DB Platinum Commodity Euro

Fund Inception Date: 17.05.2005

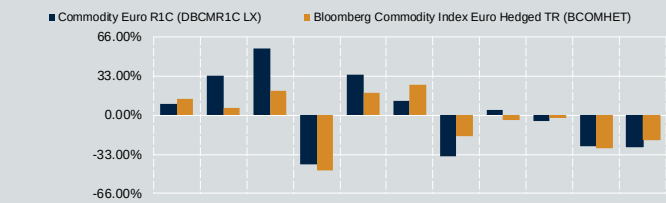

Fund Assets under Management: € 70,624,936

The DB Platinum Commodity Euro (the "Fund") is an open-ended fund which aims to provide investors with access to commodity returns via the db Commodity Euro Index (the "Index"). The Index offers diversified exposure to commodities and comprises of twelve of the most liquid commodities: Crude Oil, Natural Gas, Aluminium, Copper, Zinc, Nickel, Lead, Gold, Silver, Wheat, Soybean and Corn. The Index rebalances monthly and bases its allocation on a mean reversion algorithm. Commodities which are cheap compared to their long term mean will be over-weighted and commodities which are expensive compared to their long term mean will be under-weighted. The weights are capped at 18% with the exception of one commodity which will be capped at 32%. The Index employs the Deutsche Bank proprietary Optimum Yield technology at a single commodity level (with the exception of natural gas) with the view of optimizing roll returns. Interest payments of the Fund are within the scope of the EU Savings Directive.

Important Notice

Investments in funds involve numerous risks including, among others, general market risks, credit risks, foreign exchange risks, interest rate risks and liquidity risks

Key risk factors to consider before investing:

— The value of an investment in a Deutsche Bank fund may go down as well as up and can result in losses, up and including a total loss of the amount initially invested.

— Commodity prices react, among other things, to economic factors such as changing supply and demand relationships, weather conditions and other natural events, the agricultural, trade, fiscal, monetary and other policies of governments and other unforeseeable events all of which may affect your investment.

— The investor will bear the counterparty risk from the swap transaction with Deutsche Bank AG. The counterparty exposure is limited to 10% of the Fund NAV according to UCITS rules.
