenue figure, but no 'aligned' revenue figure, and the Investment Manager had assumed all eligible revenue figures also had 100% alignment. During the current Reference Period, the company provided both figures in their annual report, reporting that approximately half of the eligible revenue, OpEx, and CapEx are considered EU Taxonomy aligned. Thus, the Sub-Fund's reported exposure to aligned revenue, OpEx, and CapEx has decreased since the last Periodic Disclosure.

Due to a slight decrease in the Sub-Fund's weight in this company, as well as the aforementioned reporting change, during the Reference Period the Aligned Portfolio Turnover has decreased from 1.38% to 0.66%, Aligned Portfolio Operating Expenditure has decreased from 1.00% to 0.44%, and Aligned Portfolio Capital Expenditure has decreased from 1.36% to 0.43%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

66.6% of the SFDR Sustainable Investments with an environmental objective were not aligned with the EU Taxonomy. The Sub-Fund is invested in one company which is considered to be a SFDR Sustainable Investment with an environmental objective in economic activities aligned with EU Taxonomy. For this company, the EU Taxonomy eligible revenue was 67.3% (approximately half of which was deemed to be EU Taxonomy aligned revenue by the investee company), as per the company's 2023 annual report.

investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/

What was the share of socially sustainable investments?

While the Sub-Fund does not have a commitment to investing a minimum percentage of Net Asset Value in socially sustainable investments, as at 31 December 2024 the Sub-Fund invested 11.11% of Net Asset Value in SFDR Sustainable Investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

As at the 31 December 2024, the Sub-Fund held 1.17% of Net Asset Value in cash held as ancillary liquidity. There are no minimum environmental or social safeguards associated with these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In summary, the actions taken to meet the environmental and/or social characteristics during the reference period were:

- Adherence to the Investment Manager's investment process in terms of stock selection and portfolio construction.
- Each potential investment idea was subject to a broad assessment incorporating relevant and material issues using a consistent framework – a materiality-based assessment of ESG factors.
- ESG data points and controversies screening were sourced from the Investment Manager's third-party data provider.
- Review of sustainable investment assessment, performance of sustainability indicators and portfolio level assessment against relevant PAIs by an internal governance forum, the Additional Objectives Portfolios Group.

- The environmental and social characteristics promoted by the Sub-Fund were monitored daily via the exclusions list detailed in the binding elements of the Sub-Fund's investment strategy.
- Due diligence carried out on the underlying assets of the Sub-Fund spanned the processes from generation of a potential investment idea to portfolio construction. The Additional Objectives Portfolios Group assessed potential investment ideas for suitability for inclusion in the Sub-Fund and provides a recommendation to the Investment Executive. The Investment Executive has overall responsibility for the composition of the Sub-Fund.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

- HOW DOES THE REFERENCE BENCHMARK DIFFER FROM A BROAD MARKET INDEX? Not applicable.
- HOW DID THIS FINANCIAL PRODUCT PERFORM WITH REGARD TO THE SUSTAINABILITY INDICATORS TO DETERMINE THE ALIGNMENT OF THE REFERENCE BENCHMARK WITH THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED?

Not applicable.

HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE REFERENCE **BENCHMARK?**

A reference benchmark has not been designated for the purpose of attaining the environmental and/ or social characteristics promoted by the Sub-Fund.

HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE BROAD MARKET **INDEX?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: BNY Mellon Long-Term Global Equity Fund Legal entity identifier: 21380054NDC4BXEMBP84

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The 'reference period' for this periodic report is from 1 January 2024 to 31 December 2024 (the "Reference Period").

During the Reference Period, this Sub-Fund promoted the environmental characteristic of responsible use of natural resources and the social characteristic of responsible business conduct through investing in companies which embrace high standards of environmental, social and governance (ESG) practice, or that were attractive due to their progression in environmental and social practice and exhibit good governance, and by deliberately avoiding investment in companies with below threshold ESG credentials as defined by the Investment Manager.

The environmental and social sustainability indicators considered by the Investment Manager are detailed below (the "Sustainability Indicators"):

Environmental Sustainability Indicators

- Greenhouse gas emissions
- Biodiversity and natural resources
- Climate and transition risks
- Pollution and waste management

Social Sustainability Indicators

- Business ethics, bribery and corruption
- Data privacy and security
- Labour practices and human rights safeguards
- Diversity, equality and inclusion

A reference benchmark was not designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

There was no intention for the SFDR Sustainable Investments underlying this Sub-Fund to contribute to the environmental objectives set out in Article 9 of the EU Taxonomy Regulation.

The Sub-Fund's SFDR Sustainable Investments with a social objective were aligned with the UN Sustainable Development Goal 1 - 'No Poverty' and the UN Sustainable Development Goal 3 - 'Good Health and Well-Being'. The Sub-Fund's SFDR Sustainable Investment with an environmental objective was aligned with the UN Sustainable Development Goal 12 - 'Responsible Consumption and Production'.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The Sub-Fund used 8 Sustainability Indicators to measure how the environmental or social characteristics promoted by the Sub-Fund were attained which were supported by 14 data points. This is a change from prior reporting periods where the underlying data points were used by the Sub-Fund as the sustainability indicators and reflects a change made to the Sub-Fund's precontractual disclosure during the Reference Period.

ENVIRONMENTAL SUSTAINABILITY INDICATORS

| Indicator # | Description | Supporting Data Points |
|-----------------------------|------------------------------------|--|
| Sustainability Indicator #1 | Greenhouse Gas Emissions | 1. Carbon intensity scope 1 and 2 |
| Sustainability Indicator #2 | Biodiversity and natural resources | 2. Company has operations located in biodiversity-sensitive areas and is involved in controversies with severe impact on the environment |
| | | 3. Operational sites owned, leased, managed in, or adjacent to, protected areas and areas of high biodiversity value outside protected areas |
| Sustainability Indicator #3 | Climate and transition risks | 4. Active fossil fuel sector exposure |
| Sustainability Indicator #4 | Pollution and waste management | 5. Environment controversy score |

SOCIAL SUSTAINABILITY INDICATORS

| Indicator # | Description | Supporting Data Points | |
|-----------------------------|--|--|--|
| Sustainability In- | Business ethics, bribery and corruption | 6. Controversial weapons – any tie | |
| dicator #5 | | 7. Total number of convictions for violations of anti-corruption and anti-bribery laws | |
| Sustainability In- | Data privacy and security | 8. Customers - Privacy and data security score | |
| dicator #6 | | 9. Data security breaches controversies | |
| Sustainability In- | Labour practices and human rights safeguards | 10. Labour compliance – Broad | |
| dicator #7 | | 11. Human rights compliance | |
| | | 12. Human rights - Impact on local communities score | |
| Sustainability Indicator #8 | Diversity, equality and inclusion | 14. Discrimination and diversity controversies | |

Each of the Sub-Fund's equity investments was measured against the Sustainability Indicators listed above on a quarterly basis and at the end of the Reference Period, as well as upon each purchase of a new company. The supporting data points were compared to internally set thresholds and, if a threshold was met, a flag was generated which required analysis. This would prompt comment and conclusion from the 'Stock Champion' (a member of the Investment Manager's Research team responsible for the research in the equity company) and further review from the Additional Objectives Portfolios Group, an internal governance forum.

No holdings were sold during the Reference Period as a result of analysis against the Sustainability Indicators detailed above.

No derivatives (FDI) were used to meet the environmental or social characteristics.

There were no new flags deemed to be potentially material changes in data during the Reference Period.

The following table indicates the percentage weight of the Sub-Fund invested in companies which had a flag relating to each Sustainability Indicator as at the end of the Reference Period.

| Indicator # | Description | % Weight of Flagged Com- panies |
|-----------------------------|--|---------------------------------------|
| Sustainability Indicator #1 | Greenhouse Gas Emissions | 2.3 |
| Sustainability Indicator #2 | Biodiversity and natural resources | 7.3 |
| Sustainability Indicator #3 | Climate and transition risks | 5.8 |
| Sustainability Indicator #4 | Pollution and waste management: | 2.0 |
| Sustainability Indicator #5 | Business ethics, bribery and corruption | 5.8 |
| Sustainability Indicator #6 | Data privacy and security | 1.9 |
| Sustainability Indicator #7 | Labour practices and human rights safeguards | 9.4 |
| Sustainability Indicator #8 | Diversity, equality and inclusion | 7.0 |

...AND COMPARED TO PREVIOUS PERIODS?

In prior reporting periods, the 14 supporting data points set out above were used by the Sub-Fund as the sustainability indicators used to measure how the environmental or social characteristics promoted by the Sub-Fund were attained. However, following an amendment to the Sub-Fund's precontractual disclosure during the Reference Period, the Sub-Fund now uses the eight overarching environmental and social themes, which are supported by the same 14 data points, as the sustainability indicators. Please see the section above titled "How did the sustainability indicators perform?" for further detail. The following table compares the performance of the eight Sustainability Indicators during the Reference Period against their performance in the prior reference period.

| Indicator # | Description | 2023 | 2024 |
|-----------------------------|--|------|------|
| Sustainability Indicator #1 | Greenhouse Gas Emissions | 2.0 | 2.3 |
| Sustainability Indicator #2 | Biodiversity and natural resources | 0.0 | 7.3 |
| Sustainability Indicator #3 | Climate and transition risks | 6.9 | 5.8 |
| Sustainability Indicator #4 | Pollution and waste management: | 1.8 | 2.0 |
| Sustainability Indicator #5 | Business ethics, bribery and corruption | 5.8 | 5.8 |
| Sustainability Indicator #6 | Data privacy and security | 2.1 | 1.9 |
| Sustainability Indicator #7 | Labour practices and human rights safeguards | 11.3 | 9.4 |
| Sustainability Indicator #8 | Diversity, equality and inclusion | 2.6 | 7.0 |

Sustainability Indicator #2 (Biodiversity and natural resources): The increase in weight in companies with one or more flags relating to this Sustainability Indicator was due to the third-party data provider changing the underlying methodology behind the data points informing this Sustainability Indicator.

Sustainability Indicator #8 (Diversity, equality and inclusion): The beginning weight of 2.6% is a single company in the portfolio, while the ending weight of 7.0% is two companies in the portfolio. The increase in weight in companies with one or more flags relating to this Sustainability Indicator was due to (i) one company inheriting a flag from an acquisition made during the reporting period; and (ii) the increase in weight within the portfolio of another company with an existing flag from the beginning of the period.

WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

The social objectives to which the SFDR Sustainable Investments contributed were UN Sustainable Development Goal 1 - 'No Poverty' and UN Sustainable Development Goal 3 - 'Good Health and Well-Being'. The environmental objective to which the SFDR Sustainable Investments contributed was UN Sustainable Development Goal 12 - 'Responsible Consumption and Production'.

A SFDR Sustainable Investment contributed to this objective by having a minimum of 30% revenue aligned with UN Sustainable Development Goals. The Sub-Fund's five SFDR Sustainable Investments contributed to the objectives as follows:

SFDR Sustainable Investments with a social objective

- Novo Nordisk: global pharmaceuticals company largely focused on diabetes and obesity. 86% of revenue aligned with UN Sustainable Development Goal 1 - 'No Poverty' and UN Sustainable Development Goal 3 'Good Health and Well-Being'.
- Edwards Lifesciences: market leader in the treatment of aortic stenosis, a serious heart condition that affects millions of people worldwide. 84% of revenues aligned with UN Sustainable Development Goal 1 - 'No Poverty' and UN Sustainable Development Goal 3 'Good Health and Well-Being'.
- CSL: one of the largest companies in the global blood plasma products industry whose treatments address rare, mostly chronic conditions such as immune and blood clotting disorders. 65% of revenue aligned with UN Sustainable Development Goal 1 - 'No Poverty' and UN Sustainable Development Goal 3 'Good Health and Well-Being'.
- Roche: global pharmaceuticals and diagnostics business with a world leading oncology franchise. 45% of revenue aligned with UN Sustainable Development Goal 1 - 'No Poverty' and UN Sustainable Development Goal 3 'Good Health and Well-Being'.

There were no SFDR Sustainable Investments with an environmental objective.

HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

The Sub-Fund's SFDR Sustainable Investments that met the minimum revenue threshold, as previously described, were then screened against a number of principal adverse impacts (PAIs) indicators for 'do no significant harm' (DNSH).

HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS **TAKEN INTO ACCOUNT?**

The following mandatory indicators in Table 1 of Annex I of the SFDR regulatory technical standards (RTS) and any relevant indicators (on a sector-by-sector basis) from Tables 2 and 3 of Annex I of the RTS were taken into account as follows during the Reference Period:

- Relevant indicators in Table 1 of Annex I of the RTS:
- 1. Greenhouse gas emissions: Scope 1, 2 and 3
- Greenhouse gas intensity of investee companies: Scope 1, 2 and 3
- 4. Exposure to companies active in the fossil fuel sector
- 5. Share of non-renewable energy consumption and production
- 6. Energy consumption intensity per high impact climate sector
- 7. Activities negatively affecting biodiversity-sensitive areas
- 8. Emissions to water
- 9. Hazardous waste and radioactive waste ratio
- 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 12. Unadjusted gender pay gap
- 13. Board gender diversity

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons)

The Sub-Fund considered all mandatory indicators included in Table 1 of Annex I of the RTS with the exception of PAI 2, carbon footprint. For the DNSH assessment, the PAIs are required to be considered at company level. PAI 1 was converted to an intensity measure rather than an absolute number for this analysis. This was because the original PAI was designed for portfolio level consideration, rather than use at the company level, but the analysis for DNSH must be at the company level. PAI 2 is not considered separately as, having converted PAI 1 to an intensity measure, it would simply repeat the same information covered in PAIs 1 and 3.

- Relevant indicators in Table 2 of Annex I of the RTS:
- Investments in companies without carbon emission reduction initiatives
- 8. Exposure to areas of high water stress
- Indicators in Table 3 of Annex I of the RTS:
- 4. Lack of a supplier code of conduct
- 6. Insufficient whistle-blower protection
- Incidents of discrimination
- 9. Lack of a human rights policy
- 14. Number of identified cases of severe human rights issues and incidents
- 15. Lack of anti-corruption and anti-bribery policies

Each indicator was either considered versus a sector median or absolute threshold for all companies that met the percentage revenue threshold to qualify as a SFDR Sustainable Investment.

For quantitative indicators, a flag was raised if the designated threshold for sector median was surpassed. In such instances, further analysis was undertaken to determine whether the investment did no significant harm and therefore was in fact a SFDR Sustainable Investment. Across the four securities which qualified as SFDR Sustainable Investments, there were nine flags as at the end of the Reference Period, seven of which related to data gaps, while the remaining two flags related to surpassing the sector median. Specifically, these flags were for: PAI 1: Greenhouse gas emissions: Scope 1, 2 and 3, and PAI 3: Greenhouse gas intensity of investee companies: Scope 1, 2 and 3.

For other indicators, a flag was raised for a below threshold response. In such instances, further analysis was undertaken to determine whether the investment did no significant harm and therefore was in fact a SFDR Sustainable Investment. Across the four securities which qualified as SFDR Sustainable Investments, there were four flags as at the end of the Reference Period. Specifically, these flags were for: PAI 10: Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises; PAI 8: Emissions to water; Additional Social; and PAI 4: Lack of a supplier code of conduct.

For all indicators (qualitative and otherwise), if the data was not available from the Investment Manager's third-party data provider, steps were taken by the Investment Manager to either source the required information or contact the investee company. If the company did not report that data point, then proxy or alternative contextual information was used.

In all cases where flags were raised, following further analysis it was concluded that there was no significant harm to any environmental or social sustainable investment objective and therefore the companies qualified as SFDR Sustainable Investments.

WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND **HUMAN RIGHTS?**

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights (the "Responsible Business Practices") collectively cover a very broad range of areas of responsible business, encompassing everything from labour rights to consumer protection to support for internationally recognised human rights within a company's or issuer's sphere of influence.

The Sub-Fund's SFDR Sustainable Investments were considered aligned with the Responsible Business Practices as no flags were raised in relation to the specific human rights, labour, controversy, and tax compliance screens which either (i) directly cover one or more of the Responsible Business Practices; or (ii) are considered an appropriate proxy for one or more of the Responsible Business Practices.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

In accordance with Article 7 of SFDR, the adverse impacts of investment decisions on sustainability factors were considered in line with the PAI regime for this Sub-Fund from the perspective of the harm that investment positions might do externally to sustainability factors. The Sub-Fund considered seven of the mandatory indicators included in Table 1 of Annex I of the RTS at a portfolio level. Those were:

- PAI 2: Carbon footprint
- PAI 3: Greenhouse gas intensity of investee companies
- PAI 4: Exposure to companies active in the fossil fuel sector
- PAI 7: Activities negatively affecting biodiversity-sensitive areas
- PAI 10: Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 13: Board gender diversity
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons)

Thresholds were set against each indicator at an aggregate portfolio level. The approach to 'consider the PAIs' has been for the Investment Manager to apply the reasonable thresholds, above which it could be considered that the Sub-Fund has a 'material adverse impact' against any of the criteria listed above. The Sub-Fund was reviewed against these thresholds internally on a quarterly basis, as well as upon each purchase of a new company. When compared, none of these thresholds were exceeded.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2024 to 31 December 2024

| More important investments | Sector | % of assets | Country | |
|--|---|-------------|---------------|--|
| TAIWAN SEMICONDUCTOR MFG | Information technology - Semiconductors & Semiconductor Equipment | 4.14% | Taiwan | |
| Microsoft Corporation | Information technology - Software & Services | 3.76% | United States | |
| Alphabet | Communication services - Media & Entertainment | 3.21% | United States | |
| Mastercard | Financials - Financial Services | 3.19% | United States | |
| Amphenol | Information technology - Technology Hardware & Equipment | 3.08% | United States | |
| Novo Nordisk | Health care - Pharmaceuticals Biotechnology & Life Sciences | 2.76% | Denmark | |
| Linde | Materials - Materials | 2.72% | United States | |
| Moody's Corp | Financials - Financial Services | 2.41% | United States | |
| Texas Instruments | Information technology - Semiconductors & Semiconductor Equipment | 2.35% | United States | |
| Fortinet | Information technology - Software & Services | 2.31% | United States | |
| Automatic Data Processing Industrials - Commercial & Professional Services | | 2.31% | United States | |

| More important investments | Sector | % of assets | Country |
|----------------------------|--|-------------|---------------|
| Keyence | Health care - Pharmaceuticals Biotechnology & Life Sciences | 2.29% | Japan |
| Booking Holdings | Consumer discretionary - Consumer Services | 2.28% | United States |
| ResMed | sMed Health care - Health Care Equipment & Services | | United States |
| TJX Companies | Consumer discretionary - Consumer Discretionary Distribution & Retail | 2.25% | United States |

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

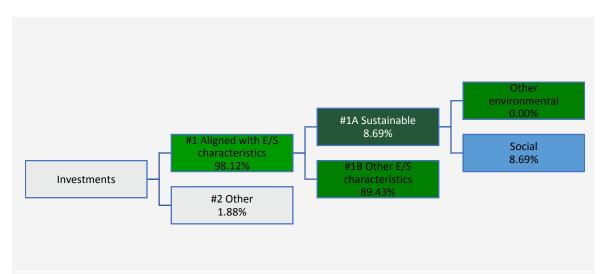

WHAT WAS THE ASSET ALLOCATION?

As at 31 December 2024, the asset allocation of the Sub-Fund was as shown in the diagram. This differs from the asset allocation diagram in the pre-contractual disclosure (Annex II) as this was intended to illustrate the planned asset allocation of the Sub-Fund and reflected the minimum investments referred to in that Annex.

As at 31 December 2024, 98.12% of the Net Asset Value of this Sub-Fund was invested in Equity and Equity-Related Securities that met the Investment Manager's "ESG Criteria" at the time of purchase and on an ongoing basis. The remainder of the Sub-Fund was invested in cash which, for the avoidance of doubt, is not required to meet the ESG Criteria.

The Sub-Fund met its commitment to investing a minimum of 5% of Net Asset Value in SFDR Sustainable Investments which contribute to an environmental or social objective. As at 31 December 2024, 8.69% of the Sub-Fund's Net Asset Value was invested in SFDR Sustainable Investments.

The asset allocation between environmental and social objectives is not fixed and as such, the Sub-Fund does not commit to invest a minimum percentage of Net Asset Value in SFDR Sustainable Investments which have specifically contributed to either an environmental objective or social objective. As at 31 December 2024, 0.00% of the Sub-Fund's Net Asset Value was in SFDR Sustainable Investments with an environmental objective and 8.69% of the Sub-Fund's Net Asset Value was in SFDR Sustainable Investments with a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

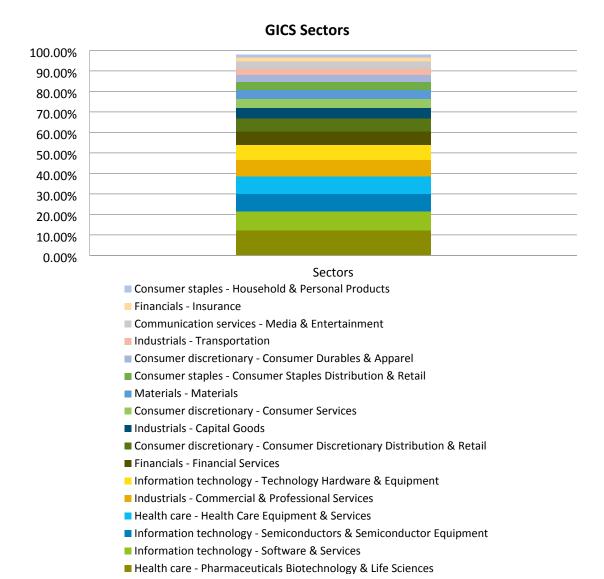

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?

As at 31 December 2024, the Sub-Fund's investments were in the following economic sectors:

✓ No

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There were no SFDR Sustainable Investments with an environmental objective, and therefore no SFDR Sustainable Investments aligned with the EU Taxonomy.

| DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY |
|--|
| RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY 1? |
| ☐ Yes: |
| ☐ In fossil gas ☐ In nuclear energy |

include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste

management rules.

To comply with the EU Taxonomy, the criteria for fossil gas

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

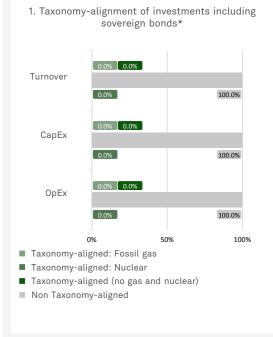

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

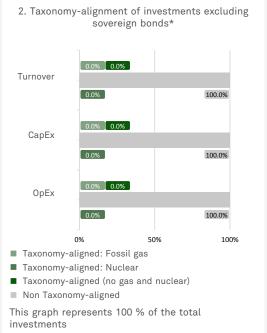

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

ire sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures
- WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND **ENABLING ACTIVITIES?**

0%

HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?

In the prior reference period, one investee company was identified as having EU Taxonomy eligible and aligned revenue, OpEx and CapEx. This holding was sold to nil in 2024. Thus, within the Reference Period (i) Aligned Portfolio Turnover decreased from 1.14% to 0.00%; (ii) Aligned Portfolio Operating Expenditure decreased from 0.82% to 0.00%; and (iii) Aligned Portfolio Capital Expenditure decreased from 1.12% to 0.00%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

There were no SFDR Sustainable Investments with an environmental objective, and therefore no SFDR Sustainable Investments aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

While the Sub-Fund does not have a commitment to investing a minimum percentage of Net Asset Value in socially sustainable investments, as at 31 December 2024 the Sub-Fund invested 8.69% of Net Asset Value in SFDR Sustainable Investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

As at 31 December 2024, the Sub-Fund held 1.88% of Net Asset Value in cash held as ancillary liquidity. There are no minimum environmental or social safeguards associated with these investments

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In summary, the actions taken to meet the environmental and/or social characteristics during the Reference Period were:

- Adherence to the Investment Manager's investment process in terms of stock selection and portfolio construction.
- Each potential investment idea was subject to a broad assessment incorporating relevant and material issues using a consistent framework – a materiality-based assessment of ESG factors.
- ESG data points and controversies screening were sourced from the Investment Manager's third-party data provider.
- Review of sustainable investment assessment, performance of Sustainability Indicators and portfolio level assessment against relevant PAIs by an internal governance forum, the Additional Objectives Portfolios Group.
- The environmental and social characteristics promoted by the Sub-Fund were monitored daily via the exclusions list detailed in the binding elements of the Sub-Fund's investment strategy.
- Due diligence carried out on the underlying assets of the Sub-Fund spanned the processes from generation of a potential investment idea to portfolio construction. The Additional Objectives Portfolios Group assessed potential investment ideas for suitability for inclusion in the Sub-Fund and provides a recommendation to the Investment Executive. The Investment Executive has overall responsibility for the composition of the Sub-Fund.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

- HOW DOES THE REFERENCE BENCHMARK DIFFER FROM A BROAD MARKET INDEX? Not applicable.
- HOW DID THIS FINANCIAL PRODUCT PERFORM WITH REGARD TO THE SUSTAINABILITY INDICATORS TO DETERMINE THE ALIGNMENT OF THE REFERENCE BENCHMARK WITH THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED?

Not applicable.

HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE REFERENCE **BENCHMARK?**

A reference benchmark has not been designated for the purpose of attaining the environmental and/ or social characteristics promoted by the Sub-Fund.

HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE BROAD MARKET INDEX?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: BNY Mellon Mobility Innovation Fund Legal entity identifier: 2138000BBVFZ8TN6N134

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Sub-Fund were met to the following extent during the reference period 1 January 2024 to 31 December 2024 (the "Reference Period").

The environmental and/or social characteristics promoted were:

- Investment in companies that align with the Investment Manager's proprietary carbon red line
- Avoid investment in companies that have material unresolvable issues relating to human rights, labour, the environment, and corruption
- Investment in companies proactively seeking to manage social and environmental factors well
- Improved environmental outcomes and other societal benefits, potentially provided by companies that are focused on innovation in transportation and related technologies.

All of the above characteristics were met by the Sub-Fund during the reference period.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The SFDR Sustainable Investments underlying this Sub- Fund did not contribute to the environmental objectives set out in Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments underlying this Sub- Fund contributed to the following environmental objectives not aligned with the EU Taxonomy:

- Contribution to the transition to a net zero world
- Electrification

The SFDR Sustainable Investments underlying this Sub-Fund contributed to the following social objectives:

- Improved digital infrastructure and connectivity that can have implications for transportation and its systems
- Improved infrastructure and products contributing to safer driving
- Contribution to social objectives as a result of investee companies' internal business practices and successful management of competing interests of key stakeholder groups.

HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The following sustainability indicators are used to measure how the environmental or social characteristics promoted by the Sub-Fund are attained:

Sustainability Indicator #1 - No more than 5% of Net Asset Value in companies that:

- Are in the following sectors as defined by the Global Industry Classification Standard (GICS): materials, industrials, utilities, and energy; and
- Have a business incompatible with a scenario in which global temperatures rise more than 2 degrees Celsius above pre-industrial levels, as determined by the Investment Manager's proprietary framework; and
- Do not have an adequate strategy to address emissions / climate change, or a credible transition plan, as determined by the Investment Manager's proprietary framework.

In addition, where third party data is not available to assess these criteria or indicates that specific companies meet these criteria, the Investment Manager retains discretion to determine alignment with this sustainability indicator solely on the basis of its qualitative review process.

Sustainability Indicator #2 - 0% of Net Asset Value in investee companies that have been involved in violations of the UNGC principles.

Sustainability Indicator #3 - A weighted average ESG risk rating of 'medium' or better at the portfolio level. Such rating to be determined using third party data.

Sustainability Indicator #4 - All companies invested in by the Sub-Fund to align to the Investment Manager's proprietary CASE framework. This framework identifies which of the following theme(s) a company aligns to:

- Connectivity, which covers sub-themes including cloud storage, and high-speed data towers
- Autonomous Vehicles, which covers sub-themes including advanced driver assistance systems, and next generation auto parts
- Sharing, which covers sub-themes including ride hailing technology
- Electrification, which covers sub-themes including EV infrastructure, smart grid, and battery technology

Excluding instruments held for liquidity and hedging purposes, the data coverage for the sustainability indicators was as follows:

Sustainability indicators #1 and #2 - 100% of the Sub-Fund.

Sustainability indicator #3 - 97% of the Sub-Fund.

Sustainability indicator #4 - 100% of the Sub-Fund.

No derivatives (FDI) were used to meet the environmental or social characteristics.

The sustainability indicators performed as follows:

| Indicator # | How did the indicator perform in the reference period? | | |
|-----------------------------|---|--|--|
| Sustainability Indicator #1 | 0% | | |
| Sustainability Indicator #2 | 0% | | |
| Sustainability Indicator #3 | Low – on a weighted average basis, the Sub-Fund was deemed by a third-party data provider to have a low level of unmanaged ESG risks. | | |
| Sustainability Indicator #4 | 100% of investments (excluding those held for liquidity and hedging purposes) | | |

...AND COMPARED TO PREVIOUS PERIODS?

| Reference period | Sustainability Indicator #1 | Sustainability Indicator #2 | Sustainability Indicator #3 | Sustainability Indicator #4 |
|--|--------------------------------|--------------------------------|--------------------------------|---|
| 31 December 2023 – 31 December 2024 | 0% | 0% | Low | 100% of investments (ex- cluding those held for liquidity and hedging purposes) |
| 31 December 2022 – 31 December 2023 | 0% | 0% | Low | 100% of investments (ex- cluding those held for liquidity and hedging purposes) |

WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

The social objectives of the SFDR Sustainable Investments the Sub-Fund partially made are included above.

The SFDR Sustainable Investments contributed to the above social objectives in the following ways:

- Production of components used in systems that contribute to or enable enhanced vehicle safety
- Creation of products that enable a better and wider connected digital world.

The SFDR Sustainable Investments underlying this Sub-Fund contributed to environmental objectives not aligned with Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments underlying this Sub-Fund contributed to the following environmental objectives not aligned with the EU Taxonomy:

- Contribution to the transition to a net zero world
- Electrification

The SFDR Sustainable Investments contributed to environmental objectives not aligned with the EU Taxonomy in the following ways:

Electrification, or the enabling of, batteries and transport, contributing to reduced emissions

Contributing to the transition towards a net zero world through efficiency, green technology, and reduced car usage.

HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

The Investment Manager determined that SFDR Sustainable Investments in the Sub-Fund did no significant harm to any environmental or social objectives by assessing each SFDR Sustainable Investment's involvement in areas deemed to be harmful from an environmental or social perspective. Issuers that had involvement in activities deemed to be harmful from an environmental or social perspective were excluded from investment. Involvement in such activities was monitored on an ongoing basis.

HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS **TAKEN INTO ACCOUNT?**

The Investment Manager reviewed the indicators for adverse impacts on sustainability factors for all SFDR Sustainable Investments where data was available. The Investment Manager reviewed PAIs for investee issuers using data from a designated third party data provider. If a given PAI or PAIs for an issuer appeared to exceed expectations based on the data obtained from the designated third-party data provider, further qualitative review was undertaken with respect to those issuer(s) and that product in order to determine whether such data indicated the evidence of significant harm. Where there were data gaps and the PAI was considered material for a company's sector, the Investment Manager's internal qualitative assessment was used to assess the PAIs.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The Sub-Fund took into account the following PAIs from:

- Table 1 of Annex I of the Commission Delegated Regulation:
- GHG emissions: Scope 1, 2 and 3 1.
- 2. Carbon footprint: Scope 1, 2 and 3
- GHG intensity of investee companies: Scope 1, 2 and 3 3.
- 4. Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- 6. Energy consumption intensity per high impact climate sector: NACE A, B, C, D, E, F, G, H and L
- 7. Activities negatively affecting biodiversity-sensitive areas
- 8. Emissions to water
- 9. Hazardous waste and radioactive waste ratio
- 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 12. Unadjusted gender pay gap
- 13. Board gender diversity
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).
- Table 2 of Annex I of the Commission Delegated Regulation: 4. Investments in companies without carbon emission reduction initiatives
- Table 3 of Annex I of the Commission Delegated Regulation: 9. Lack of a human rights policy. 17. Number of convictions and amount of fines for violation of anti-corruption and anti-bribery

WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND **HUMAN RIGHTS?**

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights (the "Responsible Business Practices") collectively cover a very broad range of areas of responsible business, encompassing everything from labour rights to consumer protection to support for internationally recognised human rights within a company's or issuer's sphere of influence.

SFDR Sustainable Investments were considered aligned with the Responsible Business Practices as each company invested in passed screens provided by third parties which either directly cover one or more of the Responsible Business Practices or are considered appropriate proxies for one or more of the Responsible Business Practices. Each company invested in also passed the Investment Manager's own qualitative review process which takes into account the Responsible Business Practices. In addition, where the companies invested in do not pass the relevant screens provided by third parties, the Investment Manager retains discretion to establish alignment with the Responsible Business Practices solely on the basis of its qualitative review process.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager reviewed principal adverse impacts at the product level on a frequent basis during the reference period, notwithstanding certain data coverage and data quality issues as further described below. The Investment Manager reviewed PAIs for investee issuers using data from a designated third party data provider. If a given PAI or PAIs for an issuer or product appeared to exceed expectations based on the data obtained from the designated third-party data provider, further qualitative review was undertaken with respect to those issuer(s) and that product in order to determine whether such data indicated the evidence of significant harm. In cases where, in the view of the Investment Manager, unresolvable significant harm was identified following further qualitative review, further action would be taken up to and including divestment. Over the course of the reference period no unresolvable significant harm was identified for investments in the Sub-Fund. Where there were data gaps and the PAI was considered material for a company's sector, the Investment Manager's internal qualitative assessment was used to assess the PAIs.

PAIs were categorised based on their characteristics (including their materiality and the Investment Manager's ability to estimate them), and such categories were used for the purpose of determining the actions and outcome when assessing the PAIs.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider principal adverse impacts on sustainability factors. The availability and quality of such data impacted the extent to which each such PAI could be considered. In particular, the lack or incomplete reporting of metrics by some issuers meant that there was limited data on some adverse indicators. As such for some of the mandatory PAIs, data coverage was low. The Investment Manager's analysis of adverse indicators relied on this third-party information and data, and where such information was not available or was incomplete, the Investment Manager's analysis of adverse indicators was necessarily limited. As the data availability improves over time, it is expected that PAIs can be applied to a greater portion of the Investment Manager's investable universe. This will allow for enhanced insight into the adverse impacts caused by issuers.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 . January 2024 to 31 December 2024

| Largest investments | Sector | % of assets | Country |
|---------------------------|------------------------|-------------|---------|

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

WHAT WAS THE ASSET ALLOCATION?

The asset allocation diagram illustrates the asset allocation of this Sub-Fund. 98.86% of Net Asset Value was used to meet the environmental or social characteristics promoted by the Sub-Fund in accordance with the binding elements of the investment strategy. The Sub-Fund invested 90.79% of Net Asset Value in SFDR Sustainable Investments of which 83.34% had an environmental objective not aligned with the EU Taxonomy and 6.16% had a social objective. 1.29% of the Net Asset Value of the Sub-Fund was invested in sustainable investments with an environmental objective aligned with the EU Taxonomy.

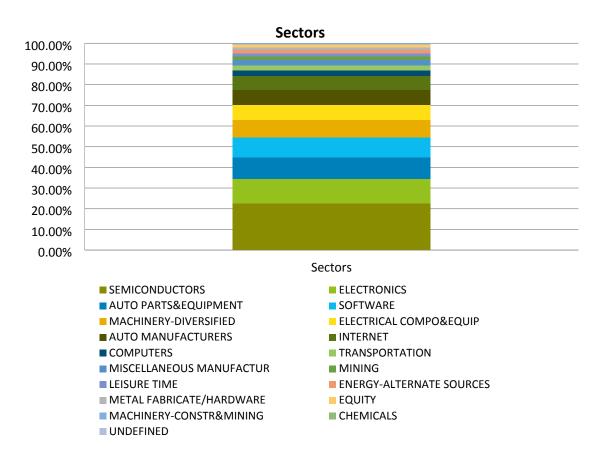

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?

The above figures are provided as at 31 December 2024 only and do not necessarily reflect the position as at other points during the Reference Period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

1.29% of the Net Asset Value of the Sub-Fund was invested in SFDR Sustainable Investments with environmental objectives were aligned with the EU Taxonomy.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

The assessment of whether these investments complied with the EU Criteria for Environmentally Sustainable Economic Activities was not subject to an assurance provided by one or more auditors or a review by one or more third parties.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

| DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY |
|--|
| RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY 1? |
| ☐ Yes: |

☐ In fossil gas ☐ In nuclear energy

✓ No

Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

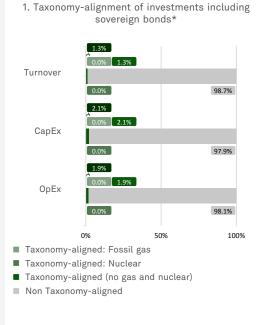

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

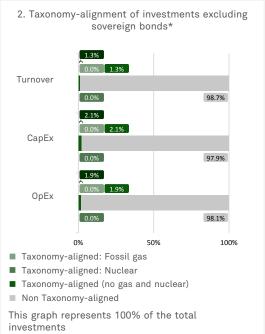

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

ire sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures
- WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND **ENABLING ACTIVITIES?**

Enabling activities: 1.17% (turnover)

Transitional activities: 0.00%

HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?

The percentage of investments that were aligned with the EU Taxonomy marginally increased compared to the previous reference period. This was due to improvements in the availability of data that was reported by investee companies as opposed to estimated by third-party data providers.

The Sub-Fund invested 83.34% of NAV in SFDR Sustainable Investments with an environmental objective not aligned with the EU Taxonomy.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

What was the share of socially sustainable investments?

While the Sub-Fund does not commit to investing a minimum percentage of its Net Asset Value in socially sustainable investments, the Sub-Fund invested 6.16% of its Net Asset Value in SFDR Sustainable Investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Sub-Fund invested 1.14% of Net Asset Value in category #2 (other) which comprised of:

1.14% in cash held for liquidity purposes only. These instruments were not subject to environmental or social safeguards as the Investment Manager does not view environmental or social considerations as relevant for these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In order to meet the environmental and social characteristics, the Investment Manager took the following actions:

- Invested at least 20% of its Net Asset Value in SFDR Sustainable Investments
- Excluded issuers that produce tobacco products
- Excluded issuers that derive more than 10% of turnover from the sale of tobacco
- Excluded issuers that generate revenues from the production of controversial weapons
- Excluded issuers in breach of the Principles of the UN Global Compact (which includes principles relating to human rights, labour, environment and anti-corruption)
- Invested at least 90% of the Net Asset Value of the Sub-Fund net of the Sub-Fund's exposure to cash and liquid near cash assets, money market funds, and currency related FDI and FDI used for hedging purposes (the "Non-ESG Assets")) in companies that meet the Investment Manager's ESG and sustainability criteria at time of purchase and on an ongoing basis.
- Invested at least 80% of the Net Asset Value of the Sub-Fund in Mobility Innovation Companies. Mobility Innovation Companies include automobile manufacturers, component suppliers and automobile technology providers that focus on innovation in transportation relating to use, control and power such as enhanced infrastructure and data processing capabilities, clean energy production, the safety implications of advanced driver-assistance systems, and the companies which make use of or enable such mobility innovations.

Engagement is not a part of the environmental or social investment strategy of the Sub-Fund. However, engagement is an integral part of the Investment Manager's approach to investing as they believe that constructive dialogue with management teams not only affords real insight into how a company operates, it is an opportunity to advocate for positive change.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

- HOW DOES THE REFERENCE BENCHMARK DIFFER FROM A BROAD MARKET INDEX? Not applicable.
- HOW DID THIS FINANCIAL PRODUCT PERFORM WITH REGARD TO THE SUSTAINABILITY INDICATORS TO DETERMINE THE ALIGNMENT OF THE REFERENCE BENCHMARK WITH THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED?

Not applicable.

HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE REFERENCE **BENCHMARK?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE BROAD MARKET **INDEX?**

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: BNY Mellon Sustainable Global Dynamic Bond Fund

Legal entity identifier: 2138003QS1W6U007GI98

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852. establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Sub-Fund were met to the following extent during the reference period 1 January 2024 to 31 December 2024 (the "Reference Period").

The environmental and/or social characteristics promoted were:

- Investment in companies that align with the Investment Manager's proprietary carbon red line
- Avoid investment in companies that have material unresolvable issues relating to human rights, labour, the environment, and corruption
- Investment in companies proactively seeking to manage social and environmental factors well
- Investment in sovereign issuers proactively seeking to manage social and environmental factors well

Characteristics relating to investing in companies that align with the Investment Manager's proprietary carbon red line; investing in companies proactively seeking to manage social and environmental factors well; and investing in sovereign issuers proactively seeking to manage social and environmental factors well, were met by the Sub-Fund during the reference period.

The SFDR Sustainable Investments underlying this Sub- Fund did not contribute to the environmental objectives set out in Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments underlying this Sub- Fund contributed to the following environmental objectives not aligned with the EU Taxonomy:

- Contributing to the transition to a net zero world
- Circular economy and recycling

The SFDR Sustainable Investments underlying this Sub-Fund contributed to the following social objectives:

- Access to financial products and services
- Connectivity and digital access
- Financial protection
- Access to housing

HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The following sustainability indicators are used to measure how the environmental or social characteristics promoted by the Sub-Fund are attained:

Sustainability Indicator #1 - No more than 5% of Net Asset Value in companies that:

- Are in the following sectors as defined by the Global Industry Classification Standard (GICS): materials, industrials, utilities, and energy; and
- Have a business incompatible with a scenario in which global temperatures rise more than 2 degrees Celsius above pre-industrial levels, as determined by the Investment Manager's proprietary framework; and
- Do not have an adequate strategy to address emissions / climate change, or a credible transition plan, as determined by the Investment Manager's proprietary framework.

In addition, where third party data is not available to assess these criteria or indicates that specific companies meet these criteria, the Investment Manager retains discretion to determine alignment with this sustainability indicator solely on the basis of its qualitative review process.

Sustainability Indicator #2 - 0% of Net Asset Value in investee companies that have been involved in violations of the UNGC principles.

Sustainability Indicator #3 - A weighted average ESG risk rating of 'medium' or better at the portfolio level. Such rating to be determined using third party data.

Sustainability Indicator #4 - All investments in sovereign issuers to have either strong current positioning, and/or are demonstrating progress in respect of the management of environmental, social and governance factors, as determined by the Investment Manager's proprietary sovereign sustainable framework.

The data coverage for sustainability indicators #1 and #2 was 100% (by weight) of the Sub-Fund's corporate investments (excluding sovereign issuers, FDI, cash and cash equivalents).

The data coverage for sustainability indicator #3 was 40% (by weight) of the Sub-Fund's investments.

The data coverage for sustainability indicator #4 was 100% (by weight) of sovereign issuers held by the Sub-Fund.

No derivatives (FDI) were used to meet the environmental or social characteristics.

The sustainability indicators performed as follows:

| Indicator # | How did the indicator perform in the reference period? |
|-----------------------------|--|
| Sustainability Indicator #1 | 0% |
| Sustainability Indicator #2 | 0% |
| Sustainability Indicator #3 | Low |
| Sustainability Indicator #4 | 100% |

...AND COMPARED TO PREVIOUS PERIODS?

| Reference period | Sustainability Indicator #1 | Sustainability Indicator #2 | Sustainability Indicator #3 | Sustainability Indicator #4 |
|--|-----------------------------|-----------------------------|-----------------------------|-----------------------------|
| 31 December 2023 - 31 December 2024 | 0% | 0% | Low | 100% |
| 31 December 2022 - 31 December 2023 | 0% | 0% | Low | 100% |

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

The social objectives of the SFDR Sustainable Investments the Sub-Fund partially made are included above.

The SFDR Sustainable Investments contributed to the above social objectives in the following ways:

- Facilitating access to financial products that contribute to financial safety and wellbeing
- Provision of social housing to underserved sections of society
- Provision of technology solutions to the life sciences industry that enable and accelerate clinical development of medical treatments for rare diseases
- Promotion of digital infrastructure in emerging markets

The SFDR Sustainable Investments underlying this Sub-Fund contributed to environmental objectives not aligned with Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments underlying this Sub-Fund contributed to the following environmental objectives not aligned with Article 9 of the EU Taxonomy Regulation:

- Contributing to the transition to a net zero world
- Circular economy and recycling

The sustainable investments contributed to these environmental objectives in the following ways:

- Promoting green finance instruments (green mortgages) and leveraging instruments like green bonds to onward finance low-carbon assets.
- Improving water quality and controlling levels of wastage.
- Establishment of policies, programmes and targets to reduce emissions and control waste within own operations
- Setting net zero targets to reducing financed emissions by reducing exposures to fossil fuel financing
- Provision of packaging solutions that provide a more easily recyclable alternative to plastics, and target for 100% recyclability in all products.
- Reduction in GHG emissions and implementation of a climate-change strategy to capitalise on opportunities in low-carbon transportation

HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

The Investment Manager determined that SFDR Sustainable Investments in the Sub-Fund did no significant harm to any environmental or social objectives by assessing each SFDR Sustainable Investment's involvement in areas deemed to be harmful from an environmental or social perspective. Issuers that had involvement in activities deemed to be harmful from an environmental or social perspective were excluded from investment. Involvement in such activities was monitored on an ongoing basis.

HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS TAKEN INTO ACCOUNT?

The Investment Manager reviewed the indicators for adverse impacts on sustainability factors for all SFDR Sustainable Investments where data was available. The Investment Manager reviewed PAIs for investee issuers using data from a designated third party data provider. If a given PAI or PAIs for an issuer appeared to exceed expectations based on the data obtained from the designated third-party data provider, further qualitative review was undertaken with respect to those issuer(s) and that product in order to determine whether such data indicated the evidence of significant harm. Where there were data gaps and the PAI was considered material for a company's sector, the Investment Manager's internal qualitative assessment was used to assess the PAIs.

The Sub-Fund took into account the following PAIs from:

- Table 1 of Annex I of the Commission Delegated Regulation:
- 1. GHG emissions: Scope 1, 2 and 3
- 2. Carbon footprint: Scope 1, 2 and 3

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

- 3. GHG intensity of investee companies: Scope 1, 2 and 3
- 4. Exposure to companies active in the fossil fuel sector
- 5. Share of non-renewable energy consumption and production
- 6. Energy consumption intensity per high impact climate sector: NACE A, B, C, D, E, F, G, H and L
- Activities negatively affecting biodiversity-sensitive areas
- 8. Emissions to water
- 9. Hazardous waste and radioactive waste ratio
- 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 12. Unadjusted gender pay gap
- 13. Board gender diversity
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).
- Table 2 of Annex I of the Commission Delegated Regulation: 4. Investments in companies without carbon emission reduction initiatives
- Table 3 of Annex I of the Commission Delegated Regulation: 9. Lack of a human rights policy. 17. Number of convictions and amount of fines for violation of anti-corruption and anti-bribery laws. 19. Freedom of expression score. 23. Political stability score. 24. Rule of law score.

WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND **HUMAN RIGHTS?**

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights (the "Responsible Business Practices") collectively cover a very broad range of areas of responsible business, encompassing everything from labour rights to consumer protection to support for internationally recognised human rights within a company's or issuer's sphere of influence.

SFDR Sustainable Investments were considered aligned with the Responsible Business Practices as each company invested in passed screens provided by third parties which either directly cover one or more of the Responsible Business Practices or are considered appropriate proxies for one or more of the Responsible Business Practices. Each company invested in also passed the Investment Manager's own qualitative review process which takes into account the Responsible Business Practices. In addition, where the companies invested in do not pass the relevant screens provided by third parties, the Investment Manager retains discretion to establish alignment with the Responsible Business Practices solely on the basis of its qualitative review process.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager reviewed principal adverse impacts at the product level on a frequent basis during the reference period, notwithstanding certain data coverage and data quality issues as further described below. The Investment Manager reviewed PAIs for investee issuers using data from a designated third party data provider. If a given PAI or PAIs for an issuer or product appeared to exceed expectations based on the data obtained from the designated third-party data provider, further qualitative review was undertaken with respect to those issuer(s) and that product in order to determine whether

such data indicated the evidence of significant harm. Where there were data gaps and the PAI was considered material for a company's sector, the Investment Manager's internal qualitative assessment was used to assess the PAIs.

PAIs were categorised based on their characteristics (including their materiality and the Investment Manager's ability to estimate them), and such categories were used for the purpose of determining the actions and outcome when assessing the PAIs. For instance, data indicated that an investee company was in violation of the principles of the UN Global Compact (PAI #10), which resulted in divestment of that

The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider principal adverse impacts on sustainability factors. The availability and quality of such data impacted the extent to which each such PAI could be considered. In particular, the lack or incomplete reporting of metrics by some issuers meant that there was limited data on some adverse indicators. As such for some of the mandatory PAIs, data coverage was low. The Investment Manager's analysis of adverse indicators relied on this third-party information and data, and where such information was not available or was incomplete, the Investment Manager's analysis of adverse indicators was necessarily limited. As the data availability improves over time, it is expected that PAIs can be applied to a greater portion of the Investment Manager's investable universe. This will allow for enhanced insight into the adverse impacts caused by issuers.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2024 to 31 December 2024

| Largest investments | Sector | % of assets | Country |
|---------------------------|------------|-------------|---------|
| US TSY 3.5% 02/15/33 | GOVERNMENT | 3.47% | USA |

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

WHAT WAS THE ASSET ALLOCATION?

The asset allocation diagram illustrates the asset allocation of this Sub-Fund. 96.17% of Net Asset Value was used to meet the environmental or social characteristics promoted by the Sub-Fund in accordance with the binding elements of the investment strategy. The Sub-Fund invested 35.74% of Net Asset Value in SFDR Sustainable Investments of which 17.49% had an environmental objective not aligned with the EU Taxonomy and 17.08% had a social objective. 1.17% of the Net Asset Value of the Sub-Fund was invested in sustainable investments with an environmental objective aligned with the EU Taxonomy.

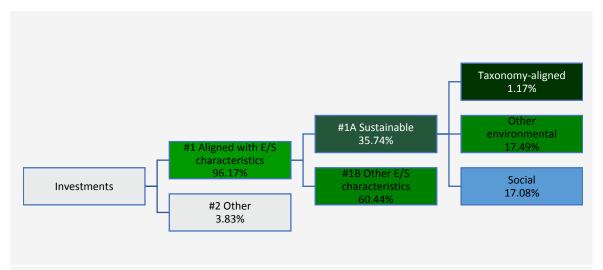

#1 Aligned with E/S characteristics: 96.17% of Net Asset Value

#1A Sustainable: 35.74% of Net Asset Value Taxonomy-aligned: 1.17% of Net Asset Value Environmental: 17.49% of Net Asset Value

Social: 17.08% of Net Asset Value

#1B Other E/S characteristics: 60.44% of Net Asset Value

#2 Other: 3.83% of Net Asset Value

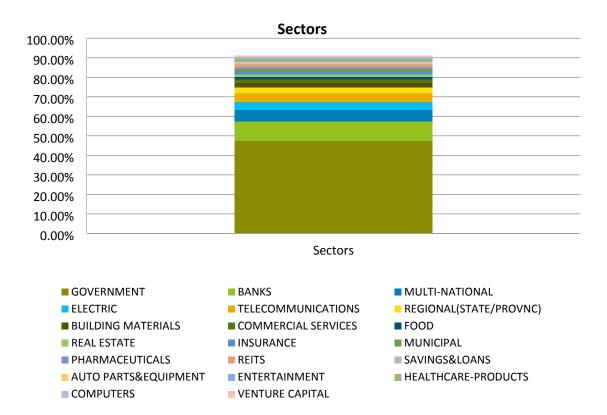

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?

The above figures are provided as at 31 December 2024 only and do not necessarily reflect the position as at other points during the Reference Period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

1.17% of the Net Asset Value of the Sub-Fund was invested in SFDR Sustainable Investments with environmental objectives aligned with the EU Taxonomy.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

The assessment of whether these investments complied with the EU Criteria for Environmentally Sustainable Economic Activities was not subject to an assurance provided by one or more auditors or a review by one or more third parties.

| To comply with the |
|--------------------------------|
| EU Taxonomy, the |
| criteria for fossil gas |
| include limitations on |
| emissions and |
| switching to fully |
| renewable power or |
| low-carbon fuels by |
| the end of 2035. For |
| nuclear energy, the |
| criteria include |
| comprehensive safety |
| and waste |
| management rules. |

| RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY 1? |
|--|
| ☐ Yes: |
| ☐ In fossil gas ☐ In nuclear energy |
| ☑ No |
| |

Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

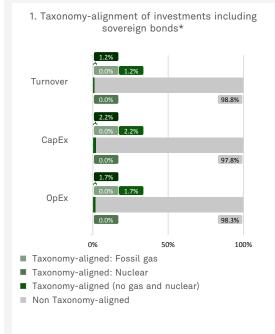

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

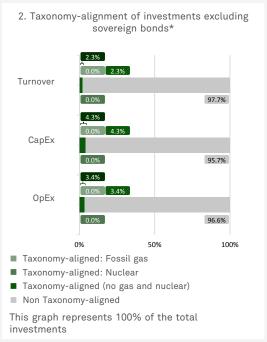

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

ire sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures
- WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND **ENABLING ACTIVITIES?**

Enabling activities: 0.27% (turnover)

Transitional activities: 0.00%

HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?

The percentage of investments that were aligned with the EU Taxonomy marginally increased compared to the previous reference period. This was due to improvements in the availability of data that was reported by companies as opposed to estimated by thirdparty data providers.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund invested 17.49% of NAV in SFDR Sustainable Investments with an environmental objective not aligned with the EU Taxonomy.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

What was the share of socially sustainable investments?

While the Sub-Fund does not commit to investing a minimum percentage of its Net Asset Value in socially sustainable investments, the Sub-Fund invested 17.08% of its Net Asset Value in SFDR Sustainable Investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Sub-Fund invested 3.83% of Net Asset Value in category #2 (other) which comprised of FDI, liquidity and hedging instruments only, including cash, cash equivalents, currency positions, currency related FDI and FDI used for hedging purposes. These instruments were held to either (a) ensure the Sub-Fund had sufficient liquidity; and/or (b) hedge against potential currency movements. These instruments were not subject to environmental or social safeguards as the Investment Manager does not view environmental or social considerations as relevant for these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In order to meet the environmental and social characteristics, the Investment Manager took the following actions:

- Invested at least 10% of the Sub-Fund's Net Asset Value in SFDR Sustainable Investments
- Excluded issuers that produce tobacco products
- Excluded issuers that derive more than 10% of turnover from the sale of tobacco
- Excluded issuers that generate revenues from the production of controversial weapons
- Excluded issuers in breach of the Principles of the UN Global Compact (which includes principles relating to human rights, labour, environment and anti-corruption).
- Invested at least 90% of the Net Asset Value of the Sub-Fund net of the Sub-Fund's exposure to cash and liquid near cash assets, money market funds, and currency related FDI and FDI used for hedging purposes (the "Non-ESG Assets") in companies that meet the Investment Manager's ESG and sustainability criteria at time of purchase and on an ongoing basis.

Engagement is not a part of the environmental or social investment strategy of the Sub-Fund. However, engagement is an integral part of the Investment Manager's approach to investing as they believe that constructive dialogue with management teams not only affords real insight into how a company operates, it is an opportunity to advocate for positive change.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics

that they promote.

- HOW DOES THE REFERENCE BENCHMARK DIFFER FROM A BROAD MARKET INDEX? Not applicable.
- HOW DID THIS FINANCIAL PRODUCT PERFORM WITH REGARD TO THE SUSTAINABILITY INDICATORS TO DETERMINE THE ALIGNMENT OF THE REFERENCE BENCHMARK WITH THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED?

Not applicable.

HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE REFERENCE **BENCHMARK?**

Not applicable.

HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE BROAD MARKET **INDEX?**

Not applicable.

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: BNY Mellon Sustainable Global Emerging Markets Fund

Legal entity identifier: 213800C4HLF07W5C5209

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objective of the Sub-Fund was met to the following extent during the reference period 1 January 2024 to 31 December 2024 (the "Reference Period"):

The Sub-Fund aims to achieve long-term capital growth and has a sustainable investment objective. Specifically, the Sub-Fund aims to contribute to social and environmental objectives by investing in securities of emerging market companies that demonstrate attractive investment attributes and support sustainable development. With the exception of instruments held for liquidity and hedging purposes, the Sub-Fund invested exclusively in SFDR Sustainable Investments over the course of the reference period. The SFDR Sustainable Investments contributed to the sustainable investment objective by supporting sustainable development through contributing to the UN Sustainable Development Goals (UN SDGs).

The SFDR Sustainable Investments underlying this Sub-Fund did not contribute to the environmental objectives set out in Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments underlying this Sub-Fund contributed to environmental objectives not aligned with Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments underlying this Sub-Fund contributed to the following environmental objectives not aligned with the EU Taxonomy:

- SDG #7: Affordable and Clean Energy
- SDG #9: Industry, Innovation and Infrastructure
- SDG #11: Sustainable Cities and Communities
- SDG #13: Climate Action

The SFDR Sustainable Investments underlying this Sub-Fund contributed to the following social objectives:

- SDG #2: Zero Hunger
- SDG #3: Good Health & Wellbeing
- SDG #4: Quality Education
- SDG #5: Gender Equality
- SDG #6: Clean Water and Sanitation
- SDG #7: Affordable and Clean Energy
- SDG #8: Decent Work and Economic Growth
- SDG #9: Industry, Innovation and Infrastructure
- SDG #10: Reduced Inequality
- SDG #11: Sustainable Cities and Communities
- SDG #12: Responsible Consumption and Production

HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The following sustainability indicators are used to measure how the sustainable investment objective of the Sub-Fund was attained:

Sustainability Indicator #1: No more than 5% of Net Asset Value in companies that:

- Are in the following sectors as defined by the Global Industry Classification Standard (GICS): materials, industrials, utilities, and energy; and
- Have a business incompatible with a scenario in which global temperatures rise more than 2 degrees Celsius above pre-industrial levels, as determined by the Investment Manager's proprietary framework; and
- Do not have an adequate strategy to address emissions / climate change, or a credible transition plan, as determined by the Investment Manager's proprietary framework.

In addition, where third party data is not available to assess these criteria or indicates that specific companies meet these criteria, the Investment Manager retains discretion to determine alignment with this sustainability indicator solely on the basis of its qualitative review process.

Sustainability Indicator #2: 0% of Net Asset Value in investee companies that have been involved in violations of the UNGC principles.

Sustainability Indicator #3: A weighted average ESG risk rating of 'medium' or better at the portfolio level. Such rating to be determined using third party data.

Sustainability Indicator #4: All investments to demonstrate alignment to one or more of the UN SDGs, as further evidenced through qualitative case studies.

The data coverage for sustainability indicators #1 and #2 was 100% of the Sub-Fund's investments net of instruments used for FDI, liquidity and hedging purposes.

The data coverage for sustainability indicator #3 was 100% of the Sub-Fund's investments net of instruments used for FDI, liquidity and hedging purposes.

The data coverage for sustainability indicator #4 was 100% of the Sub-Fund's investments net of instruments used for FDI, liquidity and hedging purposes.

No derivatives (FDI) were used to attain the sustainable investment objective of the Sub-Fund.

The sustainability indicators performed as follows:

| Indicator # | How did the indicator perform in the reference period? |
|-----------------------------|--|
| Sustainability Indicator #1 | 0% |
| Sustainability Indicator #2 | 0% |
| Sustainability Indicator #3 | Low |
| Sustainability Indicator #4 | 100% of companies aligned to one or more of the UN SDGs as indicated through a sample of qualitative case studies for the top 5 holdings as of the end of the reference period, appended to this document. |

Qualitative Case Studies - Demonstration of Alignment to the UN Sustainable Development Goals for the Top 5 Holdings (by weight) in the fund as of 31 December 2024

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

- 1. Taiwan Semiconductor Manufacturing Co, 9.77% weight in the fund. Aligned with:
- a. SDG 7 Ensure access to affordable, reliable, sustainable and modern energy for all. TSMC are leading the high-performance, energy-saving semiconductor technologies that enable customers to deliver energy-efficient products. Calculations using the Industry, Science, and Technology International Strategy Centre's model revealed that, in 2020, TSMC helped the world conserve 4kWh of energy for each 1kWh spent in production. Their semiconductors are realised in applications of new technologies and support global, inclusive growth of smart manufacturing, smart energy and smart building.
- b. SDG 4 Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all. TSMC has established research centres in collaboration with top-ranked universities in Taiwan and dedicated research funds to encourage university professors to conduct groundbreaking semiconductor research projects. As the research centres strive to develop leadingedge technologies in semiconductor devices, material science, manufacturing process, and IC design. TSMC also works with universities in Taiwan and overseas to promote joint development projects covering a range of technologies areas. The annual research funds exceed NT\$338 million, and over 157 US patent applications were filed.
- c. SDG 9 Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation. C is the first to realize automated manufacturing. The Company has applied AI to the big data and machine learning platform for wafer fabrication to create an intelligent manufacturing environment featuring self-diagnosis and self-feedback capabilities. In response to the increasingly diversified and growing need for high-quality chips, TSMC initiated a comprehensive digital transformation. Digitized fabs are launched to transform the manufacturing process. With automated data collection, system assistance and AI judgment, process efficiency per batch is increased by 30% to 40%. In accelerating intelligent manufacturing, TSMC has also built an AI quality control system for wafer fabs to ensure production quality, facilitate benchmarking among different fabs, and strengthen technology transfer capacity.
- d. SDG 12 Ensure sustainable consumption and production patterns. A core mission of TSMC is to purchase raw materials responsibly by making suppliers to make advancements in the following aspects: technology, quality, delivery, environmental protection, human rights, safety and health. All tier 1 suppliers have signed the TSMC Supplier Code of Conduct and they ensure a cumulative total of 145 local raw materials suppliers receive support on process enhancement and quality improvement. They also look to reduce waste production among local suppliers by 35% as compared to 2014.
- 2. MercadoLibre, 4.53% weight in the fund. Aligned with:
- a. SDG 8 Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all.

Mercadolibre currently enables more than 574,000 SMEs to trade, and provides more than half of their revenues for 40% of them. On top of that, Mercado Pago continues to grow, helping democratise financial inclusion for thousands of individuals and enterprises that had been locked out of the traditional system: more than 68.8 million unique users executed 300 transactions per second, with over 30,4 million users investing through MELIs digital bank.

Mercado Pago offers digital accounts and payment methods that make it easier to access basic financial transactions, as well as investment and credit solutions. This allows more people and businesses to manage their finances and operate in the formal economy. Over 500,000 SMEs sell on MELI's platform and over 1 million families have MELI as their main source of income. MELI's scale and reach (>30% e-commerce market share in Latin America) allows for network effects to play out in full and massively expands the addressable market for SMEs that otherwise would not have been

- 3. MediaTek Inc, 4.42% weight in the fund. Aligned with:
- a. SDG 7: Affordable and clean energy

MediaTek Inc. is a Taiwanese company which operates as a fabless semiconductor company for wireless communications and digital multimedia solutions for wireless communications, highdefinition TV, optical storage, digital video disc (DVD), and Blu-ray products. Investment creates impact by progressing the development and production of energy efficient semiconductor-based technologies and solutions, leading to environmental benefits such as reduced GHGs and air pollution whilst creating socio-economic opportunities.

Investment in MediaTek Inc. fosters continuous advancements in the availability of increasingly efficient semiconductor technologies. This includes contributions to ongoing research and development efforts, enabling the company to increase market share, innovate, and address evolving energy efficiency needs from existing societal products and services to reduce society's overall energy demand. All of which leads to both environmental and social progress through

reduced emissions, improved air quality, and socio-economic growth. Without the company, reductions in energy demands by products and services offered by manufacturers would likely be slower, hindering progress related to reducing society's use of fossil fuels.

- 4. Advantech Co Ltd, 4.33% weight in the fund. Aligned with:
- a. SDG 7: Affordable and clean energy

Advantech is a Taiwanese company which is the world's largest industrial PC, or IPC, supplier, offering single-board computers, fan-less IPCs, digital posts and more. Investment creates impact by driving innovation, allowing the company to develop advanced technologies for industrial automation, IoT, and embedded computing. This allows for the progression and development of energy efficient solutions, leading to environmental benefits such as reduced GHGs and air pollution while creating socio-economic opportunities.

Investment in Advantech fosters continuous advancements in the availability of and standard of integrated industrial computing technologies. This includes contributions to ongoing research and development efforts, enabling the company to increase market share, innovate, and address evolving energy efficiency needs from existing societal products and services to reduce society's overall energy demand. All of which leads to both environmental and social progress through reduced emissions, improved air quality, and socio-economic growth. Without the company, reductions in energy demands by various products and services offered by various industries would likely be slower, hindering progress on reducing society's fossil fuel use.

- 5. E Ink Holdings Inc, 4.19% weight in the fund. Aligned with:
- a. SDG 12: Responsible Consumption and Production

E Ink Holdings, Inc. is a Taiwanese company which develops, manufactures, and markets consumer electronic products through electronic paper, electronic ink, electronic inkfilm, and other products as well as Internet of Things (IoT) application services. Investment creates impact by progressing the development and production of energy-efficient display technologies and solutions, leading to environmental benefits through reduced energy and raw material consumption (printed paper) compared to traditional display technologies.

Investment in E Ink Holdings, Inc. fosters continuous advancements in the availability of increasingly efficient display technologies. This includes contributions to ongoing research and development efforts, enabling the company to increase market share, innovate, and address evolving energy consumption challenges from existing products and services to reduce society's overall energy demand. All of which leads to both environmental and social progress through reduced emissions, improved air quality, and socio-economic growth. Without the company, reductions in energy demands by products and services offered by manufacturers would likely be slower, hindering progress on reducing society's overall energy demand.

...AND COMPARED TO PREVIOUS PERIODS?

| Reference period | Sustainability Indicator #1 | Sustainability Indicator #2 | Sustainability Indicator #3 | Sustainability Indicator #4 |
|--|--------------------------------|--------------------------------|--------------------------------|---|
| 31 December 2023 - 31 December 2024 | 0% | 0% | Low | 100% of companies aligned to one or more of the UN SDGs as indicated through a sample of qualitative case studies for the top 5 holdings as of the end of the reference period. |
| 31 December 2022 - 31 December 2023 | 0% | 0% | Medium | 100% of companies aligned to one or more of the UN SDGs as indicated through a sample of qualitative case studies for the top 5 holdings as of the end of the reference period. |

HOW DID THE SUSTAINABLE INVESTMENTS NOT CAUSE SIGNIFICANT HARM TO ANY SUSTAINABLE INVESTMENT OBJECTIVE?

The Investment Manager determined that SFDR Sustainable Investments in the Sub-Fund did no significant harm to any environmental or social objectives by assessing each SFDR Sustainable Investment's involvement in areas deemed to be harmful from an environmental or social perspective. Issuers that had involvement in activities deemed to be harmful from an environmental or social perspective were excluded from investment. Involvement in such activities was monitored on an ongoing basis.

HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS TAKEN INTO ACCOUNT?

The Investment Manager reviewed the indicators for adverse impacts on sustainability factors for all SFDR Sustainable Investments where data was available. The Investment Manager reviewed PAIs for investee issuers using data from a designated third party data provider. If a given PAI or PAIs for an issuer appeared to exceed expectations based on the data obtained from the designated third-party data provider, further qualitative review was undertaken with respect to those issuer(s) and that product in order to determine whether such data indicated the evidence of significant harm. Data availability and coverage was in many case limited for the Sub-Fund given its focus on emerging markets: where there were data gaps and the PAI was considered material for a company's sector, the Investment Manager's internal qualitative assessment was used to assess the PAIs.

The Sub-Fund took into account the following PAIs from:

- Table 1 of Annex I of the Commission Delegated Regulation:
- GHG emissions: Scope 1, 2 and 3 1.
- 2. Carbon footprint: Scope 1, 2 and 3
- 3. GHG intensity of investee companies: Scope 1, 2 and 3
- 4. Exposure to companies active in the fossil fuel sector
- 5. Share of non-renewable energy consumption and production
- 6. Energy consumption intensity per high impact climate sector: NACE A, B, C, D, E, F, G, H and L
- 7. Activities negatively affecting biodiversity-sensitive areas
- 8 Emissions to water
- 9. Hazardous waste and radioactive waste ratio
- 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 12. Unadjusted gender pay gap
- 13. Board gender diversity
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).
- Table 2 of Annex I of the Commission Delegated Regulation: 4. Investments in companies without carbon emission reduction initiatives
- Table 3 of Annex I of the Commission Delegated Regulation: 9. Lack of a human rights policy. 17. Number of convictions and amount of fines for violation of anti-corruption and anti-bribery laws.

WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND **HUMAN RIGHTS?**

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights (the "Responsible Business Practices") collectively cover a very broad range of areas of responsible business, encompassing everything from labour rights to consumer protection to support for internationally recognised human rights within a company's or issuer's sphere of influence.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

SFDR Sustainable Investments were considered aligned with the Responsible Business Practices as each company invested in passed screens provided by third parties which either directly cover one or more of the Responsible Business Practices or are considered appropriate proxies for one or more of the Responsible Business Practices. Each company invested in also passed the Investment Manager's own qualitative review process which takes into account the Responsible Business Practices. In addition, where the companies invested in do not pass the relevant screens provided by third parties, the Investment Manager retains discretion to establish alignment with the Responsible Business Practices solely on the basis of its qualitative review process.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager reviewed principal adverse impacts at the product level on a frequent basis during the reference period, notwithstanding certain data coverage and data quality issues as further described below. The Investment Manager reviewed PAIs for investee issuers using data from a designated third party data provider. If a given PAI or PAIs for an issuer or product appeared to exceed expectations based on the data obtained from the designated third-party data provider, further qualitative review was undertaken with respect to those issuer(s) and that product in order to determine whether such data indicated the evidence of significant harm. In cases where, in the view of the Investment Manager, unresolvable significant harm was identified following further qualitative review, further action would be taken up to and including divestment. Over the course of the reference period no unresolvable significant harm was identified for investments in the Sub-Fund. Where there were data gaps and the PAI was considered material for a company's sector, the Investment Manager's internal qualitative assessment was used to assess the PAIs.

PAIs were categorised based on their characteristics (including their materiality and the Investment Manager's ability to estimate them), and such categories were used for the purpose of determining the actions and outcome when assessing the PAIs.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider principal adverse impacts on sustainability factors. The availability and quality of such data impacted the extent to which each such PAI could be considered. In particular, the lack or incomplete reporting of metrics by some issuers meant that there was limited data on some adverse indicators. As such for some of the mandatory PAIs, data coverage was low. The Investment Manager's analysis of adverse indicators relied on this third-party information and data, and where such information was not available or was incomplete, the Investment Manager's analysis of adverse indicators was necessarily limited. As the data availability improves over time, it is expected that PAIs can be applied to a greater portion of the Investment Manager's investable universe. This will allow for enhanced insight into the adverse impacts caused by issuers.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2024 to 31 December 2024

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

WHAT WAS THE ASSET ALLOCATION?

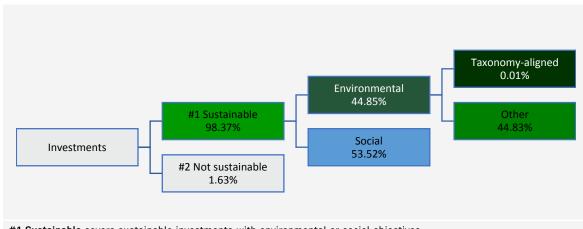

The asset allocation diagram illustrates the asset allocation of this Sub-Fund. 98.37% of the Net Asset Value was invested in SFDR Sustainable Investments. Whilst the asset allocation between environmental and social objectives is not fixed and as such the Sub-Fund does not commit to invest a minimum percentage of Net Asset Value in SFDR Sustainable Investments which have specifically an environmental objective or specifically a social objective, 44.85% of Net Asset Value was invested in SFDR Sustainable Investments with an environmental objective not aligned with the EU Taxonomy, and 53.52% of Net Asset Value was invested in SFDR Sustainable Investments with a social objective. 0.01% of the Net Asset Value of the Sub-Fund was invested in SFDR Sustainable Investments with an environmental objective aligned with the EU Taxonomy.

#1 Sustainable: 98.37% of Net Asset Value

Other environmental: 44.85% of Net Asset Value

Social: 53.52% of Net Asset Value

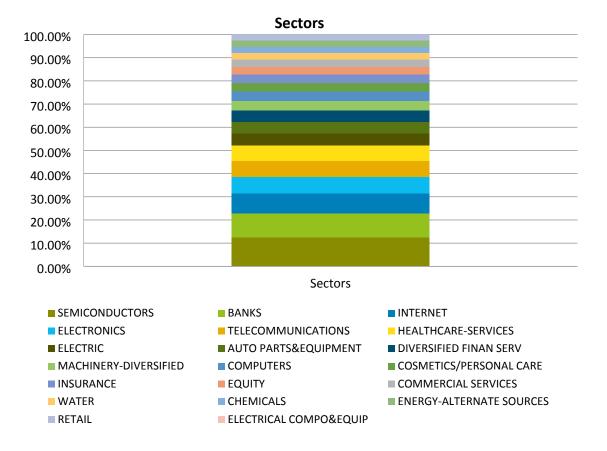

#2 Not Sustainable: 1.63% of Net Asset Value

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?

The above figures are provided as at 31 December 2024 only and do not necessarily reflect the position as at other points during the Reference Period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0.01% of the Net Asset Value of the Sub-Fund was invested in SFDR Sustainable Investments with environmental objectives aligned with the EU Taxonomy.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

The assessment of whether these investments complied with the EU Criteria for Environmentally Sustainable Economic Activities was not subject to an assurance provided by one or more auditors or a review by one or more third parties.

| DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY |
|--|
| RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY 1? |

| ☐ Yes: | |
|-----------------|--------------------|
| ☐ In fossil gas | ☐ In nuclear energ |

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully

Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

✓ No

the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds. 2. The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND **ENABLING ACTIVITIES?**

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

0.40% (enabling)

HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?

The percentage of investments that were aligned with the EU Taxonomy was marginally higher than the previous reference period (0.01% vs 0.00%).

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund invested 44.85% of NAV in SFDR Sustainable Investments with an environmental objective that were not aligned with the EU Taxonomy.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was

are sustainable investments with an environmental objective that do not take into

account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

What was the share of socially sustainable investments?

While the Sub-Fund does not commit to investing a minimum percentage of its Net Asset Value in socially sustainable investments, the Sub-Fund invested 53.52% of its Net Asset Value in SFDR Sustainable Investments with a social objective.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The Sub-Fund invested 1.63% of Net Asset Value in category #2 (Not Sustainable) which comprised of FDI, liquidity and hedging instruments only, including cash, cash equivalents, and currency positions. These instruments were held to either (a) ensure the Sub-Fund had sufficient liquidity; and/or (b) hedge against potential currency movements. These instruments were not subject to environmental or social safeguards as the Investment Manager does not view environmental or social considerations as relevant for these instruments.

What actions have been taken to attain the sustainable investment objective during the reference period?

In order to attain the sustainable investment objective, the Investment Manager took the following actions:

- Invested at least 75% of its Net Asset Value in SFDR Sustainable Investments
- Excluded issuers that produce tobacco products
- Excluded issuers that derive more than 10% of turnover from the sale of tobacco
- Excluded issuers that generate revenues from the production of controversial weapons
- Excluded issuers in breach of the Principles of the UN Global Compact (which includes principles relating to human rights, labour, environment and anti-corruption)
- Invested at least 90% of the Net Asset Value of the Sub-Fund net of the Sub-Fund's exposure to cash and liquid near cash assets, money market funds, currency related FDI and FDI used for hedging purposes (the "Non-ESG Assets") in companies that meet the Investment Manager's ESG and sustainability criteria at time of purchase and on an ongoing basis.
- Invested at least 75% of its Net Asset Value in companies in emerging market countries that contribute to social or environmental objectives by supporting sustainable development, through contributing to one or more of the UN Sustainable Development Goals (the "SDGs"). Examples of the SDGs include climate action, affordable and clean energy, sustainable cities and communities, good health and wellbeing, quality education, and zero hunger.

Engagement is not a part of the environmental or social investment strategy of the Sub-Fund. However, engagement is an integral part of the Investment Manager's approach to investing as they believe that constructive dialogue with management teams not only affords real insight into how a company operates, it is an opportunity to advocate for positive change.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the sustainable investment objective of the Sub-Fund

Reference benchmarks are indexes to measure HOW DID THE REFERENCE BENCHMARK DIFFER FROM A BROAD MARKET INDEX? Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: BNY Mellon Sustainable Global Equity Fund Legal entity identifier: 213800YDXSXADAYMRQ85

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Sub-Fund were met to the following extent during the reference period 1 January 2024 to 31 December 2024 (the "Reference Period").

The environmental and/or social characteristics promoted were:

- Investment in companies that align with the Investment Manager's proprietary carbon red line
- Avoid investment in companies that have material unresolvable issues relating to human rights, labour, the environment, and corruption
- Investment in companies proactively seeking to manage social and environmental factors well

All of the above characteristics were met by the Sub-Fund during the reference period.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The SFDR Sustainable Investments underlying this Sub- Fund contributed to the following environmental objectives not aligned with the EU Taxonomy:

- Contribution to the transition to a net zero world
- Circular economy and recycling
- Reduction in natural resource usage
- Electrification

The SFDR Sustainable Investments underlying this Sub- Fund contributed to the following social objectives:

- Access to financial products and services
- Health & wellbeing

- Drug development
- Infrastructure

Sustainability indicators measure

environmental or social characteristics

promoted by the financial product are

how the

attained.

Contribution to social objectives as a result of investee companies' internal business practices and successful management of competing interests of key stakeholder groups.

HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The following sustainability indicators are used to measure how the environmental or social characteristics promoted by the Sub-Fund are attained:

Sustainability Indicator #1 - No more than 5% of Net Asset Value in companies that:

- Are in the following sectors as defined by the Global Industry Classification Standard (GICS): materials, industrials, utilities, and energy; and
- Have a business incompatible with a scenario in which global temperatures rise more than 2 degrees Celsius above pre-industrial levels, as determined by the Investment Manager's proprietary framework; and
- Do not have an adequate strategy to address emissions / climate change, or a credible transition plan, as determined by the Investment Manager's proprietary framework.

In addition, where third party data is not available to assess these criteria or indicates that specific companies meet these criteria, the Investment Manager retains discretion to determine alignment with this sustainability indicator solely on the basis of its qualitative review process.

Sustainability Indicator #2 - 0% of Net Asset Value in investee companies that have been involved in violations of the UNGC principles.

Sustainability Indicator #3 - A weighted average ESG risk rating of 'medium' or better at the portfolio level. Such rating to be determined using third party data.

Excluding instruments held for liquidity and hedging purposes, the data coverage for the sustainability indicators was as follows:

Sustainability indicators #1 and #2 - 100% of the Sub-Fund.

Sustainability indicator #3 - 97% of the Sub-Fund.

No derivatives (FDI) were used to meet the environmental or social characteristics.

The sustainability indicators performed as follows:

| Indicator # | How did the indicator perform in the reference period? | |
|-----------------------------|---|--|
| Sustainability Indicator #1 | 0% | |
| Sustainability Indicator #2 | 0% | |
| Sustainability Indicator #3 | Low – on a weighted average basis, the Sub-Fund was deemed by a third-party data provider to have a low level of unmanaged ESG risks. | |

...AND COMPARED TO PREVIOUS PERIODS?

| Reference period | Sustainability Indicator #1 | Sustainability Indicator #2 | Sustainability Indicator #3 |
|--|--------------------------------|--------------------------------|--------------------------------|
| 31 December 2023 - 31 December 2024 | 0% | 0% | Low |
| 23 February 2023 - 31 December 2023 | 0% | 0% | Low |

WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

The social objectives of the SFDR Sustainable Investments the Sub-Fund partially made are included above.

The SFDR Sustainable Investments contributed to the above social objectives in the following ways:

- Developing gene therapies to improve patients' quality of life, longevity, and productivity while reducing physical and economic waste that is associated with chronic treatments
- Offering financial products and services to a diverse customer base, including the underbanked

Enabling safe and effective drug development & innovation

0.29% of the SFDR Sustainable Investments underlying this Sub-Fund contributed to the environmental objective of Climate Change Mitigation as set out in Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments underlying this Sub-Fund contributed to environmental objectives not aligned with Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments underlying this Sub-Fund contributed to the following environmental objectives not aligned with the EU Taxonomy:

- Contribution to the transition to a net zero world
- Electrification
- Circular economy and recycling
- Reduction in natural resource usage

The SFDR Sustainable Investments contributed to environmental objectives not aligned with the EU Taxonomy in the following ways:

Contributing to the transition towards a net zero world through the development of renewable energy, efficiency, and green technology

- Improving efficiencies in value chains and implementing strong waste management practices
- Minimising power loss, heat, and achieving better power conversion efficiency, helping end users to reduce their own operational emissions and carbon footprints as result.

HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

The Investment Manager determined that SFDR Sustainable Investments in the Sub-Fund did no significant harm to any environmental or social objectives by assessing each SFDR Sustainable Investment's involvement in areas deemed to be harmful from an environmental or social perspective. Issuers that had involvement in activities deemed to be harmful from an environmental or social perspective were excluded from investment. Involvement in such activities was monitored on an ongoing basis.

HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS TAKEN INTO ACCOUNT?

The Investment Manager reviewed the indicators for adverse impacts on sustainability factors for all SFDR Sustainable Investments where data was available. The Investment Manager reviewed PAIs for investee issuers using data from a designated third party data provider. If a given PAI or PAIs for an issuer appeared to exceed expectations based on the data obtained from the designated third-party data provider, further qualitative review was undertaken with respect to those issuer(s) and that product in order to determine whether such data indicated the evidence of significant harm. Where there were data gaps and the PAI was considered material for a company's sector, the Investment Manager's internal qualitative assessment was used to assess the PAIs.

The Sub-Fund took into account the following PAIs from:

- Table 1 of Annex I of the Commission Delegated Regulation:
- 1. GHG emissions: Scope 1, 2 and 3
- 2. Carbon footprint: Scope 1, 2 and 3
- 3. GHG intensity of investee companies: Scope 1, 2 and 3
- 4. Exposure to companies active in the fossil fuel sector
- 5. Share of non-renewable energy consumption and production
- 6. Energy consumption intensity per high impact climate sector: NACE A, B, C, D, E, F, G, H and L
- 7. Activities negatively affecting biodiversity-sensitive areas
- 8. Emissions to water
- 9. Hazardous waste and radioactive waste ratio
- 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 12. Unadjusted gender pay gap
- 13. Board gender diversity
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).
- Table 2 of Annex I of the Commission Delegated Regulation: 4. Investments in companies without carbon emission reduction initiatives
- Table 3 of Annex I of the Commission Delegated Regulation: 9. Lack of a human rights policy. 17. Number of convictions and amount of fines for violation of anti-corruption and anti-bribery

WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND **HUMAN RIGHTS?**

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights (the "Responsible Business Practices") collectively cover a very broad range of areas of responsible business, encompassing everything from labour rights to consumer protection to support for internationally recognised human rights within a company's or issuer's sphere of influence.

SFDR Sustainable Investments were considered aligned with the Responsible Business Practices as each company invested in passed screens provided by third parties which either directly cover one or more of the Responsible Business Practices or are considered appropriate proxies for one or more of the Responsible Business Practices. Each company invested in also passed the Investment Manager's own qualitative review process which takes into account the Responsible Business Practices. In addition, where the companies invested in do not pass the relevant screens provided by third parties, the Investment Manager retains discretion to establish alignment with the Responsible Business Practices solely on the basis of its qualitative review process.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager reviewed principal adverse impacts at the product level on a frequent basis during the reference period, notwithstanding certain data coverage and data quality issues as further described below. The Investment Manager reviewed PAIs for investee issuers using data from a designated third party data provider. If a given PAI or PAIs for an issuer or product appeared to exceed expectations based on the data obtained from the designated third-party data provider, further qualitative review was undertaken with respect to those issuer(s) and that product in order to determine whether such data indicated the evidence of significant harm. In cases where, in the view of the Investment Manager, unresolvable significant harm was identified following further qualitative review, further action would be taken up to and including divestment. Over the course of the reference period no unresolvable significant harm was identified for investments in the Sub-Fund. Where there were data gaps and the PAI was considered material for a company's sector, the Investment Manager's internal qualitative assessment was used to assess the PAIs.

PAIs were categorised based on their characteristics (including their materiality and the Investment Manager's ability to estimate them), and such categories were used for the purpose of determining the actions and outcome when assessing the PAIs.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider principal adverse impacts on sustainability factors. The availability and quality of such data impacted the extent to which each such PAI could be considered. In particular, the lack or incomplete reporting of metrics by some issuers meant that there was limited data on some

adverse indicators. As such for some of the mandatory PAIs, data coverage was low. The Investment Manager's analysis of adverse indicators relied on this third-party information and data, and where such information was not available or was incomplete, the Investment Manager's analysis of adverse indicators was necessarily limited. As the data availability improves over time, it is expected that PAIs can be applied to a greater portion of the Investment Manager's investable universe. This will allow for enhanced insight into the adverse impacts caused by issuers.

What were the top investments of this financial product?

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

WHAT WAS THE ASSET ALLOCATION?

The asset allocation diagram illustrates the asset allocation of this Sub-Fund. 97.74% of Net Asset Value was used to meet the environmental or social characteristics promoted by the Sub-Fund in accordance with the binding elements of the investment strategy. The Sub-Fund invested 83.38% of Net Asset Value in SFDR Sustainable Investments of which 43.85% had an environmental objective not aligned with the EU Taxonomy and 39.24% had a social objective. 0.29% of the Net Asset Value of the Sub-Fund was invested in sustainable investments with an environmental objective aligned with the EU Taxonomy.

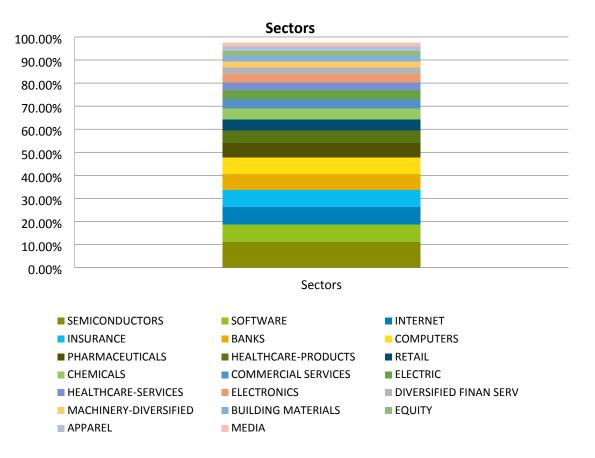

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?

The above figures are provided as at ("End of Reference Period") only and do not necessarily reflect the position as at other points during the Reference Period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0.29% of the Net Asset Value of the Sub-Fund was invested in SFDR Sustainable Investments with environmental objectives aligned with the EU Taxonomy.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

The assessment of whether these investments complied with the EU Criteria for Environmentally Sustainable Economic Activities was not subject to an assurance provided by one or more auditors or a review by one or more third parties.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

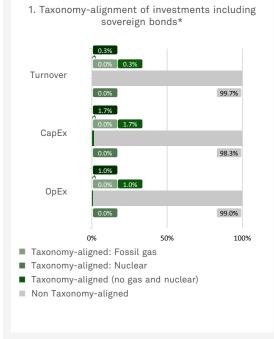

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

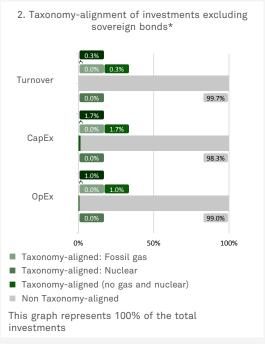

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY 1?

| ☐ Yes: | |
|-----------------|---------------------|
| ☐ In fossil gas | ☐ In nuclear energy |
| ✓ No | |

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND **ENABLING ACTIVITIES?**

Enabling activities: 0.27% (turnover)

Transitional activities: 0.00%

HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?

The percentage of investments that were aligned with the EU Taxonomy marginally decreased compared to the previous reference period.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund invested 0.29% of NAV in SFDR Sustainable Investments with an environmental objective not aligned with the EU Taxonomy.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

environmentally

that do not take into

sustainable economic activities under

Regulation (EU) 2020/

account the criteria for

What was the share of socially sustainable investments?

While the Sub-Fund does not commit to investing a minimum percentage of its Net Asset Value in socially sustainable investments, the Sub-Fund invested 39.24% of its Net Asset Value in SFDR Sustainable Investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Sub-Fund invested 2.26% of Net Asset Value in category #2 (other) which comprised of

cash and liquidity vehicles held for liquidity purposes only. These instruments were not subject to environmental or social safeguards as the Investment Manager does not view environmental or social considerations as relevant for these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In order to meet the environmental and social characteristics, the Investment Manager took the following actions:

- Invested at least 50% of its Net Asset Value in SFDR Sustainable Investments
- Excluded issuers that produce tobacco products
- Excluded issuers that derive more than 10% of turnover from the sale of tobacco
- Excluded issuers that generate revenues from the production of controversial weapons
- Excluded issuers in breach of the Principles of the UN Global Compact (which includes principles relating to human rights, labour, environment and anti-corruption)
- Invested at least 90% of the Net Asset Value of the Sub-Fund net of the Sub-Fund's exposure to cash and liquid near cash assets, money market funds, and currency related FDI and FDI used for hedging purposes (the "Non-ESG Assets") in companies that meet the Investment Manager's ESG and sustainability criteria at time of purchase and on an ongoing basis.

Engagement is not a part of the environmental or social investment strategy of the Sub-Fund. However, engagement is an integral part of the Investment Manager's approach to investing as they believe that constructive dialogue with management teams not only affords real insight into how a company operates, it is an opportunity to advocate for positive change.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- HOW DOES THE REFERENCE BENCHMARK DIFFER FROM A BROAD MARKET INDEX? Not applicable.
- HOW DID THIS FINANCIAL PRODUCT PERFORM WITH REGARD TO THE SUSTAINABILITY INDICATORS TO DETERMINE THE ALIGNMENT OF THE REFERENCE BENCHMARK WITH THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED?

Not applicable.

HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE REFERENCE **BENCHMARK?**

Not applicable.

HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE BROAD MARKET INDEX?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: BNY Mellon Sustainable Global Multi-Asset Fund Legal entity identifier: 2138002A693E30JMX948

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Sub-Fund were met to the following extent during the reference period 3 September 2024 to 31 December 2024 (the "Reference Period").

The environmental and/or social characteristics promoted were:

- Investment in companies that align with the Investment Manager's proprietary climate qualification
- Avoid investment in companies that have material unresolvable issues relating to human rights, labour, the environment, and corruption
- Investment in companies proactively seeking to manage social and environmental factors well
- Investment in sovereign issuers proactively seeking to manage social and environmental factors well

Characteristics relating to investing in companies that align with the Investment Manager's proprietary carbon red line; investing in companies proactively seeking to manage social and environmental factors well; and investing in sovereign issuers proactively seeking to manage social and environmental factors well, were met by the Sub-Fund during the reference period.

The SFDR Sustainable Investments underlying this Sub-Fund did not contribute to the environmental objectives set out in Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments underlying this Sub-Fund contributed to the following environmental objectives not aligned with the EU Taxonomy:

- Contributing to the transition to a net zero world
- Circular economy and recycling

The SFDR Sustainable Investments underlying this Sub-Fund contributed to the following social objectives:

- Access to financial products and services
- Connectivity and digital access
- Financial protection
- Access to housing

Sustainability indicators measure

environmental or social characteristics

promoted by the financial product are

how the

attained.

HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The following sustainability indicators are used to measure how the environmental or social characteristics promoted by the Sub-Fund are attained:

Sustainability Indicator #1 - No more than 5% of Net Asset Value in companies that:

Are in the following sectors as defined by the Global Industry Classification Standard (GICS):

materials, industrials, utilities, and energy; and

- Have a business incompatible with a scenario in which global temperatures rise more than 2 degrees Celsius above pre-industrial levels, as determined by the Investment Manager's proprietary framework; and
- Do not have an adequate strategy to address emissions / climate change, or a credible transition plan, as determined by the Investment Manager's proprietary framework.

In addition, where third party data is not available to assess these criteria or indicates that specific companies meet these criteria, the Investment Manager retains discretion to determine alignment with this sustainability indicator solely on the basis of its qualitative review process.

Sustainability Indicator #2 - 0% of Net Asset Value in investee companies that have been involved in violations of the UNGC principles.

Sustainability Indicator #3 - A weighted average ESG risk rating of 'medium' or better at the portfolio level. Such rating to be determined using third party data.

Sustainability Indicator #4 - All investments in sovereign issuers to have either strong current positioning, and/or are demonstrating progress in respect of the management of environmental, social and governance factors, as determined by the Investment Manager's proprietary sovereign sustainable framework.

The data coverage for sustainability indicators #1 and #2 was 100% (by weight) of the Sub-Fund's corporate investments (excluding sovereign issuers, FDI, cash and cash equivalents).

The data coverage for sustainability indicator #3 was 63% (by weight) of the Sub-Fund's investments.

The data coverage for sustainability indicator #4 was 100% (by weight) of sovereign issuers held by the Sub-Fund.

No derivatives (FDI) were used to meet the environmental or social characteristics.

The sustainability indicators performed as follows:

| Indicator # | How did the indicator perform in the reference period? |
|-----------------------------|--|
| Sustainability Indicator #1 | 0% |
| Sustainability Indicator #2 | 0% |
| Sustainability Indicator #3 | Low |
| Sustainability Indicator #4 | 100% |

...AND COMPARED TO PREVIOUS PERIODS?

No comparison for previous periods is available at the date of this periodic report.

WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

The social objectives of the SFDR Sustainable Investments the Sub-Fund partially made are included above.

The SFDR Sustainable Investments contributed to the above social objectives in the following ways:

Facilitating access to financial products that contribute to financial safety and wellbeing

- Provision of social housing to underserved sections of society
- Provision of technology solutions to the life sciences industry that enable and accelerate clinical development of medical treatments for rare diseases
- Promotion of digital infrastructure in emerging markets

The SFDR Sustainable Investments underlying this Sub-Fund contributed to environmental objectives not aligned with Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments underlying this Sub-Fund contributed to the following environmental objectives not aligned with Article 9 of the EU Taxonomy Regulation:

- Contributing to the transition to a net zero world
- Circular economy and recycling

The sustainable investments contributed to these environmental objectives in the following ways:

- Promoting green finance instruments (green mortgages) and leveraging instruments like green bonds to onward finance low-carbon assets.
- Improving water quality and controlling levels of wastage.
- Establishment of policies, programmes and targets to reduce emissions and control waste within own operations
- Setting net zero targets to reducing financed emissions by reducing exposures to fossil fuel financing
- Provision of packaging solutions that provide a more easily recyclable alternative to plastics, and target for 100% recyclability in all products.
- Reduction in GHG emissions and implementation of a climate-change strategy to capitalise on opportunities in low-carbon transportation

HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

The Investment Manager determined that SFDR Sustainable Investments in the Sub-Fund did no significant harm to any environmental or social objectives by assessing each SFDR Sustainable Investment's involvement in areas deemed to be harmful from an environmental or social perspective. Issuers that had involvement in activities deemed to be harmful from an environmental or social perspective were excluded from investment. Involvement in such activities was monitored on an ongoing basis.

HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS **TAKEN INTO ACCOUNT?**

The Investment Manager reviewed the indicators for adverse impacts on sustainability factors for all SFDR Sustainable Investments where data was available. The Investment Manager reviewed PAIs for investee issuers using data from a designated third party data provider. If a given PAI or PAIs for an issuer appeared to exceed expectations based on the data obtained from the designated third-party data provider, further qualitative review was undertaken with respect to those issuer(s) and that product in order to determine whether such data indicated the evidence of significant harm. Where there were data gaps and the PAI was considered material for a company's sector, the Investment Manager's internal qualitative assessment was used to assess the PAIs.

The Sub-Fund took into account the following PAIs from:

- Table 1 of Annex I of the Commission Delegated Regulation:
- 1. GHG emissions: Scope 1, 2 and 3
- 2. Carbon footprint: Scope 1, 2 and 3
- 3. GHG intensity of investee companies: Scope 1, 2 and 3
- 4. Exposure to companies active in the fossil fuel sector
- 5. Share of non-renewable energy consumption and production
- 6. Energy consumption intensity per high impact climate sector: NACE A, B, C, D, E, F, G, H and L
- 7. Activities negatively affecting biodiversity-sensitive areas
- 8. Emissions to water

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

- 9. Hazardous waste and radioactive waste ratio
- 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 12. Unadjusted gender pay gap
- 13. Board gender diversity
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).
- Table 2 of Annex I of the Commission Delegated Regulation: 4. Investments in companies without carbon emission reduction initiatives
- Table 3 of Annex I of the Commission Delegated Regulation: 9. Lack of a human rights policy. 17. Number of convictions and amount of fines for violation of anti-corruption and anti-bribery laws. 19. Freedom of expression score. 23. Political stability score. 24. Rule of law score.

WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND **HUMAN RIGHTS?**

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights (the "Responsible Business Practices") collectively cover a very broad range of areas of responsible business, encompassing everything from labour rights to consumer protection to support for internationally recognised human rights within a company's or issuer's sphere of influence.

SFDR Sustainable Investments were considered aligned with the Responsible Business Practices as each company invested in passed screens provided by third parties which either directly cover one or more of the Responsible Business Practices or are considered appropriate proxies for one or more of the Responsible Business Practices. Each company invested in also passed the Investment Manager's own qualitative review process which takes into account the Responsible Business Practices. In addition, where the companies invested in do not pass the relevant screens provided by third parties, the Investment Manager retains discretion to establish alignment with the Responsible Business Practices solely on the basis of its qualitative review process.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager reviewed principal adverse impacts at the product level on a frequent basis during the reference period, notwithstanding certain data coverage and data quality issues as further described below. The Investment Manager reviewed PAIs for investee issuers using data from a designated third party data provider. If a given PAI or PAIs for an issuer or product appeared to exceed expectations based on the data obtained from the designated third-party data provider, further qualitative review was undertaken with respect to those issuer(s) and that product in order to determine whether such data indicated the evidence of significant harm. Where there were data gaps and the PAI was considered material for a company's sector, the Investment Manager's internal qualitative assessment was used to assess the PAIs.

PAIs were categorised based on their characteristics (including their materiality and the Investment Manager's ability to estimate them), and such categories were used for the purpose of determining the actions and outcome when assessing the PAIs. For instance, data indicated that an investee company was in violation of the principles of the UN Global Compact (PAI #10), which resulted in divestment of that issuer

The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider principal adverse impacts on sustainability factors. The availability and quality of such data impacted the extent to which each such PAI could be considered. In particular, the lack or incomplete reporting of metrics by some issuers meant that there was limited data on some adverse indicators. As such for some of the mandatory PAIs, data coverage was low. The Investment Manager's analysis of adverse indicators relied on this third-party information and data, and where such information was not available or was incomplete, the Investment Manager's analysis of adverse indicators was necessarily limited. As the data availability improves over time, it is expected that PAIs can be applied to a greater portion of the Investment Manager's investable universe. This will allow for enhanced insight into the adverse impacts caused by issuers.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 3 September 2024 to 31 December 2024

| Largest investments | Sector | % of assets | Country |

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

WHAT WAS THE ASSET ALLOCATION?

The asset allocation diagram illustrates the asset allocation of this Sub-Fund. 88.39% of Net Asset Value was used to meet the environmental or social characteristics promoted by the Sub-Fund in accordance with the binding elements of the investment strategy. The Sub-Fund invested 65.00% of Net Asset Value in SFDR Sustainable Investments of which 31.19% had an environmental objective not aligned with the EU Taxonomy and 33.36% had a social objective. 0.45% of the Net Asset Value of the Sub-Fund was invested in sustainable investments with an environmental objective aligned with the EU Taxonomy.

#1 Aligned with E/S characteristics: 88.39% of Net Asset Value

#1A Sustainable: 65.00% of Net Asset Value

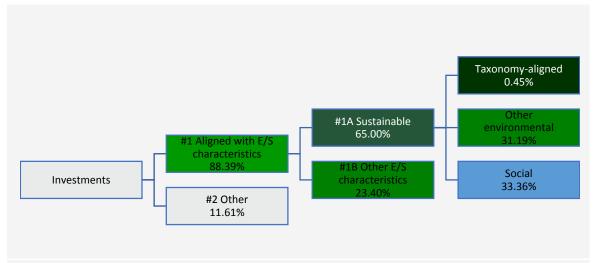

Taxonomy-aligned: 0.45% of Net Asset Value

Environmental: 31.19% of Net Asset Value

Social: 33.36% of Net Asset Value

#1B Other E/S characteristics: 23.40% of Net Asset Value

#2 Other: 11.61% of Net Asset Value

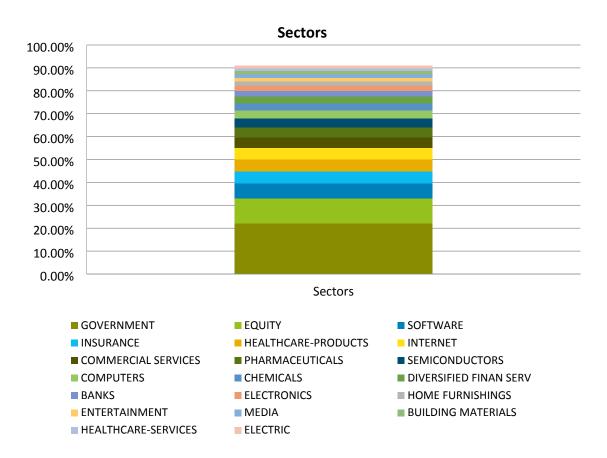

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?

The above figures are provided as at ("End of Reference Period") only and do not necessarily reflect the position as at other points during the Reference Period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0.45% of the Net Asset Value of the Sub-Fund was invested in SFDR Sustainable Investments with environmental objectives aligned with the EU Taxonomy.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

The assessment of whether these investments complied with the EU Criteria for Environmentally Sustainable Economic Activities was not subject to an assurance provided by one or more auditors or a review by one or more third parties.

DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY To comply with the EU Taxonomy, the RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY 1? criteria for fossil gas include limitations on ☐ Yes: emissions and ☐ In fossil gas ☐ In nuclear energy switching to fully renewable power or ✓ No low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste

management rules.

Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

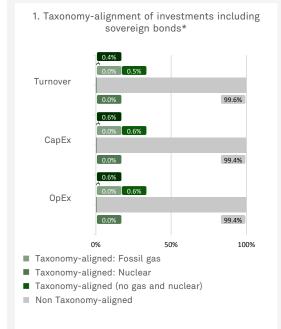

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

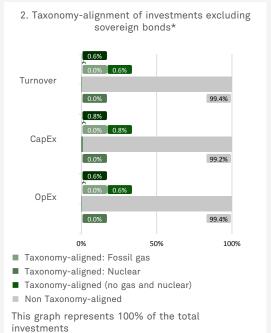

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities: 0.49% (turnover, excluding sovereign bonds)

Transitional activities: 0.00%

HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?

No comparison for previous periods is available at the date of this periodic report.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund invested 31.19% of NAV in SFDR Sustainable Investments with an environmental objective not aligned with the EU Taxonomy.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

What was the share of socially sustainable investments?

While the Sub-Fund does not commit to investing a minimum percentage of its Net Asset Value in socially sustainable investments, the Sub-Fund invested 33.36% of its Net Asset Value in SFDR Sustainable Investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Sub-Fund invested 11.61% of Net Asset Value in category #2 (other) which comprised of FDI, liquidity and hedging instruments only, including cash, cash equivalents, currency positions, currency related FDI and FDI used for hedging purposes. These instruments were held to either (a) ensure the Sub-Fund had sufficient liquidity; and/or (b) hedge against potential currency movements. These instruments were not subject to environmental or social safeguards as the Investment Manager does not view environmental or social considerations as relevant for these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In order to meet the environmental and social characteristics, the Investment Manager took the following actions:

- Invested at least 30% of the Sub-Fund's Net Asset Value in SFDR Sustainable Investments
- Excluded issuers that produce tobacco products
- Excluded issuers that derive more than 10% of turnover from the sale of tobacco
- Excluded issuers that generate revenues from the production of controversial weapons
- Excluded issuers in breach of the Principles of the UN Global Compact (which includes principles relating to human rights, labour, environment and anti-corruption).
- Invested at least 90% of the Net Asset Value of the Sub-Fund net of the Sub-Fund's exposure to cash and liquid near cash assets, money market funds, and currency related FDI and FDI used for hedging purposes (the "Non-ESG Assets") in companies that meet the Investment Manager's ESG and sustainability criteria at time of purchase and on an ongoing basis.

Engagement is not a part of the environmental or social investment strategy of the Sub-Fund. However, engagement is an integral part of the Investment Manager's approach to investing as they believe that constructive dialogue with management teams not only affords real insight into how a company operates, it is an opportunity to advocate for positive change.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: BNY Mellon Sustainable Global Real Return Fund Legal entity identifier: 213800MU54AM2UKX6758

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Sub-Fund were met to the following extent during the reference period 1 January 2024 to 10 December 2024 (the "Reference Period").

The environmental and/or social characteristics promoted were:

- Investment in companies that align with the Investment Manager's proprietary carbon red line
- Avoid investment in companies that have material unresolvable issues relating to human rights, labour, the environment, and corruption
- Investment in companies proactively seeking to manage social and environmental factors well
- Investment in sovereign issuers proactively seeking to manage social and environmental factors well

All of the above characteristics were met by the Sub-Fund during the reference period.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The SFDR Sustainable Investments underlying this Sub-Fund did not contribute to the environmental objectives set out in Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments underlying this Sub-Fund contributed to the following environmental objectives not aligned with the EU Taxonomy:

- Contributing to the transition to a net zero world
- Circular economy and recycling
- Electrification

The SFDR Sustainable Investments underlying this Sub-Fund contributed to the following social objectives:

- Access to financial products and services
- Health & wellbeing
- Drug development
- Infrastructure
- Access to digital infrastructure
- Societal protection
- Access to housing
- Education & training

HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The following sustainability indicators are used to measure how the environmental or social characteristics promoted by the Sub-Fund are attained:

Sustainability Indicator #1 - No more than 5% of Net Asset Value in companies that:

- Are in the following sectors as defined by the Global Industry Classification Standard (GICS): materials, industrials, utilities, and energy; and
- Have a business incompatible with a scenario in which global temperatures rise more than 2 degrees Celsius above pre-industrial levels, as determined by the Investment Manager's proprietary framework; and
- Do not have an adequate strategy to address emissions / climate change, or a credible transition plan, as determined by the Investment Manager's proprietary framework.

In addition, where third party data is not available to assess these criteria or indicates that specific companies meet these criteria, the Investment Manager retains discretion to determine alignment with this sustainability indicator solely on the basis of its qualitative review process.

Sustainability Indicator #2 - 0% of Net Asset Value in investee companies that have been involved in violations of the UNGC principles.

Sustainability Indicator #3 - A weighted average ESG risk rating of 'medium' or better at the portfolio level. Such rating to be determined using third party data.

Sustainability Indicator #4 - All investments in sovereign issuers to have either strong current positioning, and/or are demonstrating progress in respect of the management of environmental, social and governance factors, as determined by the Investment Manager's proprietary sovereign sustainable framework.

The data coverage for sustainability indicators #1 and #2 was 100% of the Sub-Fund's corporate investments (excluding FDI, cash and cash equivalents).

The data coverage for sustainability indicator #3 was 55% of the Sub-Fund Investments (excluding FDI, cash and cash equivalents).

The data coverage for sustainability indicator #4 was 100% of sovereign issuers held by the Sub-

No FDI were used to meet the environmental or social characteristics.

The sustainability indicators performed as follows:

| Indicator # | How did the indicator perform in the reference period? |
|-----------------------------|--|
| Sustainability Indicator #1 | 0% |
| Sustainability Indicator #2 | 0% |
| Sustainability Indicator #3 | Low |
| Sustainability Indicator #4 | 100% |

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

...AND COMPARED TO PREVIOUS PERIODS?

| Reference period | Sustainability Indicator #1 | Sustainability Indicator #2 | Sustainability Indicator #3 | Sustainability Indicator #4 |
|---------------------------|-----------------------------|--------------------------------|--------------------------------|--------------------------------|
| 1 January 2024 to | 0% | 0% | Low | 100% |
| 10 December 2024 | | | | |
| (the "Reference Period"). | | | | |
| 31 December 2022 - | 0% | 0% | Low | 100% |
| 31 December 2023 | | | | |

WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

The social objectives of the SFDR Sustainable Investments the Sub-Fund partially made are included above.

The SFDR Sustainable Investments underlying this Sub- Fund did not contribute to environmental objectives set out in Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments contributed to the above social objectives in the following ways:

- Facilitating access and knowledge of financial products and services to the non-banked market in a developing country
- Provision of social infrastructure which supports societal needs including healthcare, education and affordable housing.
- Provision of digital infrastructure
- Financing the discovery, development and/or marketing of pioneering drugs
- Provision of health care products and services
- Provision of access to affordable housing

The SFDR Sustainable Investments underlying this Sub-Fund contributed to environmental objectives not aligned with Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments underlying this Sub-Fund contributed to the following environmental objectives not aligned with Article 9 of the EU Taxonomy Regulation:

- Contributing to the transition to a net zero world
- Circular economy and recycling
- Electrification

The sustainable investments contributed to these environmental objectives in the following ways:

- Provision of key parts for the generation of renewable energy
- Provision of grid automation solutions, access and connectivity to continued electricity supply and business efficiency by creating systems that enable efficiency in power distribution and access and those that will enable transition to low carbon
- Offering renewable and circular economy solutions in the form of biofuels
- Production of EV batteries, energy storage systems, and other products that enable the transition to a lower carbon economy
- Development and manufacture of markets machines used to recycle beverage containers, supporting resource efficiency and productivity through recycling, food sorting and waste management services
- Manufacture and distribution of uninterruptible power supplies (UPSs), photovoltaic products, and electronic materials, contributing to clean energy penetration and enabling energy saving and carbon reduction for users.

HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

The Investment Manager determined that SFDR Sustainable Investments in the Sub-Fund did no significant harm to any environmental or social objectives by assessing each SFDR Sustainable Investment's involvement in areas deemed to be harmful from an environmental or social perspective. Issuers that had involvement in activities deemed to be harmful from an environmental or social perspective were excluded from investment. Involvement in such activities was monitored on an ongoing basis.

HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS TAKEN INTO ACCOUNT?

The Investment Manager reviewed the indicators for adverse impacts on sustainability factors for all SFDR Sustainable Investments where data was available. The Investment Manager reviewed PAIs for investee issuers using data from a designated third party data provider. If a given PAI or PAIs for an issuer appeared to exceed expectations based on the data obtained from the designated third-party data provider, further qualitative review was undertaken with respect to those issuer(s) and that product in order to determine whether such data indicated the evidence of significant harm. Where there were data gaps and the PAI was considered material for a company's sector, the Investment Manager's internal qualitative assessment was used to assess the PAIs.

The Sub-Fund took into account the following PAIs from:

- Table 1 of Annex I of the Commission Delegated Regulation:
- GHG emissions: Scope 1, 2 and 3 1.
- 2. Carbon footprint: Scope 1, 2 and 3
- GHG intensity of investee companies: Scope 1, 2 and 3
- 4. Exposure to companies active in the fossil fuel sector
- 5. Share of non-renewable energy consumption and production
- 6. Energy consumption intensity per high impact climate sector: NACE A, B, C, D, E, F, G, H and L
- Activities negatively affecting biodiversity-sensitive areas
- 8. Emissions to water
- 9. Hazardous waste and radioactive waste ratio
- 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 12. Unadjusted gender pay gap
- 13. Board gender diversity
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).
- Table 2 of Annex I of the Commission Delegated Regulation: 4. Investments in companies without carbon emission reduction initiatives
- Table 3 of Annex I of the Commission Delegated Regulation: 9. Lack of a human rights policy. 17. Number of convictions and amount of fines for violation of anti-corruption and anti-bribery laws. 19. Freedom of expression score. 23. Political stability score. 24. Rule of law score.

WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND **HUMAN RIGHTS?**

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights (the "Responsible Business Practices") collectively cover a very broad range of areas of responsible business, encompassing everything from labour rights to consumer protection to support for internationally recognised human rights within a company's or issuer's sphere of influence.

matters, respect for human rights, anticorruption and antibribery matters.

Principal adverse impacts are the most

decisions on

and employee

relating to

significant negative impacts of investment

sustainability factors

environmental, social

SFDR Sustainable Investments were considered aligned with the Responsible Business Practices as each company invested in passed screens provided by third parties which either directly cover one or more of the Responsible Business Practices or are considered appropriate proxies for one or more of the Responsible Business Practices. Each company invested in also passed the Investment Manager's own qualitative review process which takes into account the Responsible Business Practices. In addition, where the companies invested in do not pass the relevant screens provided by third parties, the Investment Manager retains discretion to establish alignment with the Responsible Business Practices solely on the basis of its qualitative review process.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager reviewed principal adverse impacts at the product level on a frequent basis during the reference period, notwithstanding certain data coverage and data quality issues as further described below. The Investment Manager reviewed PAIs for investee issuers using data from a designated third party data provider. If a given PAI or PAIs for an issuer or product appeared to exceed expectations based on the data obtained from the designated third-party data provider, further qualitative review was undertaken with respect to those issuer(s) and that product in order to determine whether such data indicated the evidence of significant harm. In cases where, in the view of the Investment Manager, unresolvable significant harm was identified following further qualitative review, further action would be taken up to and including divestment. Over the course of the reference period no unresolvable significant harm was identified for investments in the Sub-Fund. Where there were data gaps and the PAI was considered material for a company's sector, the Investment Manager's internal qualitative assessment was used to assess the PAIs.

PAIs were categorised based on their characteristics (including their materiality and the Investment Manager's ability to estimate them), and such categories were used for the purpose of determining the actions and outcome when assessing the PAIs.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider principal adverse impacts on sustainability factors. The availability and quality of such data impacted the extent to which each such PAI could be considered. In particular, the lack or incomplete reporting of metrics by some issuers meant that there was limited data on some adverse indicators. As such for some of the mandatory PAIs, data coverage was low. The Investment Manager's analysis of adverse indicators relied on this third-party information and data, and where such information was not available or was incomplete, the Investment Manager's analysis of adverse indicators was necessarily limited. As the data availability improves over time, it is expected that PAIs can be applied to a greater portion of the Investment Manager's investable universe. This will allow for enhanced insight into the adverse impacts caused by issuers.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2024 to 10 December 2024

| Largest investments | Sector | % of assets | Country |

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

WHAT WAS THE ASSET ALLOCATION?

The asset allocation diagram illustrates the asset allocation of this Sub-Fund. 86.99% of Net Asset Value was used to meet the environmental or social characteristics promoted by the Sub-Fund in accordance with the binding elements of the investment strategy. The Sub-Fund invested 47.20% of Net Asset Value in SFDR Sustainable Investments of which 24.84% had an environmental objective not aligned with the EU Taxonomy and 22.30% had a social objective. 0.05% of the Net Asset Value of the Sub-Fund was invested in sustainable investments with an environmental objective aligned with the EU Taxonomy.

#1 Aligned with E/S characteristics: 86.99% of Net Asset Value

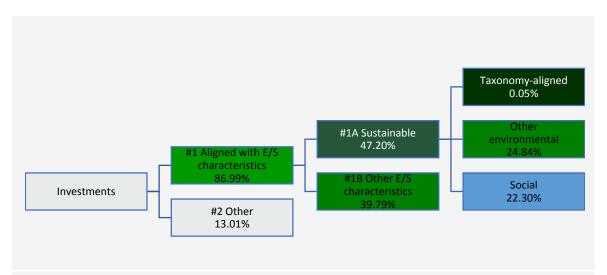

#1A Sustainable: 47.20% of Net Asset Value

Taxonomy-aligned: 0.05% of Net Asset Value Environmental: 24.84% of Net Asset Value

Social: 22.30% of Net Asset Value

#1B Other E/S characteristics: 39.79% of Net Asset Value

#2 Other: 13.01% of Net Asset Value

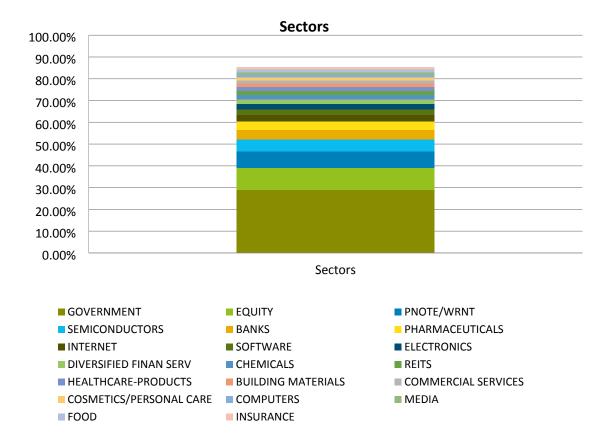

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?

The above figures are provided as at ("End of Reference Period") only and do not necessarily reflect the position as at other points during the Reference Period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0.05% of the Net Asset Value of the Sub-Fund was invested in SFDR Sustainable Investments with environmental objectives aligned with the EU Taxonomy.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

The assessment of whether these investments complied with the EU Criteria for Environmentally Sustainable Economic Activities was not subject to an assurance provided by one or more auditors or a review by one or more third parties.

DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY 1?

| ☐ Yes: | |
|-----------------|---------------------|
| ☐ In fossil gas | ☐ In nuclear energy |

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully

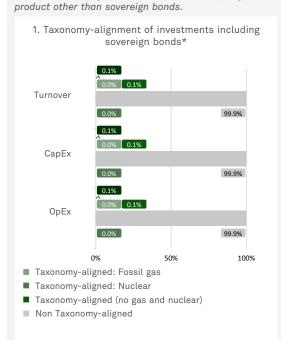

Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

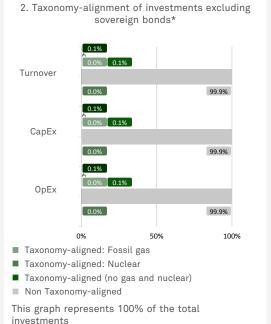

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial

✓ No

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND **ENABLING ACTIVITIES?**

Enabling: 0.03% (turnover)

Transitional: 0.00%

HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?

The percentage of investments that were aligned with the EU Taxonomy increased marginally compared to the previous reference period. This was due to improvements in the availability of data that was reported by companies as opposed to estimated by thirdparty data providers.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund invested 24.84% of NAV in SFDR Sustainable Investments with an environmental objective not aligned with the EU Taxonomy.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was

are sustainable investments with an environmental objective that do not take into

account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/

not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

What was the share of socially sustainable investments?

While the Sub-Fund does not commit to investing a minimum percentage of its Net Asset Value in socially sustainable investments, the Sub-Fund invested 22.30% of its Net Asset Value in SFDR Sustainable Investments with a social objective

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Sub-Fund invested 13.01% of Net Asset Value in category #2 (other) which comprised of FDI, liquidity and hedging instruments only, including cash, cash equivalents, currency positions, currency related FDI and FDI used for hedging purposes. These instruments were held to either (a) ensure the Sub-Fund had sufficient liquidity; and/or (b) hedge against potential currency movements. These instruments were not subject to environmental or social safeguards as the Investment Manager does not view environmental or social considerations as relevant for these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In order to meet the environmental and social characteristics, the Investment Manager took the following actions:

- invested 20% in SFDR Sustainable Investments
- excluded issuers that produce tobacco products
- excluded issuers that derive more than 10% of turnover from the sale of tobacco
- excluded issuers that generate revenues from the production of controversial weapons
- excluded issuers in breach of the Principles of the UN Global Compact (which includes principles relating to human rights, labour, environment and anti-corruption)
- invested at least 90% of the Net Asset Value of the Sub-Fund net of the Sub-Fund's exposure to cash and liquid near cash assets, money market funds, and currency related FDI and FDI used for hedging purposes (the "Non-ESG Assets") in companies that meet the Investment Manager's ESG and sustainability criteria at time of purchase and on an ongoing basis.

Engagement is not a part of the environmental or social investment strategy of the Sub-Fund. However, engagement is an integral part of the Investment Manager's approach to investing as they believe that constructive dialogue with management teams not only affords real insight into how a company operates, it is an opportunity to advocate for positive change.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund

- HOW DOES THE REFERENCE BENCHMARK DIFFER FROM A BROAD MARKET INDEX? Not applicable.
- HOW DID THIS FINANCIAL PRODUCT PERFORM WITH REGARD TO THE SUSTAINABILITY INDICATORS TO DETERMINE THE ALIGNMENT OF THE REFERENCE BENCHMARK WITH THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE REFERENCE **BENCHMARK?**

Not applicable.

HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE BROAD MARKET **INDEX?**

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: BNY Mellon US Municipal Infrastructure Debt Fund

Legal entity identifier: 213800RGF16LW6526386

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852. establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Sub-Fund were met to the following extent during the reference period 1st January 2024 to 31st December 2024 (the "Reference Period").

The Sub-Fund promoted a minimum environmental and/or social standard that sought to mitigate or avoid practices that the Investment Manager deemed environmentally and/or socially detrimental. Exclusion criteria - as set out in the Sub-Fund's supplement - were used to achieve this minimum standard. For example, as referenced in the pre-contractual disclosure, issuers that derived a certain percentage of revenue as (determined by the Investment Manager) from tobacco production, controversial weapons production and thermal coal mining and/or thermal coal power generation are excluded. Issuers will also be excluded where, in the opinion of the Investment Manager, the issuers are deemed to have violated the minimum standards of business practices represented in widely accepted global conventions;

The Sub-Fund did not invest in SFDR Sustainable Investments.

HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The following sustainability indicator was used to measure how the environmental and/or social characteristics promoted by the Sub-Fund were attained:

A minimum environmental and/or social standard that mitigated or avoided practices that the Investment Manager deems environmentally and/or socially detrimental.

A exclusion criteria was used to achieve this minimum standard. For example, issuers that derived a certain percentage of revenue as determined by the Investment Manager from tobacco production, controversial weapons production and thermal coal mining and/or thermal coal power generation

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

were excluded. Issuers were excluded where, in the opinion of the Investment Manager, the issuers were deemed to have violated the minimum standards of business practices represented in widely accepted global conventions;

Positive environmental and/or social investments by aiming to:

have higher exposures to bonds where the proceeds were exclusively applied to finance or refinance in part or in full projects with positive environmental ("green") and/or social impacts, but did not meet the definition of SFDR Sustainable Investments as assessed by the Investment Manager (hereafter "Use of Proceeds Bonds"); versus the Blended Benchmark; and

Targeted a carbon intensity level below the level of the Blended Benchmark.

A reference benchmark had not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund

Exclusion Policy: An assessment of whether the Sub-Fund had successfully and consistently executed its exclusion policy, to not invest in securities issued by corporate entities that met any of the below:

- Derived more than 5% of their revenue from the production of tobacco
- Derived more than 5% of their revenue from unconventional oil and gas extraction unless:
 - the exposure is achieved via a Use of Proceeds Bonds; and/or
 - the Investment Manager believes the issuer has a robust, clearly defined, long-term plan to address its environmental impact
- Are involved in the production of controversial weapons;
- Derived more than 5% of their revenue from thermal coal mining and/or more than 10% of revenue (or equivalent revenue) from thermal coal power generation, unless:
 - the exposure was achieved via a Use of Proceeds Bonds; and/or
 - the issuer had a clearly defined plan to exit thermal coal mining and/or generation before (i) 2030 in the case of developed market domiciled issuers or (ii) 2040 in the case of emerging market domiciled issuers
- Derived more than 5% of their revenue from gambling
- Were deemed to be involved in severe environmental, social or governance controversies (including significant violations of UN Global Compact Principles)

The sustainability indicator performed as follows:

No investment was made in securities which:

- Derived more than 5% of their revenue from the production of tobacco
- Derived more than 5% of their revenue from unconventional oil and gas extraction unless:
 - the exposure is achieved via a Use of Proceeds Bonds; and/or
 - the Investment Manager believes the issuer has a robust, clearly defined, long-term plan to address its environmental impact
- Are involved in the production of controversial weapons;
- Derived more than 5% of their revenue from thermal coal mining and/or more than 10% of revenue (or equivalent revenue) from thermal coal power generation, unless:
 - the exposure was achieved via a Use of Proceeds Bonds; and/or
 - the issuer had a clearly defined plan to exit thermal coal mining and/or generation before (i) 2030 in the case of developed market domiciled issuers or (ii) 2040 in the case of emerging market domiciled issuers
- Derived more than 5% of their revenue from gambling
- Were deemed to be involved in severe environmental, social or governance controversies (including significant violations of UN Global Compact Principles)

As at the 31st December 2024 the Sub-Fund's investments were 98.4%* aligned with the environmental and social criteria promoted. The remaining 1.6% was held in cash and derivatives for hedging purposes and therefore not aligned with environmental and social criteria promoted.

*This percentage figure is provided as at 31st December 2024 only and does not necessarily reflect the position as at other points during the Reference Period.

...AND COMPARED TO PREVIOUS PERIODS?

| Period | UN SDGs | Exclusion policy |
|---------------------------------------|---|---|
| 1 January 2023 to 31 December 2023 | the Sub-Fund's investments were 99.5%* aligned with the environmental and social criteria promoted. The remaining 0.5% was held in cash and derivatives for hedging purposes and therefore not aligned with environmental and social criteria promoted. | The Fund successfully and consistently met its exclusion policy as outlined in the then applicable supplement and the annex to the Fund's supplement. |
| 1 January 2024 to 31 December 2024 | the Sub-Fund's investments were 98.4%* aligned with the environmental and social criteria promoted. The remaining 1.6% was held in cash and derivatives for hedging purposes and therefore not aligned with environmental and social criteria promoted. | The Fund successfully and consistently met its exclusion policy as outlined in the then applicable supplement and the annex to the Fund's supplement. |

WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

Not applicable. The Sub-Fund did not make - in accordance with the SFDR pre-contractual disclosure - any investments during the Reference Period which were considered by the Investment Manager to qualify as sustainable investments pursuant to SFDR.

HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

Not applicable.

HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS **TAKEN INTO ACCOUNT?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

> WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND **HUMAN RIGHTS?**

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

the Sub-Fund considered the following PAIs from Table 1 of Annex I of the Commission Delegated Regulation:

- 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).
- 16. Investee countries subject to social violations

The PAIs were measured against certain defined thresholds which then will have triggered an additional qualitative review by the Investment Manager to determine if they had been breached. Following this process, if a PAI was considered to have been breached the Investment Manager excluded the relevant issuer from the Sub-Fund or took a synthetic short exposure to the issuer.

Reporting on consideration of PAIs is available in an annex to the annual report of the Sub-Fund.

Where the Sub-Fund invested in a broad market index, PAIs were not considered as the Investment Manager did not look-through to the underlying constituents of these indices.

Please see PAI Data Availability for further information on the PAI data sources and limitations.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31st December 2024

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

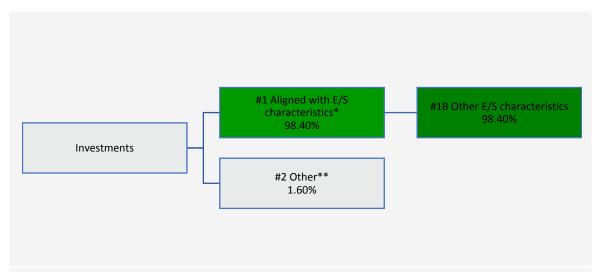

WHAT WAS THE ASSET ALLOCATION?

The Sub-Fund promoted environmental or social characteristics during the Reference Period using an exclusionary approach.

Please note that the percentage figures provided in the diagram below reflect percentages out of the Net Asset Value of the Fund as at the end of Reference Period.

The figure in #1 below represents the proportion of the portfolio that has excluded certain types of investments as detailed in the binding elements of the investment strategy outlined in the supplement and therefore such proportion of the portfolio was aligned with the environmental or social characteristics promoted by the Sub-Fund through the absence of those investments.

The percentages in this section as outlined in the diagram below are provided as at ("End of Reference Period") and do not necessarily reflect the position as at other points during the Reference Period (which may be materially higher or lower).

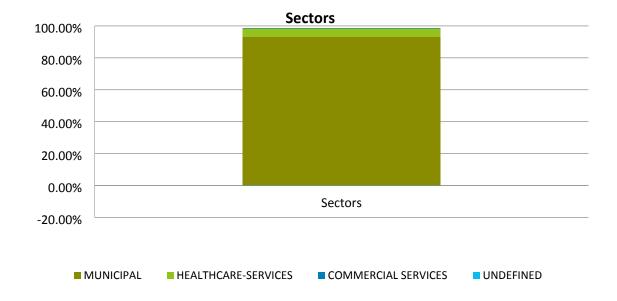

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?

As at 31st December 2024, the Sub-Fund had mostly been exposed to the Municipal and Health Services as illustrated below.

The above figures are provided as at 31st December 2024 only and do not necessarily reflect the position as at other points during the Reference Period.

^{*} The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider alignment with some of the E/S characteristics.

^{** #2} Other contains investments that do not align with E/S characteristics promoted by the fund i.e., cash and derivatives (FDI) for hedging. For further detail please see the question below "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?".

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY 1?

| | Yes: | |
|--------------|-------------------------|--------------------|
| | \square In fossil gas | ☐ In nuclear energ |
| \checkmark | No | |

Taxonomy-aligned activities are expressed as a share of:

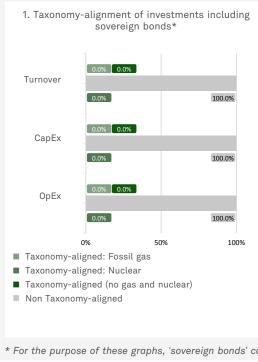

and waste management rules.

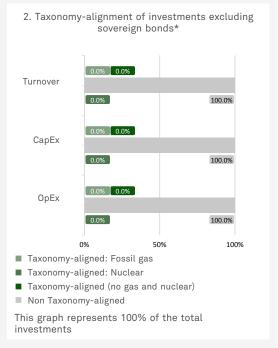

To comply with the EU Taxonomy, the

criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND **ENABLING ACTIVITIES?**

Transitional activities: 0.00% Enabling activities: 0.00%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

emission levels corresponding to the best performance.

HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?

| Period | Taxonomy data |
|--------------------|-----------------------|
| 24 November 2023 – | Turnover/Revenue – 0% |
| 31st December 2023 | CapEx – 0% |
| | OpEx - 0% |
| 1st January 2024 - | Turnover/Revenue – 0% |
| 31st December 2024 | CapEx - 0% |
| | OpEx - 0% |

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Other" were:

- Liquid and near-cash assets including cash held or used for ancillary liquidity purposes
- Derivatives (FDI) that were specifically used for hedging purposes.

No minimum environment or social safeguards were considered for these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken to meet the environmental and/or social characteristics during the reference period are:

- The Investment Manager employed exclusion criteria as outlined in the Sub-Fund's supplement.
- The Investment Manager ensured the exclusion criteria was met by excluding certain issuers as outlined in the supplement (and above). This was monitored by coding the binding elements (exclusions) into trading systems.
- The Investment Manager also employed the following internal control mechanisms to monitor adherence to the coded binding elements of the Sub-Fund during the Reference Period:
- Pre-trade warnings appeared in the trade system prior to trading to inform portfolio managers of a prohibition or limit.
- 2. Post-trade warnings were also reviewed by the monitoring team and escalated as appropriate.

Oversight of internal exclusions lists used to ensure certain binding elements were met, was provided by the Ratings and Exclusions Group ("REG"), a governance group within the Investment Manager.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics

that they promote.

- HOW DOES THE REFERENCE BENCHMARK DIFFER FROM A BROAD MARKET INDEX? Not applicable.
- HOW DID THIS FINANCIAL PRODUCT PERFORM WITH REGARD TO THE SUSTAINABILITY INDICATORS TO DETERMINE THE ALIGNMENT OF THE REFERENCE BENCHMARK WITH THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED?

Not applicable.

HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE REFERENCE **BENCHMARK?**

Not applicable.

HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE BROAD MARKET **INDEX?**

Not applicable.

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Responsible Horizons EM Debt Impact Fund Legal entity identifier: 213800RV5KK3ZK331996

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objective of this Sub-Fund is to aim to achieve positive environmental and/or social impacts while generating a total return comprised of income and capital growth by investing in emerging market debt and debt related securities and related FDI.

The sustainable investment objective of the Sub-Fund was met to the following extent during the reference period from 1 January 2024 to 31 December 2024 (the "Reference Period"), by investing in Use of Proceeds Impact Bonds and Impact Issuers which were considered by the Investment Manager to qualify as sustainable investments pursuant to SFDR ("SFDR Sustainable Investments"):

- In the case of each such Use of Proceeds Impact Bond in which the Sub-Fund was invested, the proceeds raised were aimed to be exclusively applied to finance or re-finance in part or in full projects with positive environmental and/or social impacts that demonstrated a clear alignment, by contributing to varying extents, to the following UN Sustainable Development Goals ("UN SDGs") (which, for the purposes of this section, are also considered by the Investment Manager to equate to environmental objectives):
- Affordable and clean energy
- Industry, innovation and infrastructure
- Sustainable cities and communities
- Responsible consumption and production
- Climate action
- Life below water
- Life on land
- Partnerships to achieve the goal

These SFDR Sustainable Investments also contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to social objectives):

- No poverty
- Zero hunger
- Good health and wellbeing
- Quality education
- Gender equality
- Clean water and sanitation
- Decent work and economic growth
- Reduced inequalities
- Each such Impact Issuer in which the Sub-Fund was invested demonstrated that at least 50% of their revenue streams were linked to positive environmental and/or social activities which contributed to the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to environmental objectives):
- Responsible consumption and production
- Sustainable cities and communities
- Industry, Innovation & Infrastructure

These SFDR Sustainable Investments also contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to social objectives):

- Affordable and Clean Energy
- Decent work and economic growth
- Good Health & Wellbeing

The Sub-Fund did not invest in Improving Issuers (as described in the SFDR Annex III) during the Reference Period. The SFDR Sustainable Investments may, in some cases have, contributed to some of the environmental objectives as set out in Article 9 of the Taxonomy Regulation. However, this was not explicitly considered by the Investment Manager in their assessment of the investment.

Please note that the Sub-Fund has a sustainable investment objective. There is no commitment or minimum allocation to sustainable investments with environmental objectives aligned with the EU Taxonomy, however this Annex contains certain information in relation to EU Taxonomy alignment of relevant sustainable investments with environmental objectives held by the Sub-Fund as at 31 December 2024.

As such, information in relation to EU Taxonomy alignment is provided as at the above date and does not reflect the position as at other points during the Reference Period (which may be materially different).

HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The following sustainability indicators were used to measure how the sustainable investment objective of the Sub-Fund was attained:

- 1) The Sub-Fund successfully and consistently invested a minimum of 80% of its Net Asset Value during the Reference Period in Use of Proceeds Impact Bonds and Impact Issuers, each of which were considered to be SFDR Sustainable Investments (as determined by the Investment Manager). By way of illustration, as at the Sub-Fund's year end of 31 December 2024, 85% of the Sub-Fund's Net Asset Value in aggregate was invested in such Use of Proceeds Impact Bonds and Impact Issuers. This percentage figure is provided as at 31 December 2024 only and the percentage so invested has varied during the Reference Period (while remaining above the minimum set out in SFDR Annex III at all times during the Reference Period).
- 2) The Impact Issuers and Use of Proceeds Impact Bonds invested in by the Sub-Fund successfully and consistently met the following thresholds as assessed by the Investment Manager:

(a) each such Impact Issuer in which the Sub-Fund was invested demonstrated that at least 50% of their revenue streams were aligned to help realise one or more of the 17 UN Sustainable Development Goals ("UN SDGs") or at least 50% of their economic activities were compliant with the EU Taxonomy Regulation,

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

(b) in the case of each such Use of Proceeds Impact Bond in which the Sub-Fund was invested, the proceeds raised were aimed to be exclusively applied to finance or re-finance in part or in full projects that demonstrated a clear alignment to helping realise one or more of the 17 UN SDGs and/ or were defined as "environmentally sustainable economic activities" by the EU Taxonomy Regulation.

No derivatives (FDI) were used during the Reference Period to attain the sustainable investment objective of the Sub-Fund.

...AND COMPARED TO PREVIOUS PERIODS?

| Period | SFDR SI |
|------------------------------------|--|
| 1 January 2023 to 31 December 2023 | The Sub-Fund successfully and consistently invested a minimum of 80% of its Net Asset Value during the Reference Period in Use of Proceeds Impact Bonds and Impact Issuers, each of which were considered to be SFDR Sustainable Investments (as determined by the Investment Manager). By way of illustration, as at the Sub-Fund's year end of 31 December 2023, 92% of the Sub-Fund's Net Asset Value in aggregate was invested in such Use of Proceeds Impact Bonds and Impact Issuers. This percentage figure is provided as at 31 December 2023 only and the percentage so invested has varied during the Reference Period (while remaining above the minimum set out in SFDR Annex III at all times during the Reference Period). |
| 1 January 2024 to 31 December 2024 | The Sub-Fund successfully and consistently invested a minimum of 80% of its Net Asset Value during the Reference Period in Use of Proceeds Impact Bonds and Impact Issuers, each of which were considered to be SFDR Sustainable Investments (as determined by the Investment Manager). By way of illustration, as at the Sub-Fund's year end of 31 December 2024, 85% of the Sub-Fund's Net Asset Value in aggregate was invested in such Use of Proceeds Impact Bonds and Impact Issuers. This percentage figure is provided as at 31 December 2024 only and the percentage so invested has varied during the Reference Period (while remaining above the minimum set out in SFDR Annex III at all times during the Reference Period). |

HOW DID THE SUSTAINABLE INVESTMENTS NOT CAUSE SIGNIFICANT HARM TO ANY SUSTAINABLE INVESTMENT OBJECTIVE?

During the Reference Period, the Sub-Fund's investments determined by the Investment Manager to be SFDR Sustainable Investments did not cause significant harm to any environmental or social sustainable investment objective as they were not in breach of the PAIs thresholds set by the Investment Manager.

HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS **TAKEN INTO ACCOUNT?**

During the Reference Period, the indicators for adverse impacts in Table 1 of Annex 1 and any relevant indicators in Tables 2 and 3 of that Annex were taken into account as follows in respect of the Sub-Fund's SFDR Sustainable Investments:

- Table 1 of Annex I of the Commission Delegated Regulation:
- 1. GHG Emissions: Scope 1, 2 and 3
- 2. Carbon Footprint: Scope 1, 2 and 3
- 3. GHG Intensity of Investee Companies: Scope 1, 2 and 3
- 4. Exposure to companies active in the fossil fuel sector
- 5. Share of non-renewable energy consumption and production
- 6. Energy consumption intensity per high impact climate sector: NACE A, B, C, D, E, F, G, H and L
- 7. Activities negatively affecting biodiversity-sensitive areas
- 8. Emissions to water
- 9. Hazardous waste and radioactive waste ratio
- 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 12. Unadjusted gender pay gap

Principal adverse impacts are the most

decisions on

relating to

and employee matters, respect for

significant negative impacts of investment

sustainability factors

environmental, social

human rights, anticorruption and anti-

bribery matters.

- 13. Board gender diversity
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).

During the Reference Period, the Sub-Fund took into account the above PAIs, in the following manner in respect of its SFDR Sustainable Investments:

- PAI thresholds were set by the Investment Manager at an issuer and/or Sub-Fund level where applicable in relation to instrument held by the Sub-Fund. The PAI thresholds were only applied to the Sub-Fund's corporate and sovereign holdings.
- The Investment Manager measured the performance of the issuer and/or the Sub-Fund, as applicable, against the PAI thresholds which may then have triggered an additional qualitative review where appropriate to determine crossing of PAI thresholds at the time of investment and on an ongoing basis during the above period using data obtained from the Investment Manager's designated third-part data provider.

There were no breaches of such PAI thresholds set by the Investment Manager.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider principal adverse impacts on sustainability factors. The availability and quality of such data impacted the extent to which each such PAI could be considered. In particular, the lack or incomplete reporting of metrics by some issuers meant that there was limited data on some adverse indicators. As such for some of the mandatory PAIs, data coverage was low. The Investment Manager's analysis of adverse indicators relied on this thirdparty information and data, and where such information was not available or was incomplete, the Investment Manager's analysis of adverse indicators was necessarily limited. As the data availability improves over time, it is expected that PAIs can be applied to a greater portion of the Investment Manager's investable universe. This will allow for enhanced insight into the adverse impacts caused by issuers.

WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND **HUMAN RIGHTS?**

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights (the "Responsible Business Practices") collectively cover a broad range of areas of responsible business, including labour rights, consumer protection and support for internationally recognised human rights within a company's or issuer's sphere of influence.

The Sub-Fund's investments determined by the Investment Manager to be SFDR Sustainable Investments pursuant to SFDR were considered aligned with the Responsible Business Practices as each issuer passed a broad controversy screen provided by a third party which either directly covered one or more of the Responsible Business Practices or was considered by the Investment Manager an appropriate proxy for one or more of the Responsible Business Practices. The Investment Manager was dependant on the information and data available to such third party in order to complete the broad controversy screen. It should be noted that the availability and quality of data may have impacted the screening process.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered PAIs as part of its DNSH analysis on SFDR Sustainable Investments as described in response to the above question "How were the indicators for adverse impacts on sustainability factors taken into account?".

The Sub-Fund also considered the following PAIs:

- Table 2 of Annex I of the Commission Delegated Regulation:
- Investments in companies without carbon emission reduction initiatives
- Table 3 of Annex I of the Commission Delegated Regulation:
- 16. Lack of anti-corruption and anti-bribery policies.

There were no breaches of the PAI thresholds set by the Investment Manager.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2024 to 31 December 2024

| Largest investments | Sector | % of assets | Country |
|---------------------------|--------------------------|-------------|---------|

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

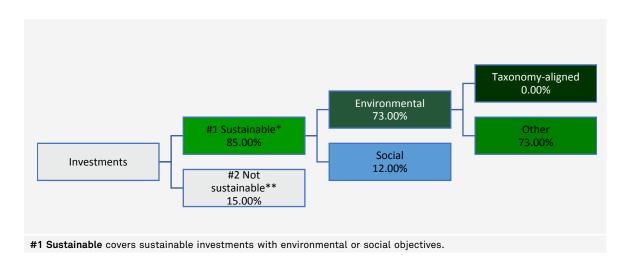

WHAT WAS THE ASSET ALLOCATION?

The Sub-Fund had a sustainable investment objective and committed to investing a minimum of 80% of NAV in aggregate in SFDR Sustainable Investments with an environmental and/or social objective.

Please note that the percentage figures provided in the diagram below reflect percentages out of the Net Asset Value of the Fund as at the end of Reference Period.

By way of illustration, as at 31 December 2024, 85% of the Sub-Fund's Net Asset Value in aggregate was invested in SFDR Sustainable Investments with an environmental and/or social objective, thus exceeding the minimum outlined in the Sub-Fund's supplement. The allocation to SFDR Sustainable Investments is referenced in #1.

It should be noted that the percentages in this section as outlined in the diagram below are provided as at 31 December 2024 and do not necessarily reflect the position as at other points during the Reference Period (which may be materially higher or lower).

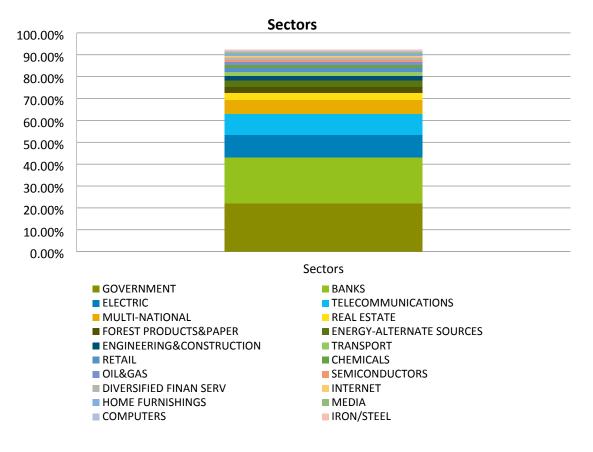

#2 Not sustainable includes investments which do not qualify as sustainable investments.

* As at 31 December 2024, 30% of the SFDR Sustainable Investments made by the Sub-Fund contributed to both an environmental and social objective. However, it is the Investment Manager's understanding that for each SFDR Sustainable Investment, SFDR requires consideration of one single environmental or social objective. Therefore, where any SFDR Sustainable Investment held by the Sub-Fund contributed to both an environmental and social objective, such SFDR Sustainable Investment has been included under "Environmental" in the diagram above.

** #2 Not Sustainable contains investments that are not categorised as SFDR Sustainable Investments i.e., cash, derivatives (FDI) for hedging and collective investment schemes (CIS) for liquidity purposes. For further detail please see the question below "What investments were included under "Not Sustainable", what was their purpose and were there any minimum environmental or social

IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?

As at 31 December 2024, the Sub-Fund had mostly been exposed to Banks and the Government sectors, as well as the Telecommunications and Electric sectors, as illustrated below.

The above figures are provided as at 31 December 2024 only and do not necessarily reflect the position as at other points during the Reference Period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not commit to making investments aligned with the EU Taxonomy, and, out of Sub-Fund's allocation to SFDR Sustainable Investments, 0% of the SFDR Sustainable investments with an environmental objective aligned with the EU Taxonomy as at the 31 December 2024.

The EU Taxonomy aligned investments contributed to the at least one of the following objectives as set out in Article 9 of Regulation (EU) 2020/852:

- Climate change mitigation.
- 2. Climate change adaptation.

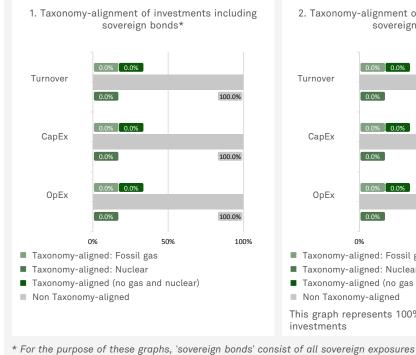

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

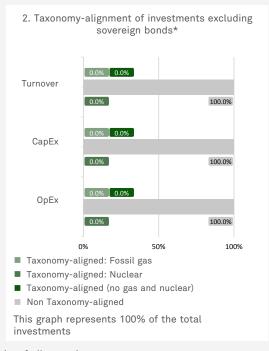

All figures and disclosures in relation to EU Taxonomy alignment in this Annex reflect the Sub-Fund's positions as at the end of the Reference Period using the most recent data available from relevant third party data providers as at 2nd January 2025.

DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY 1?

| ☐ Yes: | |
|-----------------|---------------------|
| ☐ In fossil gas | ☐ In nuclear energy |
| ☑ No | |

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

To comply with the EU Taxonomy, the

criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety

and waste management rules.

activities are

of:

WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND **ENABLING ACTIVITIES?**

Transitional activities: 0.00% Enabling activities: 0.00%

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Transitional activities are activities for which low-carbon alternatives are not vet available and among others have greenhouse gas emission levels corresponding to the best performance.

HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?

| Period | Taxonomy |
|----------------------|-----------------------|
| 1 January 2023 to 31 | Turnover/Revenue – 2% |
| December 2023 | CapEx - 0% |
| | OpEx - 0% |
| 1 January 2024 to 31 | Turnover/Revenue – 0% |
| December 2024 | CapEx - 0% |
| | OpEx - 0% |

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

100% of SFDR Sustainable Investments with an environmental objective were not aligned with the EU Taxonomy as at 31 December 2024.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

All figures and disclosures in relation to EU Taxonomy alignment in this Annex reflect the Sub-Fund's positions as at the end of the Reference Period using the most recent data available from relevant third party data providers as at 2nd January 2025.

What was the share of socially sustainable investments?

While the Sub-Fund does not commit to investing a minimum percentage of its Net Asset Value in socially sustainable investments, the Sub-Fund invested 12%* of its Net Asset Value in SFDR Sustainable Investments with a social objective as at 31 December 2024.

*This percentage figure is provided as at 31 December 2024 only and does not necessarily reflect the position as at other points during the Reference Period.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Not Sustainable" were:

- Liquid and near-cash assets including cash held for ancillary liquidity purposes.
- Collective Investment Schemes (CIS) that were used for liquidity purposes.
- Derivatives (FDI) used for hedging purposes.
- SFDR Sustainable Investments in breach of DNSH which are in the process of being sold.No minimum environment or social safeguards were considered for these investments.

Their proportion and use do not affect the delivery of the sustainable investment objective on a continuous basis because under normal circumstances they were a maximum of 20% of Net Asset Value.

investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What actions have been taken to attain the sustainable investment objective during the reference period?

The actions taken to attain the sustainable investment objective during the Reference Period were as follows:

To achieve positive environmental and/or social impacts while generating a total return comprised of income and capital growth by investing in a broad range of Euro-denominated debt and debt related securities and related FDI, the Sub-Fund invested in Impact Issuers and Use of Proceeds Impact Bonds

- a) in the case of each such Use of Proceeds Impact Bond in which the Sub-Fund was invested, the proceeds raised were applied to finance or re-finance in part or in full projects that demonstrated a clear alignment to help realise one or more of the 17 UN SDGs;
- b) each such Impact Issuer in which the Sub-Fund was invested demonstrated that at least (...)% of their revenue streams were aligned to help realise one or more of the 17 UN SDGs.

Each applicable security was assessed according to the Investment Manager's assessment framework, which ascertained the level of contribution to the UN SDGs. Two frameworks were deployed for this assessment:

- a) Use of Proceeds Impact Bonds: The Investment Manager employed an assessment framework that generally considered the following three components: issuer profile; framework of bond issuance and reporting and transparency;
- b) Impact Issuers: The Investment Manager assessed issuers using external and/or internal data to determine the revenue alignment of such issuer's products and services with the UN SDGs. Where no external data was available, an assessment was conducted by the Investment Manager's ESG analysts and ratings approved by the Investment Manager's 'Impact Committee'.

The SFDR Sustainable Investments in the Sub-Fund were monitored by the Investment Manager throughout the Reference Period by coding binding elements into trading systems.

The following internal control mechanisms were used by the Investment Manager for such monitoring during the Reference Period:

- Pre-trade warnings appeared in the trade system prior to trading to inform portfolio managers of a prohibition or limit.
- Post-trade warnings were also reviewed by the monitoring team and escalated as appropriate.
- Oversight of the relevance of criteria used to meet the sustainable investment objective of the Sub-Fund was provided by the Responsible Investment Group ("RIG"), a governance group within the Investment Manager which has overall oversight of ensuring effective implementation of ESG due diligence at asset class level and for defining adherence criteria for the Investment Manager's 'Responsible Horizons' strategies.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

- Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective
- HOW DID THE REFERENCE BENCHMARK DIFFER FROM A BROAD MARKET INDEX? Not applicable.
- HOW DID THIS FINANCIAL PRODUCT PERFORM WITH REGARD TO THE SUSTAINABILITY INDICATORS TO DETERMINE THE ALIGNMENT OF THE REFERENCE BENCHMARK WITH THE SUSTAINABLE INVESTMENT OBJECTIVE?

Not applicable.

HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE REFERENCE **BENCHMARK?**

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Responsible Horizons Euro Corporate Bond Fund Legal entity identifier: 2138009IC4PGITKRBI83

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Sub-Fund were met to the following extent during the reference period 1 January 2024 to 31 December 2024 (the "Reference Period").

- The Sub-Fund promoted a minimum environmental and/or social standard that sought to mitigate or avoid practices that the Investment Manager deemed environmentally and/or socially detrimental. Exclusion criteria - as set out in the Sub-Fund's then applicable supplement - were used to achieve this minimum standard. For example, as referenced in the pre-contractual disclosure, issuers that derived a certain percentage of revenue as (determined by the Investment Manager) from tobacco, defence, gambling, coal extraction and controversial weapons production were excluded. Issuers were also excluded where, in the opinion of the Investment Manager, such issuers were deemed to have violated the minimum standards of business practices represented in widely accepted global conventions:
- The Sub-Fund focused on higher scoring issuers in terms of their ESG profile by not investing in any securities with the lowest ESG rating (being a score of 5), as determined by the Investment Manager. By way of illustration, as at the Sub-Fund's year-end date of 31 December 2024, 55% of the portfolio's Net Asset Value in aggregate was invested in issuers with a rating of 1 and 2. The remainder was invested in issuers with an ESG rating of 3 or 4, or in assets which did not have an ESG rating (being any liquid and near-cash assets, including cash, and derivatives (FDI) that were specifically used for hedging purposes). Please see the next question for information on the Sub-Fund's asset-weighted overall ESG rating measured as against the Bloomberg Barclays Euro Aggregate Corporate Total Return Index; and

Carbon Reduction: The Sub-Fund focused on:

- Investing a minimum of 75% of its allocation to corporate debt issuers that are, in the opinion of the Investment Manager, at least committed to achieving the Net Zero Target;

- Increasing the allocation year on year and by the end of by the end of 2030 the Sub-Fund aims to invest at least 85% of its allocation to corporate debts issuers that are at least committed to achieving the Net Zero Target. While the Sub-Fund's allocation to corporate debt issuers may vary over time, the Sub-Fund focused on investing at least 51% of its Net Asset Value in fixed or floating investment grade corporate debt:
- Achieving a carbon intensity level, as defined and calculated by the Investment Manager that is at least 30% lower than the level of the Benchmark as at the end of 2020 (the "Base Year Carbon Intensity");
- The Investment Manager aims to decrease the carbon intensity level of the Sub-Fund year on year and by the end of 2030 the Sub-Fund aims to achieve a carbon intensity level that is 40% lower than the Base Year Carbon Intensity.

Additionally, the Sub-Fund made investments in Use of Proceeds Impact Bonds and Impact Issuers, which were considered by the Investment Manager to qualify as SFDR Sustainable Investments (as determined by the Investment Manager) ("SFDR Sustainable Investments" *) and which in the opinion of the Investment Manager, contributed positively to the attainment of the UN Sustainable Development Goals ("UN SDGs"). The Sub-Fund had 35% of its Net Asset Value in aggregate as at 31 December 2024 invested in Use of Proceeds Impact Bonds and Impact Issuers, each of which are considered to qualify as SFDR Sustainable Investments.

The Investment Manager considers that the Sub-Fund's SFDR Sustainable Investments contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to environmental objectives):

- Affordable and clean energy,
- Industry innovation and infrastructure,
- Sustainable cities and communities,
- Responsible consumption and production,
- Climate action,
- Life below water,
- Life on land,
- Partnerships to achieve the Goal.

The SFDR Sustainable Investments may, in some cases have contributed to some of the environmental objectives as set out in Article 9 of the Taxonomy Regulation. However, this was not explicitly considered by the Investment Manager in their assessment of the investment.

Please note that the Sub-Fund promotes environmental and/or social characteristics and does not have sustainable investment as its investment objective. There is no commitment or minimum allocation to sustainable investments with environmental objectives aligned with the EU Taxonomy Regulation, however this Annex contains certain information in relation to EU Taxonomy alignment of relevant sustainable investments with environmental objectives held by the Sub-Fund as at 31 December 2024.

As such, information in relation to EU Taxonomy alignment is provided as at the above date and does not reflect the position as at other points during the Reference Period (which may be materially different).

The Investment Manager considers that the Sub-Fund's SFDR Sustainable Investments contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to social objectives):

- No poverty,
- Zero hunger,
- Good health & wellbeing,
- Quality education,
- Gender equality,
- Clean water and sanitation,
- Decent work and economic growth,
- Reduced inequalities.
- Peace and justice strong institutions

A reference benchmark was not designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The following sustainability indicators were used to measure how the environmental or social characteristics promoted by the Sub-Fund were attained:

- The Sub-Fund successfully and consistently invested a minimum of 35% of its Net Asset Value during the Reference Period in Use of Proceeds Impact Bonds and Impact Issuers, each of which were considered to be "SFDR Sustainable Investments" (as determined by the Investment Manager). By way of illustration, as at the Sub-Fund's year end of 31 December 2024, 35% of the Sub-Fund's Net Asset Value in aggregate was invested in such Use of Proceeds Impact Bonds and Impact Issuers. This percentage figure is provided as at 31 December 2024 only and the percentage so invested has varied during the Reference Period (while remaining above the minimum at all times during the Reference Period).
- 2) The Impact Issuers and Use of Proceeds Impact Bonds invested in by the Sub-Fund successfully and consistently met the following thresholds as assessed by the Investment Manager:
- (a) each such Impact Issuer in which the Sub-Fund was invested demonstrated that at least 20% of their revenue streams were aligned to help realise one or more of the 17 UN Sustainable Development Goals ("UN SDGs"),
- (b) in the case of each such Use of Proceeds Impact Bonds in which the Sub-Fund was invested, the proceeds raised were aimed to be exclusively applied to finance or re-finance in part or in full projects that demonstrated a clear alignment to helping realise one or more of the 17 UN SDGs.
- ESG Rating: The Sub-Fund's asset-weighted overall ESG rating, as determined by the Investment Manager, has not been weaker than the asset-weighted overall ESG rating of the Bloomberg Barclays Euro Aggregate Corporate Total Return Index (the "Benchmark") at any point during the Reference Period. By way of illustration, as at the Sub-Fund's year end set out above, the Sub-Fund's asset-weighted overall ESG rating was 2.2 against the Benchmark score of 2.4 (where 1=best, 5=worst).
- Carbon Reduction: The Sub-Fund's has successfully:
- Invested a minimum of 85% of its allocation to corporate debt issuers that are, in the opinion of the Investment Manager, at least committed to achieving the Net Zero Target;
- Increased the allocation year on year and by the end of by the end of 2030 the Sub-Fund aims to invest at least 51% of its allocation to corporate debts issuers that are at least committed to achieving the Net Zero Target. While the Sub-Fund's allocation to corporate debt issuers may vary over time, the Sub-Fund invested at least 94% of its Net Asset Value in fixed or floating investment grade corporate debt;
- Achieved a carbon intensity level, as defined and calculated by the Investment Manager that is at least 30% lower than the level of the Benchmark as at the end of 2020 (the "Base Year Carbon
- The Investment Manager will aim to decrease the carbon intensity level of the Sub-Fund year on year and by the end of 2030 the Sub-Fund aims to achieve a carbon intensity level that is 40% lower than the Base Year Carbon Intensity.
- Exclusion policy: The Sub-Fund has successfully and consistently met its exclusion policy as outlined in the Sub-Fund's supplement and the annex to the Sub-Fund's supplement.

No derivatives (FDI) were used during the Reference Period to meet the environmental or social characteristics of the Sub-Fund.

...AND COMPARED TO PREVIOUS PERIODS?

UN SDGs

1st January 2022 - 31 December 2022:

The Fund successfully and consistently invested a minimum of 10% of its Net Asset Value in Sustainable Investments, with 31% of the Net Asset Value being invested in Sustainable Investments as at the Fund's year end of 31 December 2022.

1st January 2023 to 31 December 2023:

The Fund successfully and consistently invested a minimum of 10% of its Net Asset Value in Sustainable Investments, with 37% of the Net Asset Value being invested in Sustainable Investments as at the Fund's year end of 31 December 2023.

1st January 2024 to 31 December 2024

The Sub-Fund successfully and consistently invested a minimum of 35% of its Net Asset Value during the Reference Period in Use of Proceeds Impact Bonds and Impact Issuers, each of which were considered to be "SFDR Sustainable Investments" (as determined by the Investment Manager). By way of illustration, as at the Sub-Fund's year end of 31 December 2024, 35% of the Sub-Fund's Net Asset Value in aggregate was invested in such Use of Proceeds Impact Bonds and Impact Issuers. This percentage figure is provided as at 31 December 2024

ESG Rating

1st January 2022 - 31 December 2022:

The Fund's asset-weighted overall ESG rating was not weaker than the asset-weighted overall rating of the Bloomberg Barclays Euro Aggregate Corporate Total Return Index at any point during the Reference Period.

The Fund's asset-weighted overall ESG rating was 1.8 against the Benchmark score of 1.9.

1st January 2023 to 31 December 2023:

The Fund's asset-weighted overall ESG rating was not weaker than the asset-weighted overall rating of the Bloomberg Barclays Euro Aggregate Corporate Total Return Index at any point during the Reference Period.

The Fund's asset-weighted overall ESG rating was 2.2 against the Benchmark score of 2.3.

1st January 2024 - 31 December 2024:

the Sub-Fund's asset-weighted overall ESG rating was 2.2 against the Benchmark score of 2.4

Carbon Intensity/reduction

1st January 2022 - 31 December 2022:

The Fund's asset weighted average carbon intensity has successfully and consistently been at least 25% lower than the asset weighted average carbon intensity of the Bloomberg Barclays Euro Aggregate Corporate Total Return Index

1st January 2023 to 31 December 2023:

The Fund's asset weighted average carbon intensity has successfully and consistently been at least 25% lower than the asset weighted average carbon intensity of the Bloomberg Barclays Euro Aggregate Corporate Total Return Index

1st January 2024 - 31 December 2024:

Invested a minimum of 85% of its allocation to corporate debt issuers that are, in the opinion of the Investment Manager, at least committed to achieving the Net Zero Target

Exclusion policy

1st January 2022 - 31 December 2022:

The Fund successfully and consistently met its exclusion policy as outlined in the then applicable supplement and the annex to the Fund's supplement.

1st January 2023 to 31 December 2023:

The Fund successfully and consistently met its exclusion policy as outlined in the then applicable supplement and the annex to the Fund's supplement.

1st January 2024 - 31 December 2024:

The Sub-Fund has successfully and consistently met its exclusion policy as outlined in the Sub-Fund's supplement and the annex to the Sub-Fund's supplement.

 WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

The objective of the SFDR Sustainable Investments the Sub-Fund partially made was to achieve positive environmental and/or social impacts.

The Sub-Fund's SFDR Sustainable Investments contributed to environmental or social objectives by investing in:

Use of Proceeds Impact Bonds: The proceeds were applied to finance or re-finance in part or in full projects with positive environmental and/or social impacts using the UN SDGs as a guide to environmental targets These SFDR Sustainable Investments contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to environmental objectives):

- Affordable and clean energy
- Industry innovation and infrastructure
- Sustainable cities and communities
- Responsible consumption and production
- Climate action
- Life below water
- Life on land
- Partnerships to achieve the goal

These SFDR Sustainable Investments also contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to social objectives):

- No poverty
- Zero hunger
- Good health & wellbeing
- Quality education
- Gender equality
- Clean water and sanitation
- Decent work and economic growth
- Reduced inequalities
- Peace and justice strong institutions

Debt securities issued by Impact Issuers: At least 20% of these investments revenue streams were linked to positive environmental and/or social impacts using the UN SDGs as a guide to environmental targets. These SFDR Sustainable Investments contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to environmental objectives):

- Affordable and clean energy
- Industry innovation and infrastructure
- Sustainable cities and communities
- Responsible consumption and production
- Climate action

These SFDR Sustainable Investments also contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to social objectives):

- No poverty
- Good health & wellbeing
- Gender equality
- Clean water and sanitation
- Decent work and economic growth
- Reduced inequalities
- Peace and justice strong institutions

The SFDR Sustainable Investments may, in some cases have contributed to the environmental objectives as set out in Article 9 of the EU Taxonomy Regulation. However, this was not explicitly considered by the Investment Manager in their assessment of the investments.

HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

During the Reference Period, the Sub-Fund's investments determined by the Investment Manager to be SFDR Sustainable Investments did not cause significant harm to any environmental or social sustainable investments objective as they were not in breach of the PAIs thresholds set by the Investment Manager.

HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS TAKEN INTO ACCOUNT?

During the Reference Period, the indicators for adverse impacts in Table 1 of Annex 1 and any relevant indicators in Tables 2 and 3 of that Annex were taken into account as follows in respect of the Sub-Fund SFDR Sustainable Investments:

The Sub-Fund took into account the following PAIs from:

- Table 1 of Annex I of the Commission Delegated Regulation:
- 1. GHG Emissions: Scope 1, 2 and 3
- 2. Carbon Footprint: Scope 1, 2 and 3
- 3. GHG Intensity of Investee Companies: Scope 1, 2 and 3
- 4. Exposure to companies active in the fossil fuel sector
- 5. Share of non-renewable energy consumption and production
- 6. Energy consumption intensity per high impact climate sector: NACE A, B, C, D, E, F, G, H and L
- Activities negatively affecting biodiversity-sensitive areas
- 8. Emissions to water
- 9. Hazardous waste and radioactive waste ratio
- 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 12. Unadjusted gender pay gap
- 13. Board gender diversity
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).

During the Reference Period, the Sub-Fund took into account the above PAIs, in the following manner and solely in respect of its SFDR Sustainable Investments:

- PAI thresholds were set by the Investment Manager at an issuer and/or Sub-Fund level where applicable in relation to the instrument held by the Sub-Fund. The PAI thresholds were only applied to the Sub-Fund's corporate and sovereign holdings.
- The Investment Manager measured the performance of the issuer and/or the Sub-Fund, as applicable, against the PAI thresholds which may then have triggered an additional qualitative review where appropriate to determine crossing of PAI thresholds at the time of investment and on an ongoing basis during the above period using data obtained from the Investment Manager's designated third-part data provider.

There were no breaches of such PAI thresholds set by the Investment Manager.

The Investment Manager was dependent upon information and data from third party data providers to be able to consider principal adverse impacts on sustainability factors. Data coverage was previously low and incomplete for some of the mandatory PAIs which impacted the Investment Manager's analysis of adverse indicators. Data quality and completeness has improved over time with the Investment Manager utilising a data provider which has greater coverage. It's expected that PAIs can be applied to a greater portion of the Investment Manager's investable universe, allowing enhanced insight into the adverse impacts caused by issuers.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND **HUMAN RIGHTS?**

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights (the "Responsible Business Practices") collectively cover a broad range of areas of responsible business, including labour rights, consumer protection and support for internationally recognised human rights within a company's or issuer's sphere of influence.

The Sub-Fund's investments determined by the Investment Manager to be SFDR Sustainable Investments were considered aligned with the Responsible Business Practices as each issuer passed a broad controversy screen provided by a third party which either directly covered one or more of the Responsible Business Practices or was considered an appropriate proxy for one or more of the Responsible Business Practices. The Investment Manager was dependant on the information and data available to such third party in order to complete the broad controversy screen. It should be noted, that the availability and quality of data may have impacted the screening process.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the above mentioned PAIs to the extent practicable as described in the response to the above question "How were the indicators for adverse impact on sustainability factors taken into account?" Plus the additional following PAIs:

- Table 2 of Annex I of the Commission Delegated Regulation:
- 4. Investments in companies without carbon emission reduction initiatives
- Table 3 of Annex I of the Commission Delegated Regulation:
- 16. Cases of insufficient action taken to address breaches of standards of anti-corruption and antibribery.

PAI thresholds were set by the Investment Manager at an issuer and/or Sub-Fund level where applicable to the instrument held. The PAI thresholds were only applied to the Sub-Fund's corporate and sovereign holdings which were considered by the Investment Manager to be SFDR Sustainable Investments.

The Investment Manager measured the performance of the issuer and/or the Sub-Fund, as applicable, against these thresholds which may then have triggered an additional qualitative review where appropriate to determine crossing of PAI thresholds at the time of investment and on an ongoing basis during the above period using data obtained from the Investment Manager's designated third-part data provider.

There were no breaches of such PAI thresholds set by the Investment Manager.

The Investment Manager was dependent upon information and data from third party data providers to be able to consider principal adverse impacts on sustainability factors. Data coverage was previously low and incomplete for some of the mandatory PAIs which impacted the Investment Manager's analysis of adverse indicators. Data quality and completeness has improved over time with the Investment Manager utilising a data provider which has greater coverage. It's expected that PAIs can be applied to a greater portion of the Investment Manager's investable universe, allowing enhanced insight into the adverse impacts caused by issuers.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2024 to 31 December 2024

| Largest investments | Sector | % of assets | Country |
|---------------------------|--------------------|-------------|---------|
| ILF-EUR LIQUIDITY-2 | EQUITY | 3.31% | IRE |

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

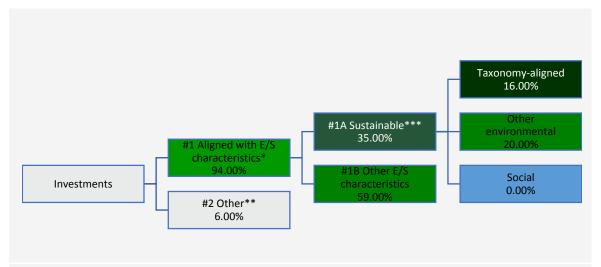

WHAT WAS THE ASSET ALLOCATION?

The Sub-Fund promoted environmental or social characteristics during the Reference Period using an exclusionary approach and allocations to certain SFDR Sustainable Investments, higher scoring issuers and lower carbon intensity issuers.

Please note that the percentage figures provided in the diagram below reflect percentages out of the Net Asset Value of the Fund as at the end of Reference Period.

The figure in #1 represents a combination of both approaches. The allocation to SFDR Sustainable Investments is referenced in #1A. The figure in #1B below represents the proportion of the portfolio that is not considered by the Investment Manager to be SFDR Sustainable Investments but has excluded certain types of investments as detailed in the binding elements of the investment strategy outlined in the supplement and therefore such proportion of the portfolio was aligned with the environmental or social characteristics promoted by the Sub-Fund through the absence of those investments.

It should be noted that the percentages in this section as outlined in the diagram below are provided as at 31 December 2024 and do not necessarily reflect the position as at other points during the Reference Period (which may be materially higher or lower).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

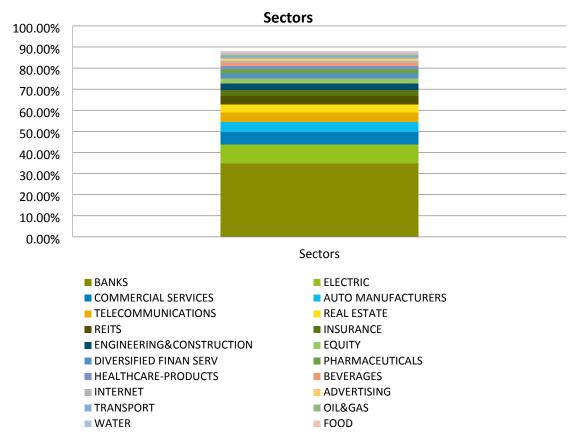

** #2 Other contains investments that do not align with E/S characteristics promoted by the fund i.e., cash, derivatives (FDI) for hedging and collective investment schemes (CIS) for liquidity purposes. For further detail please see the question below "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?".

*** As at 31 December 2024, 5% of the NAV made by the Sub-Fund contributed to both an environmental and social objective. However, it is the Investment Manager's understanding that for each SFDR Sustainable Investment, SFDR requires consideration of one single environmental or social objective. Therefore, where any SFDR Sustainable Investment held by the Sub-Fund contributed to both an environmental and social objective, such SFDR Sustainable Investment has been included under "Environmental" in the diagram above.

IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?

As at 31 December 2024, the Sub-Fund had mostly been exposed to Banks and the Electric sectors, as well as the Commercial Services sectors, as illustrated below.

^{*} The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider alignment with some of the E/S characteristics. In particular, the lack or incomplete reporting of metrics by some investments meant that there was only limited data on such investments. As such, for some of the Sub-Fund's investments, data coverage (such as for carbon footprint) was very low and in the absence of relevant data, such investments were assumed by the Investment Manager to be aligned with E/S characteristics.

The above figures are provided as at 31 December 2024 only and do not necessarily reflect the position as at other points during the Reference Period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not commit to making investments aligned with the EU Taxonomy. However, out of Sub-Fund's allocation to SFDR Sustainable Investments, 45% of the Sustainable Investments with an environmental objective aligned with the EU Taxonomy as at the 31 December 2024.

The taxonomy aligned investments contributed to the at least one or both of the following objectives as set out in Article 9 of Regulation (Eu) 2020/852:

- 1. Climate change mitigation.
- 2. Climate change adaptation.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. The availability, accuracy and quality of data impacted the extent to which such alignment could be considered. In particular, the insufficient reporting of information including in relation to some investee companies to which the Sub-Fund had exposure meant that there was limited data to evidence EU Taxonomy alignment or that there was no sufficient data to complete certain sections of this Annex. The Investment Manager's analysis of EU Taxonomy alignment relied on third-party information and data, and where such information was not available or was incomplete, the Investment Manager's analysis of alignment was necessarily limited.

All figures and disclosures in relation to EU Taxonomy alignment in this Annex reflect the Sub-Fund's positions as at the end of the Reference Period using the most recent data available from relevant third party data providers as at 2nd January 2025.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on

emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

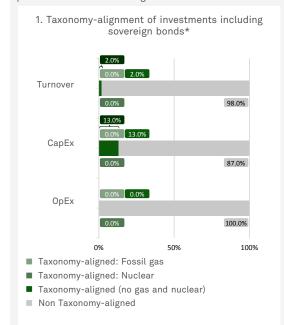

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

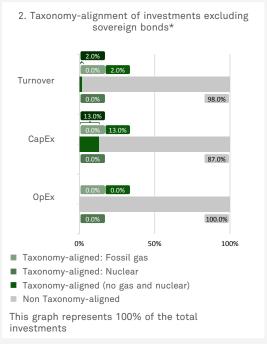

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY 1?

☐ In fossil gas ☐ In nuclear energy ✓ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND **ENABLING ACTIVITIES?**

Transitional activities: 0.00% Enabling activities: 0.00%

HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?

| Period | Taxonomy |
|--------------------|-----------------------|
| 1st January 2023 - | Turnover/Revenue – 1% |
| 31st December 2023 | CapEx – 10% |
| | OpEx – 0% |
| 1st January 2023 - | Turnover/Revenue – 2% |
| 31st December 2023 | CapEx – 13% |
| | OpEx – 0% |

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

investments with an environmental objective

that do not take into

sustainable economic activities under

Regulation (EU) 2020/

account the criteria for

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

55% of the of sustainable Investments with an environmental objective were not aligned with the EU Taxonomy as at 31 December 2024.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. The availability, accuracy and quality of data impacted the extent to which such alignment could be considered. In particular, the insufficient reporting of information including in relation to some investee companies to which the Sub-Fund had exposure meant that there was limited data to evidence EU Taxonomy alignment or that there was no sufficient data to complete certain sections of this Annex. The Investment Manager's analysis of EU Taxonomy alignment relied on third-party information and data, and where such information was not available or was incomplete, the Investment Manager's analysis of alignment was necessarily limited.

All figures and disclosures in relation to EU Taxonomy alignment in this Annex reflect the Sub-Fund's positions as at the end of the Reference Period using the most recent data available from relevant third party data providers as at at 2nd January 2025.

What was the share of socially sustainable investments?

While the Sub-Fund does not commit to investing a minimum percentage of its Net Asset Value in socially sustainable investments, the Sub-Fund invested 0%* of its Net Asset Value in SFDR Sustainable Investments with a social objective, as at 31 December 2024.

*This percentage figure is provided as at 31 December 2024 only and does not necessarily reflect the position as at other points during the Reference Period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Other" were:

- Liquid and near-cash assets including cash held or used for ancillary liquidity purposes.
- Collective Investment Schemes (CIS) that were specifically used for liquidity purposes.
- Derivatives (FDI) that were specifically used for hedging purposes.

No minimum environment or social safeguards were considered for these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken to meet the environmental and/or social characteristics during the Reference Period are:

- The Investment Manager:
- a) Invested in Use of Proceeds Impact Bonds and Impact Issuers, each of which were considered to be "SFDR Sustainable Investments" (as determined by the Investment Manager).
- b) Ensured the Sub-Fund's asset-weighted overall ESG rating, as determined by the Investment Manager, was not weaker than the asset-weighted overall ESG rating of the Bloomberg Barclays Euro Aggregate Corporate Total Return Index (the "Benchmark") at any point during the Reference Period.
- c) Ensured the Sub-Fund's asset weighted average carbon intensity was at least 25% lower than the asset weighted average carbon intensity of the Benchmark during the Reference Period
- d) Employed an exclusion policy as outlined in the Sub-Fund's supplement and the annex to the Sub-Fund's supplement.

These binding elements of the Sub-Fund were coded into the trading systems and used to monitor the environmental and social characteristics promoted during the reference period.

The following internal control mechanisms were used by the Investment Manager for such monitoring during the Reference Period:

Pre-trade warnings appeared in the trade system prior to trading to inform portfolio managers of a prohibition or limit.

Post-trade warnings were also reviewed by the monitoring team and escalated as appropriate.

Oversight of the relevance of criteria used to meet characteristics promoted was provided by the Responsible Investment Group, a governance group within the Investment Manager which has overall oversight of ensuring effective implementation of ESG due diligence at asset class level and for defining adherence criteria for the Investment Managers 'Responsible Horizons' strategies. Oversight of internal exclusions lists used to ensure certain binding criteria were met, was provided by the Ratings and Exclusions Group ("REG"), a governance group within the Investment Manager.

During the Reference Period, no engagement with the issuers in which the Sub-Fund has invested was required or undertaken as a consequence of there being no breaches of any of the binding elements outlined in Sub-Fund's supplement.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

- HOW DOES THE REFERENCE BENCHMARK DIFFER FROM A BROAD MARKET INDEX? Not applicable.
- HOW DID THIS FINANCIAL PRODUCT PERFORM WITH REGARD TO THE SUSTAINABILITY INDICATORS TO DETERMINE THE ALIGNMENT OF THE REFERENCE BENCHMARK WITH THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED?

Not applicable.

HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE REFERENCE **BENCHMARK?**

Not applicable.

HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE BROAD MARKET INDEX?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Responsible Horizons Euro Impact Bond Fund Legal entity identifier: 2138006IFGV5VY0FVZ45

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objective of this Sub-Fund is to aim to achieve positive environmental and/or social impacts while generating a total return comprised of income and capital growth by investing in a broad range of Euro-denominated debt and debt related securities and related FDI.

The sustainable investment objective of the Sub-Fund was met to the following extent during the reference period from 1 January 2024 to 31 December 2024 (the "Reference Period"), by investing in Use of Proceeds Impact Bonds and Impact Issuers which were considered by the Investment Manager to qualify as sustainable investments pursuant to SFDR ("SFDR Sustainable Investments"):

- In the case of each such Use of Proceeds Impact Bond in which the Sub-Fund was invested, the proceeds raised were aimed to be exclusively applied to finance or re-finance in part or in full projects with positive environmental and/or social impacts that demonstrated a clear alignment, by contributing to varying extents, to the following UN Sustainable Development Goals ("UN SDGs") (which, for the purposes of this section, are also considered by the Investment Manager to equate to environmental objectives):
- Affordable and clean energy
- Industry, innovation and infrastructure
- Sustainable cities and communities
- Responsible consumption and production
- Climate action
- Life below water
- Life on land

These SFDR Sustainable Investments also contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to social objectives):

- No poverty
- Zero hunger
- Good health and wellbeing
- Quality education
- Gender equality
- Clean water and sanitation
- Decent work and economic growth
- Reduced inequalities
- Peace and justice strong institutions
- Improving Issuers demonstrated that their core investment plans (affecting at least 50% of

their revenue streams, capital expenditure and/or operating expenditure including non capitalised costs that represent research and development) were compliant with the EU Taxonomy Regulation, and

- Each such Impact Issuer in which the Sub-Fund was invested demonstrated that at least 50% of their revenue streams were linked to positive environmental and/or social activities which contributed to the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to environmental objectives):
- Responsible consumption and production
- Sustainable cities and communities
- Industry, Innovation & Infrastructure

These SFDR Sustainable Investments also contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to social objectives):

- Affordable and Clean Energy
- Decent work and economic growth
- Good Health & Wellbeing

The Sub-Fund did not invest in Improving Issuers (as described in the SFDR Annex III) during the Reference Period.

The SFDR Sustainable Investments may, in some cases have, contributed to some of the environmental objectives as set out in Article 9 of the Taxonomy Regulation. However, this was not explicitly considered by the Investment Manager in their assessment of the investment.

Please note that the Sub-Fund has a sustainable investment objective. There is no commitment or minimum allocation to sustainable investments with environmental objectives aligned with the EU Taxonomy, however this Annex contains certain information in relation to EU Taxonomy alignment of relevant sustainable investments with environmental objectives held by the Sub-Fund as at 31 December 2024

As such, information in relation to EU Taxonomy alignment is provided as at the above date and does not reflect the position as at other points during the Reference Period (which may be materially different).

HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The following sustainability indicators were used to measure how the sustainable investment objective of the Sub-Fund was attained:

The Sub-Fund successfully and consistently invested a minimum of 90% of its Net Asset Value during the Reference Period in Use of Proceeds Impact Bonds and Impact Issuers, each of which were considered to be SFDR Sustainable Investments (as determined by the Investment Manager). By way of illustration, as at the Sub-Fund's year end of 31 December 2024, 99% of the Sub-Fund's Net Asset Value in aggregate was invested in such Use of Proceeds Impact Bonds and Impact Issuers. This percentage figure is provided as at 31 December 2024 only and the percentage so invested has varied during the Reference Period (while remaining above the minimum set out in SFDR Annex III at all times during the Reference Period).

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

- 2) The Impact Issuers and Use of Proceeds Impact Bonds invested in by the Sub-Fund successfully and consistently met the following thresholds as assessed by the Investment Manager:
- (a) Such Impact Issuers demonstrated that at least 50% of their revenue streams were aligned to help realising one or more of the 17 UN SDGs or at least 50% of their economic activities were compliant with the EU Taxonomy Regulation.
- (b) such Improving Issuers demonstrated that their core investment plans (affecting at least 50% of their revenue streams, capital expenditure and/or operating expenditure including non capitalised costs that represent research and development) are compliant with the EU Taxonomy Regulation,
- (c) In the case of Use of Proceeds Impact Bonds, the proceeds raised were aimed to be exclusively applied to finance or re-finance in part or in full projects that demonstrated a clear alignment to helping realise one or more of the 17 UN SDGs and/or are defined as "environmentally sustainable economic activities" by the EU Taxonomy Regulation.

No derivatives (FDI) were used during the Reference Period to attain the sustainable investment objective of the Sub-Fund.

...AND COMPARED TO PREVIOUS PERIODS?

| Period | Sustainable Investments | Impact Issuers/Bonds |
|-------------------------------------|--|---|
| 10 January 2022 to 31 December 2022 | The Sub-Fund successfully and consistently invested a minimum of 90% of its Net Asset Value during the Reference Period in Use of Proceeds Impact Bonds and Impact Issuers, each of which were considered to be SFDR Sustainable Investments (as determined by the Investment Manager). By way of illustration, as at the Sub-Fund's year end of 31 December 2022, 93% of the Sub-Fund's Net Asset Value in aggregate was invested in such Use of Proceeds Impact Bonds and Impact Issuers. This percentage figure is provided as at 31 December 2022 only and the percentage so invested has varied during the Reference Period (while remaining above the minimum set out in SFDR Annex III at all times during the Reference Period). | The Impact Issuers and Use of Proceeds Impact Bonds invested in by the Sub-Fund successfully and consistently met the following thresholds as assessed by the Investment Manager: (a) Each such Impact Issuer in which the Sub-Fund was invested demonstrated that at least 50% of their revenue streams were aligned to help realise one or more of the 17 UN Sustainable Development Goals ("UN SDGs"); (b) In the case of each such Use of Proceeds Impact Bond in which the Sub-Fund was invested, the proceeds raised were aimed to be exclusively applied to finance or re-finance in part or in full projects that demonstrated a clear alignment to helping realise one or more of the 17 UN SDGs. |
| 1 January 2023 to 31 December 2023 | The Sub-Fund successfully and consistently invested a minimum of 90% of its Net Asset Value during the Reference Period in Use of Proceeds Impact Bonds and Impact Issuers, each of which were considered to be SFDR Sustainable Investments (as determined by the Investment Manager). By way of illustration, as at the Sub-Fund's year end of 31 December 2023, 99% of the Sub-Fund's Net Asset Value in aggregate was invested in such Use of Proceeds Impact Bonds and Impact Issuers. This percentage figure is provided as at 31 December 2023 only and the percentage so invested has varied during the Reference Period (while remaining above the minimum set out in SFDR Annex III at all times during the Reference Period. | The Impact Issuers and Use of Proceeds Impact Bonds invested in by the Sub-Fund successfully and consistently met the following thresholds as assessed by the Investment Manager: (a) Such Impact Issuers demonstrated that at least 50% of their revenue streams were aligned to help realising one or more of the 17 UN SDGs or at least 50% of their economic activities were compliant with the EU Taxonomy Regulation (b) In the case of Use of Proceeds Impact Bonds, the proceeds raised were aimed to be exclusively applied to finance or re-finance in part or in full projects that demonstrated a clear alignment to helping realise one or more of the 17 UN SDGs and/or are defined as "environmentally sustainable economic activities" by the EU Taxonomy Regulation. |

| Period | Sustainable Investments | Impact Issuers/Bonds |
|------------------------------------|--|---|
| 1 January 2024 to 31 December 2024 | The Sub-Fund successfully and consistently invested a minimum of 90% of its Net Asset Value during the Reference Period in Use of Proceeds Impact Bonds and Impact Issuers, each of which were considered to be SFDR Sustainable Investments (as determined by the Investment Manager). By way of illustration, as at the Sub-Fund's year end of 31 December 2024, 99% of the Sub-Fund's Net Asset Value in aggregate was invested in such Use of Proceeds Impact Bonds and Impact Issuers. This percentage figure is provided as at 31 December 2024 only and the percentage so invested has varied during the Reference Period (while remaining above the minimum set out in SFDR Annex III at all times during the Reference Period). | The Impact Issuers and Use of Proceeds Impact Bonds invested in by the Sub-Fund successfully and consistently met the following thresholds as assessed by the Investment Manager: (a) Such Impact Issuers demonstrated that at least 50% of their revenue streams were aligned to help realising one or more of the 17 UN SDGs or at least 50% of their economic activities were compliant with the EU Taxonomy Regulation. (b) such Improving Issuers demonstrated that their core investment plans (affecting at least 50% of their revenue streams, capital expenditure and/or operating expenditure including non capitalised costs that represent research and development) are compliant with the EU Taxonomy Regulation, and (c) In the case of Use of Proceeds Impact Bonds, the proceeds raised were aimed to be exclusively applied to finance or re-finance in part or in full projects that demonstrated a clear alignment to helping realise one or more of the 17 UN SDGs and/or are defined as "environmentally sustainable economic activities" by the EU Taxonomy Regulation. |

HOW DID THE SUSTAINABLE INVESTMENTS NOT CAUSE SIGNIFICANT HARM TO ANY SUSTAINABLE INVESTMENT OBJECTIVE?

During the Reference Period, the Sub-Fund's investments determined by the Investment Manager to be SFDR Sustainable Investments did not cause significant harm to any environmental or social sustainable investment objective as they were not in breach of the PAIs thresholds set by the Investment Manager.

HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS **TAKEN INTO ACCOUNT?**

During the Reference Period, the indicators for adverse impacts in Table 1 of Annex 1 and any relevant indicators in Tables 2 and 3 of that Annex were taken into account as follows in respect of the Sub-Fund's SFDR Sustainable Investments:

- Table 1 of Annex I of the Commission Delegated Regulation:
- 1. GHG Emissions: Scope 1, 2 and 3
- 2. Carbon Footprint: Scope 1, 2 and 3
- 3. GHG Intensity of Investee Companies: Scope 1, 2 and 3
- 4. Exposure to companies active in the fossil fuel sector
- 5. Share of non-renewable energy consumption and production
- 6. Energy consumption intensity per high impact climate sector: NACE A, B, C, D, E, F, G, H and L
- 7. Activities negatively affecting biodiversity-sensitive areas
- 8. Emissions to water
- 9. Hazardous waste and radioactive waste ratio
- 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 12. Unadjusted gender pay gap
- 13. Board gender diversity

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).

During the Reference Period, the Sub-Fund took into account the above PAIs, in the following manner in respect of its SFDR Sustainable Investments:

- PAI thresholds were set by the Investment Manager at an issuer and/or Sub-Fund level where applicable in relation to instrument held by the Sub-Fund. The PAI thresholds were only applied to the Sub-Fund's corporate and sovereign holdings.
- The Investment Manager measured the performance of the issuer and/or the Sub-Fund, as applicable, against the PAI thresholds which may then have triggered an additional qualitative review where appropriate to determine crossing of PAI thresholds at the time of investment and on an ongoing basis during the above period using data obtained from the Investment Manager's designated third-part data provider.

There were no breaches of such PAI thresholds set by the Investment Manager.

The Investment Manager was dependent upon information and data from third party data providers to be able to consider principal adverse impacts on sustainability factors. Data coverage was previously low and incomplete for some of the mandatory PAIs which impacted the Investment Manager's analysis of adverse indicators. Data quality and completeness has improved over time with the Investment Manager utilising a data provider which has greater coverage. It's expected that PAIs can be applied to a greater portion of the Investment Manager's investable universe, allowing enhanced insight into the adverse impacts caused by issuers.

WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND **HUMAN RIGHTS?**

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights (the "Responsible Business Practices") collectively cover a broad range of areas of responsible business, including labour rights, consumer protection and support for internationally recognised human rights within a company's or issuer's sphere of influence.

The Sub-Fund's investments determined by the Investment Manager to be SFDR Sustainable Investments pursuant to SFDR were considered aligned with the Responsible Business Practices as each issuer passed a broad controversy screen provided by a third party which either directly covered one or more of the Responsible Business Practices or was considered by the Investment Manager an appropriate proxy for one or more of the Responsible Business Practices. The Investment Manager was dependant on the information and data available to such third party in order to complete the broad controversy screen. It should be noted that the availability and quality of data may have impacted the screening process.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered PAIs as part of its DNSH analysis on SFDR Sustainable Investments as described in response to the above question "How were the indicators for adverse impacts on sustainability factors taken into account?".

The Sub-Fund also considered the following PAIs:

- Table 2 of Annex I of the Commission Delegated Regulation:
- 4. Investments in companies without carbon emission reduction initiatives.
- Table 3 of Annex I of the Commission Delegated Regulation:
- 16. Lack of anti-corruption and anti-bribery policies.

The PAIs are measured against defined thresholds which may have triggered an additional qualitative review by the Investment Manager to determine if they have been breached. Following this process, if a PAI is considered to have been breached the Investment Manager may of taken any of the following actions including (but not limited to):

The exclusion of the issuer from within the Sub-Fund;

A reduction in % allocation to the issuer within the Sub-Fund

Mitigation of the impact on a security and/or Sub-Fund; and/or

Engagement with the relevant issuer in an attempt to mitigate the impact at source. If data the

Investment Manager received indicates a PAI threshold has been crossed and the Investment Manager decided to engage, the relevant issuer has one year from the time the Investment Manager raised the issue with them to take reasonable steps to resolve it after which time the Investment Manager will make reasonable endeavours to remove the allocation to the relevant security;

No action, with justification. In such cases this particular issuer or holding will not be categorised as within the SFDR Sustainable Investment allocation.

Reporting on consideration of PAIs is available in an annex to the annual report of the Sub-Fund.

Where the Sub-Fund invested in a broad market index, PAIs were not considered as the Investment Manager did not look-through to the underlying constituents of these indices.

Please see 'PAI Data Availability' for further information on the PAI data sources and limitations.

There were no breaches of the PAI thresholds set by the Investment Manager.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2024 to 31 December 2024

| Largest investments | Sector | % of assets | Country |
|---------------------------|---------------------|-------------|---------|
| ILF-EUR LIQUIDITY-2 | EQUITY | 4.38% | IRE |

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

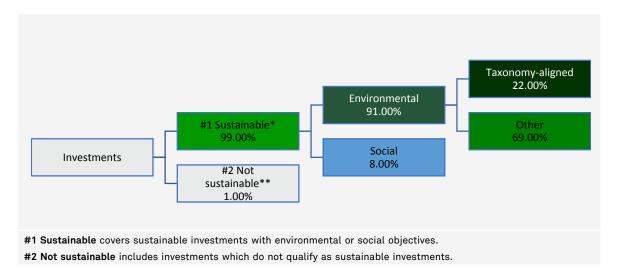

WHAT WAS THE ASSET ALLOCATION?

The Sub-Fund had a sustainable investment objective and committed to investing a minimum of 90% of Net Asset Value in aggregate in SFDR Sustainable Investments with an environmental and/or social objective.

Please note that the percentage figures provided in the diagram below reflect percentages out of the Net Asset Value of the Fund as at the end of Reference Period.

By way of illustration, as at 31 December 2024, 99% of the Sub-Fund's Net Asset Value in aggregate was invested in SFDR Sustainable Investments with an environmental and/or social objective, thus exceeding the minimum outlined in the Sub-Fund's supplement. The allocation to SFDR Sustainable Investments is referenced in #1.

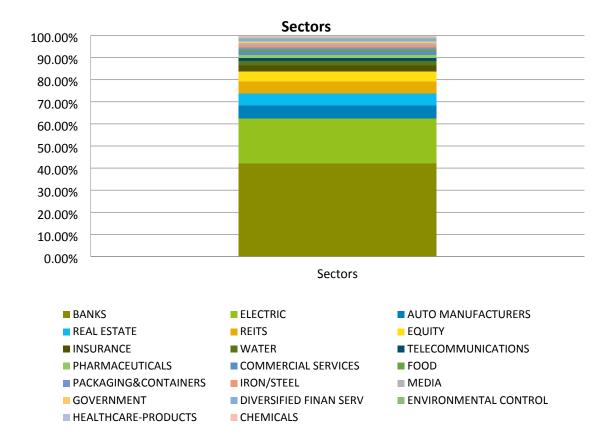

It should be noted that the percentages in this section as outlined in the diagram below are provided as at 31 December 2024 and do not necessarily reflect the position as at other points during the Reference Period (which may be materially higher or lower).

^{*} As at 31 December 2024, 51% of the SFDR Sustainable Investments made by the Sub-Fund contributed to both an environmental and social objective. However, it is the Investment Manager's understanding that for each SFDR Sustainable Investment, SFDR requires consideration of one single environmental or social objective. Therefore, where any SFDR Sustainable Investment held by the Sub-Fund contributed to both an environmental and social objective, such SFDR Sustainable Investment has been included under "Environmental" in the diagram above.

IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?

As at 31 December 2024, the Sub-Fund had mostly been exposed to the Banks and Electric sectors, as well as the REITS, Real Estate and the Water sectors, as illustrated below.

The above figures are provided as at 31 December 2024 only and do not necessarily reflect the position as at other points during the Reference Period.

^{** #2} Not sustainable contains investments that are not categorised as SFDR Sustainable Investments i.e., cash, derivatives (FDI) for hedging and collective investment schemes (CIS) for liquidity purposes. For further detail please see the question below "What investments were included under "Not Sustainable", what was their purpose and were there any minimum environmental or social safeguards?'.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not commit to making investments aligned with the EU Taxonomy, however, out of Sub-Fund's allocation to SFDR Sustainable Investments, 27% of the Sustainable investments with an environmental objective aligned with the EU Taxonomy as at the 31 December 2024.

The EU Taxonomy aligned investments contributed to the at least one of the following objectives as set out in Article 9 of Regulation (EU) 2020/852:

- 1. Climate change mitigation.
- 2. Climate change adaptation.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

All figures and disclosures in relation to EU Taxonomy alignment in this Annex reflect the Sub-Fund's positions as at the end of the Reference Period using the most recent data available from relevant third party data providers as at 2nd January 2025.

| DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY |
|--|
| RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY 1? |
| |

| ШΥ | es: | | |
|-----|-----------------|--------------|--------|
| | ☐ In fossil gas | ☐ In nuclear | energy |
| ✓ N | lo | | |

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

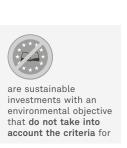

Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

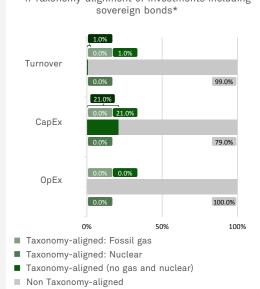

- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

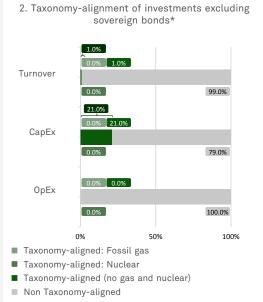

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds. 1. Taxonomy-alignment of investments including

This graph represents 100% of the total

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures
- WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND **ENABLING ACTIVITIES?**

Transitional activities: 0.00% Enabling activities: 0.00%

HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?

| Date | Taxonomy |
|--|------------------------|
| 10 January 2022 to 31 December 2022 | Turnover/revenue – N/A |
| | CapEx – N/A |
| | OpEx – N/A |
| 1 January 2023 to 31 | Turnover/revenue – 0% |
| December 2023 | CapEx – 25% |
| | OpEx – N/A |
| 1 January 2024 to 31 December 2024 | Turnover/revenue – 1% |
| | CapEx – 21% |
| | OpEx – N/A |

investments

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

73% of SFDR Sustainable Investments with an environmental objective were not aligned with the EU Taxonomy as at 31 December 2024.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment environmentally sustainable economic activities under the EU Taxonomy.

was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

All figures and disclosures in relation to EU Taxonomy alignment in this Annex reflect the Sub-Fund's positions as at the end of the Reference Period using the most recent data available from relevant third party data providers as at 2nd January 2025.

What was the share of socially sustainable investments?

While the Sub-Fund does not commit to investing a minimum percentage of its Net Asset Value in socially sustainable investments, the Sub-Fund invested 8%* of its Net Asset Value in SFDR Sustainable Investments with a social objective as at 31 December 2024.

*This percentage figure is provided as at 31 December 2024 only and does not necessarily reflect the position as at other points during the Reference Period.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Not Sustainable" were:

- Liquid and near-cash assets including cash held for ancillary liquidity purposes.
- Collective Investment Schemes (CIS) that were used for liquidity purposes.
- Derivatives (FDI) used for hedging purposes.
- SFDR Sustainable Investments in breach of DNSH which are in the process of being sold.

No minimum environment or social safeguards were considered for these investments.

Their proportion and use do not affect the delivery of the sustainable investment objective on a continuous basis because under normal circumstances they were a maximum of 10% of Net Asset Value.

What actions have been taken to attain the sustainable investment objective during the reference period?

The actions taken to attain the sustainable investment objective during the Reference Period were as

To achieve positive environmental and/or social impacts while generating a total return comprised of income and capital growth by investing in a broad range of Euro-denominated debt and debt related securities and related FDI, the Sub-Fund invested in Impact Issuers and Use of Proceeds Impact Bonds where:

- a) in the case of each such Use of Proceeds Impact Bond in which the Sub-Fund was invested, the proceeds raised were applied to finance or re-finance in part or in full projects that demonstrated a clear alignment to help realise one or more of the 17 UN SDGs.
- b) each such Impact Issuer in which the Sub-Fund was invested demonstrated that at least (...)% of their revenue streams were aligned to help realise one or more of the 17 UN SDGs.

Each applicable security was assessed according to the Investment Manager's assessment framework, which ascertained the level of contribution to the UN SDGs. Two frameworks were deployed for this assessment:

- a) Use of Proceeds Impact Bonds: The Investment Manager employed an assessment framework that generally considered the following three components: issuer profile; framework of bond issuance and reporting and transparency.
- b) Impact Issuers: The Investment Manager assessed issuers using external and/or internal data to determine the revenue alignment of such issuer's products and services with the UN SDGs. Where no external data was available, an assessment was conducted by the Investment Manager's ESG analysts and ratings approved by the Investment Manager's 'Impact Committee'.

The SFDR Sustainable Investments in the Sub-Fund were monitored by the Investment Manager throughout the Reference Period by coding binding elements into trading systems.

The following internal control mechanisms were used by the Investment Manager for such monitoring during the Reference Period:

- Pre-trade warnings appeared in the trade system prior to trading to inform portfolio managers of a prohibition or limit.
- Post-trade warnings were also reviewed by the monitoring team and escalated as appropriate.
- Oversight of the relevance of criteria used to meet the sustainable investment objective of the Sub-Fund was provided by the Responsible Investment Group ("RIG"), a governance group within the Investment Manager which has overall oversight of ensuring effective implementation of ESG due diligence at asset class level and for defining adherence criteria for the Investment Manager's 'Responsible Horizons' strategies.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

- HOW DID THE REFERENCE BENCHMARK DIFFER FROM A BROAD MARKET INDEX? Not applicable.
- HOW DID THIS FINANCIAL PRODUCT PERFORM WITH REGARD TO THE SUSTAINABILITY INDICATORS TO DETERMINE THE ALIGNMENT OF THE REFERENCE BENCHMARK WITH THE SUSTAINABLE INVESTMENT OBJECTIVE?

Not applicable.

HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE REFERENCE **BENCHMARK?**

Not applicable.

HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE BROAD MARKET INDEX?

Not applicable.
