

INVESTMENT OBJECTIVE

The Fund's investment objective is to achieve high growth with a reasonable level of income, while giving due consideration to capital security and the liquidity of the Fund's assets. Following the principle of risk diversification, the Subfund invests at least two-thirds of its assets in equities, other equity shares such as cooperative shares and participation certificates (equities and equity rights), short-term securities, dividend-right certificates and warrants issued by companies domiciled or chiefly active in China.

* Performance Fee: The performance fee is a variable commission that has some funds and is charged according to the profitability obtained by the fund.

GLOSSARY

Sharpe Ratio

The Sharpe ratio measures the return-risk ratio that indicates the excess return per unit of risk. It is calculated based on data from the last 36 months, and the excess return obtained by the fund (with respect to the risk-free asset) is divided by the standard deviation of such excess return. The higher the Sharpe ratio, the better the fund's performance during the period under review.

Volatility

Volatility is a measure of a fund's risk. It indicates whether the fund's historical net asset values have experienced significant fluctuations or whether, on the contrary, they have been stable over time. A highly volatile fund carries a greater risk as it is difficult to predict whether the net asset value will rise or fall. Consequently, at the time of redemption, the investment may result in significant gains or losses.

Correlation

A statistical ratio measuring the linear association between two variables (the fund and the index). Its value ranges from 1 to -1. A positive correlation indicates that the two variables are moving in the same direction, whereas a negative correlation indicates that they are moving in opposite directions. Indexed funds have a correlation of around 1 with respect to their benchmarks.

Beta

This measures the sensitivity of an investment fund's price to the movements of its benchmark. A beta of more than 1 indicates that the fund's historical performance has fluctuated more than its benchmark, and therefore entails a riskier portfolio than the market portfolio. Beta is an indicator of the systematic risk of overall market conditions, which cannot be diversified.

Alfa

Interception point of the regression line on the Y-axis. It describes the extra returns an investor will obtain for assuming a risk instead of accepting the market returns given by the benchmark. A high ALPHA is an indication of a good performance in comparison to the market. ALPHA is a reliable indicator when used in combination with a high R2.

Tracking Error (Tracking Error = T.E.)

The tracking error measures the standard deviation of relative returns, that is, the returns of the fund less the returns of the benchmark. The tracking error is often used as a measurement of the risk assumed versus the fund's benchmark; a higher tracking error means that to obtain the fund's returns, higher risks were taken in, with respect to of the benchmark.

Info Ratio

Statistical measure that shows the influence that a manager has had on the fund profitability compared with market behavior. This ratio measures the extra profitability of the fund as a result of the manager's ability in relation to the market, so it will be better the higher it is.

Max. Drawdown

Is the measure of the decline from a historical peak (high value) to a valley (low value).

OGC

OGC means "Ongoing Charges". OGC are the annual total expenses for a fund. Current expenses include the management fee, the depositary fee, the subscription fee and the redemption fee if applicable, the intermediation fee of the purchase operations, the audit expenses, the other expenses and, definitely, all charges that affect the fund.

DISCLAIMER

This document has been made only for information purposes, constitutes a "Summary" to explain in a clear, transparent and simple manner the main characteristics, evolution and risks of the product, which are described in the Key Investor Information Document or KIID and constitutes the only legal relationship between the client and the transmitter. In accordance with the General Code of Conduct established in Royal Decree 217/2008, the information provided does not constitute an offer or a request for an offer to buy or sell the financial product. Deutsche Bank is not responsible for making decisions based on this information.

Legal Notice: The returns are calculated on the date specified in the document in euros to allow easy comparison. The Fund's returns are shown as a growth percentage and are calculated by reinvesting the capital gains or dividends. The net asset value is shown in the currency of each Fund.

These tables show the historical returns of the fund. Past performance does not presuppose future returns. The value of investments can rise or fall and the Investors may not recover the amount initially invested. Variations in the exchange rates can also increase or decrease the value of the investment. If a product is denominated in a currency different to the investor's common currency, any fluctuation in the exchange rate may negatively affect the price or value of the financial product or the income derived from it; therefore, the investor assumes the exchange risk to its whole extend. As far as the law allows, Deutsche Bank, Sociedad Anónima Española does not accept liability for losses caused, directly or indirectly, by the use of the information contained in this document.
